NLRB General Counsel Jerry Hunter said the breakthrough came when the United Mine Workers of America agreed to expand a three-year-old civil contempt decree obtained by the NLRB to prohibit National Labor Relations Act violations, including picket line conduct.

That decree originally covered the states of Kentucky, West Virginia and Pennsylvania. The union agreed to expand the decree to the entire state of Virginia, Hunter said.

Expansion of the decree to cover future problems ''fully remedies the alleged violations and will permit the parties to resume their collective bargaining relationship in an environment free of litigation,'' Hunter said in announcing the agreement.

That move will result in the dismissal of numerous charges affecting both sides of the strike, assuming ratification of a tentative contract with the Pittston Co. and approval of the NLRB action in federal courts, said

Richard Trumka, UMWA president.

''We are pleased that the NLRB has agreed to cooperate with the union and the company in resolving this matter,'' Trumka said. ''With the conclusion of this agreement with the board, we are one step closer to rank-and-file ratification of the union's tentative contract with Pittston.''

Union officials have been saying since Jan. 1 - when a tentative contract with Pittston was announced - that settlement of the tangled issues before the NLRB was essential to bringing the contract to a vote among the 1,700 miners on strike.

Still at issue is $64 million in fines levied by Russell County, Va., Circuit Court Judge Donald McGlothlin Jr. against the union for a multitude of violent and non-violent violations of his court order barring activities designed to slow the movement of Pittston coal during the strike.

A hearing on a request by both sides to dissolve those fines has been delayed twice while the NLRB negotiations were going on, but McGlothlin was scheduled to rule on that motion Monday afternoon.

All parties who were have to benefited from those fines - the state, two Virginia counties and Pittston - have agreed to forgo the money.

''We are hopeful that our settlement with the NLRB will go a long way toward resolving Judge McGlothlin's concerns regarding disposition of the cases before him,'' said Robert Stropp, Jr., the UMWA's general counsel. ''With the court's cooperation, we will be able to remove a substantial impediment to the ratification of a labor agreement by our rank-and-file membership at Pittston.''

Union officials also have said trustees of national health and pension funds for miners must approve certain provisions of the proposed contract. There has been no word on whether that has happened.

When Pittston, Virginia's largest miner of coal, pulled out of bargaining for a national contract with the union through the Bituminous Coal Operators Association in 1988, the company also stopped contributing to the national funds. Those contributions became a major sticking point in the effort to end the strike.

Union miners in Virginia, West Virginia and Kentucky worked without a contract for 14 months before walking out on April 5, 1989, primarily over Pittston's demands for changes in benefits and work rules.

(FEB. 9) UPI - The government is reporting the largest jump in wholesale prices since the 1974 energy crisis. The Labor Department says wholesale prices in January surged one-point-eight percent... powered by a huge 13-point-six percent increase in oil and gas prices. The department says a two-point-one percent increase in food prices also contributed to last month's rise.

Homicide detectives in Santa Clarita, California, are looking into the death of rock and roll singer Del Shannon, who apparently shot himself last night at his home. Officials say Shannon's wife discovered the singer lying on the floor with what they believe was a self-inflicted gunshot wound to the head. A .22 caliber rifle was discovered on the floor next to him. Shannon had several hit songs in the 1960's, including ''Runaway.''

Soviet President Gorbachev says he'll give ''very serious consideration'' to U-S troop cut proposals in today's talks with U-S Secretary of State Baker. The two men were meeting in the Kremlin where they also planned to discuss reductions in strategic weapons. Baker reportedly made progress yesterday in his talks with the Soviet Union's foreign minister.

Rescue teams in East Germany wereN'T able to immediately go to the site of a huge explosion because of the intense heat of the flames. The East German news agency says at least three people were killed and 25 others injured in this morning's blast at a chemical plant near the southern town of Halle. One worker says after the blast, everything went black and the air was virtually burning.

#90040u1402 02/09/1990 ~United Press International
LOS ANGELES (FEB. 9) UPI - A drunken driving arraignment for the former fashion model who helped the FBI snare Washington, D.C., Mayor Marion Barry on crack cocaine charges was put off Friday at the urging of her lawyer.

The arraignment for Hazel Diane Moore, 38, who also uses the name Rasheeda Moore, was rescheduled for Mar. 2 by Van Nuys Municipal Court Commissioner Mitchell Block.

Moore, a native of Washington who lives in Burbank, was not present in court and remains free from custody on the charge. Because the charge against her is a misdemeanor, under California law, she is not required to attend her arraignment.

It was not known immediately why her attorney, Ronald Lewis, requested the postponement. He was not available for comment.

Moore was arrested in suburban North Hollywood on New Year's Day on suspicion of drunken driving. Police said they initially stopped her car at an intersection because Moore was driving without headlights. Officers then took her into custody for driving under the influence.

Moore, who carried no driver's license, was taken to the Van Nuys jail, but was later released without having to post bail.

A former fashion model, Moore has been featured on the cover of Essence magazine and is a long-time friend of the Washington mayor.

Law enforcement officials said she is the woman who lured Barry on Jan. 18 to the Vista International Hotel in Washington, where he was arrested on a misdemeanor charge of possessing crack cocaine.

Moore, working with FBI, allegedly telephoned Barry, persuaded him to visit her at the hotel and helped provide him with crack cocaine, officials said.

The FBI says it arrested Barry after secretly videotaping him smoking the crack.

#90040u1404 02/09/1990 ~United Press International
BEIRUT, LEBANON (FEB. 9) UPI - A fragile truce prevailed over east Beirut Friday but official sources said at least 430 people were killed and more than 1,500 wounded in the most recent battles between rival Christian forces.

Rescue workers said the death toll was higher than the official figures because many people were still missing and decaying bodies still littered the streets kept out of bounds by snipers.

In the hills of Dbayieh alone, the site of savage fighting 3 miles north of Beirut, 400 bodies of soldiers and militiamen and 200 others belonging to civilians were evacuated, they said.

Police said heavy guns and rocket-launchers were silent Friday but

sporadic clashes with machineguns and grenades were reported in some neighborhoods of east Beirut.

Three people were killed Friday and several others wounded by snipers in Ain Al Rummaneh neighborhood controlled by the Lebanese Forces militia, police said.

In a revised casualty toll, police and hospital source put the number of people killed at 430 and the wounded at 1,655 in the battles that erupted Jan. 31 between troops loyal to Gen. Michel Aoun and the Lebanese Forces militia of Samir Geagea for the control of the Christian enclave.

The official sources said a large number of wounded died in recent days as rescue workers were bringing more bodies to the hospitals morgues.

The undeclared truce was threatened by continuous verbal attacks that Aoun and Geagea were exchanging in the recent days over their own radio and television stations.

Aoun and Geagea did not react to a cease-fire agreement announced Thursday night by a mediation team headed by Vatican envoy Pablo Puente and the Christian Maronite church to establish a comprehensive cease-fire to end the rivalry.

The agreement guarantees political freedom for the militia in the Christian enclave and provides for a unified resistance of any external forces attempting to enter the enclave, a reference to any attempt by Syrian-backed President Elias Hrawi to storm the enclave.

Political sources said the undeclared truce was holding because the Vatican and France told Aoun that if his drive against the militia continues, the Syrian army and Lebanese troops loyal to Hrawi would thrust into East Beirut.

Lebanese lawmakers signed a peace accord Oct. 23 in Taif, Saudi Arabia, to end their country's long civil war. The agreement provided for a phased withdrawal of some 35,000 Syrian troops from Lebanon and gave the growing Moslem community greater share in power.

Aoun rejected the Taif agreement on grounds it did not provide for a swift Syrian withdrawal while Geagea, who is a staunch opposer to the Syrians, implicitly backed it.

#90040u1424 02/09/1990 ~United Press International

PRAGUE, CZECHOSLOVAKIA (FEB. 9) UPI - Czechoslovakia re-established diplomatic relations with Israel Friday after a nearly 23-year lapse,

becoming the second East Bloc country to resume ties with Tel Aviv.

Czechoslovak Foreign Minister Jiri Dienstbier and his Israeli counterpart, Moshe Arens, signed the protocol and both said they expected relations to achieve the warm level they enjoyed just after World War II.

Czechoslovakia was one of the first countries to actively support the establishment of the state of Israel after the war. Along with all other Soviet Bloc countries but Romania, Czechoslovakia severed diplomatic ties with Israel following the June 1967 Arab-Israeli war.

Hungary recently re-established relations with Israel and Poland was expected to follow suit.

In Warsaw, Polish Foreign Minister Krzysztof Skubiszewski said Arens wasexpected to visit Poland at the end of February to sign the protocol.

At a news conference, Dienstbier stressed the necessity of preparing a legal infrastructure for the development of cooperation, including a law on the protection of investments and a consular agreement to protect the rights of visitors.

Arens called it ''an honor'' to be able to sign the agreement.

Czechoslovakia was one of the few countries that supported Israel in 1947 in the struggle against the Palestinians, Arens noted. He said Israel is viewing with great attention the developments as Czechoslovakia moves from a totalitarian state toward democracy following the November peaceful revolution.

After the signing ceremony, Arens visited Terezin, a town outside of Prague that was changed into a concentration camp for Jews from all over Europe before their transport to Nazi extermination camps during World War II.

A total of 140,000 people passed through Terezin of which 34,000 died. Arens laid a wreath at the Jewish cemetery there.

After his return to Prague, the Israeli minister visited the Jewish quarters where he paid homage to the grave of Rabbi Loew and the legendary Mayor Mordechia Maisl.

Czechoslovak-Israeli postwar ties cooled when the communist leadership put on trial and executed several people in the 1950s for alleged links with ''Zionist anti-state centers'' and fabricated evidence that they were involved in a plot to overthrow communist rule.

#90040u1465 02/09/1990 ~United Press International

NEW YORK (FEB. 9) UPI - A chronology of key events in the history of major-league baseball's labor negotiations:

Nov. 9, 1953 - U.S. Supreme Court reaffirms the 1922 ruling by Justice Oliver Wendell Holmes that baseball is a sport, not a business, in effect upholding the reserve clause that binds a player to his team.

July 1, 1966 - Marvin Miller takes office as executive director of the Players Association.

Jan. 16, 1970 - Curt Flood files suit against the reserve clause, challenging the legality of the standard baseball contract.

April 1, 1972 - Players strike for 13 days over the issue of pensions.

June 19, 1972 - Supreme Court rules 5-3 that baseball is exempt from anti-trust law, defeating Flood's test of the reserve system.

Dec. 23, 1975 - An arbitration panel, with impartial chairman Peter Seitz casting the decisive vote, rules 2-1 in favor of granting free agency to Andy Messersmith and Dave McNally.

Feb. 23, 1976 - In absence of a collective bargaining agremeent, owners lock out players in spring training until then-commissioner Bowie Kuhn ordered them opened March 17.

July 19, 1976 - A collective bargaining agreement is reached, stipulating that any player who had spent at least six years in the big leagues is free to sign with a new club once he has played out his option. His former club is compensated with a draft pick.

April 1, 1980 - Executive board of the Players Association votes to boycott the last week of spring training and strike May 23 if no labor pact is reached by then.

May 23, 1980 - Shortly before 5 a.m., negotiators avert a strike by reaching a 4-year deal. They put off the compensation issue and create a Joint Study Committee to make recommendations.

Feb. 19, 1981 - Major-league owners, under terms of the Basic Agreement, unilaterally implement their proposal on a compensation system for free agents.

Feb. 25, 1981 - Executive Board of the Players Association votes unanimously to strike May 29 in the absence of an agreement on free-agent compensation.

May 28, 1981 - Players and owners extend deadline to June 1. National

Labor Relations Board petitions for an injunction that would rescind the owners' compensation proposal.

June 10, 1981 - Federal Judge Henry Werker denies the NLRB's request for an injunction. Players Association calls for a walkout before games of June 12.

June 12, 1981 - At 12:30 a.m. EDT, Miller leaves the evening bargaining session and says, ''The strike is on.''

July 30, 1981 - The longest walkout in American sports history, lasting 49 days, ends when both sides agree to a pool concept for compensation for premier free agents.

Aug. 9, 1981 - A belated All-Star Game in Cleveland opens what is the major leagues' only split season.

Aug. 6, 1985 - Players strike over issues of arbitration, free agency and benefits.

Aug. 7, 1985 - Strike is settled, with games resuming the next day.

Nov. 28, 1989 - Negotiations begin toward a new labor pact.

Dec. 31, 1989 - Labor contract expires.

Jan. 9, 1990 - Player Relations Committee sends letters to clubs telling them not to open camps until further notice.

Feb. 7, 1990 - Talks are recessed until Feb. 12, four days before the scheduled start of spring training.

Feb. 9, 1990 - Owners meet in Chicago and reaffirm their position to lock out players from spring training unless there is progress in negotiations.

-30- 3646

#90040u1476 02/09/1990 ~United Press International

WASHINGTON (FEB. 9) UPI - Daniel P. Kearney, the frustrated head of the Cabinet-level board overseeing the rescue of the nation's thrifts, resigned Friday, saying his position did not have enough authority "to be effective." "I accepted this position fully confident that I would be able to carry out the duties and responsibilities of president and CEO," Kearney said.

"However, after serious reflection I have concluded that the role of president and chief executive officer of the oversight board does not currently afford me the authority that I believe is essential to be

effective in this process. "I believe that this situation developed as a result of a mutual misunderstanding of the scope of the position that I accepted," he said in a statement.

Kearney was brought in four months ago to head the Resolution Trust Corp. oversight board, which sets policy and direction for the government's effort to close hundreds of failed thrifts and dispose of billions of dollars of assets. The $164 billion bailout effort has been slow in getting off the ground and has been under heavy congressional criticism.

A prominent Wall Street real estate finance expert, Kearney served previously in the Nixon and Ford administrations. In recent weeks, Kearney and other members of the board, including Federal Reserve Chairman Alan Greenspan and Treasury Secretary Nicholas Brady, came under fire from the House Banking Committee, which is concerned with the slow pace of the thrift bailout.

"Congress has put a lot of heat on those guys," said James Christian, chief economist of the U.S. League of Savings Institutions. The Resolution Trust Corp., the agency created in August by President Bush's thrift bailout bill to dispose of the assets of failed thrifts, has handled only a handful of the 600 insolvent thrifts.

William Seidman, chairman of the Resolution Trust Corp. and the Federal Deposit Insurance Corp., told the committee the slow pace stemmed largely from a laborious decision-making process that calls for all decisions to be made by the oversight board and the Treasury Department.

The oversight board, which also includes Housing and Urban Development Secretary Jack Kemp, has been hindered in its decision-making ability by the failure of the White House to fill two public seats that have remained vacant since August.

Kearney joined the oversight board Oct. 3 after serving as a principal at Aldrich, Eastman & Waltch Inc., a Boston pension fund adviser. Before that he was managing director of real estate finance for Salomon Brothers Inc., the Wall Street investment banking house.

#90040u1506 02/09/1990 ~United Press International

LOS ANGELES (FEB. 9) UPI - The Securities and Exchange Commission has expanded its investigation of First Interstate Bancorp to include possible problems at its troubled Arizona bank, a spokesman said Friday.

First Interstate also revealed that it is providing $91 million in capital to the Arizona bank, which had a 1989 loss of $153.9 million resulting from a third quarter $350 million write down for losses on problem loans.

First Interstate disclosed last week that the SEC was investigating problems at its Texas bank, for which the holding company recently set aside $400 million to cover problem loans.

Analysts believe the investigations are probably focused on whether the company disclosed its problems in Arizona and Texas moved to try resolving them quickly enough.

First Interstate made the disclosure of the expanded probe in an amended SEC filing to registration documents covering its proposed 7.5 million share offering of common stock.

The offering is designed to raise capital to cover the write-downs. The new filing disclosed that the offering is expected to raise $275 million, rather than the $325 million that had been expected. First Interstate's stock fell 37.5 cents to $34.625 a share on the New York Stock Exchange Friday.

There is some reported concern among shareholders that since the stock is trading at more than $2 below book value, the offer could dilute shareholder value. However, First Interstate spokesman Ken Preston said the offering will proceed as planned next week, but did not disclose the price.

#90040u1514 02/09/1990 ~United Press International

BUCHAREST, ROMANIA (FEB. 9) UPI - Romania's aspiring politicians gathered Friday for an inconclusive meeting to decide the composition of a council that will govern the nation until scheduled May 20 general elections, participants said.

The ''National Unity Council'' was to have finalized its 180 members and elect a Cabinet, but people emerging from the session inside the imposing Parliament building said none of the key issues had been resolved.

''Heated debates are continuing,'' said Cristian Unteanu, a member of one of the 30 parties contesting seats in the interim body. ''They have no idea when the decision about leadership will be announced.''

The council was created after widespread demonstrations against the provisional government held exclusively by the National Salvation Front, which seized power during the bloody December overthrow of dictator Nicolae Ceausescu.

Opposition groups had opposed the monopoly hold of the Front because many of its members were in the former communist government, and they believed

its controlling position gave it an unfair advantage for the May 20 polls. The instability threatened to erupt into civil war, but was defused when the Front agreed to the caretaker council, in which it has been apportioned half the seats.

In a related development, the director of state-run Romanian Free Television and Radio resigned following repeated protests that he was manipulating the media to favor the Front. Aurel Dragos Muntanu announced his departure when technicians threatened to go on strike and put stations off the air.

Elsewhere, political uncertainty and harsh economic conditions have prompted many Romanians to decide to emigrate.

About 600 people crammed into the central Tarom travel office in a battle that is fought daily for passports and paperwork needed to leave the country. Most outgoing flights are full and many Romanians are heading West overland.

Some 500 prospective immigrants clustered outside the U.S. Embassy in Bucharest, waiting hopefully for visas.

Claudia Zaharescu, 21, said she wanted to leave with her husband and 2-year-old son, even though she fought during the revolution.

''I watched my friends die and I thought my life would change,'' she said. ''I have listened to the words spoken by our old men. They are liars, these politicians. It will be 50 years before life is good in Romania.''

A U.S. Embassy official said many young single men had been rejected because they were potential illegal immigants, and that Washington was pondering whether to drop its political refugee program, reducing the overall quota.

Immigration Department Director Marin Taodar said 725 people left Bucharest during January, a jump from 336 for the same month lat year. No national figures were available, he said.

#90040u1526 02/09/1990 ~United Press International

CHICAGO (FEB. 9) UPI - Aggressive buying rallied the grain market to session highs late Friday on the Chicago Board of Trade, but closing prices were below the highs.

Wheat was the price leader, mostly on news that China had been offered one million tons of export bonus wheat. The March contract had most of the support amid indications that much of the wheat will come from old-crop

supplies.

Soybeans rallied on active professional buying, triggering buy-stops as March beans broke above Thursday's high. Some of the gains were eroded when the buying stopped. The weekly crush figure was higher than expected which kept soybeans on the defensive.

Corn turned higher on spillover from wheat and soybeans and was fractionally higher at the close. Corn continued to trade in a narrow range.

Reports that the Soviet Union is running out of feed grains for livestock provided underlying support across the floor.

At the close, corn was up 1/4 to 3/4, soybeans unchanged to up 2 3/4, wheat up 4 1/2 to down 1/4 and oats up 1/4 to 1 1/2.

WASHINGTON (FEB. 9) UPI - The U.S. Export-Import Bank Friday said it authorized financing for $23.1 million in U.S. exports of equipment and services for the Shanghai Metro Project in China. The principal exporter involved in the project is General Railway Signal Inc., Rochester, N.Y., which will supply signaling equipment.

Other U.S. participation in the Chinese project will include fire alarm detection systems from Simplex Time Recorder, waterproofing material from W.R. Grace Co., water chillers from United Technologies, and engineering

services from Deleuw Cather International Inc.

Eximbank's financing includes a guarantee of a $12.7 million loan from the Private Export Funding Corporation, a New York-based private organization, to the Bank of China, and a grant of $10.4 million from Eximbank's tied aid credit war chest, the bank said.

Both France and West Germany offered subsidized tied aid financing for the entire project, prompting Eximbank to do the same to save U.S. participation in the Chinese project.

The Chinese awarded the major equipment contracts for the project to West German suppliers, the French won a contract for tunneling equipment, and U.S. companies were selected to supply signaling and other equipment, the Eximbank said.

KARACHI, PAKISTAN (FEB. 9) UPI - Snipers shot and killed two people Friday and authorities recovered five charred bodies from a truck, bringing to 64 the death toll from three days of anti-government violence in Karachi.

Troops enforced indefinite curfews in much of the southern port, Pakistan's largest city, where trouble broke out Wednesday during a strike called by the Mohajir Qaumi Movement, an opposition party representing Mohajir migrants from India.

Despite the curfews, officials reported isolated incidents Friday evening. They said snipers shot and killed two people and wounded a police officer and an ambulance driver.

Militants also ransacked and torched a bank and set fire to a store and the home of a local official of Prime Minister Benazir Bhutto's Pakistan Peoples Party, the officials said.

They said five charred bodies were found in a truck which had been doused

in gasoline and torched. Doctors reported the bodies showed signs of torture.

A least 49 people were shot and killed and more than 100 injured on Wednesday when Mohajir militants enforcing the strike fought gunbattles with troops, fired indiscriminately on passersby and torched hundreds of shops, houses and vehicles. Another eight people died in scattered incidents on Thursday.

The Mohajir group called the strike to demand the release of more than 100 of its workers it says have been kidnapped by members of the Pakistan Students Federation, a wing of Bhutto's party.

The Students Federation alleges the MQM student wing has adbucted about 80 of its members.

The Mohajir movement, which holds 14 National Assembly seats, signed an agreement with the minority government led by Bhutto after the November 1988 elections. But it joined the opposition in September, sayingg the Bhutto administration had failed to promote the interests of the Mohajirs.

Karachi and surrounding Sind Province have been wracked by ethnic violence during the past few years that has left hundreds of people dead. The native Sindhis resent the power and wealth gained by the Mohajirs, whose families migrated to Pakistan from India after the 1947 partition of the subcontinent.

#90040u1578 02/09/1990 ~United Press International

CAPE TOWN, SOUTH AFRICA (FEB. 9) UPI - Jailed black nationalist Nelson Mandela told senior anti-apartheid leaders Friday he would break apartheid laws ''every hour of the day'' if he is freed before the government lifts a state of emergency and releases all other political prisoners.

In what represented his largest meeting with activists since he began a series of extraordinary prison talks last year, Mandela met 22 members of the executive committee of the United Democratic Front, a broad alliance of anti-apartheid groups ideologically aligned with the African National Congress.

''He says he will never obey any apartheid law, he will never obey any repressive measure and he will do what he considers necessary to pursue the struggle,'' said delegation member Dullah Omar, a close family friend and a senior UDF official from the Western Cape.

''And he says in the process he would be breaking many laws every hour of the day and he will find himself back in prison the same day.''

Omar told a news conference after the 5 1/2-hour prison meeting that Mandela was ''very optimistic'' the problems surrounding his release would be resolved.

''He appeared totally in control (of his emotions), he's very well and I must say, he's very optimistic. He does not think that the problems are such that they cannot be resolved,'' Omar said. ''He's not pessimistic.''

There was still no word from the government Friday on when Mandela would be released following President Frederik de Klerk's announcement a week ago that the black nationalist would be freed soon.

De Klerk Friday accused right-wing whites who condemned his racial reform package of attempting to plunge South Africa into civil war and vowed to foil any attempts ''to set fire to this country.''

De Klerk put forward the boldest racial reform package in more than four decades of apartheid rule, lifting a 30-year ban on the ANC and restrictions on more than 30 other organizations and 374 activists, suspending judicial executions and announcing Mandela's unconditional release.

The measures were intended to create a climate conducive to negotiations with black leaders on a new constitution that would end minority domination and settle the country's protracted racial conflict.

The Conservative Party has accused de Klerk of selling out the interests of the Afrikaner whites in favor of the 28 million voteless black majority and vowed to launch a campaign of active resistance to power-sharing negotiations.

The extremist Afrikaner Resistance Movement, identified by a swastika-style emblem, was granted a permit to hold a march in Pretoria

Saturday to protest the reforms, state-run radio reported. AWB leader Eugene Terre-Blanche intends to symbolically hand over to the government a handful of silver coins in a biblical reenactment of Judas Iscariot's betrayal of Christ to the Romans.

''While the National Party advocates democracy and balance, they call for resistance and answer with strikes and boycotts, the methods and solutions of radicalism,'' de Klerk said in parliamentary debate Friday. ''They will plunge this country into a racial war.

''The government and I will not allow anyone or any party to set fire to this country.''

Mandela met the UDF officials at his suburban-style house at Victor Verster Prison, some 50 miles northwest of Cape Town in the wine-growing region of Paarl.

As gale-force winds swept across the Cape, UDF spokesman Murphy Morobe told reporters at the prison gates he was ''very hopeful that this could be the last meeting with Mr. Mandela in prison.''

Morobe told the news conference later ''crucial'' talks were under way about Mandela's security on his release amid reports by the government of alleged threats on his life from both the right wing and the left. But he said there was no question of accepting a government offer to protect Mandela.

Since recovering from a bout with tuberculosis in December 1988, Mandela has lived alone in a former warden's house on the prison farm, consulting on an increasingly frequent basis with various anti-apartheid organizations and government officials.

Friday's meeting represented the largest group yet to visit Mandela, who was captured in 1962 and sentenced two years later to life imprisonment on sabotage charges in connection with the underground activities of the ANC.

U.S. civil rights activist Jesse Jackson, on the third day of his 10-day tour, arrived in Cape Town from Johannesburg for talks with church leaders activists and government officials.

#90040u1596 02/09/1990 ~United Press International

NEW YORK (FEB. 9) UPI - John Gotti, the reputed head of the nation's most powerful Mafia family, is described by authorities as the most elusive gangster since Al Capone ruled Chicago 70 years ago.

In yet another victory over the government, a jury Friday acquitted Gotti of all charges in the shooting and wounding of a union leader in a verdict that polished his reputation for invincibility as the ''Teflon Don.''

A conviction could have meant life behind bars for Gotti, a convicted hijacker and killer who authorities believe is the boss of the Gambino family, the nation's largest and most powerful Mafia organization.

But throughout the trial in state Supreme Court in Manhattan, Gotti, 49, exuded the confidence of a man who has beaten every rap since 1985, when ''Boss of Bosses'' Paul Castellano was gunned down outside a Manhattan steak house and Gotti reportedly assumed his throne.

Last winter, when a swarm of 50 uniformed cops, detectives and FBI agents arrested him on a Little Italy Street on the most recent charges, Gotti told them, ''I give you 3-to-1 odds I beat this case.''

''The Dapper Don,'' who is chauffeured about town in a black Lincoln Continental and wears expensive suits and a diamond pinky ring, has consistently slipped from the government's grip for the past 15 years.

In 1985, he went to trial for assaulting Romual Piecyk, a refrigerator repairman, and robbing him of $325 during an argument over a parking space in Queens.

However, Piecyk soon learned who Gotti was, checked himself into a hospital, developed amnesia and said he could no longer remember who popped him. The judge had no choice but to dismiss the charges.

Gotti also was acquitted in 1986 of running an 18-year racketeering enterprise with six Gambino co-defendants that included gambling, loansharking, truck hijackings, armored car robberies and three murders from 1968 to 1985.

During the trial, however, his $1 million bail was revoked when the judge declared he was ''dangerous'' and threw him in jail to guard against possible jury tampering. Gotti's appeal was bolstered by testimony from, of all people, Romual Piecyk.

Gotti's courthouse winning streak was shared by his son, John, 25, a suspected Gambino soldier, and for a while, his brother, Gene, 42, a reputed captain in the crime family.

The younger John, who lists his occupation as president of a trucking firm was acquitted of assault charges in 1987.

A narcotics trafficking and racketeering case against Gene Gotti ended in two mistrials before he was convicted in May 1989.

In his middle-class neighborhood of Howard Beach, neighbors gush that the elder John Gotti is a generous man who sponsors an annual summer street party at his Bergin Hunt and Fish Club. After his most recent acquittal, they tied yellow ribbons around trees near his house - the symbol of concern for hostages.

Gotti, a high school dropout who claims he works as a plumbing salesman, has been married for 29 years to his wife Victoria, has five children and at least two grandchildren.

One of his sons, Frank, 12, was killed in a traffic accident in 1980. Four months later, the driver of the car that hit him disappeared and has not been heard from since.

#90040u1601 02/09/1990 ~United Press International

UNITED NATIONS (FEB. 9) UPI - Cuba's representative at the United Nations accused the United States Friday of piracy in the Caribbean in an incident involving a U.S. Coast Guard and a Cuban-chartered freighter suspected of carrying drugs.

A Coast Guard cutter fired on the freighter Hermann, which was flying a Panamanian flag, on Jan. 31 in international waters in the Gulf of Mexico

when the freighter refused to be boarded for inspection.

The Hermann aroused U.S. suspicions because it had been steaming towards Tampico, Mexico, along the same route as had a Panamanian-flagged vessel in October. That vessel was seized with six tons of cocaine, the largest maritime seizure by the United States.

Cuba said the freighter escaped into Mexican waters after being fired at for almost two hours by the American ship. It complained to the United Nations about the incident and requested a debate in the U.N. Security Council.

''The United States has committed the crime of piracy and state terrorism while attempting to make the government of Cuba responsible for the incident,'' said Cuban Ambassador to the United Nations Ricardo Alarcon.

But U.S. representative Alexander Watson defended the action by the Coast Guard and told the Security Council that the Hermann was summoned for an inspection because it fit the general profile of a drug smuggling vessel.

Watson said the Coast Guard operation was a routine drug interdiction case in accordance with international law and had ''exhausted all internationally accepted means to stop the vessal.''

But Alarcon dismissed Watson's remarks as ''explanations worthy of a poor joker.''

The U.S. ship fired on the Hermann ''with the clear purpose of neutralizing and sinking a merchant ship,'' Alarcon said.

''What is the difference between these buccaneers and the old pirate days?'' he said.

The 15-nation Security Council heard arguments from the two representatives and adjourned the meeting without taking any decision.

#90040u1609 02/09/1990 ~United Press International

LOS ANGELES (FEB. 9) UPI - Music legend Stevie Wonder testified Friday that a songwriter who sued him for allegedly stealing an Oscar-winning song was a longtime friend Wonder once prevented from committing suicide.

Wonder said that he pulled a gun out of Lee Garrett's hands while the desperate songwriter was threatening to shoot himself in the bathroom of his Hollywood apartment in 1977.

Immediately following that episode, Garrett allegedly played for Wonder

some songs he had written, one of which Garrett later accused Wonder of stealing and fashioning into the Academy Award-winning tune, ''I Just Called to Say I Love You.''

Garrett and another songwriter, Lloyd Chiate, sued Wonder for copyright infringement in 1985. Garrett later dropped his allegations against Wonder but Chiate pressed the multi-millon dollar case to trial in U.S. District Court.

Wonder, 39, testified that he was too ''nervous,'' ''numb,'' and ''destroyed'' by Garrett's suicide attempt to recall what songs had been played for him by the songwriter immediately after the incident.

Chiate has maintained that Wonder stole a song the plaintiff had co-written with Garrett called, ''Hello it's Me, I Just Called.'' He has accused Wonder of ''paying off'' Garrett to drop the lawsuit.

Garrett, who, like Wonder, is blind, is expected to testify on the musician's behalf.

Wonder, one of the most honored figures in popular music with a bushel of No. 1 hits and Grammy Awards, has testified he conceived the tune while riding home from a visit to his mother's home in the San Fernando Valley in mid-July 1976.

He said the tune underwent many revisions before it was released in the 1984 movie ''The Woman In Red.'' It won the Oscar that year for best song in a motion picture.

The next year, Wonder was sued by Chiate and Garrett.

Wonder has testified that he recorded a rough version of the song in July 1976, but the copy was lost. He said the earliest surviving version is on a cassette he made months later and gave to a lead singer for a Japanese band, Bread & Butter.

On the cassette, played in court Friday, Wonder plays the piano and hums through most of the song, and, except for a short section of verse, only sings words in the chorus.

Wonder has testified that he finished the song years later, while attending a screening of ''The Woman in Red'' before music was added to the film. He said it inspired him to finish ''I Just Called.''

Wonder said the tune seemed appropriate for a scene he ''sensed'' in the movie in which actor Gene Wilder talks on the telephone with his wife.

''I said to (singer) Dionne Warwick that this gives me the inspiration for

finishing up a song that I wrote that might be good for the film,'' Wonder testified.

Chiate's lawyers described him as an established songwriter who has collaborated on such tunes as ''Magic Man'' by the 5th Dimension, ''You've Got the Love'' by Marilyn McCoo and Billy Davis Jr., and many Eddie Money songs, including, ''Maybe I'm a Fool.''

The suit was originally dismissed by U.S. District Judge David Williams, but was reinstated by an appeals court.

#90040u1616 02/09/1990 ~United Press International

(FEB. 9) UPI - The government says wholesale prices leaped one-point-eight percent in January, in what economists say is apparently a one-time shot. Analysts blame the biggest jump since the 1974 energy crisis on a brutal winter, saying the cold caused huge increases in gas and oil prices. The weather also wiped out crops in critical winter growing regions in Florida and the Rio Grande.

West German Chancellor Helmut Kohl's proposal to introduce the deutschmark to East Germany is getting backing by the president of West Germany's powerful Bundesbank. The central bank official told reporters in Bonn that entering into a monetary union with East Germany would be a major step toward reunification of the two nations. Officials hope a monetary union would help stem a massive migration of East Germans to West Germany.

The official East German news agency says two huge explosions ripped a chemical plant today, killing at least three people and injuring 25 others. The report says a carbide oven at the plant exploded twice. It says the cause of the blast was NOT immediately determined. Workers described it as the worst accident ever at the facility, where a similar explosion killed two people in 1970.

(FEB. 9) UPI - A Japanese official who requested anonymity says the nation has more than doubled its consumption of a species of porpoise because of its joining in the ban on commercial whaling. And he denied a claim by a U-S Fish and Wildlife Service official who said the increased Japanese consumption of Dall's porpoises could drive the species into extinction. The porpoise catch was 15-thousand before Japan joined the whaling ban... then soared to 39-thousand in the year after.

Police in the Philippines say they have recaptured a communist rebel suspected in the slayings of three American soldiers in 1987. Authorities

arrested Romeo Valencia last night while he was traveling to visit his family in the city of Angeles, adjacent to the U-S Clark Air Base north of Manila. Valencia and another rebel made a daring escape after a court hearing last October.

Rock 'n' roll singer Del Shannon is dead... apparently by his own hand. Authorities in Santa Clarita, California, say Shannon's wife found his body in their home last night. They say Shannon died of an apparently self-inflicted gunshot wound to the head. A .22-caliber rifle was found near his body. Shannon soared onto the pop charts in 1961 with ''Runaway '' his first and biggest hit. It held the top spot on the charts for four weeks. Known for his high-pitched voice and vocal range, Shannon also had hits with ''Do You Want to Dance'' and ''Keep Searchin'.'' Shannon's age was listed variously as 50 and 55.

#90040u1636 02/09/1990 ~United Press International

SEATTLE (FEB. 9) UPI - The battle to improve public education takes an unprecedented turn in Washington Tuesday, when more than a quarter of the state's 43,000 teachers plan to cut classes to protest lawmakers' refusal to raise their pay.

Washington teachers have seen their salaries drop in the past decade from the fourth highest in the country to 21st, dipping below the national average for the first time in memory.

Approximately 12,000 teachers in some 33 school districts plan to stay away from school altogether. Another 8,000 teachers and support personnel say they will either leave school early Tuesday or participate in marches and rallies throughout the state to draw attention to their position.

The struggle to fund improvements to public education is nothing new for most states. But the militancy and anger among Washington teachers rose a few notches after they decided they had been patronized and lied to by state officials who backed away from earlier promises.

''People are not going to stand still and watch a profession they love stand still. They just won't,'' says Carla Nuxoll, president of the 49,000-member Washington Education Association.

''Tuesday is not just a day of venting anger. People are going to go back and take more action. This is a long way from over.''

Anger is most concentrated in western Washington, where a booming Puget Sound economy has driven up housing, transportation and other costs of living out of reach of a teacher's average salary of $29,176.

Seattle housing prices are the fastest-rising in the nation. But the percentage increase in teacher salaries in Washington over the last decade ranks 49th among the 50 states and the District of Columbia, according to National Education Association figures.

NEA statistics also show Washington with the fourth largest class sizes in the country.

''It's turning into a nightmare in the classroom,'' Dave Wood, president of the Edmonds Education Association, said. ''The '80s are a lost decade for education in this state.''

The 3,500 Seattle teachers and support personnel believe they have suffered more than most. Their salaries have remained relatively static over the past decade because of a state funding formula that sought to raise the salary level of rural districts, mostly in eastern Washington, closer to that of urban areas.

''In the next two years nearly a third of the teachers in the Seattle district will be eligible for retirement,'' said John Carl Davis, head of the Seattle Teachers Association, the state's largest. ''There's a real concern about who will teach the children in the coming years.''

Recent statements by Gov. Booth Gardner and House Democratic leaders that none of the state's $611 million budget surplus will be made available for teacher raises have swelled the number of teachers who intend to boycott Tuesday.

The Washington Education Association wants a 10 percent, across-the-board raise that would cost the state an estimated $290 million.

The idea of a one-day walkout began among teachers organizations in districts north of Seattle. What excites teachers and worries politicians is that the walkout represents a new level of cooperation and coordination among districts.

''We've never had more than one district in the state on strike over the same problem,'' Wood said. ''I think that unless the Legislature starts hearing what we are saying and the parents are saying, we may see a statewide strike.''

Although, few of the mostly small districts east of the Cascades will cancel school Tuesday, teachers there are showing strong support for the boycotts to the west. In Yakima, where the local paper has castigated teachers as dupes of the Washington Education Association, 500 or so teachers plan to rally after school to draw attention to the problem.

Karen Nelson, president of the Yakima teachers group, says teachers in the

central Washington town don't need to spend as much for basics as their colleagues in Seattle, ''but they are angry at essentially going without a pay raise for years.''

The entire issue has been further complicated by Washington's patchwork tax system. Only one of five states without an income tax, Washington relies on a variety of high sales taxes - nearly 10 percent in some cities - and business taxes for the bulk of its revenue.

Ten years ago the Legislature took over the funding of basic education, removing it from dependence of district school levies, and promised to put school finances on an even keel.

''They've promised to do something for 10 years, but they've done almost nothing,'' Wood said. ''Every major category of education - salaries, retirement pensions, textbook purchases, lab facilities - all have sunk. It's no better than it was under the annual levy roulette.''

Nuxoll says teachers in the state are feeling ''under-valued and under-paid. And we're not going to take it.''

WASHINGTON (FEB. 9) UPI - The White House said Friday that President Bush was nominating four additional candidates for federal judgeships in Michigan, Arizona, North Carolina and Pennsylvania.

Adding to a flurry of judicial nominations he has proffered in recent weeks, Bush said he would nominate Samuel Alito Jr. of New Jersey to serve on the 3rd U.S. Circuit Court of Appeals, based in Philadelphia.

If confirmed by the Senate, Alito would succeed John Gibbons.

The White House said Bush also intends to nominate:

-Robert Cleland of Michigan to be U.S. district judge for the eastern district of the state. He would succeed James Churchill.

-Stephen McNamee for a U.S. district judgeship in Arizona. He would succeed Charles Hardy.

-Graham Mullen to be U.S. district judge for the western district of North Carolina. Mullen would succeed James McMillan.

LUSAKA, ZAMBIA (FEB. 9) UPI - A cholera epidemic in the Zambian capital has killed at least 50 people in less than a week and all social gatherings have been banned in an effort to slow the spread of the disease government officials said Friday.

The government called an emergency meeting with aid donors and relief agencies Friday to solicit funds to curb the epidemic, whose outbreak was officially announced last Sunday.

Unofficial estimates put the total killed in the epidemic at 100.

''We would like you to brief your respective governments on how serious the situation is and we will appreciate any assistance rendered,'' Health Minister Mavis Muyunda told the meeting.

''The rate at which it is spreading is very alarming,'' Muyunda said.

Pledges of aid totalling $246,000 were made by the World Health Organization and other U.N. bodies, and the European Community at the meeting.

Attempts by the authorities to prevent the epidemic spreading appeared to have failed, and four people were hospitalized in the copper mining town of Ndola 210 miles north of Lusaka, state-run radio Zambia National Broadcasting Corp. reported.

Authorities have closed all primary and secondary schools in Lusaka and prohibited social gatherings, including funerals, to curb the spread of the disease.

''It will be difficult to contain the epidemic because of the sanitary situation in the city,'' WHO representative Eric van Praag said.

Poor drainage, blocked sewers, uncollected garbage and a water shortage in Lusaka have exacerbated the epidemic. The rainy season is at its height in the central African country during February.

#90040u1683 02/09/1990 ~United Press International

WASHINGTON (FEB. 9) UPI - Defense Secretary Dick Cheney leaves Washington Saturday on a two-week trip to meet with U.S. allies in Asia to discuss security issues and consult on possible troop cuts in Korea and Japan, officials said Friday.

Cheney will not make any announcements on future troop cuts during his trip, defense officials stressed. About 146,000 U.S. forces are stationed in the region, with 50,000 of them in Japan and Okinawa and 44,000 in South Korea.

The Defense Department is required to report to Congress by April 1 on its ''planned forward (troop) presence in Asia,'' said a senior defense official who briefed Pentagon reporters on Cheney's trip.

''We're still developing our thoughts and still must consult with our allies. This is part of the reason for this trip,'' said the official, who spoke on condition he not be identified.

The Defense Department is ''still reviewing what we may or may not do over the next decade'' regarding U.S. troop levels in Asia, he said. ''We really, honestly, haven't made any final decisions. We're starting the process of consultations.''

Cheney will spend his first three days in Hawaii, meeting with the commander of the U.S. Pacific Command. He will visit South Korea Feb. 14-17, Hong Kong Feb. 17-18, the Philippines Feb. 18-20 and Japan Feb. 20-24.

Cheney plans to reduce the 2.1 million U.S. forces by 91,000 over the next two years, but he has ruled out withdrawing troops from Europe until there is a U.S.-Soviet conventional arms pact or taking forces out of Asia until host governments are fully consulted.

His defense budget for fiscal 1991, which begins in October and ends Sept. 30, 1991, does not envision U.S. force reductions in Asia. That leaves fiscal 1992 and beyond for any possible troop reductions there.

Another major issue facing Cheney is the U.S.-Philippine negotiations over renewal of leases for two strategic American installations - Subic Bay Naval Base and Clark Air Base.

The senior defense official said ''there will be no discussions of the base negotiations'' on Cheney's part. He added, however, that the issue is likely to come up during the talks with Philippine officials.

''We don't have any messages to take ... about the bases,'' the official said. ''It's a given ... we would prefer to maintain our presence in the Philippines.''

About 15,500 U.S. military personnel are stationed in the Philippines.

''Secretary Cheney has no intent to become deeply involved in specific issues of a long-standing nature such as the base negotiations in the Philippines, the FSX (co-produced U.S.-Japanese fighter plane) in Japan or the Korean fighter program in Seoul,'' the official said.

#90040u1722 02/09/1990 ~United Press International

LONDON (FEB. 9) UPI - Britain imposed a full security alert Friday in response to a death call against Salman Rushdie and the author of ''The Satanic Verses'' appealed from his hideout for talks with the country's Moslems for an end to his self-imposed exile.

British authorities expelled nine Iranians for unexplained reasons, but independent London radio stations said they were suspected of plotting to kill Rushdie. The deported Iranians, six students and three government employees, arrived in Tehran Friday.

A renewed death threat from Tehran against the author swiftly followed the expulsions.

Military bases and airports went on full alert and security tightened around the U.S. Embassy in London in compliance with a U.S. State Department warning of a ''high level of activity'' by the Hezbollah Islamic extremist group, officials said. Hezbollah means Party of God.

Washington has warned that ''terrorists may be planning an operation against U.S. interests in Western Europe'' to mark the 11th anniversary Saturday of the fall of Shah Mohammed Reza Pahlavi and the takeover of Iran by Islamic fundamentalists led by the late Ayatollah Ruhollah Khmomeini. .

Security officials intensified their precautions, the bombing of a Pan Am Boeing 747 jetliner over Scotland Dec. 21, 1988 that killed 270 people still fresh in the public consciousness.

''All our U.K. airports have been informed about the alert and appropriate security is being enforced," said a spokesman for the Civil Aviation Authority, Paul McKie. "The United States did not advise us of a threat against aviation, but we are keeping in close touch with the U.S.

authorities.''

He described the security alert as being ''of a very high order'' and said it involved stringent searches of hand luggage and increased deployments of personnel.

Blake Morrision, a close friend of Rushdie, said on London's Channel 4 news that the writer told him by telephone that he wanted a dialogue with Britain's Moslems.

''He wants that, they want that and, in order for it to happen, they must clearly disassociate themselves from the fatwah (death edict), and they must reassure everybody that no violence against Rushdie is intended and no threat against his life is coming from them,'' Morrison said.

But many British Moslems endorse Tehran's death order, including Alim Siddiqui, director of the London-based Moslem Institute.

''I approve of it entirely,'' he said of the death order. ''There is no threat. There is a sentence of death, which will be executed by the political and judicial authorities of Islam and not by private citizens.''

During morning prayers in Tehran, Iran's spiritual leader, Ali Khamenei, reiterated Khomeini's call for all Moslems to try to kill Rushdie for writing ''The Satanic Verses,'' which fundamentalist Moslems consider insulting to their faith.

British officials deplored the death call. Iran broke diplomatic ties with Britain March 7.

''It has been condemned by the prime minister, who said it is to be regretted that threats of this nature are made,'' a spokesman for Prime Minister Margaret Thatcher said.

''If these reports are true, we deplore this renewed incitement to violence against British citizens,'' a Foreign Office spokesman said.

''We still condemn (the death sentence) in the strongest terms,'' said Bob Gregory, spokesman for Viking Penguin, Rushdie's publishers. "We are appalled. I just think it is very bad. But it is very nearly 'What's new?' This doesn't change anything.''

The Indian-born author has been hiding under police protection for a year, since Khomeini called on Moslems worldwide to kill him.

As for the expelled Iranians, a British official said, ''On Feb. 2, the home secretary gave them notice to depart. None of them was held in detention and all nine complied. We are still in the business of

protecting individuals, and that is all I can say.''

Deportee Hussein Rahimi, a post-graduate student, called on Iran to react firmly against Britain, Iran's Islamic Republic News Agency said from Tehran.

In his first extensive public statement since he went into hiding a year ago, Rushdie last week defended ''The Satanic Verses,'' saying he had not committed blasphemy because he is not a Moslem.

#90040u1761 02/09/1990 ~United Press International
BUENOS AIRES, ARGENTINA (FEB. 9) UPI - Rumors that the government might strengthen its control of the economy might have triggered a run on the U.S. dollar, a financial newspaper said Friday.

The financial daily newspaper Ambito Financiero said the government was about to study a new economic plan drafted by Economic Coordination Secretary Hector Gambarotta, and Daniel Carbonetto, an economist who helped formulate a rigid policy which led to disastrous results. "The rumor certainly agitated the waters of the dollar," said the newspaper.

Both President Carlos Menem and Economic Minister Erman Gonzalez repeatedly denied this week that they would introduce tight controls on the free foreign currency exchange market to slow down the soaring dollar. They also denied planning significant changes in their economic plan launched two months ago. The Gonzalez plan, the third since Menem took office July 8, abolished the fixed foreign currency exchange rate and lifted price controls Dec. 18.

Wednesday, in a possible reaction to rumors about an impending Carbonetto economic plan, the dollar skyrocketted to 3,000 australes but had cooled off to 2,840 australes to one dollar by the close of the free foreign currency exchange market Friday.

The dollar's rise accompanied the release of January's 79.2 percent inflation figures, a sharp increase over the 40.1 percent December rate and a disturbing sign for the country's immediate economic future.

Armando Linde, director of the International Monetary Fund in Argentina, met this week officials to hammer out a new letter of intention for a $1.4 billion stand-by agreement signed in September.

Linde assured reporters that "the fund supported and continues supporting" the economic measures taken by the Argentine government, which he defined as efforts to reduce inflation, create more stability and interest in investment and to create more jobs.

Linde said the talks would definitely continue in spite of the recent inflation problems and the fact that Argentina has not paid a single interest payment on their $62 billion external debt in 21 months.

#90040u1809 02/09/1990 ~United Press International

NEW YORK (FEB. 9) UPI - The most unpredictable thing about the reincarnation of ''The Love Boat'' is that Joe Regalbuto makes a better looking woman than Dustin Hoffman.

Regalbuto normally appears as Frank Fontana on ''Murphy Brown,'' but the 6-foot, 180-pounder turns up as a diamond thief in drag for ''The Love Boat: A Valentine Voyage,'' to air on CBS Monday, Feb. 12, 9-11 p.m. Eastern time.

CBS also is the network that is bringing back ''The Bradys'' as a series in its effort to climb out of the ratings cellar. Before you jump to the conclusion that the ''Tiffany network'' is tarnishing its image, remember that in its glory days it was the network that gave you ''The Beverly Hillbillies,'' ''Gomer Pyle, U.S.M.C.'' and, more recently, ''The Dukes of Hazzard.''

''The Love Boat'' has made the voyage from its original network, ABC, to CBS with its crew largely intact - Gavin MacLeod, Bernie Kopell, Ted Lange and Jill Whelan are all there, along with special guest stars Tom Bosley, Julia Duffy, ''Rowdy'' Roddy Piper, Shanna Reed, Ted Shackelford and Regalbuto.

The show starts off with a diamond heist by Shackelford, Regalbuto and wrestling superstar Piper. Reed drives the getaway car but she has only turned to crime to get enough money to save her mother from eviction from the family home.

Shackelford has a heart of stone and talks in old time movie tough talk. At one point Regalbuto turns to him and says increduously, ''Who taught you to talk, Warner Brothers?''

Regalbuto plays a nice guy crook, a video game inventor whose partner stole his profits and his wife. He beat up the dirty rat and wound up in jail, where he met Shackelford and was talked into the heist because of his technical skills.

Rowdy Roddy is the gang's muscle, but he turns out to be allergic to almost everything and pathologically seasick in the bargain. Shackelford refers to him in disgust as ''an elephant with gas,'' and unfortunately Rowdy comes through with appropriate sound effects.

The gang has hidden the diamonds in a big heart-shaped box of Valentine candy and they plan to smuggle the ''ice'' out of the country while taking a ''Love Boat'' cruise to the Caribbean.

Regalbuto's description has been circulated by the cops after a child he stopped to help while fleeing the scene of the crime describes him to a police artist.

Shackelford wants Rowdy to kill Regalbuto, but instead agrees to let him accompany them in drag - complete with high heels.

''If have to be seen with you, you're going to look good,'' he snarls.

Regalbuto looks so good that a middle-aged passenger starts making advances.

The candy box accidentally falls into MacLeod's hands and, as the thieves try to get it back, it gets passed along to various guest stars, including the enormously pregnant Duffy, who in the script is married to the ship's chef, played by her real-life husband, Jerry Lacy.

How pregnant is she? Twelve months, she says.

Bosley is aboard as a police detective who has been suspended from the force after being framed by the syndicate. If he can solve the case and catch the diamond thieves, he believes he will be re-instated.

The plot, such as it is, winds its way through the beautiful Caribbean in typical ''Love Boat'' style. What you expect is what you get.

NBC will counter-program with ''Night of 1,000 Laughs II'' on Monday night a ploy that worked well for the network a year ago opposite ''Lonesome Dove,'' part 2, on CBS and the premiere of ''Columbo'' on ABC.

The NBC lineup of sitcoms on Feb. 6, 1989 won the night, scoring a 21 percent increase over NBC's regular Monday lineup.

This year the comedy schedule opens with a special episode of ''The Cosby Show'' that includes favorite old footage and outtakes and blundes by Bill Cosby, Phylicia Rashad, Tempestt Bledsoe, Malcolm-Jamal Warner, Lisa Bonet Keshia Knight Pulliam and the rest of the Cosby crowd.

After ''Cosby'' comes original episodes of ''Alf,'' ''The Golden Girls,'' ''Dear John,'' ''Empty Nest'' and ''Amen,'' on which special guest Mother Hale is honored for her Hale House for drug-addicted infants.

The competition on ABC will be ''MacGyver'' and the theatrical film, ''Jewel of the Nile.''

#90040u1811 02/09/1990 ~United Press International

WASHINGTON (FEB. 9) UPI - Ronald Reagan, saying he ''will not assert executive privilege,'' agreed Friday to provide videoptaped testimony for the Iran-Contra trial of John Poindexter, his former White House national security adviser.

The former president's surprising agreement to be questioned under oath for a videotaped desposition was announced by his lawyer, Theodore Olson.

Olson, in a response filed with U.S. District Judge Harold Greene, said Reagan would not contest the judge's earlier order he give the video testimony that Poindexter claims is essential to his defense.

However, Reagan already is appealing - on grounds of executive privilege - an order from the judge that he provide excerpts from his diaries for Poindexter's defense, and that issue is likely to delay the trial, now set to begin Feb. 20.

Poindexter, who was Reagan's No. 1 national security aide, faces five charges arising from the secret sale of arms to Iran and covert operations to aid the Nicaraguan Contra rebels.

Earlier this week, Greene ruled Reagan's testimony is important for Poindexter's defense and said the former president must submit several entries from his diaries as well as face questioning on videoptape. The video could be edited to delete any national security secrets before being shown to the Poindexter jury.

While Olson immediately appealed the order for the diaries, asserting they are protected from disclosure by the constitutional doctrine of executive privilege, he had until Friday to challenge the order for testimony.

In his response filed late Friday, Olson told the judge, ''Former President Reagan recognizes that this court has a considerable responsibility to protect and preserve the rights of the defendant in this case, as well as to be sensitive to the interests of the former president and the consitutional rights and duties of the presidency.

''The former president has determined to accept and comply with the court's judgment that a videotaped deposition is an appropriate vehicle for the resolution of these difficult issues.''

''Accordingly,'' Olson said, ''the former president hereby informs the court that he will not assert executive privilege with respect to the court's order requiring his testimony in this case in the form of a videotape deposition.''

Olson, noting the Feb. 20 trial date, requested that the deposition be taken at Reagan's office in Los Anegeles next Friday, Feb. 16.

Any national security concerns that might be raised by Reagan's testimony will have to be settled by the Bush administration, Olson added.

''The former president will defer to the incumbent president with respect to issues of executive privilege concerning national security or foreign affairs that may arise during the taking of the videotaped deposition,'' the court filing said.

Olson said two former presidents had ''accepted the medium of a videotape deposition as not incompatible with the rights, responsibilitires and duties of the president.''

While the testimony issue may be resolved, the judge still must consider the issue of the diaries in light of Supreme Court rulings on executive privilege.

The landmark high court case came in 1974, when the Supreme Court unanimously ruled that President Richard Nixon's claim to executive privilege in the Watergate scandal was outweighed by the right to evidence in a criminal case. Nixon was forced to turn over secret White House tape recordings and ultimately resigned to avoid impeachment.

Poindexter, a retired Navy rear admiral, is accused of lying to Congress and making other false statements regarding his role in the scandal that was exposed in November 1986.

Reagan approved the policy of secretly selling arms to Iran in 1985-86 in an effort to win the release of American hostages held in Lebanon.

Marine Lt. Col. Oliver North, a National Security Council aide, was a key figure in the clandestine Iran policy and the subsequent diversion of arms sales money to aid the anti-communist Contras. North was convicted last year on three felony counts for his role in the scandal, and is appealing.

Reagan successfully avoided testifying at North's trial because the judge in that case concluded his testimony was not essential since North reported to Poindexter, not Reagan.

But Greene ruled Reagan's testimony and diaries are revelant and material to Poindexter's defense, since Poindexter reported directly to Reagan and met with him almost every day.

Poindexter, who told Congress he did not tell Reagan about the secret Contra aid operation, now maintains that Reagan authorized his activities in the scandal.

#90040u1817 02/09/1990 ~United Press International

ATLANTA (FEB. 9) UPI - Insurance Commissioner Warren Evans ordered an immediate freeze Friday on Georgia's steadily increasing automobile insurance rates. Evans said he has been working to reduce the cost of auto insurance in the state since taking office in 1982.

"To date, our policy has been to work with the companies in hopes that a cooperative attitude would result in lower automobile rates on their part " he said. "Unfortunatley, the companies just haven't gotten the message. In spite of all our urging and encouragement, the best we've been able to get them to do is reduce their rate of increase.

"A reduction in the rate of increase is the best many states have been able to do," Evans said. "But that's not good enough for me, and it's not good enough for the people of Georgia."

"Auto insurance rates are too high and they must come down," he declared. "That's what I intend to do - bring them down." Evans said automobile insurance premiums across the state will be frozen "until further notice."

"This policy will remain in effect until each individual insurance company presents to my office its company plan to significantly lower its auto rates in our state," Evans said.

"Now I know there will be a great uproar by the companies, and probably from some in the news media as well," he said. "The companies will accuse me of ruining the insurance industry. The press will say it's just politics."

Evans has come under fire for Georgia's increasing insurance rates. Figures recently released by the insurance rating firm A.M. Best & Co. show Georgia's automobile insurance rates are the highest in the Southeast and the 16th higest in the nation.

The average cost of car insurance in the state increased by 5.45 percent in 1988, slightly below the national average of 6.3 percent. Between 1982 and 1988, the cost of auto insurance in Georgia went up by nearly 109 percent. Only three states in the country had larger increases during the period. Evans said lowering the state's car-insurance rates "requires sacrifice from the insurance industry."

"It requires cost-cutting and maximum efficiency on your part," he said, directing his remarks at the companies. "To date, you haven't done your best, and I'm saying that until you do - until you show me that you are serious about lowering your overall auto insurance rates - I'll stand firmly behind this policy." Initial industry reaction was negative.

"We haven't really looked at it that hard, because we don't have any rate filings right now," said Bob Sasser, public relations superintendent for State Farm Insurance Co., the state's largest insurer of automobiles.

"As far as a rate freeze in general, we are opposed to those types of things," he said. "We believe the competitive market should be the regulator of rates. With a freeze, you're doing nothing to control the underlying costs. Once the freeze is lifted ... then the rates go up faster than ever to catch up. That always happens historically when you have a price freeze of any type."

He said a long-term freeze could put insurance companies in a bind and

lead to "a shortage of insurance in the state." Spokesmen for Aetna and Cotton States insurance companies said they needed more time to study the freeze order.

Debbie Schecter, executive director of the Georgia Consumer Center and a critic of Evans, applauded the moratorium. "We have been calling for some relief for consumers who are facing ever-escalating insurance premiums, and we're happy that he's decided to finally take action that's responsive to consumers' needs," Schecter said. "We hope action like this will be in effect long after any political races are over.

"His record has been poor, and we're happy to see changes," she said. "This is one positive thing he has done, but lots of action recently has been anti-consumer."

Schecter cited Evans' opposition to a legislative proposal to create the position of an independent consumer advocate to guard the interests of consumers.

"But the changes backed by him and approved by the Senate weakens the bill so much that it will now fail to give consumers the representation they need in insurance rate reviews and other matters," she said.

"He wants the position included under his own department and that's totally unacceptable as far as we're concerned," she said. "Up until now there has been far too much influence and conflict of interest with the industry."

#90040u1828 02/09/1990 ~United Press International

NEW YORK (FEB. 9) UPI - A jury Friday acquitted reputed Mafia boss John Gotti of all charges in the shooting of a union leader, marking yet another victory for Gotti over the government and polishing his reputation for invincibility as the ''Teflon Don.''

The dapper Gotti, 49, the reputed head of the Gambino crime family, was whisked out of the courthouse behind a dozen court officers and sped away in a maroon town car with dark tinted windows.

Spectators packed the sidewalk outside state Supreme Court in Manhattan shouting, ''Yo, all right!'' and ''Right on John!'' as the Dapper Don, wearing a black double-breasted suit and black and red patterned tie, waved from inside his car.

As the seven-man, five-woman jury cleared Gotti of assault and conspiracy charges, bystanders in the crowd began to cheer and Acting Justice Edward McLaughlin warned them he would sentence each to 30 days in jail unless they kept quiet.

Gotti's co-defendant, Anthony Guerrieri, 60, a reputed Gambino soldier, was acquitted of the same charges.

Each time the jury foreman read a verdict of ''Not Guilty,'' Gotti formed a fist with his right hand, sparkling with a diamond pinky ring, and pumped it back in victory. His flamboyant lawyer, Bruce Cutler, kissed him and shook his hand in jubilation.

Gotti whispered to Cutler that the jury did ''a nice job'' and he was ''pleased,'' the attorney said.

Jurors, whose first names were withheld and who were sequestered from the start of the 11-day trial to prevent the jury tampering that has marked other Gotti prosecutions, later told reporters the government provided ''zilch'' evidence against Gotti.

''There was nothing to connect Mr. Gotti to what happened. Zilch,'' said one juror, referring to the May 7, 1986, wounding of John O'Connor, business agent of the Carpenters Union Local 608.

The government maintained Gotti ordered the violence in retaliation for the wrecking of a mob-linked restaurant built with non-union labor.

O'Connor, 53, was shot four times in the buttocks and legs by members of a murderous Irish gang known as the Westies, which was trying to curry favor with the Gambinos.

''The government did nothing to lead me to believe that Mr. Gotti would have a hand in this,'' said juror Richard Silensky, 42, an actor who also works in the mailroom of The New York Times.

''I feel justice was done by 12 people,'' he added.

The heart of the government's case was secretly recorded tapes of conversations at Gotti's alleged headquarters at the Bergin Hunt and Fish Club in Ozone Park, Queens, and in a prisoners visiting room at Rikers Island.

According to a government transcript of the Feb. 7, 1986, Queens conversation, Gotti determined O'Connor was responsible for the restaurant vandalism and told his underlings, ''We're gonna, gonna bust him up.''

The jurors said the tapes were muffled and inaudible at times.

Both jurors declined to reveal whether they believe Gotti was involved in organized crime. When asked his impression of Gotti, Silensky remarked ''dresses nice, great hair, looks successful.''

Outside court, the lead prosecutor, Assistant District Attorney Michael Cherkasky said, ''We lost, but I thought we gave it our best shot.''

He refused to comment on the government's efforts to link Gotti to the murder of his reputed gangland predecessor Paul Castellano, who was gunned down outside a Manhattan steakhouse in December 1985. Gotti allegedly immediately rose to the helm of the nation's most powerful crime family.

However, Cutler said he expects the government, which has prosecuted his client for mob-related crimes three times in the last four years, to continue its efforts to convict Gotti.

''I hope I don't have to go to court again with John Gotti ... We feel terrific right now,'' Cutler said.

Gotti has consistently slipped from the government's grip in recent years and has been described by law enforcement officials as the most elusive gangster since Al Capone.

In 1985, he went to trial for assaulting a refrigerator repairman and robbing him of $325 during an argument over a parking space in Queens. The repairman learned who Gotti was, checked himself into a hospital, developed amnesia and said he could no longer remember who hit him. The judge had no choice but to dismiss the charges.

Gotti also was acquitted in 1986 of running an 18-year racketeering enterprise that included gambling, loansharking, truck hijackings, armored car robberies and three murders from 1968 to 1985.

#90040u1832 02/09/1990 ~United Press International

(FEB. 9) UPI - A New York jury is spending a fourth day deliberating assault charges against reputed mob boss John Gotti. The jurors began the day by re-hearing testimony from an admitted killer who is the state's star witness. The charges stem from a 1986 attack on a union agent who was shot four times in the buttocks.

A drug ''mule'' who survived last month's Avianca plane crash will have a bedside arraignment today in North Shore University Hospital in Manhasset, New York. The 31-year-old was charged yesterday with drug possession for carrying inside his body 102 condoms filled with cocaine worth more than 250-thousand dollars.

A new study disputes claims that cutting down old forests and replacing them with younger trees will benefit Earth's atmosphere. Researchers at Oregon State University say in the Journal Science that replacing older

trees with young, fast-growing trees won't reduct problems with the ''greenhouse effect'' that traps heat close to the Earth's surface.

#90040u1834 02/09/1990 ~United Press International

MOSCOW (FEB. 9) UPI - Mikhail Gorbachev told Secretary of State James Baker Friday Moscow will accept President Bush's troop-reduction proposal for Europe only if 30,000 U.S. troops left out of Bush's plan are removed from Western Europe.

Baker, on the third day of a four-day visit, met with Gorbachev to discuss the June superpower summit and then held marathon talks with Foreign Minister Eduard Shevardadze on the full range of U.S.-Soviet relations.

In negotiations at the Kremlin, Baker heard the Soviet leader's counteroffer on Bush's plan for troop cuts and responded by imposing a U.S. condition on a separate Gorbachev proposal.

Baker told the Soviet leader that Washington no longer opposes his idea for a 35-nation meeting this year to deal with revolutionary change in Europe, but he said such a conference should declare free elections a basic human right, the official Tass news agency reported.

Baker arrived Wednesday for meetings in Moscow as Communist Party leaders

announced the approval of a historic program sweeping away single-party rule and establishing a presidential system of government with direct popular elections.

The secretary of state came to Moscow to try to bring the two superpowers closer to finalizing major accords on cutting conventional forces in Europe and reducing nuclear arms, in time for Bush and Gorbachev to sign the pacts at their summit in four months.

''The U.S.S.R. accepts the president's proposal to reduce Soviet and American troops on foreign territories in Europe down to 195,000 - but not in Central Europe as suggested by Bush, but in the entire European zone outside the Soviet Union,'' Gorbachev told Baker, according to Tass.

Tass quoted Gorbachev as having said: ''If this proposal does not suit you we suggest the figure of 225,000 for the entire European region.''

Baker promised a response to Gorbachev's counteroffer by the time of his scheduled departure Saturday, Tass said.

In his State of the Union address last month, Bush proposed that Washington and Moscow reduce their troop levels in central Europe to 195,000, a level that would impose far greater cuts on the Soviet Union.

The president did not include in the 195,000 ceiling 30,000 U.S. troops based in Britain and elsewhere in Western Europe, which Moscow believes threaten its security as much as Soivet soldiers in central Europe threaten the West.

Gorbachev told Baker that the conventional forces accord could be endorsed this year at the 35-nation ''Helsinki 2'' meeting he has proposed as a follow- up to the 1975 Conference on Security and Cooperation in Europe in the Finnish capital.

''If the agreement on conventional weapons and armed forces is signed ... the meeting itself would become a major historic event,'' Gorbachev said.

Bush responded coolly to the proposal for a European meeting when Gorbachev made it at their summit in Malta two months ago, but Baker said the United States, following even greater change in Eastern Europe, now views the idea of a 35-nation gathering more positively - as long as it addresses human-rights issues as well as security concerns.

''The change in the U.S. attitude toward the holding of an all-European meeting in 1990 within the Helsinki framework, which Baker spoke of (to Gorbachev), is important,'' Tass said.

''Baker suggested proclaiming at the meeting that free elections are a

human right,'' it said.

The two men also discussed the question of German reunification, regional conflicts in Afghanistan and Central America, and possible bans on the production of chemical weapons and the testing of nuclear arms, Tass said.

After his session with Gorbachev at the Kremlin, Baker huddled with Shevardnadze in a meeting that lasted nearly seven hours, running into the late evening.

Tass said the planned three-hour meeting had ''turned out to be unexpectedly long,'' adding, ''official spokesmen of the (two) sides did not disclose the reason'' for the talks' extension.

A U.S. official traveling with Baker said earlier, however, ''We threw a big wad of stuff at them'' and added the American proposals were "pretty complex."

U.S. and Soviet officials said the two men, in their meeting Thursday, made progress on technical arms control issues and on the future of Afghanistan but disagreed on Soviet shipments of jets to Cuba.

OTTAWA (FEB. 9) UPI - The Canadian government said Friday it signed a new, omnibus agreement with Boeing of Canada Ltd. worth up to $135 million to resolve a four year old dispute arising from the sale of a Toronto plant to Boeing.

Harvie Andre, Canada's industry, science and technology minister, said in a statement the agreement supports continued operations and jobs and that it ''closes the book'' on its dispute with Boeing.

Ron Woodard, president of Boeing Canada, de Havilland division, said ''We are very pleased to have the whole thing completed''. He added, ''we are convinced that it is an equitable settlement for both sides.''

The agreement announced Friday could be worth up to $135 million to Boeing's de Havilland's division in Toronto with two thirds of the money conditional on future investment and production levels.

The $135 million consists of $96 million in cash with repayment of $43 million conditioned on operating and investment goals and $39 million in deferred royalties and research repayments de Havilland was to make to the Canadian government in several years.

The agreement also releases the Canadian government from contractural

obligations and loan insurance for sales financing in Canada and the United States when current committments have been met.

The agreement recognizes that Boeing has invested more than $252 million in research and development at the Toronto plant.

The Canadian government said it assumed in excess of $252 million in costs associated with the sale of de Havilland, including $92.74 million which Boeing said it was owed for health and safety improvements at the Toronto plant.

In 1986, Boeing Co. of Seattle purchased the de Havilland Aircraft Company of Canada from the Canadian government for $131.8 million.

Only months after the purchase was completed, Boeing filed a claim in Ontario courts for health and safety deficiencies at the Toronto plant. Negotiations to settle the claim were underway for a year between Boeing and the Canadian government.

WASHINGTON (FEB. 9) UPI - President Bush declared a major disaster in American Samoa on Friday and ordered federal aid to supplement state and local relief efforts in the wake of Hurricane Ofa earlier this month, the White House said.

Bush's action makes federal funding available to those affected in the territory by the hurricane that ravaged the area Feb. 2.

The White House said in a statement that assistance can include temporary housing, grants, low-cost loans to cover uninsured property losses and other programs to help individuals and business owners recover from the effects of the disaster.

Federal funding also is available to eligible local governments on a cost-sharing basis for the repair or replacement of public facilities damaged by the hurricane.

Tommie Hamner of the Federal Emergency Management Agency's regional office in San Francisco will coordinate the federal recovery operations.

#90040u1855 02/09/1990 ~United Press International

ANCHORAGE, AK (FEB. 9) UPI - The state judge in the Exxon skipper's criminal trial opened the door Friday for defense lawyers to prove former Capt. Joseph Hazelwood innocent of recklessness by showing he relied on a woefully inadequate Coast Guard vessel traffic control system.

''The door is opened to point to the Coast Guard fault'' in the wreck of the Exxon Valdez, said defense lawyer Dick Madson, who won permission to show that tanker captains such as Hazelwood had reason to believe the Coast Guard monitored their movements in Prince William Sound in order to prevent accidents like the March 24 Exxon grounding and oil spill.

State Superior Court Judge Karl Johnstone set boundaries for just how much evidence about the Coast Guard vessel traffic system may go before the jury. But Madson said Johnstone's ruling was a ''fairly significant'' victory for defense lawyers seeking to shift blame off Hazelwood onto the Coast Guard.

Johnstone ruled against a defense request to reveal to jurors that the vessel controller on the duty when the Exxon Valdez hit Bligh Reef later flunked an alcohol test.

Madson suggested that drinking by the controller, not the skipper, contributed to the tanker wreck, which caused America's worst oil spill, nearly 11 million gallons.

Hazelwood, 43, of Huntington, N.Y., is charged with operating the Exxon Valdez while intoxicated, reckless endangerment, negligent discharge of oil and criminal mischief. He faces up to seven years, three months in jail and a $61,000 fine if convicted of the three misdemeanors and a felony.

Johnstone limited what evidence may be introduced to prevent the defense from putting the Coast Guard on trial. Johnstone noted that the Coast

Guard might have made many improvements in its vessel traffic system prior to the accident which could have prevented it, but that such a wide-ranging discussion was irrelevant to Hazelwood's guilt or innocence.

Prosecutor Brent Cole argued that none of the Coast Guard actions or inactions caused the wreck. Cole said Hazelwood caused it.

Johnstone agreed to let defense lawyers quiz Coast Guard controllers about their existing operation and to let jurors see the Coast Guard operations manual for Prince William Sound - a booklet required on tankers and which essentially says the Coast Guard monitors ship movements to prevent accidents.

In fact, the Exxon Valdez sailed off Coast Guard radar, with permission to take a detour around icebergs, when crewmen operating the ship in Hazelwood's place failed to return to tanker lanes in time to avoid Bligh Reef.

If Hazelwood was relying on the Coast Guard vessel traffic control system, as described in the operating manual, for an extra set of eyes to monitor his tanker movements, then that shows he was not criminally reckless, Madson said.

Madson failed in his bid to introduce alcohol and drug tests administered to Bruce Blandford, the Coast Guard radar watchman on duty when the wreck occurred. Blandford went on duty at 11:45 p.m. March 23. The Exxon Valdez ran aground just after midnight on March 24 and Blandford worked until 11:45 a.m. but was called back at 2 p.m. and required to give a urine sample - which showed an alcohol level of 0.203, double the legal limit.

Blandford later told investigators he ''was pretty tired and stressed out'' after his shift and went home after work and drank three or four bourbons with Coke.

Johnstone granted a prosecution request to keep Blandford's alcohol test from jurors unless the defense has evidence that Blandford was under the influence of alcohol while at work as the Coast Guard watchstander.

Defense lawyer Thomas Russo said he found it ironic that Blandford's alcohol test, taken 14 hours after the wreck, was inadmissible, but that Hazelwood's alcohol test, taken nearly 11 hours after the wreck, was admissible and grounds for a criminal charge. Hazelwood registered 0.061 percent blood alcohol, 50 percent higher than the Coast Guard limit of .04 but below the state driving limit of 0.10.

Unless there was evidence that Blandford had alcohol in his system during work, the test would improperly prejudice the jury, Johnstone said. The judge also excluded drugs test administered March 26 that showed morphine

in Blandford's system and a trace of marijuana in Gordon Taylor, the Coast Guard watchstander on duty before Blandford. Both men were civilian employees.

Prosecutors argued that evidence of improper Coast Guard actions or negligence would only confuse jurors and that Hazelwood alone - out of alcohol-impaired recklessness - put the Exxon Valdez on a high-speed detour straight toward Bligh Reef. Prosecutors said that no matter what the Coast Guard and its employees did or didn't do, Hazelwood's actions caused the wreck.

Friday's court session took place without the jury, partly because of the need to argue over what evidence jurors would be allowed to consider, but also because one of Hazelwood's defense lawyers, Michael Chalos of New York, returned home because his pregnant wife Maureen was to give birth and he asked the judge to delay additional witness testimony in the trial until Monday.

BY VERNON SCOTT

HOLLYWOOD (FEB. 9) UPI - Actress Elizabeth Arlen finds roles in movies in an unusual way - she auditions for parts written for men.

Arlen, who is no relation to the late actor Richard Arlen, and whose name is frequently mistaken for a cosmetics firm, says that in an era of male domination in movies, her battle cry is: ''If you can't beat 'em, join 'em.''

She has appeared - as a woman - in such films as ''St. Elmo's Fire,'' ''D.O.A.,'' ''Violated'' and ''Salamander.''

But in two other films, ''The Whoopee Boys'' and ''Traxx,'' the roles were originally scripted for men.

Thanks to her unadulterated brashness and a belief that all performers are androgynous, Arlen wrested the roles away and persuaded the directors to re-write the roles for a woman.

Although she hasn't examined her propensity for such shenanigans, Arlen might trace her instinct back to high school, when at 16 she played the title role in a production of ''Hamlet.''

''If you're a performer, you should be able to play any role. A part is a part, no matter if it's a man or a woman,'' she said.

''There are so few good parts written for women these days,'' she continued, ''it pay to read a script looking for juicy male roles and then going for them. But you can only do that if you audition for a female role first.

''When I went for 'The Whoppee Boys,' I read the part of a wimpy schoolgirl. But there was a 60-year-old ax murderer in the story, a role I loved. There was a lot I could do with the character.

''After I read for the girl, I asked (director) John Byrum if I could do a take-off on the ax murderer. He laughed and told me to go ahead.

''He was fascinated when I did the reading and then said, 'I'll see you on location in Miami' and walked out of the room. I didn't know whether I got the part of the girl or the part of the murderer.

''My agent called the next day and said they wanted me for the murderer. Of course, I didn't play a 60-year-old man. I played the part as a woman. We pretended she was a hangover from the '60s to give her another dimension.''

Encouraged by her success, Arlen then went for a male role in ''Traxx.''

''There were only two women in the entire film,'' she said. ''I was to read for the role of a tall blonde. We'll I'm not tall or blonde. I knew I wouldn't get the part. She was kind of a bimbo.

''The night before the reading I went through the script and saw the unusual role of an ACLU attorney named Malcolm Howard. So after I read for the blonde for the casting director, I asked if I could do the attorney.

''At first she thought I was kidding and then said, 'All right, why not.' It was a very outrageous role. Then I read a long monologue and the casting director and her assistant began laughing uncontrollably.

''They took me to the director and I did the reading again. I made her as funny as I could. Afterward, he just sat there rubbing his chin and stared at me, pondering. It was out of left field for him.

''He finally said, 'You know, it may just work.' He turned to the writer and said, 'It might be funnier if the attorney is a broad.'

''I got up and asked them to think about it. A week later they telephoned to say I had the part. It was a very funny script and a good picture, but 'Traxx' didn't work for some reason.''

Arlen visited a psychic before getting a new role.

''The medium told me I had lived most of my past lives as a man,'' she said. But in the film, ''The First Power,'' an occult thriller due out this spring, Arlen plays a woman - a nun. She said she didn't even try for the part of the priest.

WASHINGTON (FEB. 9) UPI - The American Pharmaceutical Association lashed out Friday at a drug company's ''monopolistic'' method of distributing a new drug to people with schizophrenia.

In October, the Food and Drug Administration approved clozapine, made by Sandoz Pharmaceutical Corp., of East Hanover, N.J., for use in schizophrenia patients not helped by other medications.

At that time, the FDA required Sandoz to set up a method of monitoring patients for a potentially serious side effect from the drug. About 1 percent of patients taking clozapine, sold under the trade name Clozaril, develop agranulocytosis, a blood disorder that can cause death.

To meet the FDA requirement, Sandoz set up a separate effort to deliver prescribed tablets to patients and collect blood samples for laboratory tests. The Clozaril ''patient management system'' is run by Caremark and the blood testing is done by Roche Biomedical Laboratories, Sandoz officials said.

In a letter sent to Sandoz, John Gans, president of the pharmaceutical association, said the group is ''greatly distressed'' by ''this inappropriately restrictive and unnecessary system for drug distribution.''

Only staff from the patient management system can deliver the Clozaril tablets or draw blood samples, Sandoz officials said. Patients can get a refill of Clorazil only if they undergo a weekly blood test.

Gans claimed the approach needlessly ''supplants the societally sanctioned roles of pharmacists and physicians.''

''The estimated charges of approximately $9,000 per patient per year for clozapine therapy through the (Sandoz program) substantially exceed costs for drug therapy and associated monitoring in the current health care system,'' he said. ''The monopolistic mechanism by which patients and providers secure both drug and related monitoring services ... clearly contributes to this excess.''

Dr. Mario Buzzolini, chief of scientific affairs for Sandoz, said the only reason the company set up the system is to safeguard patients who receive Clorazil ''and might risk a potentially serious blood disorder.''

''A good monitoring system is the only documented way to do this,'' said Buzzolini, adding many schizophrenic patients have a history of not complying with medication or check-up schedules.

The Sandoz official said the pharmaceutical association, of which Sandoz is a member, apparently objects to the Clozaril distribution plan because ''it is different'' and circumvents traditional middlemen like pharmacists.

About 1 percent of the population, 3 million Americans, will develop schizophrenia at some point in their lives. The FDA said about 200,000 patients may be candidates for clozapine.

Without treatment, chronic schizophrenia patients often are unable to care for themselves and mnay live in fear caused by hallucinations and delusions.

WINDHOEK, NAMIBIA (FEB. 9) UPI - Namibia's constituent assembly unanimously adopted a new constitution for the territory Friday, opening the way for independence for Africa's last colony next month.

The constitution was agreed on by all 72 members of the assembly at an open-air ceremony on the steps of the colonial Tintenpalast administration building.

''Now therefore, we the people of Namibia accept and adopt this constitution as the fundamental law of our sovereign and independent republic,'' assembly chairman Hage Geingob said.

The constitution provides for a bill of rights, a bicameral parliament and a strong executive presidency. Apartheid is prohibited and there is no provision for the death penalty.

Sam Nujoma, the president-designate and leader of the South West African People's Organization, said SWAPO viewed the document as an impressive summation of the universally acclaimed principles, ideas and values of a democratic society.

''The masses of our people have a constitution which embodies their aspirations to be masters of their own destiny,'' said Nujoma, who led SWAPO in 23-year guerrilla war against South African-led forces.

''Present and future leaders will be governed in their actions by a constitiution in which human rights are firmly entrenched,'' Nujoma said.

U.N. Secretary-General Javier Perez de Cuellar informed the Security Council Friday of the developments in Namibia, where a 7,000-strong U.N. peacekeeping force supervised elections for the assembly last November. The force's military components and a number of civilians from 23 countries have returned home.

''The secretary-general warmly welcomes these developments, which augur well for the future of Namibia and its people,'' U.N. spokesman Francois Giuliani said.

Giuliani said the U.N. chief executive plans to attend Namibian independence day March 21 in Windhoek, the capital of the southwestern African territory, a former German colony occupied by South Africa since 1915.

LIMA, PERU (FEB. 9) UPI - President Alan Garcia has invited farmers who grow the coca leaf, the main ingredient in cocaine, to the anti-drug summit next week with President Bush in Cartagena, Colombia, a newspaper reported Friday.

Garcia told the newspaper La Republica that the invitation would allow the growers to talk directly to Bush about alternative crops that would also guarantee them a living.

''It is not a matter of eradicating the cultivation of that product with the use of Spike (herbicide) or by sending troops,'' Garcia said.

''What must be done is economic help so that the products that can be harvested have an easy market and not like is happening with coffee or chocolate whose prices have fallen on the international market.''

He made the statements after meeting with representatives from 42 agricultural cooperatives from the Upper Huallaga Valley, the area that produces more coca leaf than anywhere else in the world.

He proposed that three representatives from among the 200,000 peasant farmers from the valley participate in Wednesday's summit.

Garcia said the coca growers would support the substitution of other crops when the United States promised a market for them.

''It is essential that Bush speaks seriously and contributes to these countries because everything else is only speech and electoralism,'' Garcia said.

Garcia and Bolivian officials have said they will ask Bush at the summit for funds or legislation that will provide a steady market for peasants who switch from growing the profitable coca leaf to other crops.

The request is the main feature of the two countries' proposal they will carry to the summit in the Caribbean resort city.

#90040u1995 02/09/1990 ~United Press International

SALT LAKE CITY (FEB. 9) UPI - Hogle Zoo has a new resident, a week-old orangutan that animal keepers say is a bonus for all U.S. zoos.

Primate supervisor Bob Pratt said Friday that the monkey's parents were captured wild in Borneo, making the newborn ''a very, very rare animal'' that will be especially valued when it is able to be used for breeding.

''Orangutans aren't being brought out of the wild now, so many orangutans born in United States zoos are from the same gene pool,'' Pratt said. ''But this fellow won't meet his sister in another zoo.''

The infant, dubbed J.J., was born Feb. 1. His mother is on loan from the

San Diego Zoo.

''His birth will be well received throughout the United States because he's basically a new gene pool,'' said Pratt.

He is one of about 330 orangutans in American zoos from the subspecies that originated in Borneo. U.S. zoos also have about 280 of the apes from Sumatra, and there are a number of animals carrying both genes, Pratt said.

The baby orangutan is the fifth born at Hogle Zoo. Under breeding loan programs, Pratt said, J.J. belongs to the San Diego Zoo.

If J.J. has a normal life, he will become sexually mature in about eight years and will live to be about 45, said Pratt.

#90040u2009 02/09/1990 ~United Press International
CHICAGO (FEB. 9) UPI - The top executive in charge of General Motors' Truck & Bus Group said Friday GM likely will close its full-sized van plant in Scarborough, Ontario, by mid-1991 or 1992.

GM Vice President Clifford Vaughan confirmed plans by the giant automaker to transfer van production by then from its 2,500-worker Scarborough plant to its truck plant in Flint, Mich.

''We are looking at ending production in the 1992- or 1993-model timeframe '' Vaughan said during a preview for the Chicago Auto Show.

Just prior to that, GM will consolidate production by moving full-sized van production from its Lordstown, Ohio, van plant to Flint by 1992 as previously announced, causing another 2,500 workers at the Lordstown van facility to lose their jobs.

No future product is scheduled for Scarborough beyond 1992, Vaughan said, although he noted a study has been under way for some time to see if there are any possibilities.

Production of the compact Chevrolet Cavalier and Sunbird cars will be consolidated at GM's car plant in Lordstown by 1992, freeing GM's car plant in Janesville, Wis., to build the all-new Suburban truck model due for the 1992-model year, Vaughan also said.

The new model may be offered with a turbocharged diesel engine, he said.

GM will not redesign its full-sized Chevrolet and GMC vans until 1996, with Vaughan acknowledging that program has been pushed back by a year.

He also said it may hurt the carmaker because Ford Motor Co.'s full-sized Econoline van is to be redone for 1992.

''However it is possible we could move up our program once again to 1995 '' he said.

Vaughan said GM hopes to sell about 140,000 units of its new four-door Chevrolet Blazer and and GMC Jimmy compact sport utility vehicles a year when they go on sale this spring as 1991 models. Another 80,000 a year will be the two-door versions.

GM will not redesign those trucks until the 1993-model year, Vaughan said.

(FEB. 9) UPI - Soviet President Gorbachev today held face-to-face talks with visiting U-S Secretary of State Baker on cuts in strategic arms and conventional forces. Gorbachev was in a lively, garrulous mood as he and Baker met in the ornate St. Catherines office in the Kremlin. He told American reporters that U-S troop cut proposals will be given ''very serious consideration.'' And, he added- quoting- ''It would be good if we can co-operate, as we are doing now.''

Britain is on the defensive, putting airports on full alert and expelling nine Iranians reportedly tied to a plot to kill Salman Rushdie . A Home Office spokesman would NOT directly respond to the reports concerning the British author who has been in hiding for more than a year. But the official did say- quote- ''We are still in the business of protecting individuals.'' The U-S State Department says terrorists may be planning violence to mark the 11th anniversary of the Iranian revolution.

China is continuing the crackdown begun eight months ago when the army crushed the pro-democracy movement in Beijing by firing on unarmed protesters. China's official media says the latest move to wipe out dissent involves tough regulations governing all aspects of campus life. Sources close to the rules say that as of tomorrow, all Chinese students will have to work five years in China before studying overseas.

Another shift of the wind is raising hopes that a huge oil slick will drift away from the southern California shore. Sticky oil globules and a brown foam from Wednesday's 300-thousand-gallon tanker spill cover at least five miles of the shore at Newport Beach. But Coast Guard officials say the change in the winds is pushing the slick away from the shore again. Officials also say calm seas aided in clean-up efforts as some 250 people today mopped up the mess with absorbent rags.

#90040u2067 02/09/1990 ~United Press International
(FEB. 9) UPI - A report published today says a Horizon Airlines pilot used cocaine on the average of more than once a week for 18 months before officials yanked his license last week. The Federal Aviation Administration provided the information in response to a Freedom of Information Act request. But the F-A-A is NOT naming the pilot, saying it would invade his privacy.

The Food and Drug Administration is re-thinking its policy on health claims by food companies. The F-D-A is proposing limits on such claims to well-documented links such as fat and heart disease. The Reagan administration first allowed health claims for food products- a move that

led to a virtual avalanche of labels and advertisements touting various products as disease preventers.

Rescuers continue to search for three people still missing following the collision of three boats this morning on the St. Johns River west of Daytona Beach, Florida. Three people were rescued following the mishap in a popular fishing area about 30 miles inland from Daytona. Authorities are still trying to determine what caused the wreck.

-30- 1265

#90040u2082 02/09/1990 ~United Press International

NEW YORK (FEB. 9) UPI - Curious residents of a Queens neighborhood that John Gotti calls home crowded Friday outside the unassuming social club that prosecutors claim serves as the nerve center for the largest Mafia empire in the country.

''He knows all his fans are out here,'' one middle-age woman said, anticipating Gotti's return to the Bergin Hunt and Fish Club in the New York City section of South Ozone Park to celebrate his victory over assault charges.

Gotti and his co-defendant, Anthony Guerrieri, were acquitted earlier in the day of charges they ordered the shooting of a union leader in a mob dispute.

Following the courtroom victory, the man the media has labeled the ''Dapper Don'' for his sartorial flair held court at his other hangout, the Ravenite Social Club in Manhattan, where well-wishers came to celebrate with Gotti.

Victor Serino, 36, owner of an art gallery near the Manhattan club, said he was walking through the streets of Little Italy when the Gotti entourage arrived.

''This car pulled up and there was some 20 to 30 people around and lots of clapping,'' he said. ''Some ladies kissed him and there were shouts of 'Congratulations!' 'Congratulations!''

''Everybody knows him because he's on TV all the time.''

In Queens, where Gotti claims he plies his trade as a plumbing salesman, banners praising his legal victory hung above the streets and red balloons filled storefront windows in celebration of the local folk hero, who is known for throwing Fourth of July fireworks bashes in defiance of local police.

One banner hanging from an overpass proclaimed ''Congratulations John and

Tony. We love you - 101st Avenue.''

A woman said that when the trial began, ''they had banners up all along 101st Avenue'' wishing Gotti well but the police soon ordered them taken down.

Although most people in the residential Queens neighborhood voiced their support for him, a few mocked the verdict.

''I think the justice system stinks,'' said one woman who refused to give her name.

''The man is guilty of murder and robbery. It's ridiculous to think he's innocent. It's obscene. They think the man is an idol (around here). I think he should be locked up.''

#90040u2089 02/09/1990 ~United Press International

(FEB. 9) - The market's belief that there is a relative abundance of supplies drove gasoline prices down more than a penny a gallon on the New York Mercantile Exchange Friday and nearly 5 cents on the week, sparking a retreat in crude values.

''The market-moving fundamentals, as perceived right now, is that there is plenty of gasoline around,'' said Harvey Budkofsky, energy futures specialist with Cargill Investor Services in New York.

''The high inventory numbers, that's what's giving the market a negative tint right now,'' echoed George Konikowski of New York's Smith Barney

Harris Upham & Co.

He was referring to the American Petroleum Institute's weekly report Tuesday showing crude oil, gasoline and heating oil inventories rose 7.7 million, 4.6 million and 4.5 million barrels respectively last week. Gasoline had risen a total of 16.8 million barrels in the three prior weeks.

A month ago, gasoline supplies had fallen way below normal levels as a result of the December freeze that shut down U.S. Gulf Coast refineries and reduced nationwide refinery output by more than 11 percent.

Unleaded gasoline for March delivery skidded 1.61 cents on the Merc Friday to 59.56 cents a gallon, 4.66 cents less than a week ago. On the New York Harbor cash market, it was bid 58.85 cents a gallon, down 1.65 cents on the day and 4.50 cents on the week.

The benchmark West Texas Intermediate crude for March delivery fell 35 cents to $21.74 a barrel, $1.28 below last week's Merc close. WTI fell 40 cents to $21.75 a barrel on the U.S. Gulf Coast cash market, $1.25 below last week.

And three refineries - Sun Co., Radnor, Pa., Marathon Oil Co., the Findlay Ohio unit of USX Corp. and Citgo Petroleum Corp., Tulsa, Okla. - cut by 75 cents Friday the posted price they will pay for crude at the wellhead to $20.75 a barrel for WTI.

Konikowski thought WTI prices might have fallen more but for the reluctance of some U.S. refiners to accept foreign crude.

''I'm hearing some of the refiners don't want to accept foreign crude, which is bidding up WTI,'' the analyst said. But he added, ''I think we have a little more to go on the downside for crude because of the high inventory numbers.''

Heating oil March futures contracts slipped to 55.08 cents a gallon, down 0.24 cent on the day and 3.14 cents on the week. The produce was bid 55 cents a gallon on the New York Harbor cash market, less 0.70 cent on the day and 4.25 cents on the week.

Despite weak demand resulting from unseasonably warm weather recently, the analysts did not see heating oil prices falling more without a further drop in crude because of the narrow ''crack spread'' - the difference between the price of heating oil and the crude it is made from.

The crack spread has has now fallen to $1.39 a barrel.

The low demand for heating oil is reportedly also prompting some refiners

to shutdown for an early start on the normal ''turnaround'' of their plants to emphasize output of gasoline instead of heating oil output, the analysts said.

This in turn lowers worldwide demand for crude, they said.

Nevertheless, the Merc set three new records for open interest WTI contracts this week suggesting heavy crude trading lies ahead. It registered a record 305,855 contracts Wednesday, 313,194 Thursday and 317,383 Friday.

An open interest contract is when a trader takes a futures position to buy or sell awaiting action by another trader to complete the deal.

On the European cash market, Britain's widely traded North Sea Brent crude slipped 7 cents to $19.53 a barrel.

The United Arab Emirates' Dubai light - the key OPEC crude from the Middle East exported mainly to the Far East - eased down 2 cents to $16.53 a barrel, 42 cents less than last Friday.

CHICAGO (FEB. 9) UPI - Chrysler Corp., which bought Lamborghini in 1987, Friday introduced the Diablo, the successor to the Italian carmaker's legendary Countach that first bowed 19 years ago.

It's capable of just about quadrupling the national speed limit. It zooms from zero to 60 mph in a shade over 4 seconds.

And it costs just about $190,000. That's $95,000 a seat; $53 a pound.

Making its North American debut at the 82nd annual Chicago Auto Show, the Diablo is more powerful than the Countach, which now costs just $145,000 but can muster a top speed of only 180 mph.

Still, Chrysler says the Diablo's production run, expected eventually to rise to 650 a year at Lamborghini's Sant'Agata Bolognese factory, is virtually sold out through 1991, meaning no guaranteed rebates, distress sales or blaring television ads will be needed to sell these cars.

Its U.S. sales should range between 110 units and 350 units a year.

Chrysler Vice Chairman Gerald Greenwald called the Diablo ''the fastest production car on the planet'' and ''the most audacious new vehicle to enter the new car market.''

The Diablo retains the ''scissor door'' design used in the Countach. Behind its two seats lies a 5.7-liter, 48-valve V12 engine rated at 485 horsepower and able to rocket this car to a top speed of 202 mph.

Chrysler is billing the Diablo as ''the ultimate fantasy machine.'' Yet the nation's No. 3 carmaker, known more for selling family minivans than low slung, exotic ''driving machines,'' had little to do with the Diablo other than help Lamborghini financially to get it to market.

That may be good news, after Chrysler's failure with the TC by Maserati, a $33,000 roadster designed under a joint venture between those two carmakers and loosely based on Chrysler's LeBaron convertible that costs about half the TC's price.

''The Diablo is fully built by Lamborghini,'' Chrysler spokesman Tom Kowaleski said. ''But we lent our engineering and design expertise to the project.''

Translated, that means Chrysler aided Lamborghini by allowing it use of its supercomputers at its Highland Park, Mich., headquarters, and helped Lamborghini develop the Diablo's electronic engine management system.

Chrysler's designers also had a hand in fine-tuning the Diablo's final shape to make it what Kowaleski called ''more producable.''

Despite the Diablo's G-force handling characteristics and its blinding speed, early versions will be equipped with motorized seat belts instead of air bags.

Air bags now are standard on all Chrysler cars built in North America.

While the latest Lamborghini is sure to turn a head or two at auto shows, what about those folks who have trouble doling out $200,000 for a new set of wheels?

And what about industry observers who say Chrysler should be concentrating on filling its product line with more affordable cars to boost its sagging profits and stock price?

''All I can say is that we have major refinements in engines, suspensions and steering for 1991,'' Kowaleski said, adding that Chrysler's capital spending is pegged at $15 billion during the next five years.

CAIRO, EGYPT (FEB. 9) UPI - Guards at the palace of President Hosni Mubarak shot and killed a youth who rammed the gates of the presidential home in an automobile Friday evening and then opened fire with a revolver, an Interior Ministry spokesman said.

Two guards were wounded in the attack, which apparently was carried out by a deranged 17-year-old youth who acted alone, authorities said. The youth had quarreled with his family earlier in the day and stormed out of his

house vowing to ''cause a catastrophe,'' the Middle East News Agency reported.

Mubarak was not inside the official presidential residence when the youth rammed his Fiat 121 into the palace gates about 7:20 p.m. in the posh northern Cairo suburb of Heliopolis, the Interior Ministry spokesman said.

''The youth tried to smash his car through the gates of the palace, then got out and started firing at guards with a revolver, injuring two of them in the legs. The guards were forced to fire back, killing him instantly,'' the spokesman said.

He identified the youth as Adham Mohammad Havez, 17, and described him as ''deranged.'' Residents of the Heliopolis neighborhood said they could hear the gunfire outside the presidential palace, which one witness said lasted 10 minutes.

The official Middle East News Agency quoted the youth's mother as saying her son stormed out of the house vowing to ''cause a catastrophe'' following a family argument.

Mubarak was in Aswan, 438 miles south of Cairo, and was speaking on the telephone with Libyan leader Moammar Gadhafi when the incident occurred. He issued a statement that ''expressed his astonishment and sadness that a youth from a good family should commit such an act,'' MENA reported.

MENA said the youth used a revolver registered under his father's name in the attack.

Diplomats said the shooting was the first incident of its kind since Mubarak assumed the presidency in October 1981. Police ruled out any link between the youth and organized opponents of Mubarak.

''This was an isolated incident ... a lone gunman,'' a police source said.

Mubarak's predecessor, President Anwar Sadat, was assassinated by Moslem fundamentalists Oct. 6, 1981.

#90040u2143 02/09/1990 ~United Press International

HARTFORD, CT (FEB. 9) UPI - A Madison Avenue advertising agency agreed Friday to pay a $500,000 fine to settle federal charges it paid kickbacks in connection with its award-winning ''Come Back to Jamaica'' campaign.

Young & Rubicam Inc., one of the world's largest ad agencies, was indicted Oct. 6 on charges the agency paid $900,000 to former Jamaica Tourism Minister Eric Anthony Abrahams and an adviser, Arnold Foote Jr.

The agency pleaded guilty Friday before U.S. District Judge Peter C. Dorsey in Hartford to conspiring to violate the Foreign Corrupt Practices Act.

U.S. Attorney Stanley A. Twardy Jr. said that in making the plea, Young & Rubicam admitted to conspiring to make payments to Foote, knowing he would use some of the money to bribe Abrahams.

''They admitted they used the mail to pay Foote. Their guilty plea says, 'We did this,''' Twardy said.

Young & Rubicam officials claimed, however, the plea agreement cleared the company.

The company said that beginning in 1981, some of its employees heard rumors that Foote allegedly was using money paid to him by the agency to bribe Abrahams. Foote had been retained by Young & Rubicam to represent the agency in Jamaica.

The agency agreed to the plea because, given the knowledge of some employees of alleged bribes, ''it can be construed that it technically entered into 'conspiracy,''' company officials said.

The indictment alleged kickbacks were paid on behalf of Young & Rubicam to Abrahams and Foote from the awarding of the account to the agency in 1981 and September 1986, Twardy said.

Abrahams and Foote each were charged with one count of racketeering, Twardy said. They remain in Jamaica and have not appeared in U.S. federal court on the charge.

The government Friday dismissed all charges pending against Arthur R. Klein, an executive vice president of Young & Rubicam, and Thomas Spangenberg, a former account supervisor. They faced one count each of racketeering and of conspiring to violate the Foreign Corrupt Practices Act.

Twardy said charges against the two men were dropped due to information contained in a document subpoenaed nearly two years ago, but only recently discovered in closed files.

The trial of a third defendant, Steven M. McKenna, a former budget manager on the Jamaica account, is scheduled to begin Feb. 26.

McKenna is chief financial officer of Wunderman Worldwide, a subsidiary of Young & Rubicam, who was charged with perjury before a grand jury during the investigation.

#90040u2167 02/09/1990 ~United Press International

SAN FRANCISCO (FEB. 9) UPI - Peter Pilaski, who has served two years in prison for sending a bomb hidden in a flower bouquet to his estranged wife had his sentence reduced Friday from 15 years to 10 years in prison.

Pilaski, 56, will be eligible for parole in four years, according to the court.

Pilaski hatched a plot with his handyman, Shaun Small, to booby-trap a flower bouquet and deliver it to his wife at her job in a downtown federal office building.

The bomb, delivered by Small Nov. 17, 1986, exploded in a highrise federal building, injuring Pilaski's wife Melanie and a co-worker, Pamela Castro.

Melanie Pilaski was in the midst of a divorce fight with her husband over a property settlement in the case.

Pilaski's sentence was reduced by U.S. District Judge Robert Schnacke to reflect a reduction in sentence given to Small, whose 15 years term was cut to 10 years during appeals.

Schnacke indicated he considered Pilaski and Small equally culpable and therefore reduced Pilaski's sentence to equal Small's.

Pilaski was recently transferred for his own safety from a federal prison in Arizona to Terra Haute, Ind., after he alerted authorities to an alleged escape plan in the works at the Arizona facility.

CLEVELAND (FEB. 9) UPI - The resignation of embattled Cleveland Browns offensive coordinator Marc Trestman was announced Friday by head coach Bud Carson, who said he wanted to make both offensive and defensive changes next season.

While the job of the rookie NFL head coach Carson in making the Browns' defense more aggressive was generally praised in Cleveland, the work of Trestman - a man the Browns' front office strongly recommended to Carson - was the subject of much criticism.

The Browns struggled through weeks two through six scoring only 14, 16, 10 and 7 points and then went through a later stretch of 17, 10, and 10 points and a shutout.

Trestman, 34, was Bernie Kosar's quarterback coach at the University of Miami and worked in the NFL with Minnesota and Tampa Bay before joining the Browns as quarterback coach in 1988.

Controversy over Cleveland's offense began to develop in 1988 when offensive coordinator Lindy Infante left for the head coaching job in Green Bay and Browns head coach Marty Schottenheimer, a long-time defensive coach, decided to take control of the offense.

The Browns offense struggled in 1988 as four different quarterbacks suffered injuries. When Modell said after the season he wanted to hire an offensive coordinator, Schottenheimer resigned.

Carson was hired with the understanding that Trestman would be his offensive coordinator.

Trestman was not available Friday for comment.

No new offensive coordinator apparently will be named but Carson said defensive coordinator Dan Radakovich has been switched to offensive line and will take on the added title as assistant head coach.

''Everybody knows the respect I have for 'Rad' and his coaching ability,'' Carson said in a prepared statement. ''Plus, I believe he's the best offensive line coach in the business.''

Offensive line coach Hal Hunter has been offered the new position of special assistant to the head coach. And Carson also announced the resignation of secondary coach Jed Hughes.

''I want to say this about Marc and Jed,'' Carson said. ''They both did a good job for us last season. But, now that I've been through a full season as head coach, I plan to change some of the things we did on both offense and defense and wanted to put the coaches in the spots where they would best help us win.''

Carson said he expects to soon name a linebacker, secondary and quarterback coach.

''We obviously have some people in mind,'' Carson said, ''and we've talked to some already.''

#90040u2251 02/09/1990 ~United Press International

TAMPA, FL. (FEB. 9) UPI - Andy Rooney, the droll, ever-wondering essayist suspended by CBS News for racist remarks attributed to him in a Los Angeles homosexual publication, was offered a job Friday hosting a talk show on a Florida radio station.

The three-month package offered by WFLA-AM in Tampa includes free use of a gulfside condominium near St. Petersburg, daily limousine service and a plum, noon to 3 p.m. time slot, station Operations Manager Gabe Hobbs said.

''We've never really hired anybody of this stature before, so I really don't know what to expect,'' he said. ''I think the chance to spend a winter vacation in Florida and an opportunity to continue working certainly may pique his interest.''

He said Rooney should receive a letter officially offering him the job by Monday.

The ''60 Minutes'' commentator and best-selling author was suspended Thursday for three months by CBS News President David Burke after The Advocate, a biweekly newspaper, quoted him as saying black people ''watered down'' their genes because the less intelligent have the most children.

Rooney vehemently denied making that remark, which he tabbed a ''know-nothing statement,'' during an interview with The Advocate's New York correspondent, Chris Bull.

CBS News spokesman Roy Burnett said Friday he was not aware of any job offers made to Rooney since word of his suspension was made public.

The highest rated AM station in the Tampa Bay area, WFLA will offer a similar deal if Rooney declines the talk show slot, but agrees to make several commentaries each day, Hobbs said. WFLA is owned by Jacor Communications Inc. of Cincinnati.

''Sure we want Andy Rooney on our radio station,'' Hobbs said. ''There's no question he will attract a larger listening audience. I think we have some chance of getting it done.''

If hired, ''he will receive more money than anybody has ever made for that amount of time at this station,'' Hobbs said. ''I don't know if I could

give you a ballpark figure, but we're talking thousands and thousands of dollars.''

-30- 2284

#90040u2262 02/09/1990 ~United Press International

HARRISBURG, PA. (FEB. 9) UPI - A piece of metal taken from inside the damaged Three Mile Island nuclear reactor showed that a crack in the vessel wall runs deeper than previously thought, plant officials said Friday.

A wedge-shaped sample of metal taken Thursday revealed the crack is deeper than original estimates of three-sixteenths of an inch, but officials said the crack did not breach the 5-inch-thick wall of the vessel.

The 3-inch-thick sample was one of three taken from the bottom of the vessel by officials studying the dangers of nuclear reactor accidents.

The officials recently completed a four-year defueling program at the reactor, site of the nation's worst nuclear reactor accident in 1979.

''It is not yet known how far the crack goes,'' said Mary Wells, spokeswoman for GPU Nuclear Corp, which runs the reactor.

''It (the crack) goes most of the way through the sample, but there are still several inches of reactor vessel left,'' she said. She added that thousands of gallons of radioactive water are still in the giant reactor vessel and removal of a complete section of the vessel would cause a leak.

''There is still no indication that the reactor was breached,'' she said.

The fissure, described as ''a thin, very tight, semi-circular crack,'' was discovered last summer by video examination.

The vessel, 40 feet high and 12 feet in diameter, is at the core of the reactor where the nuclear fission occurred.

The reactor, one of two at Three Mile Island, will never be used again. Unit 1 is in operation and generates electricity.

A scaffold was built over the top of the crippled vessel and workers using extension poles cut the samples with an electic arc cutting device. The work was done by engineers from MPR Associates, Power Cutting Inc. and GPU crews working on behalf of the Nuclear Regulatory Commission.

Wells said the samples, as well as 17 more that will be taken, will be examined by scientists around the world.

TMI's Unit No. 2 nearly suffered a meltdown on March 28, 1979, when a loss of cooling water caused the reactor fuel to melt, forcing the release of large amounts of radioactive steam.

-30- 2396

#90040u2279 02/09/1990 ~United Press International

MOSCOW (FEB. 9) UPI - Mikhail Gorbachev told Secretary of State James Baker on Friday that Moscow will accept President Bush's troop-reduction proposal for Central Europe only if 30,000 U.S. troops left out of Bush's plan are removed from Western Europe.

Baker, on the third day of a four-day visit, met with Gorbachev to discuss the June superpower summit and then held marathon talks with Foreign Minister Eduard Shevardnadze on the full range of U.S.-Soviet relations.

At a midnight news conference after 11 hours of talks, Baker said the meetings had produced substantial progress on a number of technical arms control issues.

Baker said his visit had moved U.S.-Soviet ties another step away from the era of confrontation and closer to relations based on cooperation.

''I think the relationship is in better shape than it has been in the past '' Baker told reporters.

Baker, citing the continuing delivery of Soviet jets to Cuba, said the two countries still have differences, but he said the disputes are being addressed through an expanding dialogue.

In their give-and-take negotiations at the Kremlin, Baker heard Gorbachev's counteroffer on Bush's plan for troop cuts and responded by imposing a U.S. condition on a separate proposal by the Soviet leader.

Baker told Gorbachev that Washington no longer opposes his idea for a 35-nation meeting this year to deal with revolutionary change in Europe, but he said such a conference should declare free elections a basic human right, the official Tass news agency reported.

Baker arrived Wednesday for a three-day visit to Moscow as Communist Party leaders announced the approval of a historic program sweeping away single-party rule and establishing a presidential system of government with direct popular elections.

The secretary of state came to Moscow to try to bring the two superpowers closer to finalizing major accords on cutting conventional forces in Europe and reducing nuclear arms, in time for Bush and Gorbachev to sign the pacts at their summit in four months.

''The U.S.S.R. accepts the president's proposal to reduce Soviet and American troops on foreign territories in Europe down to 195,000 - but not in Central Europe as suggested by Bush, but in the entire European zone outside the Soviet Union,'' Gorbachev told Baker, according to Tass.

Tass quoted Gorbachev as having said: ''If this proposal does not suit you we suggest the figure of 225,000 for the entire European region.''

Baker promised a response to Gorbachev's counteroffer by the time of his scheduled departure Saturday, Tass said.

Baker, however, later told reporters that there would be no U.S. response until he consulted with Bush and U.S. allies.

In his State of the Union address last month, Bush proposed that Washington and Moscow reduce their troop levels to 195,000, a level that would impose far greater cuts on the Soviet Union.

The president did not include in the 195,000 ceiling 30,000 U.S. troops based mainly in Britain, which Moscow believes threaten its security as much as Soviet soldiers in Central Europe threaten the West.

Gorbachev told Baker that the conventional forces accord could be endorsed this year at the 35-nation ''Helsinki 2'' meeting he has proposed as a follow-up to the 1975 Conference on Security and Cooperation in Europe in the Finnish capital.

''If the agreement on conventional weapons and armed forces is signed ... the meeting itself would become a major historic event,'' Gorbachev said.

Bush responded coolly to the proposal for a European meeting when Gorbachev made it at their summit in Malta two months ago, but Baker said the United States, following even greater change in Eastern Europe, now views the idea of a 35-nation gathering more positively - as long as it addresses human-rights issues as well as security concerns.

''The change in the U.S. attitude toward the holding of an all-European meeting in 1990 within the Helsinki framework, which Baker spoke of (to Gorbachev), is important,'' Tass said.

''Baker suggested proclaiming at the meeting that free elections are a human right,'' it said.

The two men also discussed the question of German reunification, regional conflicts in Afghanistan and Central America, and possible bans on the production of chemical weapons and the testing of nuclear arms, Tass said.

#90040u2283 02/09/1990 ~United Press International

ROSEMONT, IL. (FEB. 9) UPI - Baseball owners imperiled the start of spring training by reaffirming their call for a player lockout Friday, and Commissioner Fay Vincent said it would take a ''miracle'' to forge a labor contract before the first players are to report to camps.

Chuck O'Connor, management's chief negotiator, said the clubs are not free to open spring-training camps Feb. 15 until instructed by the Player Relations Committee.

A lockout would mark the sixth time since 1972 baseball has been hit by a labor stoppage.

''By the 15th, I think that would be a miracle,'' Vincent said following a 2-hour, 10-minute meeting of the 26 club owners. ''And while I believe in miracles, I think it unlikely there will be an agreement by the 15th. I think there will be an agreement. When, I can't predict.''

Negotiations resume Monday in New York, with the site and time to be determined.

O'Connor was asked what was the latest that progress could occur for spring training to begin Feb. 15.

''I suppose you could go to Feb. 14,'' he said.

Don Fehr, head of the players' union, said he wants to start the season while talks continue. He said he could not predict how long the impasse might last.

''It will take as long as it takes,'' he said.

O'Connor plans to huddle Saturday with the PRC, the owners' bargaining arm. Fehr briefed players for 2 1/2 hours in Phoenix Friday, advising them to fish and play golf with talks deadlocked.

''I've long since given up trying to figure out the owners' strategy,'' he said.

Lloyd McLendon of the Chicago Cubs attended the briefing and called the stalemate ''a sad situation.''

''I'm not angry, but I'm definitely confused,'' he said. ''Baseball is at the height of prosperity, the owners are making all the money they could dream of right now. Tell me any other industry in the world that would want to stop work at the height of prosperity.''

Owners are seeking to restructure the contract with revenue sharing, pay-for-performance and a salary cap. In a system similar to the NBA's, the owners propose to give the players 48 percent of their revenue from ticket sales and television contracts. That accounts for about 80 percent of management's income.

The players object to a payroll cap and pay-for-performance, a system that would rate players and determine salary. They are demanding 25-man rosters upgraded minimum salary and pension contributions, protection against collusion and changes in salary arbitration eligibility.

The PRC sent a memo to the clubs Jan. 9, ordering them not to open camps until negotiations progressed.

''We have defined a course for ourselves and we've been very candid,'' said Milwaukee Brewers owner Bud Selig, head of the PRC.

Selig, looking to minimize any hint of disunity among owners, said the group was pursuing the same course it has maintained for months.

''There was no change in our strategy, either requested or made,'' Selig said.

Baseball's basic labor agreement expired Dec. 31. Talks began Nov. 28 and have produced virtually no progress.

O'Connor has acknowledged the clubs have a fund of more than $170 million to withstand a lockout, a strategy that allows management to control events. Fehr said the players have a strike fund ''in the neighborhood of $90 million.''

In 1972 and 1980, players struck late in spring training. In 1981, they struck for 50 days during the season, and for two days in 1985. In 1976, owners locked out players from spring training until March 17.

Vincent, who is employed by the owners, has said he will not order camps open, as Bowie Kuhn, then commissioner, did in 1976. Kuhn lost his job for his perceived failure to end the 50-day strike in 1981.

In 1985, then-Commissioner Peter Ueberroth received credit for ending a one-day walkout, even though he downplayed his role and others disagree on his contribution.

''The history of baseball labor relations is not a pleasant or happy one and that cannot be reversed by a new commissioner in the fourth month of his tenure,'' Vincent said. ''It is going to take hard work.''

Selig estimated it would take four days for a club to open spring training after receiving permission from the PRC. O'Connor said a group of general managers estimates clubs would need at least three weeks to prepare. Under that scenario talks could continue until the first full week of March before Opening Day on April 2 would be endangered.

Fehr said he did not believe the owners would get much fan support for a lockout because of the huge sums baseball earns from its television contracts. He also said it is unfair to compare the owners' demands with the NBA's system.

''The NBA players only agreed to a salary cap because the NBA was going bankrupt,'' he said. ''Nobody takes that position with major league baseball at this time.''

#90040u2325 02/09/1990 ~United Press International

NEW YORK (FEB. 9) UPI - The stock market had only one down day this week, making up still more of the ground it lost in a dismal January, thanks to a quarterly refunding that held no unpleasant surprises and a rally in high-tech issues.

The Dow Jones industrial average rose 3.83 Friday to close at 2648.20 for a gain of 45.50 points on the week, or about 1.7 percent.

Among the broader market averages, the New York Stock Exchange composite index rose 1.64 points to close the week at 184.39. Standard & Poor's 500-stock index gained 2.70 to 333.62.

Advances led declines 1,075-811 among the 2,163 issues traded this week. Big Board volume totaled 774,980,820 shares, compared with 845,526,810 a week earlier and 955,486,870 a year ago.

Wall Street's focus this week was squarely on the Treasury's quarterly refunding, which amounts to a sale of securities by the government to finance the budget deficit. Thirty billion dollars in notes and bonds were auctioned - $10 billion in 3-year notes Tuesday, $10 billion in 10-year notes Wednesday, and $10 billion in 30-year bonds Thursday.

The last phase of the refunding, the bond auction, was key in the market's eyes because of fears that the recent sharp rise in interest rates in Japan would make U.S. government debt less attractive to Japanese investors, who could invest instead in high-yielding bonds of their own country.

Japanese investors normally buy about 40 percent of the bonds sold in quarterly refundings, but Wall Street feared they would not be active

bidders in the auction and that yields on the bonds would have to rise even more to attract them.

The exact level of interest was difficult to gauge right after the auction but most analysts said it seemed Japanese interests had taken anywhere from 20 to 25 percent of the bonds. The average yield in the auction was 8.50 percent, within the range of expectations but at the high end, an indication that interest in the bonds had been mediocre.

Stocks eked out a small gain that day, relieved that the refunding was over and that the Japanese had not completely abandoned U.S. securities. But the lion's share of the market's weekly gain came Wednesday, when the market cheered the enthusiastic welcome given the 3- and 10-year notes by investors and the technology sector, battered in January, reemerged as a market leader.

''The auction was a relatively successful event,'' said Trude Latimer, analyst with Josephthal and Co. ''From talking to institutional clients, they are thinking more on the buy side. They're thinking in terms of buying rather than selling into strength. I don't expect any short term collapses.''

But other analysts disagreed.

''I think this is the time to sell into strength,'' said Alan Ackerman, senior vice president at Gruntal and Co. ''Rates in the auction were not easy (low), but they weren't as onerous as they might have been. There's a sense of relief that the auction is behind us but there's no euphoria. The road is still bumpy.''

As for the rally in technology issues, led by bellwether International Business Machines Corp. which gained more than $5 a share and was the second most active issue this week, analysts said the prospect of renewed earnings growth may be giving IBM a much-needed shot in the arm. They say Big Blue's profits may rebound this year after a $2.4 billion restructuring charge.

''It had given up its mantle of leadership,'' said Ackerman, ''But it's showing signs of trying to be a leader once again.''

On the trading floor this week, Amax was the most active NYSE issue, up 1/8 to 23 1/8 in dividend-related trading.

IBM followed, jumping 5 3/8 to 102 1/2. Bank of New England was third, down 1/4 to 5 after agreeing to take $17.5 million less for the sale of its leasing group to the Bank of Tokyo than the two settled on in November. The revision in the deal comes at a time when the bank, already hammered by enormous losses, is trying to sell off $6 billion in non-bank

assets and is considering the sale of some units.

Among the other blue chips, AT&T rose 1/2 to 39 7/8, Philip Morris gained 1 to 39 1/4, General Electric gained 1 1/2 to 63 1/4, But American Express lost 7/8 to 29 1/4.

Takeover-related issues were mixed. Pan Am rose 3/8 to 3 3/8 amid heightened speculation involving a merger with NWA, parent of Northwest Airlines. UAL climbed 6 to 136 1/2, CBS fell 4 3/4 to 184 1/4 and Genentech lost 2 3/4 to 27 1/8 after surging last week on its agreement to sell a controlling stake to Roche Holding Ltd.

Oil and oil services stocks had a strong week. Phillips Petroleum rose 1 to 26 5/8, Exxon was up 3/8 to 48 1/4, Mesa Limited Partnership surged 7/8 to 7 3/8 and Halliburton soared 4 to 46 1/8.

On the American Stock Exchange, the Amex Market Value index rose 7.23 to close Friday at 360.79. Advances led declines 468-318 among the 1,000 issues traded.

Amex volume totaled 65,493,220 shares, compared with 69,888,835 traded a week earlier and 62,438,645 traded in the same week a year ago.

Hillhaven led the Amex actives, off 3/8 to 1 3/8.

The National Association of Securities Dealers index rose 6.62 to end the week at 428.84.

#90040u2348 02/09/1990 ~United Press International

NEW YORK (FEB. 9) UPI - A supersonic Air France Concorde jet was given priority landing Friday at Kennedy International Airport when pilots told air traffic controllers the plane was low on fuel following a trans-Atlantic flight.

Air France Flight 001, which was carrying 74 passengers, was forced to drop down to subsonic speed 90 minutes before landing because of a problem with the plane's autopilot, officials said, adding that the jet landed with 30 minutes worth of fuel left in its tanks.

At 1:34 p.m., the crew told air traffic controllers in Nashua, N.H., who were monitoring the flight before Kennedy trackers took over, that the plane was low on fuel, said Kathleen Bergen, a spokeswoman for the Federal Aviation Administration.

Bergen said she did not know whether controllers actually used the word ''emergency'' when relaying the plane's fuel status to their colleagues at

Kennedy, but the plane was allowed to make a direct landing at 1:56 p.m.

On Jan. 25, Avianca Airlines Flight 052 from Colombia crashed on the North Shore of Long Island, killing 73 people, and investigators have said they believe the plane ran out of fuel shortly after an aborted landing attempt at Kennedy Airport.

Air traffic controllers at Kennedy have said the Avianca crew never used the word ''emergency'' when describing their fuel situation, and if they had, the plane would have been allowed to land immediately.

Bergen said the Avianca crash probably has alerted pilots and air traffic controllers to potential fuel shortage situations.

''Everybody's sensitivity is a little bit heightened,'' she said. ''I think that they handled the flight the way they normally would have.''

#90040u2369 02/09/1990 ~United Press International

(FEB. 9) UPI - A five-hour hostage situation in south St. Louis ended in tragedy today. Police say a 28-year-old man apparently shot and killed two young boys at the home of his estranged wife. Investigators say the suspect... identified as Marcus Atkins... was taken to a local hospital with a self-inflicted gunshot wound to his shoulder. Police believe the shootings stemmed from a custody dispute. But it's NOT immediately known if Atkins and the eight-year-old and five-year-old boys are related. The standoff began about 4 a-m when Atkins took the children hostage at the house.

Florida authorities now say one person is known dead and two are still missing following this morning's collision of three boats on the St. Johns River in far western Volusia County near Daytona Beach. The cause of the wreck is under investigation. Officials say eight people were on the three boats at the time of the accident in a heavily wooded area. Two people were injured in the mishap.

Harlequin Romances has some advice for men in advance of Valentine's Day. The purveyor of passionate tales surveyed one-thousand women, with nearly 50 percent listing a sense of humor as the most important thing to look for in a man. But more than half questioned also wanted something more than a joke for Valentine's Day. 53 percent chose a romantic adventure in an exotic spot.

#90040u2400 02/09/1990 ~United Press International

ST. LOUIS (FEB. 9) UPI - An man armed with a .22-caliber rifle shot and

killed his two stepsons Friday, then shot and wounded himself during a standoff with police at the house of his estranged wife, authorities said.

Police entered the house about five hours after the standoff began and found the bodies of Terry Peete, 8, and Norman Peete, 5. Marcus Adkins, 25 was found lying near the rifle with a gunshot wound to the chest. He was hospitalized in satisfactory condition.

Adkins used a key to enter the house of his estranged wife Norma Jean Adkins, 25, at about 4 a.m., said police Capt. Robert Bauman.

Adkins found his estranged wife in bed with Darrell Morse, 35, and ordered him to leave, Bauman said. Morse ran to a neighbor's house and called police.

When police arrived at the home, they were met by Norma Jean Adkins, who told them her husband was holding the children hostage, Bauman said.

A short time later, Adkins also released his wife's 8-year-old nephew, Travis Gordon, Bauman said.

Members of the department's hostage team negotiated with Adkins during the standoff and officers saw the children alive through a second floor window about 8:20 a.m., Bauman said.

Adkins apparently shot the boys sometime between then and when he shot himself at 8:50 a.m., Bauman said. He was talking on the telephone with his mother when he turned the gun on himself.

The body of Terry Peete was found in a bathroom, and the body of Norman Peete was found in a bedroom, Bauman said.

Police were expected to take Adkins into custody as soon as he could be released from the hospital.

#90040u2429 02/09/1990 ~United Press International

HUNTINGTON BEACH, CA (FEB. 9) UPI - The oil industry will have to bear new operational costs and become more sensitive to environmental concerns as a result of the oil spill from a disabled tanker that fouled Southern California waters and beaches, analysts said Friday.

''This incident will give the major watchdog environmental groups even more power and authority,'' said Thomas Lewis, an oil analyst with Duff & Phelps.

''The oil industry is already becoming much more aware of the needs and

environmental concerns of citizens,'' Lewis said. ''But that means that it will be a little bit more expensive.''

Francis Morris, an analyst with Provident National Bank in Philadelphia, said, ''Psychologically, it's always significant for the industry anytime you have an oil spill.''

Light winds helped drive the oil slick - 6 miles long and 3 miles wide - away from beaches Friday as cleanup crews mopped up remnants of a brown oily foam that lapped onto the shoreline after a 280,000-gallon spill from the American Trader oil tanker.

However, there was the potential for winds to shift again and push the slick back ashore. Environmental damage appeared to be minimal, although at least 37 birds, were found coated with oil and 12 others were found dead.

''The main effect of the spill is that it will give additional fuel to environmentalists to block oil development,'' said analyst Thomas Samuelson of Duff and Phelps.

Specifically, Samuelson said, the incident will probably add to delays in pursuing oil production from two areas: the Arctic National Wildlife Refuge in Alaska and the Point Arguello project off Santa Barbara in California.

With output from the Alaskan North Slope declining, the industry has been looking toward the 19 million-acre wildlife refuge, where there are estimates of as much as 3 billion barrels of new reserves.

Atlantic Richfield Co. and British Petroleum, which leased the American Trader and owned the spilled oil, would be the most affected by delays in development of that area, Samuelson said.

Tankering of oil from the Point Arguello development has been stalled by the California Coastal Commission over local environmental concerns. Chevron and Phillips Petroleum would be the losers if there are further delays.

Analyst Lewis said the effects of the spill are likely to be widespread.

''I think the impact will go throughout the industry, rather than just to British Petroleum,'' he said. ''I really don't think the spill will have a major material impact on BP.''

BP, the world's third-largest private oil company chartered the American Trader, which spilled about 280,000 gallons of crude oil after its anchor punctured its hull Wednesday.

The oil spill also prompt Congress to pass legislation requiring new tankers to be built with double hulls, said Ward Mauck, president of the American Institute of Marine Underwriters in New York. The American Trader is not outfitted with a double hull.

''Any oil spill while the U.S. Congress is considering oil spill liability legislation is going to have an impact, particularly if it is crude oil,'' Mauck said.

Crude oil is heavier than diesel oil and does not evaporate as quickly, he noted.

On the other hand, Mauck said, the clean-up of the spill should be much easier the clean-up that following last March's spill from the Exxon Valdez in Alaska.

''You had 11 million gallons of crude in Prince William Sound, very cold water and a rocky shore,'' he said. ''In this spill, with less oil, relatively warm water and sandy beaches, you've been pretty lucky so far.''

''I think it will be a couple of more days before we have a real sense of the outcome from this spill,'' Mauck said.

But Mauck added that the spill is not likely to add significantly to the costs of pollution liability insurance for oil tankers.

Such ships use large liability insurance mutuals because their exposure to damages can be so large, Mauck explained.

American Trading Transportation Co., the owner of the ship, reportedly has liability coverage with Assuranceforeningen Gard of Arendal, Norway.

Jerry Aspland, president of Arco Marine Co., which owns 10 oil tankers operating in Southern California, said the premiums for tanker insurance - including pollution liability, hull damage and protection and indemnity insurance - usually go up two to three years following a problem.

#90040u2525 02/09/1990 ~United Press International

TORONTO (FEB. 9) UPI - Toronto reliever Tom Henke said the 1990 season will be his last with the Blue Jays if he's forced into arbitration next Wednesday.

Henke, asking for $2.4 million and offered $1.7 million in the arbitration hearing, turned down a $7.3 million deal over three years Tuesday because the club wouldn't agree to pay him if the owners lock out the players this

year.

''If they force me to go to arbitration, I won't sign next year. No chance. I'll leave Toronto after this season,'' Henke told the Toronto Star.

In 1988, Henke asked for $1.025 million and was bitter over losing an arbitration case that gave him $725,000 for the year. Last year, he signed a last-minute deal to avoid arbitration, but it still was less than $1 million.

''I've fought them for five years over my contracts and I'm not fighting them anymore,'' Henke said. ''They always sat back and waited for me to give in and they feel I'm going to give in again this time. Well, I'm not giving in anymore.''

Club spokesman Gord Ash said Henke is a ''man of his word'' and said the threat he's imposed ''would be entered into our equation''.

Henke noted the Blue Jays won the American League East and set an AL attendance record of 3,375,883 in 1989, which should make the team willing to meet his demands.

''Toronto had a franchise year last year. If anybody can afford to give out the money, Toronto can,'' Henke said.

Henke said a new factor in his contract demands is Tuesday's signing by John Franco with the New York Mets for $7.6 million over three years.

''Franco's signing sheds a whole new light on it. They kept telling me all winter that they think I'm as good as Franco or better. Well, I know that. I know I'm as good as John Franco,'' Henke said.

In 1989, Henke went 8-3 with a 1.92 ERA and 20 saves. In 89 innings, Henke struck out 116 batters, walked 25, and allowed a .205 batting average. In comparison, Franco went 4-8 with a 3.12 ERA and 32 saves. In 80 innings, he recorded 60 strikeouts and 36 walks. Batters hit .258 off him.

Henke said he'd like to finish his career in Toronto, but it's believed he'd like to play closer to his Missouri home, either with St. Louis or Kansas City.

Ash said Henke's demand for contract protection in the event of a lockout is unreal.

''No one has what he's asking for, not Will Clark, not anybody,'' Ash said. ''We're not asking him to do something different from any player in baseball. We're hardly being unfair.''

#90040u2605 02/09/1990 ~United Press International

UNITED NATIONS (FEB. 12) UPI - The sister of Terry Anderson, an American journalist held hostage by a Moslem fundamentalist group, said Friday she will travel to Europe and the Middle East to ask for his release because this is an ''opportune period.''

''There is hope this time will be different,'' Peggy Say told reporters on the eve of her departure to Geneva, the first stop of her nearly three-week visit to seven countries.

''The potential in this trip is that the atmosphere exists to make it a more opportune period'' since the kidnapping of Anderson March 16, 1985, by the Hezbollah in Beirut, Lebanon.

She said there is a ''groundswell'' of support for her new initiative because of political changes between the United States and the Soviet Union and in Eastern European nations.

She said she has requested a meeting with Soviet leader Mikhail Gorbachev and would be willing to go to Lebanon if ''it means that I can come out with my brother.''

Anderson, 42, was chief Middle East correspondent and Beirut bureau manager for the Associated Press when he was kidnapped. He is one of eight Americans still detained by various Moslem fundamentalist groups. There are also four Britons, one Italian, one Irishman and a West German still detained by those groups.

Say, who called the trip an ''international tour of hope and reconciliation,'' will be accompanied by three AP officials and her husband. The delegation will leave Saturday for Geneva and is expected to return to the United States March 1.

The delegation will discuss the situation of the hostages with U.N. Human

Rights Commission in Geneva, meet with Pope John Paul II in Rome, PLO leader Yasser Arafat in Tunis and travel to Syria, Cyprus and London for talks with the head of the Canterbury church. The assistant of the Canterbury archbishop, Terry Waite, was kidnapped Jan. 20, 1987. Waite had been negotiating for the release for the Western hostages.

The delegation will also visit the European Parliament in Strasbourg and hold talks with UNESCO officials in Paris.

Say said the purpose of meeting international organizations as well as political leaders will be to convince those who have ''influence on the situation to use this influence in a positive way.''

''Five years are too long. It's certainly more than enough,'' she said.

Say met with Secretary-General Javier Perez de Cuellar Friday and believed that the U.N. leader has been ''pursuing every options'' for the release of the hostages.

She expressed support for President Bush's moves to free the hostages, particularly when Bush ordered the release of Iranian assets in the United States.

#90040u2801 02/09/1990 ~United Press International

CAIRO, EGYPT (FEB. 12) UPI - Officials said Friday that the great pyramid at Giza will reopen to visitors in March after closing last year for renovations.

Zehi Hawas, in charge of the Giza pyramids at Egypt's department of antiquities, said visitors will be able to enter the great pyramid through the only entrance on its northern face as of March 1, 1990.

Hawas said the pyramid, west of Cairo, would be open for six hours a day.

The pyramid was closed to the public after archaeologists said the breath of thousands of visitors was contributing to high humidity levels and a potentially erosive concentration of salts in the air inside the pyramid's ''grand passage.''

Hawas said scientists had covered some 500 rocks from the sides of the pyramid's passageway with chemicals to prevent further erosion from high humidity and salt concentration.

#90040u2921 02/09/1990 ~United Press International

(FEB. 9) UPI - Soviet President Gorbachev isn't saying whether he will lead the communists in multi-party elections... Nelson Mandela vows NEVER to give in to apartheid... Reputed Mafia don John Gotti is acquitted again... And California cleans up a huge oilspill... U-P-I details these top stories and more, next.

U-S Secretary of State Baker met with Soviet President Gorbachev in Moscow today for talks on cuts in strategic arms and conventional forces.

Gorbachev told American reporters that he would give U-S troop cut proposals ''very serious consideration,'' and said- quoting now- ''It would be good if we can co-operate, as we are doing now.''

Baker met yesterday with Soviet Foreign Minister Shevardnadze , and officials say progress was made on technical issues relating to arms control, and on the future of Afghanistan. But the two men disagreed on Soviet shipments of jets to Cuba.

Also today, Gorbachev was asked if he would run as a Communist in the nation's first multi-party presidential elections. He smiled and said- ''Let us wait and see.''

Earlier this week, the Communist Party approved landmark reforms calling for a multi-party system and presidential elections.

-30- 1371

#90040u2929 02/09/1990 ~United Press International

(FEB. 9) UPI - Representatives of an anti-apartheid alliance met today with black nationalist Nelson Mandela at the South African prison where he's being held.

After the meeting, leaders of the United Democratic Front said Mandela seemed ''very optimistic'' that problems surrounding his release would be resolved.

But they quoted Mandela as saying he would NEVER obey any apartheid law or repressive measure, and he will do ''what he considers necessary to pursue the struggle.''

Mandela wants the government to lift a state of emergency and free all other political prisoners. If he's released before that happens, he told the anti-apartheid leaders that he would break apartheid laws ''every hour of the day,'' and would find himself back in prison the same day.

The 22 leaders Mandela met with today at the prison north of Cape Town are members of an alliance that's ideologically aligned with Mandela's African National Congress.

There's still NO word from the government on when Mandela will be released. President de Klerk said a week ago that he would be freed soon, as part of a sweeping reform package that also lifted the ban on the African National Congress.

-30- 1348

#90040u2958 02/09/1990 ~United Press International

(FEB. 9) UPI - John Gotti has beaten the rap again. The man prosecutors call the boss of New York's Gambino crime family has been acquitted on all counts of shooting a union leader.

The verdict marks another victory for Gotti over the government and polishes his reputation for invincibility as the so-called ''Teflon Don.''

As the jury read its verdict... bystanders cheered. The judge warned them that he would sentence each to 30 days in jail unless they kept quiet. Gotti's lawyer kissed him and shook hands in jubilation. Gotti smiled and rapped his hands on the table.

The New York jury had been deliberating the case for four days.

At the time of his arrest... Gotti gave ''3-1 odds'' he would beat the case the way he beat a 1986 charge of running an 18-year racketeering enterprise that included gambling... loan-sharking... truck hijackings... armored car robberies, and three murders from 1968 to 1985.

Gotti does have convictions for killing and hijacking and a guilty verdict would have made him a three-time loser. That would enable the government to ask a judge to declare Gotti a ''persistent felon'' and sentence him to life behind bars.

Some 250 people are working to clean up oil that washed ashore along at least five miles of southern California's beaches. Police say Newport Beach declared a state of emergency today after the oil from Wednesday's huge spill washed up on shore.

The two-inch-wide band of muck came in on high tides from a 300-thousand-gallon slick that spilled when the tanker ''American Trader'' apparently hit its own anchor. The accident off the coast of Huntington Beach opened a three-foot gash in the bottom of the ship.

Officials yesterday predicted that favorable winds would keep the spill off-shore, but the first waves of oil hit the sands at Newport Beach just before nightfall.

Today, officials say a shift in the winds is pushing the oil away from

shore again. Coast Guard Petty Officer Elizabeth Neely also says a ''pretty calm'' sea is helping in clean-up efforts.

-30- 2227

#90040u2973 02/09/1990 ~United Press International

(FEB. 9) UPI - The Labor Department says wholesale prices surged by one-point-eight percent in January. It's the biggest jump since the 1974 energy crisis.

The government says the cold snap that drove up oil and gas prices also pushed vegetable prices to record highs... including a 58 percent hike for cabbage.

The unusually large 13-point-six percent increase in energy prices was the steepest since the government started tracking wholesale gas and oil prices in 1974. The overall increase in the Producer Price Index was the largest since a two percent increase in November 1974.

Fuel oil prices zoomed 25-point-three percent and gasoline prices jumped by 16-point-seven percent in January... accounting for most of the energy price surge. Natural gas was up three-point-two percent.

The Labor Department says the January surge appears to be a one-time shot due to the cold and will NOT continue throughout the year.

Consumer activists are praising a government proposal aimed at halting an ''explosion'' of health claims on food products, calling it ''a step in the right direction.''

The Food and Drug Administration today proposed new rules that would sharply restrict food health claims, limiting them to well-documented statements such as that low-fat foods cut the risk of heart disease.

The rules would replace a 1987 plan put forth by the Reagan administration that allowed health claims for food products. That plan created an avalanche of labels and ads touting everything from cereals to margarine as disease preventers.

Before 1987, the F-D-A barred companies from making claims linking a food to prevention or treatment of a particular disease.

Health Secretary Sullivan says- quote- ''In hindsight, the 1987 proposal has proved to be too permissive.''

Charles Mitchell, a lawyer for the Center for Science in the Public Interest, says the move ''is a real improvement over the 1987 proposal.'' But he says stronger steps should be taken to protect Americans from

misleading messages.

#90040u3002 02/09/1990 ~United Press International
(FEB. 9) UPI - Britain has expelled nine Iranians amid reports the nine were planning to kill author Salman Rushdie.

The British Home Office won't say whether the six students and three government employees were deported because they were involved in a plot to kill Rushdie.

Iran's spiritual leader has renewed a world-wide call for Moslems to kill the author of ''The Satanic Verses''... who has been in hiding since the late Ayatollah Khomeini first put a death threat on him. Khomeini considered Rushdie's book to be blasphemous.

Britain also has put airports on full alert following U-S warnings that terrorists may be planning violence to mark the 11th anniversary of the Iranian revolution.

The U-S State Department reports a ''high level of activity'' by the Hezbollah Islamic extremist group. The United States is concerned that terrorists may be planning an operation against U-S interests in Western Europe.

Hungary and The Vatican have resumed full diplomatic relations after a 45-year split.

The Catholic Church had played a prominent political and social role in Hungary before World War Two... when communists crushed the church. The church controlled half of the educational institutions and Catholic bishops were ex-officio members of parliament.

Following the communist takeover... authorities broke ties with the Vatican... confiscated church lands and schools... dissolved more than four-thousand Catholic associations... and tortured and imprisoned Hungarian Catholic Cardinal Jozsef Mindszenty.

Hungarian officials want the Vatican to closely monitor developments in Romania... which has a large Hungarian Catholic population primarily in Transylvania.

Hungary is the second East Bloc country to re-establish full relations with the Vatican after Poland. Polish-born Pope John Paul will visit Hungary in September 1991.

#90040u3175 02/09/1990 ~United Press International
(FEB. 9) UPI - Former President Reagan today agreed to provide videoptaped testimony for the Iran-Contra trial of John Poindexter, his former White House national security adviser. In a surprise move, Reagan said he ''will NOT assert executive privilege.''

The Pentagon says technological advancements will allow a cut of about 20 percent in the estimated cost of the first part of the S-D-I program, which critics call ''Star Wars.'' It reportedly will cost 55-Million dollars instead of 69-Million.

Administration officials appeared before a Senate panel today to explain President Bush's proposal to cut U-S troops in Europe. They were met by calls for an even larger cut... to reflect the changing situation in Eastern Europe.

Reputed Mafia boss John Gotti today was acquitted of all charges in the shooting of a union leader. The alleged head of the Gambino crime family was whisked away from a Manhattan courthouse in a dark limousine as spectators shouted- ''Right on John!''

A Senate panel chairman today questioned why the federal government isn't doing more to fight drugs and violence in the nation's capital. Anti-drug chief William Bennett replied that it's the D-C government that dropped the ball, NOT the federal government.

A drunken driving arraignment has been postponed for the former fashion model who allegedly lured Washington, D-C, Mayor Marion Barry into an F-B-I drug sting. ''Rasheeda'' Moore's lawyer did NOT say why he asked to postpone the arraignment.

#90040u3308 02/09/1990 ~United Press International
(FEB. 9) UPI - Mikhail Gorbachev told Secretary of State Baker today that Moscow will accept President Bush's troop-reduction proposal for Europe... with one condition. The Soviet president says 30-thousand troops in Britain and France that Bush left out of the plan must also be removed. Baker responded by imposing a U-S condition on a separate Gorbachev proposal for a 35-nation meeting to deal with changes in Europe. The proposals came during talks in the Kremlin between Baker and Gorbachev.

Former President Reagan today agreed to provide videotaped testimony for the Iran-Contra trial of his former national security adviser, John Poindexter. The surprise agreement was announced by Reagan's lawyer, Theodore Olson, who says Reagan ''will NOT assert executive privilege'' in the matter. U-S District Judge Harold Greene earlier this week ordered

Reagan to provide the videotaped testimony that Poindexter says is essential to his defense.

Federal agents raided homes and businesses in New Jersey, New York and Florida this morning... arresting more than a dozen people in connection with a New Jersey-based money-laundering ring. They say the ring laundered 100-Million dollars a year for Colombian drug lords. 10-Million dollars in cash and bank accounts were seized this morning. The group allegedly took fax machine instructions from Colombia.

A Cuban representative told the U-N Security Council that the Unites States was guilty of piracy for firing on a Cuban-chartered freighter that refused to stop for a drug inspection. A U-S representative argued that the Coast Guard had exhausted all other options. The council took NO action.

#90040u3314 02/09/1990 ~United Press International

(FEB. 9) UPI - Government officials in Zambia say a cholera epidemic in the capital of the central African nation has killed at least 50 people in less than a week. Unofficial estimates put the total killed at 100. All social gatherings have been banned, and the government is asking relief agencies for financial help.

Music legend Stevie Wonder says he can't remember what songs were played for him at his friend Lee Garrett's apartment in 1977 because he was shaken up about having just stopped Garrett from committing suicide. Wonder testified in his copyright trial today that he pulled a gun out of Garrett's hand and then listened to some songs. A second friend says one of the songs was a version of ''I Just Called to Say I Love You,'' which Wonder later released.

#90040u3626 02/09/1990 ~United Press International

(FEB. 9) UPI - President Bush's proposal for U-S and Soviet troop reductions in Europe got a favorable response today from President Gorbachev , with one string attached. Gorbachev told Secretary of State Baker in Moscow that he accepts the Bush proposal, as long as 30-thousand U-S troops in Western Europe that Bush left out of the plan also are removed. The Soviet news agency Tass says Baker promised a response by the time he's scheduled to leave Moscow tomorrow.

Ronald Reagan says he ''will NOT assert executive privilege'' and will go along with a judge's order to provide videotaped testimony for the Iran-Contra trial of John Poindexter. Reagan's lawyer says the former president will NOT contest a federal judge's order that he give the video

testimony that his former national security adviser wants for his defense. But Reagan is appealing- on grounds of executive privilege- an order from the judge that he provide excerpts from his diaries for Poindexter's defense.

A juror in the trial of alleged New York Mob boss John Gotti says the government had NO good evidence connecting Gotti to the shooting of a Carpenters Union leader. The juror says the government's case amounted to ''zilch.'' Gotti smiled and kissed his lawyer as he was pronounced innocent on all counts. He sped away in a maroon town car with dark tinted windows.

Anti-apartheid leaders met for more than five hours with jailed black nationalist Nelson Mandela today. They say Mandela is optimistic about his release. But Mandela says he will break apartheid laws ''every hour of the day'' if he is freed before the government lifts a state of emergency and releases all other political prisoners.

-30- 1861

#90040u3673 02/09/1990 ~United Press International

(FEB. 9) UPI - About one-thousand Nicaraguan Contras were released from jail today... along with 39 former national guardsman who used to work for deposed President Anastasio Somoza. The official Sandinista radio made frequent reference to President Ortega's generosity in pardoning the prisoners just two weeks before general elections.

Five senators proposed legislation today aimed at preventing a repeat of last December's huge increase in home heating oil prices. The bill would make it a criminal offense to knowingly create a fuel shortage for the purpose of increasing oil prices. Oil industry officials say the year-end price hike stemmed from the December cold wave that increased demand. But members of Congress have accused the oil companies of manipulating supplies in order to jack up prices.

The former secretary of federal Judge Robert Aguilar testified in San Francisco today that he visited her in Acapulco in 1982 and warned her that she could face 10 years in prison if she returned to the United States. Vera Hoff says Aguilar moved into her San Jose home but stopped making interest payments to her. Aguilar... who's charged with racketeering... says the government is persecuting him because of his liberal rulings.

The Galileo probe that was launched from the shuttle Atlantis last October is headed for a flyby past Venus early tomorrow. It will collect valuable data about Venus, but that's NOT the main purpose of the maneuver. The flyby will give Galileo a gravitational boost back toward Earth and send it ultimately to Jupiter, which is its main goal. The

one-point-four-BILLION-dollar probe is to reach Jupiter in 1995.

-30- 1833
#90040u3873 02/09/1990 ~United Press International
(FEB. 9) UPI - Soviet President Gorbachev was a bit coy today when asked if he would run as a communist in his country's multi-party presidential elections. Gorbachev smiled and said- ''Let us wait and see.'' The Soviet Communist Party this week passed landmark reforms that call for a multi-party system and presidential elections. Gorbachev's comment came as he and Secretary of State Baker met for talks in Moscow.

The first Israeli to be imprisoned for violating a law against contact with the P-L-O was released today after four months in prison. Peace activist Abie Natan says he will continue to break the law if he must to start a dialogue between Israelis and the Palestinian leadership. Natan says the law against contact with the P-L-O is ''undemocratic.''

Officials in Beirut say the death toll from a war between rival Christian armies stands at 430, with more than 15-hundred wounded. Rescue workers say the death toll is higher than the official figures because many people are still missing and decaying bodies still litter the streets kept out of bounds by snipers. A cease-fire has brought an uneasy peace to Beirut.

Authorities in Cairo say an apparently deranged 17-year-old youth rammed the gates of President Mubarak's home and then fired at guards with a revolver, forcing the guards to kill him. The Middle East news agency says the youth had quarreled with his family earlier in the day and had stormed out of his house, saying he was going to ''cause a catastrophe.'' Mubarak was NOT in the residence when the incident occurred.

-30- 1733
#90040u3893 02/09/1990 ~United Press International
(FEB. 9) UPI - Romania's new National Unity Council was to have completed selecting its 180 members today and was to have elected a Cabinet, but those issues apparently are still up in the air. A member of one of the parties contesting seats in the caretaker council says ''heated debates are continuing'' in the Parliament building in Bucharest. The council was created following widespread demonstrations against the provisional government. The new National Unity Council is to govern until elections in May.

Africa's last colony took another step toward independence today. Namibia's constituent assembly unanimously adopted a new constitution for the territory, opening the way for independence next month. The constitution provides for a bill of rights, a two-chamber parliament and a strong executive presidency. The document drew praise from

President-designate Sam Nujoma, who led a 23-year guerrilla war against forces led by South Africa.

San Francisco dockworkers who refused to unload two ships carrying coffee beans from El Salvador are back on the job after shipping officials reached a settlement with peace protesters. The protesters objected to the unloading of Salvadoran coffee beans... which they say are a major source of income for El Salvador's government. The dockworkers' union supoorted the protest.

The United Mine Workers and the Pittston Coal Company are a step closer to fully solving their dispute. The miners agreed to expand a consent decree obtained by the National Labor Relations Board to cover the entire state of Virginia. Still at issue are 64-Million dollars in fines levied by a Virginia judge against striking miners for protest activities.

-30- 1862
#90040u4027 02/09/1990 ~United Press International
(FEB. 9) UPI - The latest news from across the nation and around the world... U-P-I has the details and the developments.

Reputed Mafia boss John Gotti scored another victory over the government today when a jury in New York City acquitted him of all charges in the shooting of a union leader.

Jurors later said the government had NOT provided enough evidence to convict Gotti of the 1986 shooting and wounding of union official John O'Connor.

One juror said there was nothing to connect Gotti to the incident. Another said he thought ''justice was done.''

The reputed head of the Gambino crime family was whisked out of the courtroom after the verdict was read, and he sped away in a maroon town car. Spectators outside state Supreme Court in Manhattan shouted- ''Right on John'' as he waved from the car.

Gotti was accused of ordering the shooting in retaliation for the wrecking of a mob-linked restaurant that was built with non-union labor.

Gotti has two previous convictions, but in recent years he has consistently slipped from the government's grip. He's been described by officials as the most elusive gangster since Al Capone.

Light winds have helped to push a huge oil slick about one mile away from California's beaches today. But the wind could shift and blow it back.

Cleanup crews have filled more than 800 trash bags with industrial-size paper towels they used to soak up remnants of the oil spill that washed ashore at Newport Beach.

Officials are also trying to contain the six-mile-long slick offshore. 10 skimming boats... including four from the Navy... are on the scene and have managed to skim an estimated 400 gallons off the top of the water.

The spill has killed at least 12 sea birds. 37 birds have been found coated with oil.

The California Sportfishing Association and United Anglers of California have filed a one-BILLION-dollar lawsuit against British Petroleum for the 280-thousand gallon spill.

Their attorney says the clean-up is NOT progressing fast enough and their concerned about the effect on the ocean food chain.

#90040u4049 02/09/1990 ~United Press International

(FEB. 9) UPI - Nicaragua's Sandinista government has released more than one-thousand Contra rebels in a pre-election good will gesture.

Nicaragua's official radio gave live coverage of the pardoned prisoners' release... peppered with praise for the generosity of President Ortega. He faces opposition candidate Violeta Chamorro in the presidential election February 25th.

39 of the pardoned prisoners were National Guard officers under the reign of deposed President Anastasio Somoza. Those guardsmen were jailed by the Sandinistas after they overthrew Somoza in 1979.

Relatives of the prisoners who waited hours in stifling heat hugged and kissed the prisoners freed at the prison in Tipitapa ... 14 miles east of Managua.

The leader of an anti-Sandinista human rights group says there are more than 13-hundred prisoners still in Nicaraguan jails that were NOT covered by the pardon.

South African President de Klerk's racial reform program bore concrete results today when the first political prisoners were released.

Barbara Hogan and Rob Adams, both white, were released two years before the end of their 10-year sentences for activities linked to the African National Congress.

Hogan was the first person convicted of treason only because of her membership in the A-N-C. She told reporters in Johannesburg today that- quoting here- ''What we stood for is becoming a reality.''

She and Adams are two of at least 75 prisoners expected to be freed under de Klerk's reforms, but that number falls far short of the country's estimated 350 political prisoners.

The release of all political prisoners is one of the demands being pushed by black nationalist Nelson Mandela. He met with anti-apartheid leaders today at the prison where he's being held north of Cape Town.

One of the leaders quoted Mandela as saying ''he will never obey any apartheid law'' if he's released before all political prisoners are freed and before a state of emergency is lifted.

-30- 2165

#90040u4081 02/09/1990 ~United Press International

(FEB. 9) UPI - A Peruvian newspaper says President Bush will get a chance to speak first hand to farmers who grow coca leaves for use in cocaine, when he attends next week's drug summit in Colombia.

Peru's President Garcia says he has invited the farmers to send three representatives to the conference to confront Bush on the difficult issue of what they should grow instead of coca leaves.

Garcia says South American farmers will stop growing the coca leaf when Bush can promise them a market for other crops such as coffee or chocolate.

Garcia says economic assistance from Bush is essential because- in Garcia's words- ''everything else is only speeches and electoralism.''

Garcia says it is NOT enough to eradicate the crops with herbicides or send in troops. The United States must be able to offer some other way for the farmers to make a living.

The Labor Department says wholesale prices climbed one-point-eight percent in January... the biggest jump since the 1974 energy crisis.

Analysts say a record cold snap had a lot to do with the price surge. They don't expect prices to keep rising at such a high rate for the rest of the year.

Oil and gas producers blamed record fuel price hikes on the cold weather.

The ''unusually large'' 13-point-six percent increase in energy prices was the steepest since the government started tracking wholesale gas and oil

prices in 1974... the year of the so-called energy crisis.

Fuel oil prices zoomed 25-point-three percent and gasoline prices jumped by 16-point-seven percent in January.

The cold also was blamed for skyrocketing vegetable prices. The price of cabbage went up 58 percent and the price for lettuce and tomatoes doubled.

-30- 1887

#90040u4162 02/09/1990 ~United Press International

(FEB. 9) UPI - John Gotti re-established his credentials as the so-called ''Teflon Don'' today. The alleged head of the Gambino Mafia family was acquitted of all charges in a New York City conspiracy and fraud case.

Former President Ronald Reagan has agreed to give a sworn deposition on videotape in the Iran-Contra trial of his national security adviser John Poindexter. But Reagan is pressing his claims of executive privilege in refusing to surrender excerpts from his diary.

South Africa today released two whites convicted of associating with the African National Congress- the first prisoners freed under President de Klerk's new reform program. But in a statement released by an anti-apartheid leader, jailed A-N-C leader Nelson Mandela vowed today to ''pursue the struggle.''

China is trying to make sure its universities do NOT become the source of another rebellion. The government imposed harsh new education guidelines today, limiting the number of students eligible for study abroad and imposing new restrictions on all aspects of campus life.

Iranian leader Ayatollah Khamenei has renewed the call of his predecessor Ayatollah Khomeini for the death of British author Salman Rushdie. The declaration came after Britain expelled nine Iranians yesterday.

Independent London radio reports say the Iranians were expelled because they had been plotting to kill Rushdie. Britain responded to the renewed Iranian threats by declaring a full security alert today.

-30- 1656

#90040u4175 02/09/1990 ~United Press International

(FEB. 9) UPI - The Sandinista government of Nicaragua freed almost 12-hundred political prisoners today following a pardon by President Ortega. A U-N delegation in Nicaragua to observe the February 25th elections cheered the release.

Cuba made charges of piracy against the United States today in a complaint

delivered to the United Nations. Cuba is seeking an official Security Council debate over last month's incident in which a Coast Guard cutter fired on a Cuban freighter off Mexico.

The 300-thousand-gallon oil slick off the southern California coast brushed the shoreline today, leaving brown foam and small globules of oil. But a shift in the wind raised hopes that most of the slick will disperse out at sea.

Defense lawyers for Captain Joseph Hazelwood are trying to shift the blame for the Exxon Valdez oil spill to the Coast Guard. The state judge in the case gave the lawyers permission today to pursue the defense at trial.

The Royal Shakespeare Company is dust-sheeting two of its London theaters. The theaters will be temporarily shut because the British Arts Council voted NOT to increase the R-S-C's share of the arts budget.

The death of early '60's rock 'n' roll singer Del Shannon is being called a suicide. Shannon's body was discoved late yesterday in the den of his California home- the victim of an apparently self-inflicted gunshot. Shannon is famous for his classic song, ''Runaway.''

-30- 1590

#90040u4348 02/09/1990 ~United Press International

(FEB. 9) UPI - A World Health Organization doctor said in Geneva today that the AIDS situation in Romania ''is very serious.'' Dr. David Heymann says there are about 50 children in Romania under five years of age with AIDS, and 550 others with the H-I-V virus. He says the children may have contracted AIDS as a result of a government policy that required blood transfusions to prevent anemia caused by lack of food.

The man who headed the Cabinet-level board overseeing the rescue of the nation's savings-and-loans resigned today after four months on the job. Daniel Kearney said the position did NOT have enough authority ''to be effective.'' Bert Ely, a thrift industry consultant, said Kearney ''was probably as good a person as'' could've been found for the post, and said his resignation does NOT bode well for the bailout of the industry. That bailout has been slow in getting started, and has drawn heavy criticism from Congress.

Federal officials busted an alleged money-laundering ring based in New Jersey that handled an estimated 100-Million dollars of drug money a year. The ring reportedly took its marching orders via fax machine from Colombian drug cartels. Federal agents raided homes and businesses in New Jersey, New York and Florida... arresting more than a dozen suspects and the seizing 10-Million dollars in cash and bank accounts.

Federal anti-drug chief William Bennett is rejecting blame for NOT solving Washington, D-C's, drug epidemic. Bennett says the city's government chronically fails to apply for federal aid... even when his office sends them warnings to apply. But the chairman of a Senate budget panel today showed Bennett a list of 120-Million dollars in federal funds that D-C's government had applied for, only to be refused by Bennett's office.

-30- 1967

#90040u4353 02/09/1990 ~United Press International

(FEB. 9) UPI - The former model whom federal agents reportedly used to lure Washington, D-C, Mayor Marion Barry into a drug sting has postponed an arraignment on drunk-driving charges. An attorney for ''Rasheeda'' Moore did NOT say why Moore wanted her arraignment postponed. The 38-year-old Washington, D-C, native was arrested in North Hollywood, California, on New Year's Day on suspicion of drunk driving.

Both Democrats and Republicans on a Senate Panel gave a warm reception today to the woman President Bush has nominated for surgeon general. Dr. Antonia Novello... who was born in Puerto Rico... would be the first woman and the first Hispanic to fill the post. Democrats did NOT give her a hard time about her opposition to abortion because they say she does NOT plan to make an issue of abortion.

NOT everyone is pleased with steps the government took to halt an ''explosion'' of health claims on food products. The Food and Drug Administration proposed new rules that would limit such claims to well-documented statements... such as that low-fat foods reduce risk of heart disease. Consumer activists praised the move, but an official for companies that make nutritional supplements criticized it. The head of the Council for Responsible Nutrition says it will have a ''negative health impact on Americans.''

An Air France Concorde jet was given priority landing at New York's Kennedy International Airport today when pilots told air-traffic controllers they were low on fuel. Officials say the plane was forced to drop to subsonic speed 90 minutes before landing because of a problem with the autopilot. The transatlantic jet had 30 minutes of fuel left when it landed. The incident comes two weeks after a Colombian jetliner crashed on approach to Kennedy, apparently because it ran out of fuel.

-30- 1994

#90041d1570 02/10/1990 ~French/German News Agency

MELBOURNE, AUSTRALIA (FEB. 11) - A high-level French business delegation arrived here Sunday at the start of a five-day visit to examine trade and investment opportunities.

The 22-member delegation, led by Jean Gandois, chairman and chief executive of the French industrial giant Pechiney, was expected to meet government, business and trade union leaders.

Meetings have been arranged with Prime Minister Bob Hawke, Treasurer Paul Keating, trade union leader Bill Kelty, and key businessmen.

France has sent representatives from industries including industrial gases, telecommunications, banking, food processing, water distribution, petroleum, dairy products, chemicals and pharmaceuticals, glass, aircraft manufacturing and food packaging.

They will in Melbourne on Monday, Canberra on Tuesday, Sydney on Wednesday and Perth on Thursday.

-30- 1055

#90041p0016 02/10/1990 ~PR Newswire

ST. PETERSBURG, FL (FEB. 10) PR NEWSWIRE - Milton Roy Company (NYSE: MRC) announced today that it has purchased 488,300 shares of its common stock from Crane Co. (NYSE: CR) at $16.75 cash per share.

Richard E. Schmidt, chairman and president of Milton Roy stated, "We are pleased to be able to repurchase these shares at an attractive price rleative to the excellent future prospects of the company. The repurchase is also beneficial because it is anticipated to enhance 1990 earnings per share and increase return on equity."

The shares were purchased on Friday, Feb. 9, and represent all the shares owned by Crane. Milton Roy's shares opened on the New York Stock Exchange on Friday at $16.75 and closed at $16.50.

Milton Roy Company manufactures a broad range of analytical instrumentation and process control products for use in industrial, educational and laboratory applications.

#90041u0096 02/10/1990 ~United Press International

(FEB. 10) UPI - Violence erupted in South Africa tonight, on the eve of Nelson Mandela's release from prison. Authorities say police fired to break up mobs of blacks who were throwing stones and gasoline bombs in two townships east of Johannesburg. They say eight people were killed and 45 injured. Mandela's release tomorrow will end more than 27 years of

imprisonment for the black nationalist leader, the world's most famous political prisoner.

South African President de Klerk announced the impending release at a news conference today in Cape Town. Spontaneous celebrations erupted across the country... including in the black city of Soweto , where about 500 youths danced outside the Mandela family home. Anti-apartheid leaders say once Mandela is freed, he'll be driven from the prison to Cape Town for a news conference and a public rally.

West German Chancellor Helmut Kohl says he's pleased with a meeting he had with Soviet President Gorbachev today. Kohl says the Kremlin leader promises to leave the issue of German re-unification to the Germans. As for when that could happen, Kohl predicts re-unification within two years.

Secretary of State Baker weathered a storm of tough questions this morning from the Soviet equivilent of a Senate Foreign Relations Committee. Soviet legislators grilled Baker on the U-S invasion of Panama and U-S naval power. Baker had an easier time this afternoon in Bulgaria, where he was cheered by crowds of citizens. Bush told Bulgaria's government to institute more democratic reforms if it wants U-S aid.

-30- 1726

#90041u0098 02/10/1990 ~United Press International

(FEB. 10) UPI - President Bush met at Camp David, Maryland, today with NATO Secretary-General Manfred Woerner for talks about the political developments in Europe. The talks come as the likelihood of a unified Germany increases. That raises the question of whether the resulting country would remain a member of NATO. Secretary of State Baker has said that Washington might accept a re-unified Germany that would NOT necessarily be a full member of NATO.

NASA scientists say the Galileo space probe performed perfectly last night in its flight around Venus- except for one minor problem. An apparent computer glitch caused a camera shutter lens to click faster and more often than it was supposed to... going through 468 cycles instead of 16. Aside from that, they say, it was a flawless mission that puts the probe on course to Jupiter.

Tornadoes and high winds ripped through the South early today, killing at least three people and injuring scores of others. Authories say homes were demolished, trees blown over and power knocked out for more than 360-thousand customers. At least 13 tornadoes touched down in six states, but officials say much of the damage was caused by winds gusting to 90 miles an hour.

Crime is up four percent in Atlanta for last year... and police say that's

NOT bad, relatively speaking. The year before it rose 14 percent. Residents of Atlanta now have a one-in-five chance of falling victim to crime. Homicides rose nearly 14 percent in the city. Automobile theft and robbery posted the largest jumps. Police attribute the rising crime rate largely to illegal drug use.

(FEB. 12) UPI - TV SCHEDULE:

(Times are EST unless noted)
(R denotes repeat)

SUNDAY, FEBRUARY 18

7 a.m.
PBS, ''Sesame Street.''

8 a.m.
PBS, ''Mister Rogers' Neighborhood.''

8:30 a.m.
CBS, ''Sunday Morning.''

9 a.m.
NBC, ''Sunday Today.''
PBS, ''Sesame Street.''

10 a.m.
PBS, ''Wonderworks: 'Runaway''' - Aremis Slake is a latch-key kid whose best friend is killed in an accident. His guilt and sorrow drive him under the streets of New York City, where a subway cave becomes his new home, and he struggles to survive in a tough underground world.

10:30 a.m.
ABC, ''The Health Show.''
CBS, ''Face the Nation.''
NBC, ''Meet the Press.''

11 a.m.
ABC, ''Business World,'' anchored by Sander Vanocur.
CBS, ''For Our Times.''
PBS, ''Degrassi Junior High: 'Rumor Has It.'''

11:30 a.m.
ABC, ''This Week With David Brinkley.''
PBS, ''Degrassi High: 'Nobody's Perfect''' - Kathleen's new

boyfriend is older, popular, affectionate - and physically abusive.

12 noon
CBS, ''Sports Special: 'Daytona 500 Live''' - Flag-to-flag coverage of the 32nd NASCAR Daytona 500, America's most prestigious stock car race, live from Daytona International Speedway in Daytona Beach, Fla.
PBS, ''Wild America.''

1:00 p.m.
NBC, ''College Basketball'' - Oklahoma Sooners vs. Missouri Tigers from Hearnes Center in Columbia, Md.

1:30 p.m.
PBS, ''Inside Washington.''

2 p.m.
ABC, ''ABC's College Basketball.''

3:00 p.m.
NBC, ''Sportsworld'' - Live coverage of scheduled 12-round junior-flyweight title bout between Michael Carbajal of Phoenix, Ariz., and Tony ''Bazooka'' Deluca of San Diego, Calif., from the Civic Center in Phoenix Ariz.

3:30 p.m.
CBS, ''The NBA on CBS'' - Boston Celtics vs. Los Angeles Lakers at the Forum in Inglewood, Calif.

4 p.m.
ABC, ''ABC's College Basketball.''

4:30 p.m.
PBS, ''Sonia Sanchez'' - An exploration of how Sonia Sanchez's poems reflect her concerns for the struggles of women and African-Americans. The program profiles her childhood in Birmingham, Ala., her adolescence and political awakening in Harlem; and her two decades in Philadelphia, where she is currently an English professor at Temple University.

6:30 p.m.
ABC, ''ABC's World News Sunday'' - anchored by Sam Donaldson.
NBC, ''NBC Nightly News.''

7 p.m.
ABC, ''Life Goes On.''
CBS, ''60 Minutes.''
NBC, ''Sunday Night at the Movies: 'The Goonies.'''
PBS, ''The Frugal Gourmet.''

7:30 p.m.
PBS, ''The Old House.''

8 p.m.
ABC, ''America's Funniest Home Videos.''
CBS, ''CBS Sunday Night Movie: 'The Color Purple''' - Danny Glover, Whoopi Goldberg and Margaret Avery star in Steven Spielberg's adaptation of Alice Walker's Pulitzer Prize-winning novel about the struggles of one Southern family in the early 20th century.

8:30 p.m.
ABC, ''Elvis.''

9 p.m.
ABC, ''ABC Miniseries: 'The Kennedys of Massachusetts''' - Based on the best-selling book ''The Fitzgeralds and the Kennedys'' by Doris Kearns Goodwin, the miniseries recounts the rise of one of America's most charismatic families. Starring William Peterson, Annette O'Toole, Pat Hingle and Charles Durning. Part 1 of 3.
NBC, ''The Death of the Incredible Hulk.''
PBS, ''Masterpiece Theater: 'After the War: Winds of Change''' - Rachael and David are living in the newly independent West African Republic. While traveling north on business, they become caught up in a growing rebellion against the Republic and its first president.

11:00 p.m.
ABC, ''World News Tonight: 'The Weekend Report.'''

11:30 p.m.
NBC, ''George Michael's Sports Machine.

12:30 a.m.
PBS, ''Chuck Davis: 'Dancing Through West Africa''' - Filmed in villages and suburban compounds of Senegal and the Gambia in West Africa, the internationally renowned dancer and choreographer explores the life, movement and sense of community created in Africa by dance.

(FEB. 11) UPI - DIGEST:

Baseball

Pittsburgh went 1-1 in arbitration cases. Outfielder R.J. Reynolds lost his case, settling for $535,000 in 1990. He was seeking $785,000. Pitcher Bob Kipper was awarded $525,000 for next season, a raise of $295,000. The Pirates offered $380,000. Kipper underwent arthroscopic surgery to remove fragments from his elbow.

Boxing

South Korean Kim Bong-jun defended his World Boxing Association minimumweight (under 108 pounds) title Saturday, stopping Petthai Chuvatana of Thailand 1:15 into the fourth round of a scheduled 12-round bout in Seoul. Kim, 26, improved to 21-5-3 in his third title defense. Chuvatana, 22, dropped to 7-1-1.

Football

A Hennepin, Minn., county court judge will decide Monday whether Vikings defensive end Chris Doleman is contractually bound to the team for another season. Doleman said he agreed to three one-year contracts in 1987 with no option, including a clause giving the team the right to extend the deal for one season. The Vikings said both sides intended an option year and the team had agreed to pay Doleman $125,000 in July 1990 for the inclusion of the clause. Doleman wants to negotiate with other teams.

Harness Racing

Jockey Joe Marsh, Jr. recorded his 5,000th career victory Friday night, steering One Bad Sister to triumph in the seventh race at Yonkers Raceway. Marsh, 55, became the sixth member to reach 5,000.

Skiing

Carole Merle of France defeated Maria Walliser of Switzerland by 2-100ths of a second in a women's World Cup super-giant slalom in Meribel, France. Merle recorded a time of 1:05.35, with Walliser second in 1:05.37. West Germany's Michaela Gerg finished third after Austrian Barbara Sadleder missed a gate and was disqualified.

Tennis

Ivan Lendl, the top-rated player in the world, advanced to the final of the Milan Indoor Championships, defeating American Pete Sampras, 3-6, 6-0, 6-3 in Italy. ... Steffi Graf, the top-ranked player in the world, will have her broken right thumb examined Monday to determine if surgery is necessary. Graf suffered a chipped right thumb in a skiing accident last Wednesday at St. Moritz, Switzerland. She could miss three months.

HUNTINGTON BEACH, CA (FEB. 11) UPI - Government officials said Saturday they will train and equip 500 volunteers eager to help rescue oil-soaked birds washing up in the wake of the American Trader oil spill.

The volunteer training program, supervised by the state Fish and Game Department, the Coast Guard and the Occupational Safety and Health Administration, will be conducted three times a day at the Huntington Beach Lifeguard headquarters as long as needed.

Officials from the Fish and Game Department and from Amigos de Bolsa Chica Wildlife Refuge warned that unless done properly, picking up oily birds is dangerous and harmful to both the animal and rescuer. The oil contains benzine, a carcinogen.

Officials also said many well-intentioned volunteers are frightening the oil-soaked birds and into the surf where they are drowning.

Also, those who rescue birds on their own are in violation of state codes and could be cited, said Bruce Kinney, a state game warden.

By late Saturday, state officials reported retrieving 67 live oil-soaked birds and 33 dead birds.

When a bird's feathers become oiled, its water-proofing protection is ruined, and it become susceptible to hyperthermia. Bird can also die from ingesting oil while preening.

Under the volunteer-training program, designated assistants will take the birds to a rescue center where experts will wash and rehabilitate them.

Workers at the rescue center were busy scrubbing the squawking birds Saturday.

Millicent Woods, a member of the International Bird Rescue Center, which coordinated efforts to save hundreds of birds injured in the 1989 Alaska spill, had her hands in a soapy tub with a squealing Western grebe, the most common of the birds found so far. Using a toothbrush, she scrubbed its head and, with her hands, she vigorously rubbed off the oil, being careful not to harm its feathers.

In addition to the grebe, the majority of the birds recovered include cormorants, common mure, seagulls, loons, rhino auklet, and brown pelicans which are endangered.

The 394,000-gallon spill 2 miles out to sea has fouled 13 miles of shoreline from Newport Beach north to Anaheim Bay.

-30- 2401
#90041u1387 02/10/1990 ~United Press International
PORTLAND, OR (FEB. 10) UPI - Eight anti-abortion protesters jailed indefinitely for civil contempt have decided against pledging $10,000 each in assets as a condition of release and they remain locked up.

Norman Lindstedt, a lawyer for the Portland protesters, notified Multnomah County District Judge Nely Johnson early Friday that the protesters rejected the release condition the judge had set Thursday.

The eight protesters were sent to jail Jan. 25 after being held in civil contempt for violating a preliminary injunction restricting anti-abortion protests at the Lovejoy Surgicenter in northwest Portland. Johnson jailed them after the eight refused to state that they would abide by the injuction terms.

Johnson said Thursday that $10,000 in assets pledged by each of the demonstrators in return for their release would be held by the court and paid as damages to any party showing an injury as a result of any future demonstrations that violated the preliminary injunction.

They could remain in jail until a full trial in April on the medical clinic's request for a permanent injunction.

The preliminary injunction bars demostrators from blocking doorways and preventing entry by others to the Lovejoy building. However, the temporary order does not preclude all demonstrating near the building.

Lindstedt has filed an appeal with the Oregon Court of Appeals contesting the judge's civil contempt punishment.

-30- 1628
#90041u1418 02/10/1990 ~United Press International
HUNTINGTON BEACH, CA (FEB. 10) UPI - The oil tanker that was punctured off Southern California last week spilled 394,000 gallons of oil into offshore waters, 110,000 gallons more than initially believed, the Coast Guard said Saturday.

In the four days since the spill, the slick has fouled 13 miles of shoreline, killing dozens of sea birds and threatening microscopic animals and plants that form the foundation of the aquatic food chain.

Capt. James Card, the Coast Guard's on-scene coordinator for the massive spill, said once authorities began investigating the spill site, ''they discovered more oil had spilled.''

The spill began when the vessel was damaged Wednesday but the leaking stopped within eight hours of the accident.

Card said 21,000 gallons of oil remaining in the vessel's two damaged tanks were pumped out Saturday. Underwater crews were to begin patching the two holes Sunday in hopes of moving the tanker ship on Monday. More than 23 million gallons of oil remained on board in other compartments.

Acknowledging the Coast Guard's initial calculations were off, he said a total of 394,000 gallons had spilled from two holes 38 feet beneath the surface in the side of the ship. The earlier report had been 280,000 gallons.

The resulting slick of oil - which spewed from the ruptured hull of the U.S.-registered tanker American Trader, pierced apparently by its own anchor - grew to 12-miles-by-3.5-miles early Saturday, Coast Guard officials said.

An investigation was underway to determine exactly how the anchor was able to puncture the hull.

Drifts of oily residue spotted a 13-mile stretch of beach between Newport Beach north to Anaheim Bay, just south of the Los Angeles County line, while hundreds of professional crews worked to collect as much of the beach-bound oily muck as possible.

Members of the international environmentalist group Greenpeace held a protest rally at Huntington Beach Saturday, urging officials to develop other methods of fuel to break the United States' dependence on foreign oil.

''The real answer for safety and to prevent reliance on other countries is to work on alternatives and renewable engery sources like solar polwer,'' said Greenpeace spokesman Ed Bierling.

Officials have not said how much the cleanup efforts have cost. But Stanford Schmidt, president of American Trading and Transportation of New York that owns the 80,000-ton tanker and is liable for the majority of the expenses, said the costs already have reached into the millions.

''We are doing the best we can,'' Schmidt told a news briefing. ''I don't know if there's anything humanly possible more than can be done. If there was, we would do it.''

At least 67 live birds had been found covered with oil and were being cleaned at a wildlife aid station. At least 33 have died, said officials, who also warned that the toll will mount at the days pass.

Officials began a program to signup 500 volunteers to help clean oil-soaked birds.

Protective booms were in place and connecting floodways were expected to be closed to prevent oil from infiltrating two wildlife reserves, the Bolsa Chica Ecological Reserve and the Seal Beach National Wildlife Refuge.

There were no reports of oily infringement into either area - nesting grounds for dozens of species, including the endangered least terns and light-footed clapper rails.

Officials conceded, however, that they were at mercy of shifting winds.

Even if the marshes are spared, biologists said they expect the number of deaths and injuries will rise in the populations of birds, whose feathers lose their insulating capacity when they are oil-matted.

''No question, if you have a spill in the environment, you'll have damage to (fish) eggs, lavae, plankton, birds,'' said Lt. Reid Smith of the state Department of Fish and Games.

A marine expert told the Los Angeles Times that a ship striking its own anchor is the mariner's equivalent of shooting oneself in the foot.

-30- 4259

#90041u2625 02/10/1990 ~United Press International

(FEB. 10) UPI - South African President F-W de Klerk says negotiations about releasing more political prisoners will begin after anti-apartheid leader Nelson Mandela is freed tomorrow . De Klerk says he has told Mandela the release of other political prisoners will depend on whether the black leader's freedom brings a new wave of unrest.

President Bush telephoned de Klerk to congratulate him on his decision to release Mandela. Bush has invited de Klerk to visit the United States and says he will make the same offer to Mandela when he is freed. Civil rights leaders around the world are praising the move... although conservative leaders in South Africa are condemning it. Two-thousand white South Africans marched through Pretoria today, chanting ''Hang Mandela.''

The re-unification of East and West Germany might be coming very soon. West German Chancellor Helmut Kohl met with Soviet President Gorbachev today in Moscow. Kohl says Gorbachev told him it's up to the Germans to decide on the time frame for unification. The West German leader says reunification could be completed before a 1992 European conference on post-war borders.

Storms spawned 13 tornadoes and winds of up to 90 miles an hour across the South this morning. At least three people are reported dead in Georgia. Two of them were crushed when trees fell on their homes. 87-mile-an-hour winds destroyed a dozen planes and damaged a dozen more at the Macon, Georgia, Airport. Winds toppled dozens of mobile homes in Alabama... including the mayor's home in one small town.

-30- 1724

#90041u2780 02/10/1990 ~United Press International

(FEB. 10) UPI - Reaction to the impending release of jailed South African black nationalist Nelson Mandela...

West German Chancellor Kohl predicts German reunification within two years...

And a warning from Secretary of State Baker to Bulgarian government officials...

These stories... and the latest on the oil spill off the southern California coast... next, from United Press International:

South African President F.W. de Klerk says black nationalist leader Nelson Mandela will be released from prison tomorrow, and that has drawn praise from around the world.

President Bush says he welcomes the move, and says it's another step toward a democratic, non-racial South Africa. Bush telephoned de Klerk and invited him to visit the United States.

In London, British Prime Minister Thatcher called it a ''wise decision.'' And a French anti-racist group says it's a victory for anti-apartheid movements ''of South Africa and the entire world.''

In Amsterdam, the Dutch government also praised the move. It was the Netherlands that colonized South Africa in the 17th century.

De Klerk made the announcement at a news conference today in Cape Town, and said he had concluded that Mandela ''is committed to a peaceful process.'' The release will end more than 27 years of imprisonment for Mandela, who was jailed in 1962 for crimes against the white minority government.

De Klerk says Pretoria wants a new constitution ''that is fair and just to all people of South Africa.'' He called on Mandela and other interested parties to work toward a positive climate for negotiations.

NOT everyone applauded the announcement. A spokesman for the right-wing

Conservative Party shook his head throughout de Klerk's news conference, and said the president ''has completely capitulated.''

Shortly before the news conference, nearly two-thousand white extremists marched through Pretoria, chanting- ''Hang Mandela.''

De Klerk says the government is concerned about the threats on Mandela's life, and says ''every precaution'' must be taken ''to ensure nothing happens to him.''

The government also released tonight the first photograph of Mandela in 24 years. It was taken last night, and shows the black nationalist leader standing with de Klerk.

-30- 2463

#90041u2786 02/10/1990 ~United Press International

(FEB. 10) UPI - West German Chancellor Helmut Kohl says East and West Germany could be re-united within two years.

Kohl spoke with reporters tonight following a two-hour meeting with Soviet President Gorbachev during a hastily arranged visit to Moscow. He says the Kremlin leader assured him the time frame for re-unification was for the Germans to decide.

And Kohl credits Gorbachev with making the historical outcome possible. In his words- ''This is a good day for Germany and a good day for me personally.''

Kohl admits he himself is surprised by the swiftness of events taking place in East Germany. He says if he had been asked earlier how soon re-unification could happen, he would've had a different answer.

Rampant migration from East Germany to West Germany prompted East German communist officials re-think their stand against re-unification.

Secretary of State Baker had a full day in the Soviet Union. He started with an historic appearance before a Soviet parliamentary committee in Moscow, and then traveled to Bulgaria for talks with interim government officials.

In Moscow, Baker faced tough questions from members of the international relations committee of the Supreme Soviet, which is the Soviet parliament. They questioned him on a variety of topics... including arms control, the U-S defense budget and the U-S invasion of Panama.

Baker was apparently taken aback by the directness of the questions. But he recovered, and said the give-and-take illustrates how far U-S-Soviet

relations have moved toward dialogue.

Baker then left Moscow for the Bulgarian capital of Sofia ... where he emphasized the importance of free elections to continue the revolution that toppled the government of hard-line leader Todor Zhivkov.

He told interim government leaders that U-S support for Bulgaria will depend on free and fair elections.

-30- 2055

#90041u2813 02/10/1990 ~United Press International

(FEB. 10) UPI - The Coast Guard says the total amount of oil that spilled Wednesday from a tanker off the coast of Southern California was higher than initially thought.

Earlier estimates said 280-thousand gallons had spilled, but Captain James Card says the correct amount is 394-thousand gallons.

The spill occurred when the tanker American Trader was punctured, apparently by its own anchor. The resulting oil slick is now 12 miles long and more than three miles wide, and is about half-a-mile offshore.

Drifts of oily residue have washed up along a 13-mile stretch of beach between Newport Beach and Anaheim Bay, and crews are using industrial-size paper towels to clean up the oily muck.

At least 50 live birds have been found covered with oil, and are being cleaned at a wildlife station. Officials say 25 others have died, and they warn that the toll on wildlife will mount as the days pass.

Tornadoes and high winds swept the South this morning. The winds knocked down trees, which killed three people in Georgia. More than 360-thousand customers were left without power.

At least 13 twisters are reported to have touched down- six in Alabama... two in Tennessee and Georgia... and one each in Texas, Mississippi and Florida. But much of the damage was caused by winds that reached speeds of 90 miles an hour.

A 10-year-old boy and a 72-year-old woman were killed in separate incidents in the Atlanta area when trees fell on their homes. A 69-year-old suburban Atlanta man inspecting his yard for storm damage was hit and killed by a falling tree.

In one small Alabama town, a tornado demolished the house of the mayor. He was NOT hurt.

Winds gusting to 87 miles an hour destroyed a dozen small airplanes and damaged a dozen more at the Macon, Georgia, Airport.

-30- 1973

#90041u2840 02/10/1990 ~United Press International

(FEB. 10) UPI - NASA officials have cleared the space shuttle Atlantis and its five-member crew for a February 22nd predawn blastoff.

This will be another classified flight, so NASA is NOT releasing any details. But a science magazine says the shuttle will launch a sophisticated spy satellite to eavesdrop on secure Soviet radio and television signals.

As usual with such military missions, the exact launch time will not be revealed until nine minutes before liftoff. NASA officials will only say Atlantis is scheduled to takeoff sometime Thursday morning

Meanwhile, NASA scientists are still trying to figure out what went wrong with the lens shutter on the camera of the space probe Galileo. The space probe rounded Venus last night in a move designed to build up momentum for its journey to Jupiter.

NASA says aside from taking too many pictures, Galileo's swing around Venus was flawless and it recorded all the information it was supposed to record.

The bottlers of Perrier mineral water are recalling all U-S inventories of the water and inspecting packaging and distribution facilities to find out how small amounts of benzene got into the water.

The Food and Drug Administration found between 12 and 19 parts per BILLION of the clear, flammable, poisonous liquid in samples of Perrier. That's more than double the five parts per BILLION allowed. Perrier bottlers say the F-D-A has assured them the small quantities of benzene do NOT pose any significant health threat. But they're taking the bottles off the shelves anyway.

Benzene is used as a solvent for fats and in making lacquers, varnishes and dyes. It is also believed to be a cancer-causing agent.

Perrier officials say NO benzene has been detected by either the company or the French government at the underground stream in France where the water is drawn and bottled. They're focusing on the packaging and distribution.

-30- 2093

#90041u2901 02/10/1990 ~United Press International
(FEB. 10) UPI - South Africa's announcement of tomorrow's release of jailed black nationalist leader Nelson Mandela was followed by violence tonight in two townships east of Johannesburg. Authorities report eight people killed and 45 injured when police opened fire to break up crowds of blacks hurling stones and gas bombs.

Mandela is quoted today as warning that proposed negotiations canNOT be used as another delaying tactic to preserve white rule. Mandela reportedly says there will ''be NO peace'' in South Africa while whites insist on preferential treatment.

West German Chancellor Kohl says Soviet leader Gorbachev had assured him it is up to East and West Germany to decide the time frame for re-unification. Kohl predicts the two Germanys will get together within two years.

At least two people were reported killed and four others wounded today in renewed fighting between rival Christian military factions in Beirut, Lebanon. Sources say the Syrian army and Lebanese troops could use the fighting as a pretext to move into east Beirut.

Some 300 people gathered today at a pier in Huntington Beach, California, to protest the spill of almost 400-thousand gallons of oil two miles off shore. The protesters also criticized the clean-up efforts the Coast Guard had praised earlier.

VATICAN CITY (FEB. 11) - Pope John Paul II sunday appealed to the hostile factions in Sudan to end their bloody civil war and enable humanitarian aid to reach the Sudanese people.

Reports from southern Sunday gave cause for ''grave concern'', the pontiff said. He called on both sides to reopen the dialogue and to work towards national reconciliation.

All groups in society, including minorities, should be respected regardless of race and religion, Pope John Paul said.

MOSCOW (FEB. 11) - An armour-plated Soviet military train has arrived in the Armenian capital Yerevan and is preparing to break through a rail blockade imposed on Armenia by Azerbaijan, Tass news agency said Sunday.

"We are awaiting orders and we are ready to implement them," Tass quoted the train's commander, Captain Mikhail Kuliguin, as saying.

The train, which came from western Siberia, has an extremely powerful engine and is carrying well-armed troops from the Russian republic, Kazakhstan and central Asia.

However Tass said the troops were hoping to see the blockade lifted through negotiations rather than by force.

Some 400 trains loaded with consumer goods from other parts of the Soviet Union have been held up because of the blockade.

At least 125 people have been killed in the Azeri capital Baku since ethnic strife between Armenians and Azeris led to intervention by Soviet troops on January 20.

ADDIS ABABA (FEB. 11) - The Organization of African Unity (OAU) on Sunday said it "warmly welcomed" and "rejoiced" at the release from prison of veteran South African nationalist leader Nelson Mandela.

OAU Secretary-General Salim Ahmed Salim said Mr. Mandela's release was the result of his "indomitable spirit of resistance".

The reaction, which called the release of Mr. Mandela this "unique and significant landmark in the struggle against institutionalized racism," was one of the swiftest on record from the OAU.

The OAU chief, in a rare tribute to the South African government, also hailed as "significant" the unbanning of anti-apartheid organizations.

But Mr. Salim warned that while the world rejoiced at the release of Mr. Mandela, it was important to consider that apartheid remained entrenched.

He called for more pressure to be exerted upon the South African government, including economic sanctions.

Islamabad (FEB. 11) - Indian troops fired on a crowd of Kashmiri protestors breaking the ceasefire line from Pakistan side of the turbulent Himalyan state Sunday causing undetermined casualties, reports from the area said.

Unofficial sources said at least six protestors were killed and scores injured in the incident reminiscent of the one last week near the Pakistani border town of Sialkot in which three persons were reported killed by Indian security forces.

Sunday's incident took place near Chikothi checkpoint, about 50 kilometres from Muzaffarabad, capital of the Pakistan-controlled Azad (free) Kashmir, according to reports.

It came on a day when Kashmiris were observing the sixth death anniversary of their hero, Maqbool Butt, who was hanged by India for alleged terrorism.

The Azad Kashmir government chose the day to hold an all-party conference in Pakistan on the current Moslem uprising in Indian Kashmir.

#90042d3980 02/11/1990 ~French/German News Agency

BONN (FEB. 11) - East German authorities are about to declare local elections held throughout the country last year invalid after opposition

allegations that the poll was rigged, according to a West German newspaper.

Many mayors are also expected to be arrested and charged with rigging the elections, the mass circulation Bild Zeitung said in an article appearing Monday.

The newspaper said mayors and town councillors elected in the May 7 poll last year would be asked to remain in office until new municipal elections scheduled for May 6.

But it added that "a great many mayors" would face charges of rigging the poll, saying some were already planning to defect to West Germany to avoid prosecution.

The poll, which officially confirmed the ruling communist Socialist Unity Party of ousted hardline leader Erich Honecker, raised a storm of protests by East German dissidents.

#90042d4260 02/11/1990 ~French/German News Agency

KHARTOUM (FEB. 11) - Samira Hassan Mahadi Sunday became her country's first woman to be sent to jail for anti-government activities.

Mahadi, in her thirties and a clerk in the judiciary, was sentenced by a Khartoum court to three years in prison.

She was arrested late last year for possessing an anti-government leaflet, which the authorities said was harmful and would ''incite hatred against the state''.

The same court sentenced a female companion of hers to two years in jail, which she will serve at home. But the judge warned that she would immediately be transfered to prison if she indulged in any anti-government activity again.

The third companion, Ali Mohamed Tom Saqair, was given two years in jail. He was a diplomat with the Sudanese foreign ministry.

The military government of General Omer Beshir, which came to power in June last year, has banned all political activities in the country.

MANILA (FEB. 11) - Talks on the future of U.S. military bases in the Philippines will focus on Washington's failure to deliver pledged compensation for the facilities, President Corazon Aquino said Sunday.

Mrs. Aquino also said she "does not need" to meet with U.S. Defense Secretary Richard Cheney during his visit here next week, saying she had been misquoted by U.S. officials who had called on her earlier.

"The topic of the exploratory talks will be the non-fulfillment of the commitments of the Americans under the Manglapus-Shultz agreement" in 1988 detailing compensation for the bases for 1990 and 1991, she said.

"We want America to explain why they failed to meet or reduced what is due us, what we describe as rent but what they say is assistance," she said on state-run radio.

"What we want to find out in the exploratory talks is what about it? We are waiting for them to explain to us why this has happened."

Philippine Foreign Secretary Raul Manglapus has said he expected the U S. congress to cut 96 million dollars from a 360 million-dollar military and economic aid package pledged by Washington for 1990 as compensation for the bases.

He said Sunday that Washington and Manila should be able to start the "exploratory talks" on Clark Air Base and Subic Naval Base, the two largest U.S. military bases overseas, by "the end of March or the beginning of April" at the earliest.

CAPE TOWN (FEB. 11) - The deaths of at least seven people Sunday marred countrywide celebrations to mark the release of African National Congress (ANC) leader Nelson Mandela.

In Cape Town, ambulance officials said four people were shot dead when police opened fire on bottle-throwing youths near Grand Parade in the city centre, where huge crowds had gathered to await the arrival of Mr. Mandela.

Trouble broke out when sections of the crowd, who had been vainly waiting outside the City Hall for up to eight hours in sweltering heat for a glimpse of the man who was the world's most famous political prisoner, became increasingly impatient with delays.

Some started pelting police and shop windows with bottles and stones, goading policemen into at least seven retaliatory volleys of birdshot, an Agence France-Presse reporter said.

At least 17 people were hurt in the clashes.

In other bloodshed Sunday, police in the nominally independent homeland of Ciskei opened fire on jubilant youths who had taken to the streets in Mdantsane township, near the east coast city of East London, a correspondent said.

Three people died and 20 were injured -- among them eight people shot in the head -- during the clashes, she said.

PANAMA CITY (FEB. 11) EFE - Panama's U.S.-backed government has officially decreed the abolition of deposed leader Manuel Antonio Noriega's Panamanian Defence Forces (PDF) and their replacement with a law-enforcement body.

The new Public Force, which came into being shortly after the U.S. invasion of Panama on December 20, is to be headed by the president, said the decree, which was approved by ministers after a 10-hour session late Saturday.

"The Public Force will be answerable directly to the executive body, and its actions subject to the Constitution and the law, with total respect for human rights," read the decree.

Previously, PDF chief Noriega was supreme head of the military, which was independent of the presidency.

The PDF was Noriega's chief instrument of control and was overrun by U.S. troops sent into the country to oust and capture the ex-dictator.

The PDF was immediately disbanded when Guillermo Endara was sworn in as Panamanian president at a U.S. Air Force base just before the invasion.

Vice-President Ricardo Arias, who is also justice and interior minister, said Saturday the decree was "the first formal, legal step towards the demilitarization of the Public Force".

The separate police, air and maritime services are to remain in operation until their merger when the Public Force's regulatory legislation is passed.

Public Force numbers are to be limited to a certain percentage of the population, to be specified in the legislation, but can be temporarily increased "subject to the approval of the legislative body, for a 30-day period" in times of war or serious public unrest.

Public Force members will not be allowed to participate in politics except

to vote.

CAIRO (FEB. 11) XINHUA - EGYPTIAN PRESIDENT HOSNI MUBARAK WILL VISIT MOSCOW NEXT MONTH FOR TALKS WITH SOVIET LEADERS ON THE MIDDLE EAST PEACE PROCESS, THE EMIGRATION OF SOVIET JEWS TO ISRAEL AND THE RECENT CHANGES IN EASTERN EUROPE, AN EGYPTIAN FOREIGN MINISTRY OFFICIAL ANNOUNCED TODAY.

THE ANNOUNCEMENT WAS MADE BY OSAMA AL BAZ, FIRST UNDER- SECRETARY OF THE EGYPTIAN FOREIGN MINISTRY AND DIRECTOR OF THE PRESIDENTIAL BUREAU FOR FOREIGN AFFAIRS BEFORE HE LEFT THIS AFTERNOON FOR MOSCOW TO ARRANGE MUBARAK'S VISIT.

BAZ TOLD REPORTERS BEFORE HIS DEPARTURE THAT HE WILL CONVEY A MESSAGE FROM MUBARAK TO SOVIET LEADER MIKHAIL GORBACHEV ON THE LATEST DEVELOPMENTS IN THE MIDDLE EAST.

HE SAID HE WILL MAKE ARRANGEMENTS WITH TOP SOVIET OFFICIALS FOR MUBARAK'S FORTHCOMING VISIT INCLUDING THE AGENDA OF HIS TALKS IN MOSCOW.

BAZ ADDED THAT MUBARAK'S VISIT WILL ALSO INCLUDE TALKS ON BILATERAL TIES BETWEEN THE TWO COUNTRIES AND THE SOVIET UNION'S CONTRIBUTION TO EGYPT'S DEVELOPMENT PROGRAMS.

MEANWHILE, THE EGYPTIAN NEWSPAPER "AL-WAFD" REPORTED THAT SOME ARAB LEADERS HAVE CALLED UPON MUBARAK TO MAKE URGENT CONTACTS WITH BOTH GORBACHEV AND U.S. PRESIDENT GEORGE BUSH TO SEEK THEIR HELP TO CURB THE INFLUX OF SOVIET IMMIGRANTS INTO ISRAEL.

EGYPTIAN AND ARAB LEADERS HAVE RECENTLY VOICED THEIR OUTRAGE AT ISRAEL'S PLAN TO SETTLE LARGE NUMBERS OF SOVIET JEWS IN ISRAEL, ESPECIALLY IN THE OCCUPIED WEST BANK AND GAZA STRIP.

EGYPTIAN DEPUTY PRIME MINISTER AND FOREIGN MINISTER ESMAT ABDUL MEGUID HAS SAID THE ISRAELI MOVE WOULD MAKE THE SITUATION IN THE REGION MORE TENSE AND COMPLICATED AND WOULD HAMPER THE EFFORTS TO FIND AN APPROPRIATE SOLUTION TO THE MIDDLE EAST ISSUE.

ISRAELI PRIME MINISTER YITZHAK SHAMIR HAS SAID ISRAEL EXPECTS A NUMBER OF UP TO HALF A MILLION SOVIET JEWS TO SETTLE IN ISRAEL IN THE NEXT FIVE YEARS.

MUBARAK'S FORTHCOMING VISIT TO MOSCOW WILL BE THE FIRST BY AN EGYPTIAN PRESIDENT TO THE SOVIET CAPITAL IN 18 YEARS.

#90042u0137 02/11/1990 ~United Press International
(FEB. 11) UPI - The week the longest winning streak of the season in the NBA was stopped at 12 games ended with the longest current run in college ranks following suit Saturday, when a young Baylor team surprised No. 3 Arkansas.

The Razorbacks, who had won 12 straight games and 18 in the Southwest Conference, fell 82-77 to the Bears, whose underclassmen-filled team has struggled to play .500 in the league.

Wednesday night on the pro circuit, the Golden State Warriors won with three-tenths of a second left to end the Philadelphia 76ers' 12-game roll. The Razorbacks Saturday were undone in the final minute as sophomore guard David Wesley made four clutch free throws en route to his 23-point performance.

Because of the recent past - Arkansas was through the toughest part of its schedule and No. 1 Missouri lost Thursday - the Razorbacks could probably be blamed for looking too far ahead. They set their sights on o. 2 this week and ultimate top-ranking.

''I think they were looking forward to that No. 1 ranking,'' Wesley said. ''They just looked past us. I thought there would be a good chance that they wouldn't be ready to play and if they weren't, I thought we had a chance to beat them.''

Hundreds of Baylor students stormed onto the court to celebrate the school's first victory over a ranked team in a decade.

With the score tied 70-70 and two minutes to go, Arkansas' Todd Day missed a layup. Wesley hit two free throws with 1:28 left that gave the Bears the lead for good, then stole the ball with 1:12 remaining and hit a layup.

Protecting a two-point lead, Baylor began going to the line with 41 seconds left and all eight of its free shots for the rest of the game were good - two by Tim Schumacher, two by Julius Denton and four by Wesley.

The loss dropped Arkansas to 20-3 for the year and 11-1 in the Southwest Conference. Arkansas' other two losses have been to Missouri and Nevada-Las Vegas, also ranked all year. Baylor is 13-9 and 5-6.

--- AROUND THE COLLEGE SCENE ---

In other games featuring Top 20 teams, top-ranked Missouri bounced back against Nebraska 107-85, No. 2 Kansas escaped Iowa State 88-83, No. 4 Duke outlasted Maryland 114-111 in overtime, No. 5 Georgetown downed Florida 56-40, No. 6 Syracuse bested No. 11 Connecticut 90-86, No. 7 Nevada Las-Vegas dumped Oklahoma State 100-84, No. 12 Louisiana State outscored Tennessee 119-113, No. 15 Georgia Tech beat No. 14 Louisville 94-84, No. 16 La Salle topped Manhattan 99-78, No. 19 New Mexico St. nipped Cal-Santa Barbara 66-64, and Arizona defeated No. 20 UCLA 83-74.

At Columbia, Mo., junior Doug Smith scored a career-high 44 points in a

Big Eight victory over Nebraska, the Tigers' first game since their upset loss to Kansas State. In improving to 22-2 overall and a first-place 8-1 in the league, Missouri matched a team record with its 29th straight home victory. Nebraska, losers of its last six games to Missouri, fell to 9-12 and 2-6. Smith, the only active player named Saturday to the Tigers' all-1980s team, had scored 31 against the Cornhuskers earlier this season.

At College Park, Md., Alaa Abdelnaby and Phil Henderson combined for 13 points in overtime to help the fourth-ranked Blue Devils rally from a 13-point deficit with 4:27 left in regulation against Atlantic Coast Conference rival Maryland. Abdelnaby's two free throws gave Duke a 104-103 lead with 2:31 left in overtime and the Blue Devils made eight free throws down the stretch to avoid a second straight ACC loss. Henderson and sophomore Christian Laettner each scored 26 points to lead the Blue Devils who were coming off a 72-69 loss to Virginia on Thursday.

At Landover, Md., Mark Tillmon scored 15 points to lead cold-shooting Georgetown in its lowest-scoring game of the season. The Hoyas missed their first 10 shots of the game and shot just 29.6 percent from the field in the first half but took control with a 14-0 first-half run keyed by 10 of Alonzo Mourning's 14 points. Florida never got closer than 9 points in the second half. Georgetown, 19-2, and in first place in the Big East has won four straight games and improved its record outside of conference play to 11-0. Florida, the defection-depleted SEC team, dropped to 6-13, lost its eighth straight game, the Gators' longest skid since a 14-game slide during the 1981-82 season.

At Syracuse, N.Y., Derrick Coleman scored a career-high 29 points and grabbed 12 rebounds and No. 6 Syracuse never trailed, avenging an earlier loss to the Huskies. Syracuse, improved to 18-3 overall and 8-3 in the Big East, before a Carrier Dome record crowd of 32,820. Chris Smith, who scored all 25 of his points in the second half, led the Huskies, 20-4, 7-3. John Gwynn and Tate George each scored 15 points for Connecticut and Nadav Henefeld added 13. The Huskies were 12 of 28 from the 3-point line.

At Knoxville, Tenn., sophomore Chris Jackson came off the lowest-scoring game of his career to score 49 points, including a career-high 30 from 3-point range to lead the 12th-ranked Tigers into first place in the Southeastern Conference with their seventh straight victory. Jackson, who had been held to a career-low 9 points against Auburn this week, responded against Tennessee by hitting 14 of 32 from the field, including 10 of 20 in 3-point shots.

At Louisville, Ky., Dennis Scott scored 30 points and freshman guard Kenny Anderson collected 29 points, 12 assists and 8 rebounds to lead Georgia Tech. Anderson scored 23 points in the second half and made 10 of 16 shots from the field. Brian Oliver added 19 points as Georgia Tech improved to 16-4. Louisville, 18-5, was led by LaBradford Smith with 23 points, Felton

Spencer 21 and Keith Williams and Jerome Harmon added 12 each. Smith also had eight assists.

At New York, Lionel Simmons scored a career-high 40 points to lead No. 16 La Salle to its 13th straight victory over Metro Atlantic Athletic Conference rival Manhattan. Simmons, who also pulled down 14 rebounds, had 20 points in each half to help the Explorers improve to 18-1 overall and 10-0 in the MAAC.

At Las Cruces, New Mexico, Rickey Fluckey hit a three-point jumper with 19 seconds left to lead the Aggies in a come-from-behind victory over Cal-Santa Barbara. The Aggies improved 20-2 overall and kept pace with UNLV at 11-1 in the Big West. The Aggies rallied from a 17-point second-half deficit to post their sixth straight win. Cal-Santa Barbara fell to 16-6 and 9-4 and snapped a five-game winning streak. Paul Johnson led the Gauchos with 12 points and Gary Grant and Lucius Davis had 10 apiece.

At Tucson, Ariz., Sean Rooks scored a career-high 24 points and hauled in eight rebounds as the Wildcats claimed their 44th straight home victory with the Pacific 10 triumph over UCLA. Jud Buechler contributed 17 points and 12 rebounds for the Wildcats, who pulled within one game of idle first-place Oregon State. Arizona is 16-4 overall and 10-3 in the conference. The Bruins slipped to 16-5 and 9-3 despite 26 points and 12 rebounds from Don MacLean.

#90042u0154 02/11/1990 ~United Press International

NEW YORK (FEB. 11) UPI - A very pregnant woman waiting for a train on a subway platform made an express delivery - a baby boy.

With the help of transit police alerted by 911, Sydell Golthin, 18, delivered her baby on a 7th Avenue subway platform in Manhattan shortly before 5 p.m. EST Saturday, said Al O'Leary, a transit police spokesman.

Transit officer Thomas Breyer, 35, explained that when they arrived at the scene the mother's ''water'' had broken and the baby's feet were visible.

Breyer said his partner, Jerry Lofredo, 24, noticed the umbilical cord was wrapped around the baby's head. ''He slipped the cord over his head and then pulled him all the way out,'' Breyer said.

He said Lofredo tapped the baby on the back and cleaned out the infant's airways. The baby was placed on the mother's stomach, covered with clothing and woman and child were rushed to a local hospital.

Doctors said the baby was nearly a month late, Breyer said.

Both officers said they were instructors in the transit police's training division, and said they were well-versed in emergency medical techniques.

Neither officer had delivered a baby while on duty, but both participated in the birth of their own children.

''We've trained for this. We get everything from life to death. Tonight we feel real good,'' Breyer said.

#90042u0156 02/11/1990 ~United Press International

BANGKOK, Thailand (FEB. 11) UPI - Soviet Prime Minister Nikolai Ryzhkov arrived in Thailand Sunday on an official two-day visit expected to focus on the Cambodian conflict and expansion of Soviet economic ties with the region.

Ryzhkov, arriving on a special Aeroflot plane, was greeted by Thai Prime Minister Chatichai Choonhavan and other senior ministers.

The Soviet premier was scheduled to tour Thailand's royal palace and visit a textile factory before a formal dinner Sunday night and official talks with Chatichai on Monday.

Ryzshkov, fresh from supporting President Mikhail Gorbachev's moves toward a multi-party Soviet system, was expected to discuss efforts to end the conflict in Cambodia, where Thailand and the Soviet Union back opposing sides.

The Soviet Union provides arms to the Phnom Penh government installed by Vietnam in 1978 while Thailand has long acted as a conduit for Western and Chinese aid for the three-party anti-government coalition.

Both Thailand and the Soviet Union, however, have urged their Cambodian allies to find a political settlement to the conflict.

The next round of Cambodian peace talks is scheduled for Feb. 26-28 in Jakarta, Malaysia, but the Khmer Rouge, the strongest guerrilla force, has said it may not attend.

Chatichai told reporters Saturday he expected the Khmer Rouge to agree to take part in the talks.

Official Soviet radio said this week that Thailand had recently shown ''good intentions'' on the Cambodian issue.

''The Soviet Union is pleased with Prime Minister Gen. Chatichai

Choonhavan's idea of turning the Indochinese battlefield into a marketplace,'' a radio commentator said.

Thai officials said they want the Soviet Union to encourage the Phnom Penh government to approve a U.N.-supervised settlement that would include the Khmer Rouge.

One official said any settlement that omitted the Khmer Rouge, with its 40,000 guerrillas, could never bring peace to Cambodia and would endanger Thai security along the Thai-Cambodia border.

Ryzhkov was also expected to seek better trade ties with Thailand, one of the fastest-growing economies in the world.

Thai exports to the Soviet Union totaled $400 million last year while Soviet exports to Thailand reached only $80 million.

The Soviet Union has pressed Thai companies to buy more Soviet goods and to set up a Thai-Soviet joint chamber of commerce.

Soviet officials acknowledged that increased trade will depend largely on the progress of Soviet economic reforms.

Ryzhkov's trip was seen as part of an effort to improve ties with the Association of Southeast Asian Nations, of which Thailand is a key member. Other members are Singapore, Malaysia, the Philippines, Indonesia, and Brunei.

#90042u0203 02/11/1990 ~United Press International
SAN ANTONIO (FEB. 11) UPI - Authorities confiscated an estimated $20 million worth of illegal narcotics from storage lockers on Saturday in what may be the state's largest drug seizure ever, officials said.

Undercover agents cut locks on two storage lockers and found 132 pounds of methamphetamine, or speed, with an estimated street value of $20 million, said Sumner Bowen, a supervisor with the Alamo Area Narcotics Task Force.

He said the seizure could be the largest in state history.

The discovery follows Friday's raid on a San Antonio home that netted authorities numerous of weapons, ammunition and a small amount of methamphetamine and marijuana.

Weapons seized from the home included three assault rifles, five assault pistols, one shotgun, 13 other handguns and two .22 caliber rifles, said task force Sgt. Stanley West.

Based on information from the raid, agents secured additional warrants to search the storage lockers. ''We knew they had a lot more drugs, but we had no idea (how much),'' said Bowen.

Arrested in the house raid were Andrew and Kathy Locke, both 35.

Stemmming from the house raid, Andrew Locke was charged with two counts of aggravated possession of drugs and was released on $50,000 bond. Kathy Locke was charged with unlawfully carrying a concealed weapon and aggravated drug possession and was released on $45,800 bond.

Bowen declined to say if the drug seizure could be linked to the Lockes. The seizure capped a two-year investigation.

-30- 1705
#90042u0212 02/11/1990 ~United Press International
BANGKOK, Thailand (FEB. 11) UPI - The Khmer Rouge guerrilla group said Sunday it would not particpate in Cambodian peace talks set for this month

in Indonesia because it was dissatisfied with the meeting's agenda, rules and participants.

Khmer Rouge radio quoted from a letter that guerrilla leader Khieu Samphan sent to Indonesian Foreign Minister Ali Alatas in which he declined an invitation to join the talks, scheduled to begin Feb. 26.

The Khmer Rouge, along with two non-communist resistance groups, has been fighting to topple the Cambodian government installed by Vietnam after a 1978 invasion. Vietnamese troops withdrew from the country last fall and the resistance groups have since claimed to have captured key areas along the Cambodia-Thai border.

By making the letter public, the Khmer Rouge seemed set in its determination to boycott the negotiations despite pleas on Saturday from Thai Prime Minister Chatichai Choonhavan and Army Chief Chavalit Yongchaiyudh.

Observers say that without the Khmer Rouge, the most powerful of the three resistance groups, the talks can make little progress towards a settlement of the 11-year-old conflict.

The radio said Khieu Samphan was concerned that Vietnam would be allowed to attend the talks as ''an outsider'' rather than a participant in the conflict.

The Khmer Rouge has claimed some Vietnamese troops have remained behind in Cambodia disguised as government soldiers.

Khieu Samphan's letter said two earlier rounds of peace talks in Jakarta, Indonesia, had ambiguous agendas which subjected the Khmer Rouge to ''pressure'' while allowing Vietnam a forum for propoganda.

''Therefore, the meeting is not aimed at resolving the problem, but will be another opportunity to put pressure on us, the victim,'' the Khmer Rouge leader said in the letter dated Feb. 4.

Khieu Samphan complained that an Australian peace plan calling for a dominant U.N. role was slated for discussion but not the resistance plan proposing a four-part interim government.

''I would like to reaffirm our position on demanding an extensive agenda, which includes a comprehensive settlement with well-defined procedures,'' he said.

He also said all agreements reached at the negotiating table should be unanimous, saying issues at earlier talks had been publicly declared resolved when the Khmer Rouge had not concurred.

The guerrilla leader called for the enlargement of the talks to include the five permanent members of the U.N. Security Council - China, the United States, the Soviet Union, Britain and France. The demand was rejected by Phnom Penh this week.

''We believe that only by so doing can the meeting make progress toward achieving a comprehensive political settlement,'' Khieu Samphan said.

He called on Alatas to respond to his concerns, apparently leaving open the possibility the Khmer Rouge may participate in future talks if the conditions were met.

The two coaltion partners of the Khmer Rouge - the followers of Prince Norodom Sihanouk and the Khmer People's National Liberation Front - have already agreed to attend the talks along with the government in Phnom Penh.

MOSCOW (FEB. 11) UPI - Two Soviet cosmonauts blasted off Sunday for the Mir space station where they will replace two other cosmonauts who have spent six months in the giant orbiting complex.

The silver-tipped, 184-foot Soyuz TM-9 rocket rumbled off the ground at the Baikonur Cosmodrome in the Soviet Central Asian republic of Kazakhstan at 9:16 a.m. local time, the official Tass news agency said.

The three-stage rocket carrying flight commander Anatoli Solovyov and engineer Alexander Balandin trailed an orange flame as it left the same desert launching pad from which Yuri Gagarin became the first man to enter space on April 12, 1961.

''The crew is to dock the spaceship with the Soviet orbital complex Mir and then replace the crew of the fifth main expedition, Alexander Viktorenko and Alexander Serebrov, who are in their sixth month of working in orbit and who are expected to return to earth on Feb. 19,'' the news agency said.

The spaceship was scheduled to dock with the Mir on Tuesday, bringing the 22nd and 23rd cosmonauts to the complex since it was launched Feb. 20, 1986, and opening the next chapter in the Soviets' space-station program.

The Soviets' 68th manned launch comes in a period of unprecedented criticism of the entire space program by newly emboldened lawmakers who, under Mikhail Gorbachev's political reforms, have questioned its direction and annual tab of $17.1 billion.

During their stay on the Mir, Viktorenko and Serebrov have done hundreds of medical and biological experiments and research for the Soviets' beleaguered agricultural program.

The crew also performed tasks outside the space station, testing the manned maneuvering unit, or ''space armchair,'' a device that allows cosmonauts to propel themselves while inspecting the Mir's external surface and doing other maintenance.

Soviet space officials, who have warned that the space program could be destroyed by penny-pinching legislators, are trying hard to make the program self-funding.

Many of the experiments on the Mir involve research into commercial production of organic and non-organic materials that might be made better in conditions of weightlessness, including various semiconductor substances, metals, alloys and glass.

The Soviets hope to earn as much as $40 million by charging foreign nations and businesses that want to conduct tests in a Kristall module, scheduled to to arrive at the space station in April, Tass said.

Moscow is also raising money through its new pay-as-you fly program that charges crews from other countries for trips to the Mir.

There have been four joint missions with foreign cosmonauts to the space station, a Japanese TV journalist is training in Moscow for a trip later this year, and British and Austrian cosmonauts are also scheduled to participate.

#90042u0218 02/11/1990 ~United Press International

PAARL, South Africa (FEB. 11) UPI - Hundreds of people danced and waved flags of the African National Congress in front of the South African prison Sunday where black nationalist leader Nelson Mandela was expected to emerge from 27 years and seven months of incarceration.

Police, anxious to control enthusiastic crowds and protect Mandela from threatened violence, set up road blocks a mile and a half from the gates of the Victor Verner prison outside Cape Town, forcing hundreds of jubilant spectators to abandon their cars and form a festive parade on foot down a road lined with grape vinyards.

Immediately following his 3 p.m. release, to be broadcast live in South Africa and the United States, the silver-haired Mandela, 71, was scheduled to be driven into Cape Town for a news conference and rally in the heart of the city.

President Frederik de Klerk announced Saturday Mandela would be released from prison, paving the way for negotiations to end the country's grinding racial conflict.

Mandela was sentenced on June 12, 1964, to life in prison for acts of sabatoge against the white-dominated government of South Africa. He refused several offers of freedom, turning down government demands he renounce violence as a condition of his release.

Scores of police and some soldiers gathered around the prison, where Mandela has been living in a former warden's cottage since December 1988.

Marshals with armbands ringed the gate of the prison and linked arms to keep the gathering crowds back from the main entrance where Mandela was expected to emerge. Women carried babies. Many of those in the crowd were not even born when Mandela was captured in 1962.

Andrew Anthony, 29, an employee of the Department of Education, and his pregnant wife drove through the night from their home in Kimberley to the picturesque Paarl to see Mandela step out of prison.

''Mandela has been a symbol of our struggle,'' said Anthony, who is of mixed race.

The Sunday Times, a nationally circulated broadsheet, devoted its entire front page to a photo of de Klerk and Mandela, topped by the banner headline ''Here he is.''

The photograph, released Saturday, is the first published photo in 24 years of the nationalist hero, whose name is synonymous with the fight against racial inequality but whose aging face has been virtually unknown except for family members, ministers and lawyers allowed to visit with him.

The color photograph of Mandela, standing shoulder to shoulder with de Klerk, showed his hair had gone gray but he appeared fit and trim.

On the eve of Mandela's release into a volatile political atmosphere, violence broke out in two townships east of Johannesburg where eight people were reported killed and 45 injured by police who fired to break up mobs of blacks hurling stones and petrol bombs.

Spontaneous celebrations erupted across the country after de Klerk's announcement, including in the black city of Soweto near Johannesburg, where about 500 youths and women danced outside the Mandela family home.

De Klerk told a news conference Mandela would be freed about 3 p.m. (8 a.m. EST) from Victor Verster Prison in the wine growing region of Paarl

outside Cape Town. Discussions were under way to conduct his release in a ''dignified and orderly manner,'' he said.

''Yesterday evening, I met with Mr. Mandela in Cape Town. During the meeting Mr. Mandela was informed of the government's decision regarding his release,'' said de Klerk, 53, whose rapidly unfolding racial reform program represents the boldest efforts to end the country's racial conflict since the National Party won power in 1948.

''I came to the conclusion that he is committed to a peaceful process,'' de Klerk said of Mandela, who is the world's most celebrated political prisoner and a powerful symbol of the resistance to white rule by South Africa's 28 million black majority.

De Klerk's announcement failed to meet Mandela's demands that the government lift in its entirety a 43-month-old state of emergency, release all political prisoners and clarify amnesty for exiles returning to the country.

De Klerk said, however, the issue of the exiles and political prisoners could be discussed in further negotiations. Lifting the emergency would depend on the ''situation on the ground,'' he said.

#90042u0219 02/11/1990 ~United Press International

JOHANNESBURG, South Africa (FEB. 11) UPI - Nine people were killed in separate incidents of unrest across the country in a 24-hour period, six of them in Natal Province, police reported Sunday.

Three blacks died in the black township of KwaMashu near the Indian Ocean port of Durban in Natal when a group of blacks went on the rampage, attacking and robbing inhabitants, the official report said.

In Durban, two Indian men were killed after fighting broke out between Indians and blacks, police said.

At Imbali, near the Natal provincial capital of Pietermaritzburg, a woman was stabbed to death and a man seriously injured when a group of blacks attacked them.

As many as 3,000 people have died since violence erupted in Natal in September 1987 between members of Chief Mangosuthu Buthelezi's conservative Zulu Inkatha movement and supporters of the more radical anti-apartheid umbrella United Democratic Front.

At KwaNabuhle in eastern Cape Province, near Port Elizabeth on the Indian Ocean coast, police found the body of a black man, who had been stabbed to

death.

At Nkululeko near Barkley East, also in the eastern Cape, a group threw stones at a black policeman. He fired into the crowd killing two blacks and wounding two more. In the same area, police used birdshot to disperse crowds stoning police vehicles.

#90042u0222 02/11/1990 ~United Press International

BUCHAREST, Romania (FEB. 11) UPI - Secretary of State James Baker held four hours of talks with Romanian leaders Sunday to wrap up a six-day Eastern European tour that included clashes with senior Soviet officials over U.S. defense policy.

Baker, the highest-ranking U.S. official to visit Romania since the December revolution that toppled communist dictator Nicolae Ceausescu, departed Bucharest for Shannon, Ireland, where he was expected to stop briefly before returning to North America.

In his trip through the East bloc, Baker spoke with legislators in the Soviet Union as well as government and opposition leaders in Romania and Bulgaria.

After arriving in Bucharest early Sunday, Baker met briefly with Prime Minister Peter Roman and later was received by interim President Ion Iliescu at the presidential palace.

He also held discussions, at the U.S. Embassy, with Romanian religious and labor leaders and the heads of several political parties expected to particpate in free elections scheduled for May.

The provisional government had hoped to use the Baker visit to allay U.S. concerns over its commitment to democratic reform.

Bucharest is also anxious to regain most-favored nation status, which Ceausescu renounced following U.S. criticism of Romania's human rights record. The status would pave the way for lucrative trade relations with the United States.

During an overnight visit Saturday in Sofia, Bulgaria, Baker emphasized to communist Prime Minister Andrei Lukanov and members of his government the importance of free and fair elections to continue the revolution that toppled hard-line leader Todor Zhivkov.

U.S. officials said Baker had made it ''forthrightly clear'' that Washington had grave doubts about the way the Communist interim government was preparing for elections.

Those doubts, the officials said, included the blocking of the opposition press from reaching the people.

''Some concerns are clearly genuine about elections,'' Baker said after meeting with Bulgarian government and opposition leaders. ''U.S. support will depend on free and fair elections.''

The United States has not announced a specific aid program for Bulgaria, but has proposed $300 million for start-up aid in all of Eastern Europe in 1991, excluding aid already announced for Poland and Hungary.

As he returned to his hotel, Baker was greeted by about 1,000 friendly demonstrators.

The crowd roared, ''Viva Democracia.''

Baker gave a double thumbs-up sign and told the demonstrators through a translator, ''You have brought Bulgaria to a new threshold of a new age of democracy. We praise your vision and your persistence.''

In the floodlights of the television cameras, he raised his arms and walked into the hotel as the crowd chanted, ''U.S.A, U.S.A., U.S.A.''

Earlier Saturday, Baker made an unprecedented appearance in Moscow before the international relations committee of the Supreme Soviet, or parliament.

As Soviet President Mikhail Gorbachev and others have discovered, delegates to the Supreme Soviet are no longer docile rubber stamps. They peppered Baker with a series of tough questions about arms control, the Pentagon budget, the invasion of Panama and the United States' refusal to consider a ban on nuclear testing or limits on naval arms.

Baker, apparently startled by the directness of questioning, recovered and called the occasion an example of how far U.S.-Soviet relations have progressed toward dialogue.

He resisted any commitment to the Soviets about United States military policy toward Cuba.

''Now is the time to put the Cold War legacy behind us,'' Baker said in his 15-minute opening speech to the committee. ''Now it is time to move beyond the Cold War.''

Baker met for four hours on Friday with Gorbachev, who told him Moscow will accept President Bush's proposal for troop cuts in central Europe only if 30,000 U.S. soldiers left out of the plan are removed from Britain and elsewhere in Western Europe.

LAS CRUCES, N.M. (FEB. 11) UPI - At least two gunmen apparently trying to stage a holdup at a bowling alley Saturday opened fire on seven people in an office, killing four of them and wounding three others, before setting fire to the office, police said.

Steve Turan, an employee of the bowling alley believed to be in his 30s, and his two daughters, Paula, 7, and Victoria, 2, were shot and killed along with Ann Houser, 13, a family friend, said police Capt. Fred Rubio.

A 34-year-old female who was related to the owner was wounded in the shooting, which apparently occurred shortly after 8 a.m., as was her 13-year-old daughter, Rubio said.

A concession worker was also wounded in the attack.

Two of the victims were listed in serious but stable condition and the third was in critical condition at Memorial General Hospital in Las Cruces Lt. Conrad Perea said.

''It appears the motive is robbery,'' said Rubio. ''All of the victims, seven in all, were rounded up in an office and shot.

''They were herded into the office and we assume after the shooting they (gunmen) apparently started a fire in the office area,'' he said.

He said investigators were attempting to interview the injured to learn more about the crime.

''A 13-year-old victim who had been shot called (a police emergency 911 line) immediately after she heard the suspects leave,'' said Perea. ''She was conscious and standing at the telephone when we arrived.''

''She says, 'I've been shot. It hurts.','' Perea said.

A .22 caliber rifle and a shotgun were apparently used in the shootings, he said.

The identities of the surviviors were not being released, police said late Saturday.

Firefighters called to the bowling alley doused a small blaze in the office where the shootings took place, fire department Capt. Randy Nix said.

''To the best of our knowledge right now, it was set by whoever is connected to the robbery and shooting,'' Nix said.

Police were searching for the gunmen Saturday night and had released composite sketches of the suspects, Perea said.

#90042u0247 02/11/1990 ~United Press International

PAARL, South Africa (FEB. 11) UPI - Black nationalist leader Nelson Mandela walked out of Victor Verster prison a free man Sunday, opening a new chapter in South African political history and ending a 27-year confinement for advocating the violent overthrow of the white minority government.

Mandela, 71, jailed in August 1962 and sentenced to life in prison in 1964 for sabotage, was driven to the prison gate in a car and then walked to freedom hand-in-hand with his wife, Winnie.

A crowd gathered outside the prison chanted and cheered and waved the green, black and yellow flags of the African National Congress.

Mandela, dressed in a dark business suit, smiled and then raised his hands over his head in apparent jubilation. Winnie Mandela gave a clenched fist salute to the crowd.

Police, anxious to control enthusiastic crowds and protect Mandela from threatened violence, had set up road blocks a mile and a half from the gates of the prison outside Cape Town, forcing hundreds of jubilant spectators to abandon their cars and form a festive parade on foot down a road lined with grape vineyards.

When Mandela emerged through the prison gates, police cleared a path with a team of motorcycle outriders as helicopters swirled overhead.

Mandela has been living in a former warden's cottage at the Victor Verster facility since December 1988, after moving from the maximum security Robbin Island prison off the Cape Town coast.

Immediately following his release, the silver-haired Mandela was scheduled to be driven into Cape Town for a news conference and rally in the heart of the city.

President Frederik de Klerk announced Saturday that Mandela would be released from prison unconditionally, paving the way for negotiations to end the country's grinding racial conflict.

Mandela was sentenced on June 12, 1964, to life in prison for acts of

sabatoge against the white-dominated government of South Africa. He had previously refused several offers of freedom, turning down government demands that he renounce violence as a condition of his release.

Marshals with armbands ringed the gate of the prison and linked arms to keep the gathering crowds back from the main entrance as Mandela, giving a clenched fist blackpower salute, emerged. Many of those in the crowd were not even born when Mandela was captured in 1962.

The Sunday Times, a nationally circulated broadsheet, devoted its entire front page earlier Sunday to a photo of de Klerk and Mandela, topped by the banner headline ''Here he is.''

The photograph, released Saturday, is the first published photo in 24 years of the nationalist hero, whose name is synonymous with the fight against racial inequality but whose aging face has been virtually unknown except for family members, ministers and lawyers allowed to visit with him.

On the eve of Mandela's release into a volatile political atmosphere, violence broke out in two townships east of Johannesburg, where eight people were reported killed and 45 injured by police who fired to break up mobs of blacks hurling stones and petrol bombs.

Spontaneous celebrations erupted across the country after de Klerk's Saturday announcement, including in the black city of Soweto near Johannesburg, where about 500 youths and women danced outside the Mandela family home.

''I came to the conclusion that he is committed to a peaceful process,'' de Klerk said of Mandela, who was the world's most celebrated political prisoner and a powerful symbol of the resistance to white rule by South Africa's 28 million black majority.

De Klerk's announcement failed to meet Mandela's demands that the government lift in its entirety a 43-month-old state of emergency, release all political prisoners and clarify amnesty for exiles returning to the country.

De Klerk said, however, the issue of the exiles and political prisoners could be discussed in further negotiations. Lifting the emergency would depend on the ''situation on the ground,'' saying that an absence of political strife and violence would lay the groundwork for canceling the emergency declaration.

Activists who met Mandela Friday afternoon said the symbolic leader of the African National Congress would break apartheid laws ''every hour of the day'' until the emergency is lifted and all political prisoners are freed.

#90042u0252 02/11/1990 ~United Press International
ATHENS, Greece (FEB. 11) UPI - Iran marked the 11th anniversary of its revolution Sunday with marches and a mass rally in Tehran's Freedom Square official reports from Tehran said.

The U.S. State Department had on Thursday issues an alert to American citizens that pro-Iranian Hezbollah terrorists might be planning attacks on U.S. interests in Western Europe to mark the 11th anniversary of the revolution.

In Tehran, President Akbar Hashemi-Rafsanjani, one of the architects of the revolution that toppled the shah, addressed the rally at Azadi Square, or Freedom Square, where he paid tribute to the late Ayatollah Ruhollah Khomeini, the state-owned Islamic Republic News Agency said.

The rally culminated 11 days of ceremonies in Tehran, where the anniversary celebrations were held for the first time since Khomeini died on June 2 last year.

Tehran radio, monitored in Athens, said massive crowds marched through the streets of the capital chanting slogans and carrying huge pictures of Khomeini, who led the revolution against the Shah in 1979.

The authorities replayed on a public address system a speech Khomeini made at Behesht Zahra cemetery, some 10 miles south of Tehran, on Feb. 1, 1979, the day he returned to Iran after 15 years in exile.

Tehran radio quoted a reporter who viewed the crowd from a helicopter as saying an estimated 5 million people turned out for the marches and rally, an apparent exaggeration. Independent estimates of the crowd were not immediately available.

Over the past 10 days, Iran celebrated what is officially known as the ''10-Day Dawn,'' marking the period between Feb. 1, 1979, when Khomeini returned, and Feb. 11, when he seized power.

Military maneuvers, a film festival, an Islamic conference, special plays and book and picture exhibitions were held to mark the occasion.

Iran had complained to the United Nations about the State Department warning, saying the alert was baseless and was issued to blemish Iran's image abroad.

On Friday, however, Iran's new spiritual leader, Ayatollah Ali Khamenei, mounted a pulpit for the first time in months to renew Khomeini's death call against British author Salman Rushdie for writing the novel The

Satanic Verses.

Most Moslems consider the novel blasphemous, but several Western leaders expressed dismay at the renewal of the murder call against Rushdie.

Khamenei's move shattered the view that Iran was moving toward moderation in the wake of Khomeini's death.

IRNA paraphrased Rafsanjani as saying, in his speech at Azadi Square, that Iranians ''owe the Islamic system in Iran to the lofty ideals of Imam Khomeini, and that they will owe the permanency of the same ideology to his trusted student, Ayatollah Khamenei.''

On Feb. 1, Hojatoleslam Ahmed Khomeini, the late Iranian leader's only surviving son, kept the ayatollah's anti-American sentiments alive in a fiery speech at Behesht Zahra.

''Those who think of making compromise with the United States are not treading the Imam's (Khomeini's) path,'' IRNA quoted him as saying.

In Baghdad, the Mojahedin Khalq Organization, an Iranian opposition group in exile, said Khamenei's renewed death call against Rushdie was probably intended to draw attention away from an internal power struggle among the ruling clerics.

A Mojahedin statement said some 400 clerics from both the pragmatic and the hard-line camps met in late January in a bid to reach a compromise, but failed.

The pragmatists, led by Khamenei and Rafsanjani, pushed the hard-liners into the sidelines after seizing control in a series of moves after Khomeini died, but diplomats said the hard-liners still controlled Parliament and were by no means a spent force.

#90042u0263 02/11/1990 ~United Press International

ADDIS ABABA, Ethiopia (FEB. 11) UPI - Fierce fighting between government troops and Eritrean rebels continued for a third day Sunday over a 70-mile front in the northern coastal area of Ethiopia, the official Ethiopian news agency said.

Rebel radio broadcasts reported that the Eritrean People's Liberation Front had captured the vital Red Sea port of Massawa, but the government denied the claim.

Deputy Prime Minister Ashagne Yigletu said the three days of battles, centered around Massawa, threatened Ethiopia's precarious food supply

lines. He appealed for international aid agencies to pressure the rebels to stop the attack, which began Friday.

Eritreans have been battling for independence for their coastal region since 1961, but Soviet-backed Ethiopia is loath to lose Eritrea and its access to the Red Sea. The two sides had been negotiating a peace settlement in recent months, with the help of former U.S. President Jimmy Carter.

The EPLF claimed twice in two days to have captured Massawa, but conceded the battle was not yet won.

''As we speak to you, fellow countrymen, our fighters are engaged in a battle with Dergue (government) troops who are out to re-take Massawa,'' a clandestine radio broadcast monitored in Nairobi said.

It said the fight was being waged on land and in the Red Sea.

''In addition to our victory, our forces managed to sink three naval ships in the Red Sea,'' the rebel broadcast claimed. It did not report any precise casualty figures, nor did the government.

Fighting began in the early hours of Friday, centering on the steep, twisting road from Massawa to the regional capital of Asmara, 450 miles north of the Ethiopian capital Addis Ababa.

The attacks shattered a year-old unofficial cease-fire between the EPLF and the Marxist Dergue regime of President Mengistu Haile Mariam.

The EPLF said Friday it had captured the road, the only northern link from the sea to areas threatened with major famine.

The government Sunday denied all of the EPLF's claims, but said that heavy fighting was in progress. It charged the rebels were endangering the food supplies to the famine-starved populace in the region.

Western relief agencies have predicted that 4 million people could die in Ethiopia this year if donated food does not get through from the coast to northern areas threatened by famine.

Deputy Prime Minister Ashagne asked U.N. agencies and church workers to exert what pressure they could on the EPLF to stop disrupting food supplies, the Ethiopian Herald newspaper reported.

The aid agencies should ''exert the necessary pressure on those who are responsible for creating obstructions and thereby help alleviate the sorrowful plight of those suffering from famine,'' he said.

Rebels have also charged that the government uses food as a weapon and prevents donated aid from getting through to starving people in Eritrean areas.

A government accord reached in January with the three major Ethiopian churches, Orthodox, Protestant, and Catholic, called for a relief program to be located in Massawa.

The government said 400,000 tons of food have been offloaded from ships at Massawa and was waiting to be moved to emergency distribution centers inland.

Officials said it is now impossible to move the food because of the fighting, citing clashes near one of the distribution points, at Keren, 70 miles west of Massawa.

''Today, Sunday, EPLF forces operating around Keren launched an offensive, killing hundreds of Dergue troops,'' EPLF radio reported.

#90042u0275 02/11/1990 ~United Press International

(FEB. 11) UPI - On the eve of the scheduled release of black nationalist leader Nelson Mandela, South African police opened fire on a crowd of demonstrating blacks. Police say the blacks were throwing stones and gas bombs. Authorities report eight people were killed and 45 more hurt.

Police say at least two gunmen opened fire Saturday in a Las Cruces , New Mexico, bowling alley during an apparent robbery... killing four people and wounding three. Those killed were a bowling alley employee, his two daughters... ages seven and two... and a 13-year-old girl who was a family friend. Authorities are searching for the attackers.

The Coast Guard now says the oil spill in the Pacific Ocean near Huntington Beach, California, is bigger than they thought. Officials Saturday hiked the estimate to almost 400-thousand gallons. Wednesday's spill has messed 13 miles of beaches, killed dozens of birds and and threatened ocean life at the base of the food chain.

A 13-year-old boy is struggling for his life after a sight-seeing helicopter in which he and four other people were riding plunged into New York's East River Saturday. Authorities say the boy was submerged for a long time, and his heart had stopped beating by the time he was pulled from the water. The others aboard the chopper also were rescued and are hospitalized.

A volcano in Indonesia's ''belt of fire'' erupted and rained lava on nearby towns Saturday, killing at least 15 people and injuring 48 others.

Mount Kelud is located in East Java, some 400 miles east of Jakarta. It is considered one of the most dangerous volcanoes in the world.

NASA has solved the computer glitch that sent a scare through the team working on the Galileo Jupiter probe. The probe had just flown by Venus late Friday when its camera started working overtime... opening its shutter almost 500 times rather than for the 16 planned pictures. A mission spokesman says computer commands were radioed to the probe a little too quickly.

#90042u0300 02/11/1990 ~United Press International
PAARL, South Africa (FEB. 11) UPI - Black nationalist leader Nelson Mandela walked out of Victor Verster prison a free man Sunday, opening a new chapter in South African political history and ending a 27-year confinement for advocating the violent overthrow of the white minority government.

Mandela, 71, jailed in August 1962 and sentenced to life in prison in 1964 for sabotage, was driven to the prison gate in a car and then walked to freedom hand-in-hand with his wife, Winnie.

But as Mandela drove to Cape Town to address a downtown rally, police there opened fire with buckshot and teargas on a portion of the gathered crowd that had thrown bottles at police and smashed storefront windows, looting shoops, witnesses said,

Paramedics at the scene, opposite the Cape Town city hall, said at least 30 people were wounded.

Mandela had not yet arrived at the scene when the shooting took place, but two-time U.S. presidential candidate Jesse Jackson and Allan Boesak, president of the World Alliance of Reformed Chruches, were in the vicinity when the shooting took place.

Witnesse said looters dumped piles of clothes onto the street which was littered with shattered glass.

Before Mandela's release, thousands of supporters gathered outside the prison near Cape Town and chanted ''Freedom, freedom'' and ''Viva, viva''. They waved the green, black and yellow flags of the anti-apartheid and recently legalized African National Congress.

Mandela's release had originally been scheduled for 3 p.m. local time (8 a.m. EST) and there was no immediate explanation for a delay of more than 45 minutes.

Mandela, dressed in a gray business suit, smiled and then raised his hands over his head in apparent jubilation. He punched the air several times with a clenched fist. Winnie Mandela gave a clenched fist salute to the crowd.

Police, anxious to control enthusiastic crowds and protect Mandela from threatened violence, had set up road blocks a mile and a half from the gate to the prison outside Cape Town, forcing hundreds of jubilant spectators to abandon their cars and form a festive parade on foot down a road lined with grape vineyards.

When Mandela emerged through the prison gate, police cleared a path with a team of motorcycle outriders as helicopters swirled overhead.

Amid a cacophony of horns, the crowd swarmed Mandela's car as the freed ANC leader waved out the window.

Mandela has been living in a former warden's cottage at the Victor Verster facility since December 1988, after moving from the maximum security Robbin Island prison off the Cape Town coast.

Immediately following his release, the silver-haired Mandela was driven into Cape Town for a rally in the heart of the city.

At Mandela's family home in the black township of Soweto on the outskirts of Johannesburg, thousands of blacks danced and chanted ''Viva Mandela'' in the rain.

#90042u0360 02/11/1990 ~United Press International

NEW YORK (FEB. 11) UPI - Commentator Andy Rooney, under suspension from CBS for three months for allegedly making a racist remark, said Sunday the subsequent publicity barrage made him feel like novelist Salman Rushdie, who was condemned to death for his writings.

In a syndicated column, Rooney, the resident humorist at ''60 Minutes,'' again insisted he did not make the controversial comments attributed to him by a reporter for the Advocate, a newspaper for homosexuals based in Los Angeles.

''I not only deny the quote attributed to me, I say the quotation was made up by a young reporter who couldn't take notes,'' Rooney said.

The article in the Advocate quotes the commentator as saying, ''Most people are born with intelligence, but blacks have watered down their genes because the less intelligent ones are the ones that have the most children. They drop out of school early, do drugs and get pregnant.''

Rooney was suspended for three months on Thursday by CBS News President David Burke. His future with the network after that time remains uncertain.

In the column, Rooney said the remarks attributed to him came from an ''angry gay organization'' which had conducted an organized campaign against him after he made comments during a ''60 Minutes'' commentary which they called homophobic.

Rooney said he was subjected to intense public scrutiny after the quotes in the Advocate were first reported, describing the barrage of phone calls he received at his office from news organizations seeking comment.

''Outside the front door, as we answered calls upstairs, camera crews were lined up on the sidewalk waiting for me to poke out my head out the door so they could pounce on me,'' he said. ''I felt like Salman Rushdie.''

Rushdie was sentenced to death last year by the late Ayatollah Khomeini after the Iranian leader labeled his novel, ''The Satanic Verses,'' blasphemous to Moslems. Rushdie remains in hiding in England.

WASHINGTON (FEB. 11) UPI - President Bush and the leaders of three Andean nations plan to sign ''a document of agreements'' at this week's drug summit that will commit them to an unprecedented war on drugs, administration sources say.

The document, jointly drafted over the past three months, would have the United States back a sweeping plan to replace the illegal South American drug trade with legal commerce, from fruits to textiles, the sources say.

In addition, the United States would bolster efforts to halt the smuggling of U.S.-made weapons to South American drugs lords and limit the export of chemicals used to make cocaine.

In return, Colombia, Peru and Bolivia, the world's biggest cocaine producers, would increase drug-fighting efforts and share more intelligence with the United States, the world's biggest cocaine consumer.

Together, all would crack down on the laundering of drug money and require stricter registration of planes and ships, used to smuggle narcotics. The United States also would try to cut demand by expanding anti-drug programs.

''This will be the first comprehensive effort to attack the illegal drug trade in this hemisphere,'' said a U.S. official who helped prepare for the summit that will be held under tight security Thursday in Cartagena,

Colombia.

''It will mark a level of commitment by this country that is precedented, and a level of commitment by those countries that is unprecedented,'' the official said.

Speaking on the condition of anonymity, the official said ''the document of agreements'' was drafted over the past three months by representatives of the four nations.

He said the document was being translated into English and Spanish and, together with a joint communique, was expected to be ready for signature before the summit officially begins.

''The presidents will have an opportunity to discuss what they expect from the agreements,'' he said. ''There is also a good chance they will talk about related issues.''

One topic is likely to be coffee. Last year, Colombia's coffee earnings dropped by $200 million. It is looking for a new trade agreement with the United States to strengthen its economy and, thus, ability to fight drugs.

Sources said the cost of the upholding the ''documents of agreements'' to the United States, at least next year, would basically be covered by the proposed fiscal 1991 budget that Bush submitted to Congress last month.

In it, Bush recommended that U.S. economic and military aid to the three nations increase by $217 million to $417 million. Military assistance is confined to training and equipment.

Bush has said he would seek $2.4 billion in aid through 1994, provided there is demonstrable progress in the drug war. While the administration salutes Colombia, it has sought a greater effort by Peru and Bolivia.

Under the new accord, the United States would encourage private U.S. investment in South America and help open new markets for their goods.

The aim is to get hundreds of thousands of peasant farmers to stop raising coca for cocaine cartels and enter a new line of business.

All sides agree this will take time and be highly expensive. But they say it is a vital. The illegal drug trade in South America now totals about $3 billion to $4 billion a year.

Peruvian President Alan Garcia has invited farmers who grow the coca leaf to the summit so they can talk to Bush.

''What must be done is economic help so that the products that can be

harvested have an easy market and not like what is happening with coffee or chocolate whose prices have fallen,'' Garcia said.

Colombian President Virgilio Barco, who will host the summit, has complained that many narco-traffickers in his country are armed with weapons made in the United States.

Last year, the Bush administration banned the import of foreign-made semiautomatic weapons. But many of the rapid-fire guns made in America end up overseas.

#90042u0413 02/11/1990 ~United Press International

WASHINGTON (FEB. 11) UPI - Amid East-West anxiety over the reunification of Germany, President Bush and NATO Secretary General Manfred Woerner agreed Sunday that NATO ''should adopt new political roles'' to help shape a post-Cold War Europe.

After weekend talks at Camp David, Bush and Woerner restated the cautious Western approach to what has become known as ''the German question'' in language that underscored the uncertain course of political change.

White House spokesman John Herrick said the two ''expressed their gratification'' that the West German government had in recent days ''affirmed that a unified Germany would remain a member of the North Atlantic alliance.''

At the same time, he said, ''they agreed that NATO, in addition to maintaining the common defense, should adopt new political roles.''

Among those roles would be helping guide Western policy toward the emerging democracies of Eastern Europe, coordinating the negotiation and monitoring of arms control agreements and developing Western policy for regional and transnational issues, Herrick said.

While Bush and Woerner also sought to give a boost through their meeting to negotiations on conventional force cuts in Europe, the public attention on their talks focused on Germany, the same hot topic that will bring West German Chancellor Helmut Kohl to the United States in two weeks for a similar mountaintop meeting at Camp David.

Over the past week, Bush and his senior advisers have at times struggled to have U.S. policy keep pace with events abroad as a nod from Moscow has accelerated movement by East and West Germany toward a single union.

Kohl predicted Saturday after meeting in Moscow with Soviet President Mikhail Gorbachev that reunification could take place within the next two

years, a prospect the Soviets and some Europeans have found troublesome.

Though the United States and Soviet Union agree that reunification must be the result of self-determination, both have a stake in the political and military outcome. And the Western insistence that Germany remain a member of NATO has undergone some fine-tuning in the past week to reflect the uncertain future the alliance itself faces in a safer Europe.

It has been suggested, for example, that Germany remain in NATO, but that NATO not advance its deployment of troops into what is now East Germany.

Secretary of State James Baker, who met Friday with Gorbachev, suggested Germany could have a looser ''association'' that would entail something short of its current military obligation as the main forward basing point for NATO troops.

However their respective security concerns are to be balanced, East and West appear agreed on one point: a neutral Germany, with its economic and military potential to rekindle postwar fears of European domination, is out of the question.

Former Secretary of State Henry Kissinger said Sunday on the NBC News program ''Meet the Press'' that neutrality ''would be a disaster for Europe'' and ''the most dangerous'' outcome ''for everybody concerned.''

''The two world wars in this century were caused by Germany trying to conduct a totally isolated national policy in the center of Europe,'' he said. ''And a country in the center of Europe that wants to be secure against everybody together threatens everybody individually.''

On the ABC News program ''This Week with David Brinkley,'' Soviet Foreign Ministry spokesman Gennady Gerasimov echoed those concerns in warning that the steps toward reunification ''must take into account the specific position of Germany'' and the ''psychological concerns'' of the Soviet Union, which lost 20 million people in World War II.

''We still have memories of that dreadful, terrible war with Germany,'' Gerasimov said, ''and for many people in my country, it's difficult to understand that we going to have a big Germany again as our neighbor.''

#90042u0451 02/11/1990 ~United Press International

(FEB. 11) UPI - Cries of joy sounded into the night in South Africa, where black nationalist leader Nelson Mandela is set to be freed Sunday. But authorities report eight people were killed and 45 injured near Johannesburg, when police fired to break up blacks hurling stones and gasoline bombs. South African President de Klerk says the government is

committed to a new constitution which is fair to all blacks and whites.

As some of a 400-thousand-gallon oil spill laps the shore of Huntington Beach, California, the government is about to cite a cleanup contractor for using improper clothing. The Occupational Safety and Health Administration says it will cite Chempro of Long Beach for letting workers wear sneakers instead of oil-resistant boots. The government agency also says the company did NOT give some workers enough training in cleaning up Wednesday's spill.

Police in Las Cruces, New Mexico, are circulating sketches of suspects in a bowling alley robbery in which four people were killed. At least two gunmen forced seven people into an office of the bowling alley Saturday and opened fire. The four fatalities included an alley employee, his daughters aged seven and two, and a 13-year-old girl. Three people were wounded. The robbers set fire to the office.

Secretary of State Baker is threatening to with-hold U-S aid to Bulgaria if the government there does NOT work to ensure free and fair elections. Baker travelled to Sofia Saturday to express doubts about the Communist government's preparations for the elections. Those doubts included muzzling of the press. The United States has proposed 300-Million dollars in aid for Eastern Europe in 1991, excluding Poland and Hungary.

James ''Buster'' Douglas closed one of Mike Tyson's eyes and then turned out his lights, with a knock-out to take the heavyweight championship of the world. Sunday's fight in Tokyo was expected to be a mere tuneup for Tyson for another fight. Tyson knocked Douglas down in the eight round but the challenger came back. Douglas was ahead or tied on all the score cards by the time he ended the bout with an uppercut.

#90042u0496 02/11/1990 ~United Press International

WASHINGTON (FEB. 11) UPI - Despite apparent universal praise on Capitol Hill Sunday for the release of black nationalist leader Nelson Mandela, lawmakers appeared unwilling to call for the immediate easing of sanctions against South Africa.

But Assistant Secretary of State for African Affairs Herman Cohen said the Bush administration was reviewing its policy on South Africa and would likely attempt to make a gesture in recognition of Mandela's release after 27 years in prison for attempting to overthrow the white majority government.

In an interview with CBS's ''Face the Nation,'' Cohen said: ''I think President Bush has sent a couple of interesting signals in the last few days. ... He said positive change is taking place there; therefore, we

should review our policy. We're doing that right now.''

Cohen said he considered some sort of easing of the sanctions, imposed by Congress in 1986 over a veto by former President Ronald Reagan, to be ''important in this case.''

But he acknowledged that any gesture had to be made in conjuction with Congress.

In fact, lawmakers were quick to laud the decision, announced Saturday by South African President Frederick de Klerk, to release Mandela from prison.

But Rep. William Gray, D-Pa., architect of the sanctions against South Africa, echoed the sentiments of many, telling ABC's ''This Week with David Brinkley'' that ''it's too early to determine'' when or whether the legal conditions for repeal of the sanctions will be met.

''Although we welcome it and we applaud the move by Mr. de Klerk, the fact is that South Africa is still not free,'' he said. ''There are 23 million black South Africans that don't have the right to vote, that don't have the right to live where they want or travel where they want.

''So we've got to see what this first step means in terms of that process '' Gray said.

Added Sen. Sam Nunn, D-Ga., in an interview with NBC's ''Meet the Press,'' ''This is a big day. In effect, the South African government is beginning to take down their own Berlin Wall.''

But Nunn also said the sanctions ''ought to be continued for the time being. There were five conditions that were attached to the sanctions by the Congress. Those conditions have been partially met.''

Gray contended the sanctions have caused the South African economy to plummet as the South African government has been denied foreign capital and credit. Bush, like Reagan, has argued the sanctions have had a more painful impact on blacks in South Africa than on the government.

Among the sanctions against South Africa is the banning of new U.S. business investments in South Africa, banning landing rights in the United States for South African aircraft, and barring the U.S. government from buying products produced by companies owned by the South African government.

Under the law passed by Congress, the sanctions would end if South Africa released all black political prisoners and allowed the formation of legitimate democratic political parties.

Rep. Alan Wheat, D-Mo., was among those who said the United States should not lift sanctions until South Africa ended its racially segregated system of apartheid.

''There is little doubt that the steps taken thus far by President de Klerk are progressive in the South African context, but we must not forget that our ultimate goal is the elimination of apartheid,'' Wheat said in a statement.

''While we are now hopeful, our efforts must continue until apartheid is abolished and all South African citizens may participate in a nonracial democratic government,'' Wheat said.

#90042u0507 02/11/1990 ~United Press International

ISLAMABAD, Pakistan (FEB. 11) UPI - Indian troops fired Sunday on Pakistani demonstrators who ran across the cease-fire line dividing the disputed region of Kashmir, killing at least two and wounding six in the second such incident in a week, officials said.

The officials said Indian and Pakistani border forces exchanged fire for about 30 minutes across the line following the incident, but no further casualties were reported.

Local officials in the town of Chakoti, about 60 miles northeast of Islamabad in Pakistan's Kashmir region, said about 12 villagers shouting anti-Indian slogans ran across the cease-fire line into India's Jammu and Kashmir state despite warnings by security forces on both sides.

Indian paramilitary border troops fired on the demonstrators, killing two and wounding six others, said officials reached by telephone from Islamabad. They said Indian authorities detained four of the Pakistani protesters.

But Sikander Hayat Khan, prime minister of what Pakistan calls Azad (free) Kashmir, told reporters in Islamabad's twin city of Rawalpindi that six people died as a result of the shooting.

Officials in New Delhi confirmed the incident to the Press Trust of India news agency. They said Indian security forces fired warning shots and then opened fire on a crowd that crossed the border. They gave no further details and said casualty figures were not available.

The incident is the second of its kind in the past week.

On Feb. 5, Indian officials said about 4,000 Pakistani supporters of Moslem separatists in Jammu and Kashmir streamed across the border into

India near Sialkot city, about 120 miles southeast of Islamabad, and set crops ablaze, prompting troops to open fire. At least 10 people were wounded.

The incidents come at the lowest point in Indo-Pakistan relations since their 1971 war, with the two neighbors at loggerheads over a popular uprising against Indian rule in Jammu and Kashmir.

More than 100 people have died since the movement began Jan. 20. India has accused Pakistan of arming and training the militants, charges Islamabad denies.

The two countries have fought three wars since 1948 over the disputed region, which is divided along a U.N.-monitored cease-fire line into India's Jammu and Kashmir state and Pakistani Azad Kashmir. A 1949 U.N. resolution called for a plebiscite to decide the region's future, a vote that has not taken place.

Officials said the villagers involved in Sunday's incident had been taking part in a rally in Chakoti to observe the fifth anniversary of the death of Maqbool Butt, founder of the Jammu and Kashmir Liberation Front - the most powerful of the separatist groups in the state.

Butt, who is widely regarded as a martyr in the region, was hanged in India in 1984 for killing a police officer.

#90042u0514 02/11/1990 ~United Press International

GREENWICH, CT (FEB. 11) UPI - A bottling problem in France is believed to have caused the benzene contamination that led to a voluntary recall of all Perrier water in the United States and Canada, the manufacturer said Sunday.

Perrier has halted worldwide production of the naturally carbonated mineral water until the problem has been isolated and resolved, said Ronald V. Davis, president of the bottler's U.S. arm, Perrier Group of America.

Davis said the company had narrowed the problem to its bottling process in France and expected to be able to pinpoint the exact source of low-level contamination by the poisonous solvent ''within a few days.''

''We think we have zeroed in on what the problem is, but do not want to do anything until we are 100 percent certain,'' Davis said. ''We're moving as prudently and as cautiously as we can. We know its in the bottling process.''

Perrier, whose product has become something of a status symbol for the

health-minded and well-to-do, voluntarily began recalling all bottled mineral water distributed to the United States Friday after it was told by the federal Food and Drug Administration that traces of benzene were found in 13 samples of the mineral water.

The FDA said the 12 to 19 parts per billion levels of benzene detected posed no significant short-term health risks, but exceeded the standard maximum contamination of 5 ppb of benzene for public drinking water.

Benzene is a clear, flammable, poisonous liquid used as a solvent for fats and in making lacquers, varnishes and dyes. It also is believed to be a cancer-causing agent.

Davis said French health officials had confirmed the contamination did not come from the underground mineral spring in Vergeze that produces the carbonated water.

Davis said the recall was extended to Canada late Saturday because Canada and the United States share the same distribution system. He said the company planned to destroy its entire inventory of about 72 million bottles for the United States and Canada.

The mineral water could be off the shelves in the two countries for two to three months, which could cost the company more than $40 million in sales, Davis said.

''In some places, we could be back (on the shelves) before that,'' Davis said. ''We're trying to be as conservative as possible.''

Perrier has not detected benzene in any European samples and has no plans to recall the water from European stores, but has halted worldwide production as a further precaution, Davis said.

''We want to make sure the problem is 100 percent isolated,'' Davis said.

Davis said he could not calculate what the total cost of the recall and production shutdown would be to the company, which has annual sales of about $150 million.

''We're trying to deal with this in the most responsible and professional way possible,'' Davis said. ''(The cost) will be what it will be.''

Davis said he though Perrier was being unfairly treated by the media, which he claimed was sensationalizing the story.

''The head of the FDA said if he had a bottle of Perrier in his refrigerator, he'd drink it, and that got buried in the stories,'' Davis said of a remark by acting FDA Commissioner James Benson.

''People should know there is no more risk to this than drinking a glass of apple juice, which has more benzene in it, or a cup of coffee, which also has more benzene,'' Davis added.

Rather than launching the voluntary recall, the company could have just issued a national health advisory, Davis said.

''We were within our legal rights to do that,'' Davis said. ''We could have just paraded out a bunch of FDA and other witnesses who said there was no risk, but we didn't do that. We went a further step, a very expensive step, that shows the company is committed to integrity.''

Davis said the company ''was trying to do the ethical thing. We believe we're doing what is right and I think that is a winning strategy over time.''

#90042u0563 02/11/1990 ~United Press International

CHICAGO (FEB. 11) UPI - A fire possibly started by children playing with matches swept through a West Side apartment early Sunday and killed three children, authorities said.

Tatiana and Renita Handford, both 4, and Raoul Handford, 12, were pronounced dead at 1:50 a.m. at area hospitals, officials said.

''The fire was contained to a first-floor apartment in the rear'' and began in a closet, said Frank Chambers, fire batallion chief. He said children playing with matches may have started the blaze in the three-story structure.

The two younger children were so badly burned that doctors had difficulty distinguishing their gender, said V. Derama, a spokesman for St. Anthony Hospital and Medical Center.

The fire also left Bridget Handford, 18, and her 5-month-old daugher, Eleanor Watt, injured. They were in fair condition at Cook County Hospital said Marlo Hodges, a hospital spokeswoman.

The relationships among the dead and injured were not immediately known, authorities said.

#90042u0595 02/11/1990 ~United Press International

MIAMI (FEB. 11) UPI - Customs agents in Miami have seen a six-fold increase in a single year in cocaine seized from people smuggling the drug

into the United States by swallowing it in balloons or condoms, authorities said Sunday.

In fiscal 1988, agents recovered about 23 pounds of cocaine from swallowers. In 1989, they recovered 136 pounds of cocaine from 84 swallowers, authorities said.

From the start of fiscal 1990 in October through early February, 88 pounds of cocaine has been detected in 55 swallowers, Customs agents in Miami said.

''At that rate, this year we could reach 300 pounds,'' said Vann Capps, director of airport operations for the U.S. Customs Service.

The average swallower ingests between a half-pound and 2 pounds of cocaine and is paid $1,000 to $3,000 for transporting it from Colombia to Miami.

The cocaine is compressed into small, rock-hard cylinders, then heat sealed and wrapped in layers of balloons, fingertips from rubber gloves, or condoms.

If water permeates the pellets or if the covering tears, a massive cocaine overdose occurs, which could kill the carrier.

Last week, agents noted that Luis Triate looked very uncomfortable as he walked through Customs at Miami International Airport. In his digestive system, inspectors found 2 pounds of cocaine wrapped in dozens of little rubber packets.

Triate, a physician, carried enough cocaine to kill him within minuntes if one of the packets had burst.

''It's incredible that a doctor would do that,'' said Prospero Ellis, supervisor of a special anti-narcotics Customs unit at the airport. ''Each little packet is a time bomb in the stomach.''

Agents said 99 percent of the smugglers are from Colombia. When survivors of the Avianca Airlines crash on Long Island were examined last month, cocaine packets were found in the stomachs of four passengers.

At Miami International, travelers who behave suspiciously and fit a secret profile are detained for interrogation. Many are taken to Jackson Memorial Hospital's prison ward to be X-rayed.

If the X-rays show packages in the digestive tract, they are given the choice of taking bulk laxatives, undergoing an operation to remove the packets, or just waiting. Most agree to take the laxatives.

''Some people wait two, three days without going to the bathroom, but finally they have to go. We wait,'' Ellis said.

Last month, Customs agents detained a 35-year-old man and woman and the woman's 61-year-old father.

The X-rays showed that the younger man carried 71 packets of cocaine in his disgestive system, his wife had swallowed 68 packets and her father had swallowed 40 packets. The X-ray also showed that the woman was four months pregnant.

''The one thing you learn here is that some people will do anything for drugs or money,'' said Capps.

#90042u0714 02/11/1990 ~United Press International

MANSFIELD, OH (FEB. 11) UPI - Twin illiterate brothers played out their dream of being law officers during a standoff with police that ended when one brother shot and killed his sibling and then himself, authorities said Sunday.

Brad and Chad Jordan, 18, being held on burglary charges, took a detective's gun Friday and held a sheriff hostage before ending the seven-hour siege in a murder-suicide, officials said.

While holding Richland County Sheriff Dale Shetler hostage, the brothers pretended to be police officers themselves, County Prosecutor James J. Mayer Jr. said.

''They had the sheriff in handcuffs and leg irons and would ask him questions, and then they would interrogate each other with the tape recorder,'' Mayer said.

He also said the Jordans told Shetler they had always wanted to be police

officers and that this might be their only chance because they couldn't read or write.

Toward the end of the ordeal, the brothers put Shetler in another room and began discussing their options, which were picked up by the tape recorder.

''You can hear Brad discuss this was only way out. Chad did not say much '' said Jerry Ault, assistant county prosecutor.

Shetler later heard a gunshot and opened the door in time to see Brad Jordan firing a second shot at his twin.

''I heard the first shot, saw the recoil of the weapon as I opened the door. I saw the second shot as he kept hollering his brother's name,'' Shetler told the Cleveland Plain Dealer. ''I kept hollering 'Put the weapon down! Give me the weapon! Put the weapon down!'''

Jordan momentarily pointed the gun at the sheriff, but then pointed it at his head and fired once.

Shetler said the two had planned to overpower a deputy, steal two uniforms and escape.

''They stated to me that once they got outside, they were going to the mountains to live their lives out,'' he said.

#90042u0816 02/11/1990 ~United Press International

AMHERST, MA (FEB. 11) UPI - A daughter of South African black nationalist leader Nelson Mandela expressed joy at his release Sunday, but said the nation's reforms are far from complete and predicted her newly freed father will ''break every law'' related to repression.

Makaziwe ''Maki'' Mandela-Amuah, 35, an anthropology doctoral candidate at the University of Massachusetts at Amherst, cried as she watched on television her father and his wife, Winnie Mandela, stride confidently from the Victor Verster prison near Cape Town.

''At that moment, I really felt like I could fly to South Africa ... and be with him and embrace him and say, ''We're behind you 100 percent,''' Mandela-Amuah said of her father.

''We know this is a momentous period for you. You've been in jail for 27 years, you haven't met so many of your people and just to be out of the prison walls and gates and breath fresh air among your people,'' she said.

She was also quick to predict that her father, who was imprisoned for 27

years for advocating the violent overthrow of the white minority government, would continue to challenge authority.

''I realize fully that South Africa hasn't changed and is coming really still to a very hostile environment in terms of blacks in South Africa. And I know my father will not tolerate those laws that exist in South Africa,'' Mandela said.

''From this moment on, he's going to do everything in his might to challenge those laws, to break every law that still exists in South Africa '' she said.

Because of ''academic commitments,'' she said she would not likely visit South Africa until the current semester ends in May.

Mandela-Amuah is one of Mandela's three children from his first marriage.

Another Mandela daughter, Zenani Mandela Dlamini, 31, one of two daughters by his marriage to Winnie Mandela, attends Boston University and planned to attend a celebration rally Sunday evening at Saint Paul's Cathedral on Tremont Street in Boston.

-30- 2199

#90042u0841 02/11/1990 ~United Press International

(FEB. 11) UPI - Upon his release from prison today, South African black nationalist Nelson Mandela is scheduled to be driven into Cape Town for a news conference and a rally to celebrate his new freedom. Mandela, the symbolic head of the anti-apartheid movement... has been in prison for more than 27 years because of his fight for black self-determination.

Secretary of State Baker touched down in Bucharest today in the final leg of a weeklong visit to Eastern Europe. Prior to travelling to Romania, aides to Baker say he expressed U-S reservations to Bulgaria's transitional communist government about the way the interim government is preparing for national elections. Baker stressed the importance of free elections to preserve the Bulgarian revolution.

Seven hours after challenger James ''Buster'' Douglas knocked out champ Mike Tyson, the World Boxing Council and the World Boxing Association declared the world heavyweight championship vacant pending a review of the fight next week. W-B-C and W-B-A officials say they'll review Tyson's claim that the referee gave Douglas more than 10 seconds when he was knocked down in the eighth round. Tyson went down in the 10th.

The Khmer Rouge guerrilla group has tossed a wrench into the Cambodian peace process by announcing its refusal today to take part in peace talks set to begin this month in Indonesia. Khmer radio broadcast excerpts of a

letter sent by a rebel leader to the Indonesian foreign minister that rejected the meeting's agenda, rules and participants. Indonesia has held two previous rounds of peace talks.

(FEB. 11) UPI - Indonesian officials say at least 15 people died and another four-dozen were injured when Mount Kelud erupted yesterday. Police say the 56-hundredfoot in East Java is quiet this morning. Regarded as one of the world's most dangerous volcanos... Kelud spewed lava on nearby towns and rained ash on cities as far as 30 miles away.

A published report indicates Miami's bank system leads the nation with a five-point-one-BILLION-dollar surplus, a tell-tale sign of the drug trade. The article states a federal grand jury is looking into at least six area banks in one of the most intensive money-laundering cases in U-S history. A federal official says stemming the flow of money to illegal drug organizations will deliver their death knell.

The Soviet news agency Tass reports two cosmonauts blasted off today on the sixth manned-mission to the Mir space station. The crew will dock the spaceship with the giant orbiting complex Tuesday and replace the two-man crew of the fifth main expedition. This morning's launch comes amid growing criticism by Soviet legislators of the cost of the U-S-S-R space program.

After a three-month introductory period, the nation's third-largest city took the plunge yesterday and introduced a new area code. While Chicago will retain its 32 code, its collar suburbs have changed to a new one, 78. The conversion will affect one-point-seven Million customers and was implemented because Illinois Bell was running out of phone numbers in the Chicago metropolitan area.

#90042u0997 02/11/1990 ~United Press International

(FEB. 11) UPI - Secretary of State Baker wrapped up his six-day Eastern European tour by speaking with Romanian leaders for four hours. The interim government had hoped to use Baker's visit to allay U-S fears regarding Bucharest's commitment to democratic reforms. Romania is also anxious to regain most-favored-nation status, which former dictator Nicolae Ceausescu renounced after U-S criticism of his human rights record.

West German Chancellor Kohl says Soviet President Gorbachev has promised to let Germans determine the time frame for German reunification. Kohl's announcement came after a one-day visit to Moscow. Gorbachev's acceptance of a unified German state reverses a 45-year-old policy and could carry

for him enormous political risk since more than 20-Million Soviets died in World War Two.

Heavy artillery fell silent today in east Beirut after one week of fighting between rival Christian forces. But the head of the Lebanese Forces militia says he doubts if the tense peace will hold due to the ''destructive and suicidal policy'' of his foe, General Michel Aoun . Samir Geagea also invited Syrian troops to join him in his attempt to quell Aoun.

The left uppercut that James ''Buster'' Douglas delivered in the 10th round of the heavyweight title fight in Tokyo accomplished two firsts- it floored champ Mike Tyson and knocked him out as well. But Douglas is NOT the new champ. The World Boxing Council and the World Boxing Association say the throne is vacant pending a review of a complaint lodged by Tyson that Douglas was given more than 10 seconds to get up after Tyson decked him in the eighth round.

Texas law enforcement officials capped a two-year federally funded drug investigation yesterday by seizing 132 pounds of methamphetamine hidden in a San Antonio storage facility. Undercover agents staged the raid based on information obtained Friday when they arrested a San Antonio couple for drug possession. The head of the Alamo Area Narcotics Task Force says the seized narcotics have an estimated street value of 20-Million dollars.

Coast Guard officials are trying to determine how an anchor punctured the hull of an oil tanker last Wednesday and caused a gigantic oil spill that has fouled 13 miles of Southern California's coast. Nearly 400-thousand gallons of oil spilled through two holes 38-feet beneath the surface in the side of the U-S-registered tanker American Trader. Cleanup efforts are underway.

#90042u1125 02/11/1990 ~United Press International

LOS ANGELES (FEB. 12) UPI - Gas prices dropped slightly over the last three weeks, returning to a more seasonable level after a month of weather-related jumps, an industry analyst said Sunday.

The average price of a gallon of gasoline was 0.6 cent lower on Feb. 9 than it was Jan. 19, said Trilby Lundberg, who regularly surveys price at 12,000 service stations nationwide.

The new average price of 112.46 cents reflected a cut in wholesale prices, which retailers passed on to consumers, Lundberg said.

''This is much more typical of the winter season when we use less gasoline '' she said.

Wholesale prices rose in January because of extreme cold weather that gripped the Eastern part of the country, increasing demand for all petroleum products but also decreasing the ability of refineries to supply as much.

The price of a gallon of gas at self-serve stations on Feb. 9 was 100.95 cents for regular unleaded, 118.38 cents for premium unleaded and 99.27 cents for regular leaded.

At full-serve stations, prices were 129.09 cents for regular unleaded, 142.51 for premium unleaded and 127.34 for regular leaded.

#90042u1149 02/11/1990 ~United Press International

(FEB. 11) UPI - A man named James ''Buster'' Douglas knocked out heavyweight champion Mike Tyson last night in the 10th round of their title bout in Tokyo. Until then, Tyson had been undefeated. It was surely one of the most stunning and controversial upsets in boxing history. But just hours after Douglas flattened Tyson, the World Boxing Council and the World Boxing Association declared their championships vacant... pending a review of an eighth-round Tyson knockdown of Douglas. Tyson says in his heart he feels like he's still the champion.

Secretary of State Baker wrapped up a six-day tour of Eastern Europe today that included clashes with senior Soviet officials in Moscow over U-S defense policy. Baker held four hours of talks with Romanian leaders before leaving Bucharest for Shannon, Ireland, where he's expected to stop briefly before returning home. Baker is the highest-ranking U-S official to visit Romania since the December revolution that toppled communist dictator Nicolae Ceausescu .

An East Berlin newspaper quotes a leading adviser to Soviet President Gorbachev as saying the Soviet Union won't stand in the way of German reunification so long as the interests of Germany's neighbors are taken into account. The paper quotes Valentin Falin as saying Moscow does NOT favor the removal of troops from East Germany if American troops remain on West German soil. Western experts estimate there are 350-thousand Soviet troops stationed in East Germany. The United States has over 240-thousand troops stationed in West Germany.

The East German news agency reports more than 100 East Germans protested outside the Soviet Embassy in East Berlin, demanding the removal of Soviet helicopters from a city near the border with Poland. Protesters say the Soviets pulled tanks out of Prenzlau, but left military helicopters. The news agency says one Soviet tank divison stationed left the area May 18th as part of Soviet President Gorbachev's unilateral troop reductions.

#90042u1232 02/11/1990 ~United Press International

The strings tightened another notch in the Big Ten standings Sunday.

Melvin Newbern, whose bad pass had enabled No. 9 Purdue to take the lead, came back with a driving jumper with 32 seconds left that gave No. 18 Minnesota a 73-72 victory over the conference-leading Boilermakers.

The victory kept Minnesota clinging to life in the Big Ten race and preserved the Gophers' perfect home record this season. Minnesota, 16-5 and 7-4 in the Big Ten, is 12-0 in Williams Arena and has won 26 of its last 27 at home.

Purdue, 17-4 and 9-2 in the league, lost its first Big Ten road game after five triumphs and had its conference lead sliced to one game over Michigan and Michigan State.

''We're going home for three of our next four,'' Purdue Coach Gene Keady said. ''I don't care if we were tied or even if we were down one. I'm just glad to be part of the pack.''

Newbern's winning shot made up for his pass at the top of the key seconds earlier that Purdue's Tony Jones intercepted and laid in for a 72-71 Purdue lead.

After Newbern redeemed himself, Jones missed a 20-foot try that Newbern rebounded with two seconds to play.

''They told me Coach (Clem Haskins) dove on the floor after that pass,'' Newbern said. ''I just tried not to get discouraged. I didn't want to get where I thought the game was over. I wanted to remain positive.''

No. 8 Michigan also picked up ground Sunday with a 93-79 victory over No. 13 Illinois at Ann Arbor, Mich. Rumeal Robinson scored 29 points, including six foul shots in the final three minutes, to key the triumph.

Michigan, 18-4 and 8-3 in the conference, hit 15 of 16 free throws in the final 3:18. Terry Mills contributed 20 points for Michigan while Loy Vaught, who fouled out with 3:54 to play, added 16 points and a career-high 18 rebounds.

Kendall Gill led Illinois, 17-5 and 7-5 in league play, with 29 points. Stephen Bardo added 15 points and Ervin Small 10 for the Illini.

In other games Sunday involving Top 20 teams, No. 10 Oklahoma defeated Seton Hall 89-84 and No. 17 Oregon State nipped Oregon 57-55.

At East Rutherford, N.J., Smokey McCovery scored 20 points and Oklahoma withstood a late charge led by Seton Hall freshman Terry Dehere. Oklahoma, 17-3, led by as much as 77-65 before Dehere, who finished with a season-high 30 points, sank 4 three-point baskets in the final six minutes. Dehere's successive three-pointers and a free throw drew the Pirates within 85-82 with 58 seconds remaining, but Damon Patterson and McCovery each made a pair of free throws to put the game out of reach.

At Corvallis, Ore., Gary Payton scored 30 points and Oregon State escaped with its third close victory over Oregon this season. Oregon trailed 57-50 with 51 seconds remaining, but rebounded to pull within two. The Ducks had an opportunity to tie when Terrell Brandon intentionally missed a free throw with five seconds left. Richard Lucas got the offensive rebound, but was tied up by Oregon State's Scott Haskin and the Beavers took possession.

The Beavers' three victories over the Ducks was by a combined margin of seven points.

''They always play us tough,'' Payton said. ''They didn't have anything to lose. If they beat us it makes their whole season.''

-- AROUND THE NCAA --

In Saturday games featuring Top 20 teams, top-ranked Missouri thrashed Nebraska 107-85, No. 2 Kansas escaped Iowa State 88-83, Baylor upended No. 3 Arkansas 82-77, No. 4 Duke outlasted Maryland 114-111 in overtime, No. 5 Georgetown downed Florida 56-40, No. 6 Syracuse bested No. 11 Connecticut 90-86, No. 7 Nevada Las-Vegas dumped Oklahoma State 100-84, No. 12 Louisiana State outscored Tennessee 119-113, No. 15 Georgia Tech beat No. 14 Louisville 94-84, No. 16 La Salle topped Manhattan 99-78, No. 19 New Mexico State nipped Cal-Santa Barbara 66-64, and Arizona defeated No. 20 UCLA 83-74.

-30- 4109

#90042u1259 02/11/1990 ~United Press International

MIAMI (FEB. 11) UPI - Chuck Daly, making his All-Star coaching debut, introduced defense into the midseason classic on Sunday.

The East employed the same type of jarring defense Detroit used to win the NBA Championship in posting a 130-113 victory over the West.

He also took advantage of having three Celtics - Robert Parish, Kevin McHale and Larry Bird - and Detroit players Isiah Thomas, Joe Dumars and Dennis Rodman in employing his defensive scheme.

''I can't say enough about how well these guys played,'' Daly said.

''Those guys from Boston are in it so often, you say something out there and they go out and do it. When everyone plays well and you win, I love it.''

The East held the West to 44 percent shooting from the floor and to the lowest point total since 1976, when the West lost to the East 123-109.

The victory maintained the East dominance over the West, improving its series advantage to 26-14. Parish scored 14 points and grabbed 4 rebounds and McHale added 13 points and 8 rebounds.

While offense has been the hallmark of recent games, Parish enjoyed his outing Sunday.

''That is the best All-Star Game, as far as defense, I have played in,'' said Parish, who made his eighth All-Star appearance. ''Normally it is only offense in the spotlight.''

The East enjoyed a 20-point bulge most of the way until the fourth quarter when the West cut the lead to 9 points.

Magic Johnson scored 22 points, including 4 three-pointers, and added 4 assists to win his first All-Star Most Valuable Player award in a losing effort. He became the first losing player to be named All-Star MVP since Julius Erving in 1977.

''I'm sort of disappointed that we lost the game,'' Johnson said. ''But to win an award anytime against your peers is a great feeling.''

With the West trailing 100-83 at the start of the final period, West Coach Pat Riley went with a lineup of reserves Tom Chambers, David Robinson, Kevin Johnson, Lafayette Lever and Chris Mullin. That squad used a 9-2 run to cut the deficit to 102-92 with 10:34 remaining.

Though the West twice was able to pull within 9 points, the East proved to have too much firepower with Michael Jordan and Charles Barkley to allow the West to get any closer.

Jordan and Barkley each finished with 17 points. Patrick Ewing added 12 points, 10 rebounds and 5 blocked shots for the East and Isiah Thomas had 15 points and 9 assists.

The East opened the third quarter with an 11-5 run to take a 76-57 lead with 9:08 left, as Larry Bird scored his first 4 points of the game in the run. Bird (10 appearances), Parish (8) and McHale (6) represent 24 years of All-Star service.

''We really helped each other on defenese,'' Bird said. ''That is because

in these games you never know what is going to happen. A lot of people like to see dunks and fancy passes in this game. I like to see teamwork.''

The East lead hovered around 20 points over the next five minutes of the third period as the teams traded baskets.

Chambers and Drexler scored the West's final 13 points to pull their team within 17 points entering the final period.

There were 17 blocks in the in all, led by Ewing's 5. Both teams tried to protect the lane and players entered somtimes at their own risk.

Ewing had two rejections and Parish a third as the East raced to a 40-23 lead after one period.

Dominique Wilkins sank a 30-foot three-point shot for the East with one-tenth of a second left in the opening period to cap an 18-4 run over the final 3:02 of the quarter.

At the beginning of the game, flashes of brilliance often amounted to an easy basket at the other end.

The East benefitted more from the largesse, converting eight West miscues into 12 points. The West, paced by 9 points from Johnson, converted just 37.5 percent of its shots from the floor over the first 12 minutes.

The East quickly increased the lead to 47-27 on a three-point shot by McHale 1:50 into the second period. The West whittled the deficit to 55-45 with a 7-0 spurt, but Dennis Rodman and Scottie Pippen converted thunderous dunks to build the advantage back to 14 points.

Johnson converted two of his three first-half three-pointers to end the period with his team trailing 65-52. Johnson, the All-Star career assist leader, had none in the first half.

#90042u1492 02/11/1990 ~United Press International

SAN SALVADOR, EL SALVADOR (FEB. 12) UPI - Government bombing raids Sunday killed at least five civilians and wounded 15, including five children, amid heavy fighting between government forces and rebels, the Salvadoran Red Cross said.

The report came as a delegation of 15 U.S. lawmakers arrived to look into whether Washington should continue funding the Salvadoran military. Rep. Joe Moakley, D-Md., led the congressional group.

U.S. Ambassador William Walker greeted the congressmen, who also will look into the circumstances surrounding the Nov. 16 slayings of six Jesuit priests, their housekeeper and her teenage daughter.

''I assume that they will look into all issues that surround the deaths of the Jesuits and the investigation and where it stands now,'' Walker said. ''As far as I know, it's a single-issue delegation.''

A Salvadoran army colonel, three other officers and five lower-ranking soldiers have been charged with murder in the case.

The slaying of the Jesuits, who were El Salvador's most respected leftist intellectuals, prompted Congress to threaten to cut U.S. aid allocations to El Salvador. Washington sends the country more than $500 million a year $85 million of which is direct military aid.

Sunday's fighting took place in the northern province of Chalatenango,

long a stronghold of the leftist Farabundo Marti National Liberation Front known by their Spanish acronum FMLN.

''We have information that (the Armed Forces) have bombed and attacked the villages of Guarjila, Las Canas and Chiapas,'' Red Cross spokesman Carlos Mendoza said.

A priest who works in Guajila, 30 miles northeast of San Salvador, told Mendoza that five civilians and one combatant were killed in the village and 15 civilians wounded.

''Among the injured civilians are five children between 7 and 9 years old '' Mendoza said. ''Two are in serious condition.''

U.S. Embassy spokesman Jefferson Brown said military sources reported that ''five civilians were wounded in a cross-fire while guerrillas were withdrawing through San Jacinto Juan Guancornito,'' about 1 mile to the east of Guarjila. Four guerrillas and one government soldier reportedly died in the fighting.

''Apparently the combat continues,'' Brown said, adding that the embassy had no confirmation of aerial bombing in the area.

Moakley was accompanied by Reps. David Bonior, D-Mass.; Robert Dornan, R-Calif.; Dan Glickman, D-Kan.; Steny Hoyer, D-Md.; Barbara Kennelly, D-Conn.; Frank McCloskey, D-Ind.; Bill McCollum, R-Fla.; Jim McDermontt, D-Wash.; Matthew McHugh, D-N.Y.; Bob McEwen, R-Ohio; George Miller, D-Calif.; Bud Shuster R-Pa., and Gerry Studds, D-Mass.

#90042u1846 02/11/1990 ~United Press International
(FEB. 11) UPI - The world's most famous political prisoner is freed, with Nelson Mandela renewing his call for a continued struggle against South Africa's apartheid system... Details of the upcoming drug summit... and proof that royalty is just as mushy as regular folk... These top stories

and more, next, from U-P-I...

Bush administration sources say ''a document of agreements'' being prepared for this week's drug summit in Colombia will commit the United States, Colombia, Peru and Bolivia to ''unprecedented'' co-operation in the war on drugs.

The sources say the United States will bolster efforts to halt the smuggling of U-S-made weapons to South American drug lords and limit the export of chemicals used to make cocaine.

The United States will also attempt to shift farmers away from growing cocaine crops with a plan to replace the illegal South American drug trade with legal commerce such as fruits and textiles.

In return... Colombia, Peru and Bolivia will share more intelligence with the United States... the world's biggest cocaine consumer.

All three countries will promise to crack down on the laundering of drug money and will require stricter registration of planes and ships that are often used to smuggle narcotics.

#90042u1872 02/11/1990 ~United Press International

(FEB. 11) UPI - Secretary of State Baker brought news of 80-Million dollars in humanitarian food aid to Romania today. But Baker warned the communist leaders that if they want any more U-S aid, they'll have to have free elections and make more progress toward a free-market economy.

Baker also met with 40 opposition leaders. One student leader told Baker that Romanians want the United States to be ''tough'' and refuse to accept the communist interim government. The student leader described the older leaders in the transitional government as ''the old element... communists who have served before and failed.''

Baker's pledge of aid includes 500-thousand tons of grain and 75-hundred tons of butter. The Romanian capital of Bucharest is already experiencing some food and energy shortages. The food will be either given outright to needy Romanians or will be paid for in Romanian currency... with the proceeds going for economic development projects in Romania.

Some opposition leaders asked Baker for U-S help in such elemental areas as supplying typewriters and typing paper and instruction on how to establish a new code of laws.

NASA scientists will turn on cameras aboard the space agency's aging Voyager-1 probe Tuesday for a final set of pictures before Voyager-1

drifts out into space.

The last time Voyager-1 was in the news was 10 years ago when it was taking pictures of Saturn and Saturn's moon Titan.

The Voyager-1 was launched in 1977 and since its encounter with Saturn... it's been drifting out to a position in space above the plane of our solar system. It's all set to take a so-called ''family portrait'' of the sun and... scientists hope... seven of the nine planets.

Only Jupiter will show a clearly discernible disk. Earth will show up only as a brilliant star-like point of light.

Voyager-1 will take 64 pictures of the solar system over a four-hour period. The images will be stored on tape until the end of March... when they will be radioed back to Earth. The first pictures will be released to the public in late April.

-30- 2254

#90042u1894 02/11/1990 ~United Press International

(FEB. 11) UPI - The issue of German re-unification was on the agenda this weekend as President Bush and NATO Secretary General Manfred Woerner conferred at Camp David, Maryland.

Both men restated the cautious Western approach to what has become known as ''the German question'' in language that underscored the uncertain course of political change.

They thanked the West German government for assuring that a unified Germany would remain a member of NATO.

At the same time... they agreed that NATO... in addition to maintaining the common defense... should adopt new political roles to meet a changing Europe. And they say NATO should play a strong role in discussion on arms cuts.

Soviet Foreign Ministry spokesman Gennady Gerasimov says many Soviets are un-easy with the notion of a reunified Germany because the Soviet Union lost 20-Million people in World War Two.

#90042u1909 02/11/1990 ~United Press International

(FEB. 11) UPI - British monarchs apparently are as susceptible as their commoners to the pleasures of love, as well as its silliness.

That's what's apparent from their love letters, as seen in a collection at

London's Royal Britain exhibition. It spans more than 450 years, and is in honor of Valentine's Day.

One letter was written in 1528 from King Henry the Eighth to Anne Boleyn, who was then his mistress. Says Henry- ''Wishing myself- specially in evening- in my sweetheart's arms.'' He signed it- ''Written with the hand of him that was, is and shall be yours by his will. H-R''

She became Henry's second wife, but he later had her beheaded because she had NOT borne him a son.

Another letter is from Prince Albert to Queen Victoria, shortly before their marriage. Said Albert- ''Dearest, best beloved Victoria. Already another dear, dear letter from you which has wholly charmed me, for it once again tells me you love me.''

Other letters are from King Edward the Eighth, who abdicated in 1936 for American divorcee Wallis Simpson. In one written in 1937, he lapses into silliness, saying- ''My Sweetheart. This is just to say good meesel and that I love you more and more before I take another drowsel.''

#90042u2533 02/11/1990 ~United Press International

(FEB. 11) UPI - Egypt's ruling party newspaper sharply criticized the Palestine Liberation Organization today in an editorial that's seen as a sign of closer ties between Egypt and Israel. The editorial criticized the P-L-O's Cairo representative after he accused Israel of aiding a deadly attack on a bus of Israeli tourists in Egypt this month. The UNprecedented editorial is the first Egyptian criticism of the P-L-O since the two normalized relations in 1983.

Authorities in Illinois have issued a nationwide alert for six prisoners who escaped today from the Joliet Correctional Center. Three of the prisoners at the maximum-security facility are convicted murderers and considered ''extremely dangerous.'' The men apparently cut out iron bars to free themselves. Authorities are searching by air and by land and are using dogs.

Federal officials say the number of people smuggling cocaine into the country in their digestive system increased six-fold from 1988 to 1989 and could double again this year. Authorities say four passengers on the Colombian Avianca jet that crashed in New York last month were found to have rubber packets of cocaine inside them. Customs officials in Miami routinely X-ray people who look uncomfortable as they come off flights from South America.

As this week's anniversary of the Soviet pull-out of Afghanistan approaches, the U-S-funded resistance does NOT appear to have made the inroads Washington hoped it would. The Soviet Union continues to fund the communist government... and has left that government with a stong military base. The lack of a rebel victory is reportedly pushing U-S officials toward a negotiated political settlement with Moscow.

The International Boxing Federation says it will recognize James ''Buster'' Douglas as the new heavyweight champion of the world. But Mike Tyson maintains he's still the champ despite last night's upset knockout in Tokyo. And the World Boxing Council and the World Boxing Association say the champion's seat will stay open until they review what the referee admits was a slow count in the eighth round when Douglas went down. The W-B-C's president says a re-match is ''mandatory.''

#90042u2683 02/11/1990 ~United Press International
(FEB. 11) UPI - Nelson Mandela's first day of freedom is marred by violence...

NATO and Warsaw Pact foreign ministers gather in Ottawa, Canada...

And clergymen try to end the bloodshed in Lebanon as rival Christian forces gear up for more fighting...

These stories, and more, next from U-P-I:

Foreign ministers from NATO and the Warsaw Pact are arriving in Ottawa, Canada, for talks on a proposed ''Open Skies'' policy. The idea is to allow the flying over and photographing of each other's military installations.

The main opponents of the plan appear to be the Soviets... who reportedly want fewer flights, less sophisticated cameras and a common fleet of aircraft and common sensors.

Canadian officials say recent developments in Eastern Europe will also be put on the agenda at the talks scheduled to begin tomorrow.

Canadian government sources say U-S Secretary of State Baker... fresh from a tour of Eastern Europe... wants to discuss the future of NATO and the role of a re-united Germany will play in the Western alliance.

U-S and Soviet proposals for arms and troops cuts in Europe also will be raised.

Clerics in Beirut are shuttling between two Christian warlords... seeking

a lasting truce in the 11-day war that's killed at least 432 people.

Earlier truces have failed as Christian General Michel Aoun and Christian militia leader Samir Geagea seek to establish their dominance in Beirut's Christian enclave.

Christian officials say a mediation committee of three Christian clergymen held lengthy but separate talks with Aoun and Geagea. But as the mediators tried to bring peace, the foes' forces continued to beef up their positions... poising for a new round of fighting.

Geagea says he wants hostilities to stop immediately. Aoun is still demanding Geagea first reject the so-called Taif accord to end Lebanon's civil war.

The accords were agreed to by all major factions in Lebanon except Aoun. Aoun rejects the accords because they do NOT call for an immediate pull-out of Syrian troops. Aoun refuses to abandon the presidential palace in the Christian enclave to Christian President Elias Hrawi, who accepts the accords.

-30- 2364
#90042u2702 02/11/1990 ~United Press International
(FEB. 11) UPI - The Coast Guard says calm weather this weekend off Orange County, California, has been ideal for cleaning up the oil that leaked from a punctured tanker last Wednesday.

Petty Officer Dennis Hall says the cleanup is going very well. He calls it ''almost a textbook cleanup.''

But officials are keeping an eye on the fickle Southern California winds, fearful that a shift could push the oil back toward the shore. At present, most of the slick is about two-and-a-half miles off shore.

Skimmers are working around the clock, sweeping up the oil floating along a 13-mile stretch of coast near Long Beach and Huntington Beach. Officials say about two-thirds of the 400-thousand gallons that spilled has either dispersed or been mopped up.

On land, crews are cleaning up sticky residue that washed ashore at Huntington Beach and Newport Beach.

The oil spilled when the hull of the tanker American Trader was pierced, apparently by its own anchor. The exact cause of the accident is under investigation.

Federal agents say four passengers on the Avianca jetliner that crashed in

Long Island, New York, last month had swallowed rubber packets of cocaine to smuggle the narcotic into the country. And they say that's just one glimpse at how widespread the practice has become.

Authorities say agents recovered six times as much swallowed cocaine in 1989 as they did the year before, and they're expecting the amount to double this year.

The cocaine is packed in either layers of balloons, fingertips from rubber gloves, or condoms. People are paid one-thousand to three-thousand dollars to swallow the packets in South America and make the so-called ''delivery'' in the United States.

If even one of the packets breaks, the swallower could easily die from a massive overdose of cocaine.

Federal agents at Miami Airport routinely X-ray people who look uncomfortable as they get off flights from South America. If the X-rays show they've swallowed packages, they have the option of taking laxatives... having the packages surgically removed... or waiting in the hospital for the ''delivery.''

#90042u2728 02/11/1990 ~United Press International

(FEB. 11) UPI - In a syndicated newspaper column, satirical commentator Andy Rooney blames an ''angry gay organization'' mad at him for his earlier comments about homosexuals for fabricating a racist statement now attributed to him.

Last week, C-B-S suspended Rooney for three months from his job as resident humorist on t-v's ''60 Minutes.''

A reporter for the Advocate, a Los Angeles-based newspaper for homosexuals says Rooney told him blacks have- quote- ''watered down their genes because the less intelligent ones are the ones that have the most children.'' The reporter admits he did NOT tape record the conversation.

Rooney NOT only denies the quote, but says it was made up by a ''young reporter who couldn't take notes.''

Since news broke about the alleged comment, Rooney says he has felt like Salman Rushdie. Rushdie is the British author who had a price tag placed on his head by Moslem radicals upset with his book, ''The Satanic Verses.''

-30- 1125

#90042u2803 02/11/1990 ~United Press International

(FEB. 11) UPI - The surf's down at Huntington Beach, California, where surfing has been banned while crews clean up 400-thousand gallons of oil spilled from a tanker Wednesday. Calm seas have helped the effort. One surfer has been arrested.

One convict has been captured in Chicago, but five others are still on the loose after escaping from a prison in Joliet, Illinois, earlier today. Three of the five remaining fugitives are convicted murderers.

Crowds massed in Tehran today to celebrate the 11th anniversary of the ''10 Day Dawn''... when Ayatollah Khomeini sparked a revolution in Iran. Thousands chanted slogans and carried huge pictures of Khomeini, who died last June.

The largest repatriation ever in Central America is bringing thousands of Salvadoran refugees home from neighboring Honduras. But the refugees are returning to a battle zone they fled almost a decade ago.

Thousands of work crews in Georgia and Alabama are cleaning up in the wake of storms and tornadoes that wrecked dozens of homes and knocked out power to 600-thousand utility customers. Up to 13 twisters hit the South yesterday.

One week of testimony in the trial of Joseph Hazelwood has produced witnesses who said the skipper drank before his Exxon tanker ran aground and spilled 11-Million gallons of oil off the coast of Alaska last March. But NOT a single person yet has said Hazelwood was drunk as charged. The trial resumes tomorrow in Anchorage.

A gasoline industry analyst says gas prices have dropped slightly during the last two weeks. That returns the price to one dollar and 12 cents a gallon... a more seasonable level after a month of weather-related jumps.

-30- 1844

#90042u2907 02/11/1990 ~United Press International

(FEB. 11) UPI - Secretary of State James Baker promised the interim government of Romania 80-Million dollars in U-S food aid today. Baker met opposition leaders and was warned by a student leader to be tough with the communists running the interim government. Baker let the interim government know that the United States wants to see real reforms and free elections before it sends any more aid.

Three former homeless people in New York say a new newspaper designed to help the homeless is at least helping them. All three are making 500 dollars a week selling Street News... a tabloid supported by big-name stars such as Paul Newman and Lisa Bonet, both of which have articles in the latest issue. Executive Editor Hutchinson Persons got the idea when he

realized homeless people could sell newspapers.

As leaders of NATO and the Warsaw Pact gather in Ottowa, Canada... President Bush finished up a weekend of talks with NATO Secretary General Manfred Woerner at Camp David, Maryland. Bush and Woerner say they're glad West Germany is committing itself to stay in NATO even if it re-unifies with East Germany. But they say NATO should change its role to a political one to meet the changes in Eastern Europe.

In Lebanon, mediators shuttled between rival Christian leaders today in an effort to end warfare that has killed more than 400 people in 11 days. A mediation committee of three Christian clergymen held talks with General Michel Aoun and with militia leader Samir Geagea. But the opposing forces are girding for more fighting. The dispute involves whether to recognize pro-Syrian President Elias Hrawi.

The municipal government of Boston and the state government of Massachusetts have approved 150-thousand dollar program to fight rats... which have always been a problem for Boston. The hearty rodents are expected to be a major problem when a massive new expressway construction program plows through their underground burrows. The city is planning a four-BILLION-dollar project to double its highway capacity.

CHULA VISTA, CA (FEB. 12) BUSINESS WIRE - Members of the International Association of Machinists and Aerospace Workers at two Rohr Industries' facilities voted Sunday to accept a new three-year labor contract.

The agreement covers 4,500 unionized employees at Rohr's Chula Vista (Local 755) and Riverside (Local 964) facilities.

The contract calls for increases to the hourly base rate of 3 percent the first year, 4 percent the second year and 4 percent the final year. The present Cost of Living Allowance (COLA) will be folded into the base rate following the first year's general wage increases and the current COLA formula will be maintained. In the second and third years of the contract 40 cents will be added to wage structure minimums.

In addition, the workers will receive one-time bonus payments of $1,200 the second year and $1,700 the third year.

Other contract provisions call for changes to Rohr's health care benefits; improvements to life insurance benefits; and increases in retirement benefits to $29 per month per year of service.

''This represents a tremendous cooperative effort by the union and company

negotiators,'' said R. William Difley, vice president, human resources.

Workers are scheduled to return to their jobs beginning with third shift tonight, followed by the first and second shifts at their regular times tomorrow.

Rohr provides technologically advanced aircraft engine nacelle systems, thrust reversers, pylons, noise suppression systems and engine components for commercial, military and business aircraft. The company also manufactures solid rocket motor casings and nozzles for space programs.

Headquartered in Chula Vista, Rohr has nine facilities in the United States and one in Toulouse, France.

PICKERINGTON, OH (FEB. 12) BUSINESS WIRE - R.G. Barry Corp. (AMEX:RGB) Monday said that it will report later this week significant increases in 1989 sales and earnings.

Chairman Gordon Zacks said the footwear maker expects to report earnings of approximately $3,700,000 or $1 per share on sales of about $122,800,000. In 1988, the company had earnings of $23,000 or 1 cent per share on sales of $106,203,000.

The company also anticipates that its sales and operating results for the first quarter and the first half of 1990 will be significantly below those in the comparable periods of 1989.

Among the factors influencing these results are:

o A softening in stretch product sales;

o A decline in spring sales to stores affiliated with the Campeau organization;

o And, a loss of high volume, low margin slipper sales in mass merchandise channels as Barry emphasizes high margin, lower volume giftable footwear products.

The company's business is highly seasonal and heavily influenced by Christmas gift buying. Barry traditionally experiences its greatest sales and profitability in the second six months. The company expects a very strong second half in 1990.

R.G. Barry Corp. is the world's largest manufacturer and marketer of soft washable slippers and footwear for at and around the home. Its brand lines include Dearfoams, Madye's, Snug Treds and slipper products under the licensed Capezio and Cannon names.

BOSTON (FEB. 12) BUSINESS WIRE - Novell Inc. (NASDAQ:NOVL), developer of NetWare systems software products, Monday announced its Client/Server NLM Testing Program to confirm compatibility among NLMs written for the NetWare 386 environment.

NLMs are server-resident applications, utilities and services created by Novell and by third-party developers specifically for the NetWare 386 server operating system.

The company has instituted a detailed testing program, scheduled to begin in the second quarter of 1990, to confirm that NLMs from Novell and from its strategic development partners will complement each other in a NetWare 386 system.

Five of Novell's key strategic developers have enrolled in the program to date: database vendors Oracle, Informix and XDB Systems; CADCAM developer ISICAD; and OSI protocol specialist Retix.

''As a responsible leader in the networking community, Novell believes that open system9xsuch as NetWare 386 should have a central repository of information that can be shared by customers and developers,'' said Darrell Miller, Novell executive vice president of marketing and services. ''Novell will act as the information broker and advisory service to third-party client/server NLM developers.

''We've had a comparable program, the Independent Manufacturers Support Program (IMSP), in place for years to assure customers that LAN and disk drivers from over 200 vendors are compatible with NetWare,'' Miller added. ''It's important to give our NetWare 386 customers the same assurance regarding client/server NLMs.''

Client/server NLMs will be tested for compatibility within several application configurations, including file and print services, communications services, MHS (Mail Handling System) messaging engines and NetWare Btrieve. Novell's NetWare Btrieve is a key-indexed record management system providing high-performance file handling for the NetWare

environment.

Novell Inc. is the leading independent provider of open, high-performance systems software products. The company's NetWare network operating system has become a standard for personal computer-based local area networks. Novell had revenue of $422 million for fiscal 1989.

#90043b0015 02/12/1990 ~Business Wire

SEATTLE (FEB. 12) BUSINESS WIRE - Air Transport World Magazine has selected THAI Airways International to receive the 1989 Passenger Service Award.

The award was presented at the annual awards dinner in Singapore in conjunction with the Asian Aerospace '90 air show.

In making the presentation, Air Transport World stated that ''THAI has a number of natural advantages that nearly assure a superior cabin service. At the core is the friendliness and hospitality that is a hallmark of the Thai culture. The gracious atmosphere and helpful employee attitudes that must be carefully nurtured by the management of many airlines comes as a given, a base, for Thailand's flag carrier.''

The editors of the magazine also lauded the high level of service in THAI's business class and its comfortable 2-by-2 configuration.

THAI was also singled out for taking the lead in in-flight entertainment with the use for more than a year of the Video 8 format, providing sharp video images while feeding high-quality digital music and movie soundtracks to passengers.

Air Transport World's annual airline industry awards program is a creation of the magazine's editorial department, and is now in its sixteenth year. All award winners are selected by the editors of Air Transport World.

SUNNYVALE, CA (FEB. 12) BUSINESS WIRE - MASS Microsystems Inc. (NASDAQ:MMIC) Monday announced its preliminary unaudited financial results

which reflect record sales and earnings for its fiscal year 1989.

Net sales for the year ended Dec. 31, 1989, were approximately $19.0 million, vs. 1988 net sales of $8.1 million, which represents a 133 percent increase. Net income was approximately $900,000, or 23 cents per share, compared with a loss of $1.5 million, or a loss of 43 cents per share in 1988.

The 1989 fourth-quarter net sales were estimated at $5.4 million, representing an 80 percent increase from the 1988 fourth-quarter net sales of $3.0 million. Fourth quarter net income was approximately $240,000, or 5 cents per share, compared with a net loss of $473,946, or a loss of 13 cents per share, for the like period in 1988.

At the beginning of the fourth quarter of 1989, the company terminated its former S corporation status and became subject to federal and state income taxes.

Adel El-Shimi, MASS Microsystems' president, stated: ''The significant increase in 1989 net sales and net income is primarily due to the growing acceptance of the ColorSpace videographics product line for various applications and the continued success of the company's DataPak storage product.

''The positive year-end results also reflect the effectiveness of the company's sales and marketing efforts in penetrating the multimedia market.''

MASS Microsystems manufactures the ColorSpace line of videographics computer products and DataPak line of 45 Mb removable cartridge storage systems for the Apple Macintosh family of personal computers.

In November 1989, MASS Microsystems completed an initial public offering of 1,845,207 shares of common stock managed by the Pennsylvania Merchant Group Ltd. MASS Microsystems' common stock trades on the NASDAQ market system.

EMERYVILLE, CA (FEB. 5) BUSINESS WIRE - Cetus Corp. (NASDAQ:CTUS) announced Monday that the company's European subsidiary, EuroCetus B.V., has submitted an application to the Committee for Proprietary Medicinal Products requesting marketing approval for OncoScint CR103.

The product is a monoclonal antibody-based imaging agent intended for use in the diagnosis and follow-up of patients with colorectal cancer and was licensed to EuroCetus by Cytogen Corp. of Princeton, N.J., as part of an agreement reached in October 1989.

OncoScint CR103 uses a novel linker technology proprietary to Cytogen. The product which will be supplied by Cytogen is a fast, simple and easy to prepare kit.

The CPMP, which meets in Brussels on a regular basis, acts as a centralized body for review of applications for approval of biotech and high-tech drugs and to issue opinions regarding drug approvals for member countries of the European Community. The committee is comprised of representatives from the EC member nations.

The rapporteur or sponsoring country for the OncoScint product submission is The Netherlands.

The EuroCetus and Cytogen agreement is an exclusive distribution and supply arrangement covering the marketing of Cytogen's OncoScint and OncoTec cancer diagnostic imaging product lines in Europe. Other Cytogen products covered by the agreement which are in advanced stages of development include agents for detecting ovarian and prostate cancers.

Cetus Corp. is a leading biotechnology company primarily engaged in the development, manufacture and marketing of pharmaceutical products to treat cancers and serious infectious diseases. The company is also developing commercial applications of its GeneAmp polymerase chain reaction technology. Founded in 1971, Cetus is based in Emeryville and also operates EuroCetus in Amsterdam, Netherlands.

Cytogen Corp. is a biopharmaceutical company which has developed proprietary systems for linking drugs and diagnostic agents to monoclonal antibodies in order to optimize the function of the antibody as a delivery vehicle. With major emphasis on human cancer, current product development efforts at Cytogen are focused on improved cancer diagnostic imaging agents and the targeted delivery of cancer therapeutic agents directly to tumor sites.

MILWAUKEE (FEB. 12) BUSINESS WIRE - The third annual conference on water-related environmental issues and water industry participants will be held in Milwaukee on May 3 and 4.

The conference is sponsored by Blunt Ellis & Loewi Inc., a large midwestern regional brokerage and investment banking firm that specializes in following water industry companies and utilities.

The conference will focus national attention on environmental problems and other issues that affect the safety and availability of water. This includes everything from water distribution to water testing, membrane, ozone and absorption technologies.

Thomas J. Czech, CFA, chairman of Blunt Ellis & Loewi's investment policy committee, said that the firm has made the water industry a top priority because ''after eight years of ignoring the issues, the Administration and Congress are once again spending a good deal of time on the environment. Concerns over global warming, acid rain and last summer's Alar scare are just a few of the reasons for the heightened interest in environmental issues. Our water problems took decades to develop and it is likely to take at least another decade to resolve them. Billions of dollars will be spent to clean our nation's water and dozens of well-placed corporations and utilities will benefit from this need, making them attractive to investors.''

Approximately 30 water-related companies, including some privately-held firms, will make presentations at the conference. Among them will be American Water Works (Voorhees, N.J.); Betz Laboratories (Trevose, Pa.); Calgon Carbon (Robinson Twp., Pa.); Geraghty & Miller Inc. (Plainview, N.Y.); Nalco Chemical Co. (Naperville, Ill.); Safety-Kleen Corp. (Elgin, Ill.) and United Water Resources (Harrington Park, N.J.).

In addition to an expected audience of approximately 150 institutional investors, the conference will also be attended by 30-40 privately-held and smaller public companies which will give investors the opportunity to informally meet additional industry participants.

For more information on the conference, call Ruth Strekow at Blunt Ellis & Loewi, 1-800-242-1066, ext. 3267.

Blunt Ellis & Loewi Inc., dually headquartered in Milwaukee and Chicago, services over 250,000 clients through 520 brokers in more than 70 full-service branches in the Midwest and Florida. Blunt Ellis & Loewi is a member of Kemper Financial Cos. Inc.

DAYTON, OH (FEB. 12) BUSINESS WIRE - Philips Industries (NYSE:PHL) adjourned, without taking action, its Feb. 10 special shareholder meeting until 10 a.m. on Feb. 28.

This special meeting of shareholders was called to consider Philips proposed merger with an affiliate of Merrill Lynch Capital Partners (MLCP).

Philips noted that it had announced on Jan. 11 that MLCP's proposed financing sources had indicated that they would be unable to participate in the financing of the transaction as currently structured. At that time Philoips also announced that MLCP had said that MLCP remained interested in completing the acquisition of Philips and was evaluating whether an alternative structure could be arranged which would be acceptable to all parties.

Philips stated that MLCP, although MLCP still remains interested, had not made any further proposals to Philips and Philips was unable to predict whether the acquisition would be consummated or any alternative transaction would be proposed.

Philips Industries is a leading manufacturer of components for the building and transportation industries and is a leading supplier of material handling components and systems for a broad range of manufacturing and distribution applications. The company is listed on the New York Stock exchange under the ticket symbol PHL.

LAS VEGAS (FEB. 12) BUSINESS WIRE - Less than four months after its introduction of major hardware and software enhancements, The Reynolds and Reynolds Co. (NYSE:REY) Monday announced the release of the fifth generation of major enhancements to its ERA in-house computer system for automobile dealers.

The new release will be marketed as ERA 5.0.

Reynolds and Reynolds, a major supplier of information processing systems, including business forms and computer systems to automotive, professional,

medical and general business markets, unveiled the ERA system enhancements at the National Automobile Dealers Association convention in Las Vegas. Reynolds and Reynolds is headquartered in Dayton, Ohio.

Highlights of the ERA 5.0 release include the most integrated Dealer Communications System (DCS) available in the industry and two new integrated modules -- Labor Time Guide and Cash Receipts.

''Our ERA system's revolutionary design provides competitive superiority by making it possible to not only rapidly develop application enhancements but also to totally integrate these enhancements into the dealership system,'' said Jack Proud, senior vice president, Reynolds' computer systems division.

The ERA system provides and integrates all applications needed to manage and control the business, the selling process, and the service and parts departments.

In all, ERA 5.0 includes more than 150 enhancements to the sales, service, parts and business systems. Last fall, Reynolds released ERA 4.0 which broadened the range of market appeal, increased system speed and performance and reduced system price. All existing dealer customers received the 4.0 upgrade.

''The 5.0 release puts an even greater distance between Reynolds' ERA product and its competition. With 4.0 we exceeded expectations and achieved record-breaking sales with the revolutionary enhancements. Release 5.0 takes us even further beyond our competitors,'' Proud said.

This latest release also is indicative of Reynolds' commitment and capability to invest in systems development even in 'soft' markets. ''It is precisely during times like these that dealers are examining operations and profitability and looking to control costs. ERA 5.0 further streamlines operations by integrating service and warranty claims processing,'' Proud said.

SEATTLE (FEB. 12) BUSINESS WIRE - Westmark International Inc. (WMRK) Monday reported that its net income for 1989 increased by 83 percent to $19.7 million, or $1.91 per share, compared with $10.8 million, or $1.08 in 1988.

The results for 1989 include a charge in the fourth quarter of $1.7

million for the planned discontinuation in 1990 of our ultrasound manufacturing operations in Solingen, West Germany, and the consolidation of the manufacturing of all ultrasound systems at ATL's facility in Bothell, Wash. The charge reduced earnings per share by 16 cents.

Net income for the fourth quarter of 1989 increased by 56 percent to $6.4 million, or 60 cents per share, as compared with $4.1 million, or 40 cents per share, for the fourth quarter of 1988.

Westmark, with headquarters in Seattle, is a worldwide developer, manufacturer and distributor of diagnostic imaging systems and electronic patient monitoring systems through its subsidiaries: Advanced Technology Laboratories Inc. in Bothell, Wash., and SpaceLabs Inc. in Redmond, Wash.

Westmark's common stock is quoted on the NASDAQ National Market System under the symbol WMRK.

SEATTLE (FEB. 12) BUSINESS WIRE - Foremost Dairies Northwest, a leading regional dairy operator, has launched an extensive regionwide search for a site on which to develop a new state-of-the-art dairy processing facility. The new Foremost dairy plant will be the first new dairy facility to be built in the region in almost 30 years.

"We are proud to be expanding our operations and to increase our service capacity to accommodate the growing Northwest market," said Frank Lewis, senior vice president of operations for Foremost Dairies Northwest in Seattle. According to Lewis, the area's population growth and the need to bring new production technologies on-line prompted the company's decision to build this new plant.

"We expect to have completed our site selection by the end of the year," said James Moilanen, Foremost's director of corporate real estate, who is leading the search for an appropriate site.

Construction of the $30 million dairy facility, which will be equipped to process, package and distribute fluid milk, yogurt and ice cream, bottled water and fresh juices in a five-state region, will begin in 1991, with operation start-up scheduled for the following year.

"A team of industry specialists including civil engineers, architects, and contractors will be assembled," said Moilanen, "with the goal of making the new Foremost Dairies processing facility truly "state-of-the-art" in

product quality, freshness and flavor."

Foremost Dairies Northwest, using fresh milk supplied by local producers, markets more than 150 dairy-related products which, along with a selection of fresh milks, it packages and distributes to school districts, hospitals, churches, nursing homes, restaurants, government accounts, and grocery and convenience stores throughout the Northwest and southeast Alaska.

Foremost Dairies Northwest has processing facilities in Seattle; Spokane, Wash.; and Portland, Ore. Additional Oregon-based distribution facilities are located in Eugene, Albany, Hood River, Salem, and Astoria. Washington distribution is handled through facilities in Seattle, Spokane, the Tri-Cities, Moses Lake, Yakima, and Bremerton.

#90043b0034 02/12/1990 ~Business Wire

DALLAS (FEB. 12) BUSINESS WIRE - Maxus Energy Corp. (NYSE:MXS) reported that it replaced 156 percent of worldwide oil and gas production at year-end 1989 at a finding and development cost of $3.17 per equivalent barrel.

For the past four years, Maxus has replaced 152 percent of its production at an average finding cost of $3.31 per equivalent barrel.

''Again in 1989, we maintained our excellent record in both reserve additions and replacement costs,'' said C. L. Blackburn, chairman and chief executive officer. ''In 1990, Indonesia and the United States will continue to provide a solid base for reserve additions as we pursue other geographic areas for future growth.''

Worldwide reserves at year-end 1989 were 301 million oil equivalent barrels which compares to 332 million oil equivalent barrels in 1988.

In 1989, Maxus' reserve base was reduced by 51 million barrels through the sale of its Canadian subsidiary, non-strategic U.S. assets and a 10 percent interest in the Northwest Java area of Indonesia, which generated proceeds totalling approximately $310 million.

Maxus Energy is an independent oil and gas exploration and production company.

LOS ANGELES (FEB. 12) BUSINESS WIRE - Verit Industries announced Monday that it has completed the purchase of 100 percent of the outstanding stock of Emerald Homes SGP Inc. (''Emerald SGP''), 50 percent of the outstanding stock of Emerald Homes Inc. (''Emerald Inc.''), and 50 percent of the outstanding stock of Emerald ALP Inc.

Emerald SGP and Emerald Inc. are the general partners of Emerald Homes L.P., a limited partnership whose units are traded on the New York Stock Exchange under the symbol EHP. Emerald SGP owns 1,250,000 units of Emerald Homes L.P. which represents approximately 24 percent of the outstanding units.

Verit issued 20,000 shares of series A preferred stock, and issued warrants to purchase 250,000 shares of common stock of Verit at $4.00 per share. The series A preferred stock is convertible into common shares on the basis of 20 common shares for each preferred share and may not be converted until approval for listing of the shares on the American Stock Exchange has been obtained.

Such approval will require the vote of the shareholders of Verit. The warrants may not be exercised until approval has also been obtained.

Emerald Homes L.P. designs, builds and markets single family homes primarily in the San Francisco Bay area of Northern California, Houston, Texas, the San Diego/Orange County area of Southern California, and Phoenix, Ariz.

For the year ended Dec. 31, 1988, Emerald Homes L.P. had total revenues of $113,954,000 and net income of $10,784,000. For the nine months ended Sept. 30, 1989, Emerald Homes L.P. had total revenues of $68,273,000 and net income of $240,000. Verit has placed three members on the seven-man board of directors of Emerald Inc., the managing partner of Emerald Homes L.P.

Verit announced that its acquisition of 1,242,334 shares of Iroquois Brands Ltd. is proceeding and is expected to close before Feb. 16.

Verit's common shares are traded on the American Stock Exchange under the symbol VER.

ALBANY, NY (FEB. 12) BUSINESS WIRE - Home & City Savings Bank (NASDAQ: HCSB) and National Savings Bank of Albany (NASDAQ: NSBA) jointly announced Monday that they have signed a definitive merger agreement under which Home & City has agreed to pay $40 per share in cash for all outstanding shares of National common stock, for total consideration of approximately $48 million.

In conjunction with signing the merger agreement, National granted to Home & City an option to purchase 290,500 shares of National common stock at $33.75 per share, exercisable on the occurrence of certain events.

Home & City granted to National an option to purchase 539,000 shares of Home & City's common stock at $32.60 per share, exercisable on the occurrence of certain events.

John J. Brunner, president and chief executive officer of Home & City, stated that "I am pleased and excited to announce the merger of our two banks. Upon completion, our institution will have 24 branches which cover the New York market from Plattsburgh to Hudson."

He added, "the two organizations can be efficiently melded to create one of the soundest savings institutions in the state, enjoying the pooled resources of our respective boards, management teams and staffs."

George O. Pfaff, chairman of the board and CEO of National, stated "the synergies of the banks' branch structures plus economies of scale should produce excellent opportunities for business development and earnings enhancement."

Under the terms of the agreement, the consummation of the merger is contingent on state and federal regulatory approvals which are expected to be received during the third quarter of this year. The transaction is also subject to approval of the shareholders of each bank. Under the agreement, the respective shareholders' meetings are expected to take place prior to June 1.

In connection with signing the agreement, National's board of directors has amended its Rights Agreement so that the merger with Home & City will not constitute an event which would trigger distribution of rights under the Rights Agreement.

Pfaff and four other members of National's board of directors will join Home & City's Board. Pfaff will also be nominated to become vice chairman and a member of the executive committee of the board of directors of Home & City.

CONTACT: Home & City Savings Bank, Albany, Richard A. Ahl, (518) 447-5905 or National Savings Bank of Albany, Albany, Russell G. Melton, (518) 472-6848.

KANSAS CITY, MO (FEB. 12) BUSINESS WIRE - The Meeting Channel, US Sprint's worldwide videoconferencing network, has announced a program designed to allow new customers to see how videoconferencing can work for their companies without long-term commitments or high up-front capital outlays.

Dubbed ''The Advantage Program(sm),'' the Meeting Channel's new equipment and pricing programs will enable users to experience the advantages of videoconferencing for one low monthly cost including equipment, transmission time, training and other features.

Trials can last as little as sixty days or as long as six months. Three leading equipment manufacturers are providing equipment for the program.

''With 'The Advantage Program,' corporations which have resisted videoconferencing in their communications program because of perceived expensive up-front costs and fear of making the wrong decision will be able to test a system at discounted prices and for a time period that meets their needs,'' said Holly Owens, director of The Meeting Channel.

''We are certain with the wide range of equipment options available, and US Sprint's variable-speed network, we can design a trial for any company.''

Included in ''The Advantage Program'' packages are a telephone survey of the customer's site for suitablilty, T-1 access up to $1,500 per month toward Meeting Channel connection, credit toward domestic transmission, equipment training, waiver of the one-time connection charge, and equipment maintenance.

Additionally, volume discounts on usage will be granted with a minimum of 20 transmission hours in a given month.

The Meeting Channel, owned and operated by US Sprint, is the world's largest network of domestic and international, public and private videoconferencing rooms, providing connectivity to over 600 sites in 25 countries.

US Sprint is a unit of United Telecommunications Inc., a diversified telecommunications company headquartered in Kansas City.

LOUISVILLE, CO (FEB. 12) BUSINESS WIRE - Storage Technology Corp. (NYSE:STK) Monday announced that it has entered into an OEM (original equipment manufacturer) agreement with Control Data Corp.'s Computer Products Group which will market the StorageTek high-capacity 4400 Automated Cartridge System (ACS), 4480 Cartridge Subsystem and Library Server software for use with Control Data mainframe and departmental computer systems.

The library operates in IBM and other high-performance computing environments. This is the first computer environment in which it will be resold. Projected value of the agreement is more than $50 million.

Control Data will market these products as its 5744 Cartridge Library Subsystem and its 5680 Cartridge Tape Subsystem. Now available on Control Data's NOS/VE-based CYBER mainframes, the subsystems will be available early next year on UNIX R -based Control Data 4000 departmental systems.

StorageTek introduced the 4400 ACS in January 1987, creating a new category of information storage and retrieval called Nearline R -- an alternative to traditional choices of online and offline data storage.

Its performance approaches the service time of disk drives at a cost close to that of manual tape. The Library Server, introduced in November 1989, increases the flexibility and functionality of the ACS, allowing multiple CYBER mainframes and UNIX-based Cray systems to access the same ACS.

Nearly 50 CYBER sites worldwide already run Archive/VE, which was introduced last year. Combining the StorageTek system with Archive/VE will provide significant cost-savings and improved storage control and efficiency.

Control Data provides solutions for customers' complex data collection, processing and communications needs by integrating hardware, software and services. Headquartered in Minneapolis, its Computer Products Group integrates high-performance computer solutions for engineers and scientists, and manages large and complex data bases and communications networks.

Storage Technology manufactures, markets and services, worldwide, information storage and retrieval subsystems for high-performance computers. It reported revenues of $982.5 million in 1989.

ASHEVILLE, NC (FEB. 12) BUSINESS WIRE - Ingles Markets Inc. (NASDAQ:IMKTA) Monday announced financial results for its first quarter ended Dec. 30, 1989.

For the three months ended Dec. 30, 1989, net sales increased 16 percent to $244,616,592 from $210,931,676 in the comparable prior period last year. Income from operations rose 24 percent to $7,955,833, compared with $6,422,063 a year ago. Net income was $2,628,759, or 15 cents per share (primary), compared with $3,100,755, or 17 cents per share (primary), in the first quarter last year.

Commenting on the results, Robert P. Ingle, chairman and chief executive officer, stated: ''New stores contributed 9.4 percent of the 16 percent sales increase. Growth in identical store sales accounted for approximately 6.4 percent of the increase, while our wholly owned subsidiary, Milkco Inc. accounted for the balance.

''We are very pleased with the increase in sales for our first quarter. The strong increase in income from operations is due primarily to the

sales increase as well as a decrease in operating and administrative expenses as a percentage of sales. The decrease in net income for the quarter is the result of a loss incurred on the sale of marketable securities of $1,674,921, or $.055 (five and-one-half cents) per share, after tax.

''First quarter results, discounting the loss on marketable equity securities, were very strong. We believe this performance is indicative of our ability to achieve our 18th consecutive year of record sales and earnings,'' Ingle concluded.

Ingles Markets Inc. is a leading supermarket chain with operations in five southeastern states. Headquartered in Asheville, the company operates 161 supermarkets. In conjunction with its supermarket operations, the company also operates 61 neighborhood shopping centers, each of which contains an Ingles supermarket.

BOSTON (FEB. 12) BUSINESS WIRE - Informix Software Inc. (NASDAQ:IFMX) announced Monday that its Informix-Net connectivity software now delivers client/server processing capabilities to Informix database users on Novell NetWare local area networks.

With Informix-Net, DOS users on NetWare LANs can now access Informix databases on high-performance UNIX-based servers. This client/server processing capability reduces network traffic and speeds network performance. Users can choose from any of the wide range of UNIX-based server platforms Informix supports.

Informix also currently plans to make its new Informix-OnLine database engine available as a NetWare Loadable Module for NetWare 386 servers during the second half of 1990. This will eliminate the need for a separate UNIX server on the NetWare LAN. OnLine is the first database engine to combine fault tolerant OLTP performance with multimedia capabilities.

Informix's full line of SQL-based application tools are available today for client/server processing on NetWare.

These tools include the Informix-4GL family of fourth generation programming tools that dramatically reduce application development time; Informix-SQL, a menu-driven relational database management system; and the Informix-ESQL family of development tools for embedding SQL into C and

COBOL programs.

Informix Software Inc. is a leading supplier of information management software providing solutions from the database through the desktop.

Informix products include powerful distributed database management systems robust application development tools, and graphical- and character-based productivity software for delivering information to every significant desktop platform.

The company has wholly owned subsidiaries in the United Kingdom, France, Germany, The Netherlands, Sweden, Australia, Singapore, Italy, Spain and Canada.

CLEVELAND (FEB. 12) BUSINESS WIRE - The Lamson & Sessions Co. (NYSE-LMS) announced today that it is terminating its offer to purchase for cash all of its 14 percent Senior Subordinated Notes due 1997, and the solicitation of consents from holders of the Notes to a proposed amendment to the indenture under which the Notes were issued. Validly tendered Notes totaling $250,000 as of the expiration date of 5 p.m. Friday, February 9, 1990, will be returned to the Note holders.

The offer was terminated, after the original expiration date had been extended three times, because holders were reluctant to act due to the current unsettled state of the high-yield bond market, a company spokesman said.

CLEVELAND (FEB. 12) BUSINESS WIRE - The Lubrizol Corporation announced today that consolidated revenues for 1989 were $1.2 billion, an increase of 9 percent over 1988. Consolidated net income was $94 million, or $2.52 per share. These results include a fourth quarter charge of $3.1 million pretax, or $.06 per share, for the write-down of plant assets in the Specialty Chemicals segment and a strategic investment in the Agribusiness segment. Consolidated net income in 1988 was $3.62 per share and included a gain of $1.37 per share for the settlement of a patent infringement suit special charges of $.44 per share, gains from the sale of investments of

$.18 per share and an accounting change which added $.22 per share. Income from operations in 1988 was $2.29 per share. Additive shipments in 1989 increased by 7 percent over 1988.

Consolidated revenues for the fourth quarter, which ended on December 31, 1989, were $280 million, an increase of 1 percent over last year's fourth quarter. Consolidated net income was $15.9 million, or $.43 per share and includes the $.06 per share charge mentioned above. Consolidated net income per share for the fourth quarter of 1988 was $1.93 and included $1.37 per share from a patent settlement and an $.08 per share charge. Income from operations in 1988 was $.64 per share. Additive shipments in the fourth quarter were 4 percent below last year.

L.E. Coleman, Chairman, said, ''We are disappointed in the fourth quarter results. During the quarter, we had an unexpected slowing in customer orders for additive products. We increased prices for our products during the third quarter, but the increase was not sufficient to offset the effects of continued high raw material prices, the strong dollar and lower volume. Margins were negatively affected. We did not lose market share, and our forecasts indicate that the decreased volume is not a continuing trend. Forecasts for 1990 indicate increased volume and earnings per share.''

Lubrizol repurchased 1.1 million of its common shares in 1989. The annual report will be available in mid-March.

SAN JOSE, CA (FEB. 12) BUSINESS WIRE - A new desktop cartridge handling subsystem (CHS) that provides up to 50 GB of unattended data storage was announced Monday at the Systems/USA tradshow by EXABYTE Corp. of Boulder, Colo., maker of 8mm cartridge tape subsystems.

''The introduction of this data cartridge stacker reflects our determination and ability to provide customers with a broad range of compatible, cost-effective, leading edge 8mm products,'' said EXABYTE President Peter Behrendt.

The EXB-10 CHS incorporates either an EXB-8200 or EXB-8500, offering total storage capacities of 25 gigabytes or 50 gigabytes, respectively, in less than one square foot of desk space. An integral robotic cartridge handling mechanism sequentially loads and unloads up to 10 8mm data cartridges.

This mechanism can remove a cartridge from the drive, store it, retrieve the next cartridge, and insert it into the drive in 20 seconds. No host software is required beyond existing EXB-8200 or EXB-8500 support.

In the EXB-10 CHS, data cartridges are held in contamination-resistant, removable 8mm Data Cartridge Holders that store 10 cartridges each. When removed, these holders, complete with lids, provide protected, stackable, offline shelf storage for cartridges.

The EXB-10 CHS weighs 25 pounds and measures 8.5 inches wide by 15.5 inches high by 16.5 inches deep. It includes a cooling fan and a universal power supply.

Beta shipments of the EXB-10 will begin in second quarter 1990. Production shipments are scheduled for third quarter 1990. Single-quantity price to OEMs and system integrators (without drive and cartridges) is $2,995.

EXABYTE Corp. develops, manufactures and markets high-capacity 8mm cartridge tape subsystems for use in a broad spectrum of computer systems, ranging from personal computers to supercomputers. The company markets its products to original equipment manufacturers, value-added resellers, system integrators and distributors. EXABYTE's stock is traded on NASDAQ under the symbol EXBT.

#90043b0096 02/12/1990 ~Business Wire

SAN FRANCISCO (FEB. 12) BUSINESS WIRE - CelluLand, California's leading retailer of cellular telephones, announced Monday their expansion into the facsimile machine market, with the opening of a facsimile division, complete with ''Loan Fax'' in each of their four San Francisco Bay Area stores.

''Loan Fax'' is modelled after CelluLand's practice of giving customers a ''loan phone'' - a free cellular phone to use if their own should need service work.

''When our fax machine went down in the earthquake last year it just about brought business to a halt,'' said Graham Tenneson, general manager of CelluLand San Francisco. ''We realized right then that many businesses, like ours, depend on their fax machines every day. Downtime is frustrating and expensive. So we invented ''Loan Fax'' to give our customers protection.''

CelluLand has contracted to become authorized agents for Mitsubishi and Fujitsu facsimile machines.

Said Tenneson, ''Mitsubishi and Fujitsu are both top quality companies whose facsimile products have not been promoted in the Bay Area. They feel that CelluLand's commitment to service and customer satisfaction, plus our growth rate, will give them the exposure and penetration they are seeking.''

In under three years, CelluLand has captured 12 percent share of the Bay Area's burgeoning cellular market and firmly positioned itself as PacTel's leading agent.

Tenneson attributes CelluLand's success to their ''one stop'' approach of providing sales, installation and service at the same location, and a dedication to customer service at all levels. ''We came into a marketplace that was totally price-oriented - we felt sure service was important to people if they just knew they could have it, and our success proves it.''

CelluLand currently has four stores in the Bay Area, with plans to open six to eight more stores over the next five years. Current locations are: San Francisco, Walnut Creek, Palo Alto and Santa Clara, Calif.

MOUNTAIN VIEW, CA (FEB. 12) BUSINESS WIRE - Sun Microsystems and Micrognosis Inc., a leading developer and manufacturer for dealing rooms, Monday announced that Micrognosis' trading floor system based on Sun's popular RISC-based SPARCstation 1 just went ''live'' at Mitsubishi Bank, the fourth largest bank in the world.

The new system was installed by Telecomet International Inc., and is the largest ever in Japan, using more than 300 Sun workstations to automate Mitsubishi's Tokyo trading floor. Telecomet is Micrognosis' sole distributor and service agent in Japan.

Micrognosis designed the bank's trading system and added sophisticated software that allows traders to integrate digital and video information from several external and internal sources on a single trader's workstation. Both Sun and Micrognosis enhanced their software to support Japanese language processing.

Sun and Micrognosis have penetrated the world's leading financial centers in the United States, Europe and Japan. With this installation, Sun's workstation technology is found in the largest digital trading floors in both Japan and Europe, as well as in 22 of the top 25 U.S. securities firms.

Meanwhile, more than 230 financial institutions worldwide use the Micrognosis trading system. Last year, Micrognosis sold its trading system comprised of more than 250 Sun workstations to Swiss Bank Corporation International in London.

Micrognosis Inc., a subsidiary of Control Data Corp., designs, manufactures and integrates comprehensive trading solutions for the financial industry worldwide. The company is headquartered in the United States and has major regional operations located in New York, London and Tokyo with 24 offices in major financial centers around the world.

Sun Microsystems Inc., headquartered in Mountain View, is a leading worldwide supplier of network-based distributed computing systems, including professional workstations, servers and UNIX operating system and productivity software.

SANTA BARBARA, CA (FEB. 12) BUSINESS WIRE - Rockwell CMC, a subsidiary of Rockwell International Corp., Monday announced a major software upgrade and Unified Local Area Network Architecture (ULANA) compliance for its DRN-3200 DDN router.

The DRN-3200, an Internet Protocol (IP) router, gives TCP/IP Ethernet users access to the resources of the Defense Data Network (DDN) or compatible networks.

The new software release, release 3.0, which is being certified for use under the ULANA contract, includes support for Simple Network Management Protocol (SNMP), enhanced diagnostics and software downloading.

Electronic Data Systems (EDS), one of the suppliers for the ULANA contract to install local area networks at Air Force bases over a period of five years, extensively tested Rockwell's DRN-3200 software for ULANA compliance and is working to add the router to the ULANA Approved Products List. When this is complete, the DRN-3200 can be purchased by any authorized government agency under the contract.

SNMP, a network management standard for the TCP/IP protocol suite, is included with the release 3.0, allowing SNMP management stations to access the router for management information and control. The unit features full compliance with the RFC standards and supports the standard Management Information Base (MIB) plus a Rockwell-specific MIB extension.

Increased diagnostic capabilities include the X.25 Line Monitoring System (LMS), a tool useful for isolating compatibility and line failure problems. The tool allows the system manager to display X.25 traffic transiting the router. LMS reads and displays the X.25 line as a selective debugging tool.

The Rockwell CMC Download Service (CDS) is now available for the DRN-3200. A CDS Server host downloads centrally administered configuration data and operating code to the DRN-3200 across an Ethernet using Internet-standard bootstrap protocols. New DRN-3200 features also include:

- Support for ULANA-defined Basic IP Security Options;
- SNMP agent support, conforming to RFC 1065, 1066 and 1067;
- Sub-Network Access Protocol (SNAP) Interface;
- Support for up to 126 X.25 virtual circuits; and
- DDN communications software certified by the Defense Communications Agency.

The DRN-3200 comes with a choice of protocol interfaces to the DDN, X.25 or 1822. The routers are priced at $11,900 and $18,900, respectively. Delivery is two weeks after receipt of order.

MENLO PARK, CA (FEB. 12) BUSINESS WIRE - Adia Services Inc. (NASDAQ:ADIA) a national supplier of personnel services, Monday announced that net income for the fourth quarter of 1989 increased 14 percent to $4.5 million from $3.9 million in the fourth quarter of 1988.

Net income per share increased to $.36 as compared to $.32 a year ago. Revenues during the fourth quarter increased 18 percent to $158.5 million as compared to $134.5 million in the prior year period.

For the full year 1989 net income increased 24 percent to $21.8 million ($1.75 per share) on revenues of $604.5 million, 20 percent higher than last year.

Net income for 1989 includes a non-recurring tax benefit recognized during the first quarter, resulting from adoption of Financial Accounting Standards Board Statement No. 96, ''Accounting for Income Taxes.'' The cumulative effect of this accounting change increased net income by approximately $1.5 million ($.12 per share).

Excluding the effect of this change net income for 1989 increased 15 percent to $20.3 million ($1.63 per share).

Adia's nationwide network now consists of over 585 offices including specialty operations in accounting, health care, data processing, word processing and outplacement services.

#90043b0103 02/12/1990 ~Business Wire

REDONDO BEACH, CA (FEB. 12) BUSINESS WIRE - TRW's Electronic Systems Group in Redondo Beach has been awarded a five-year Air Force contract as one of four companies pre-qualified to replace and upgrade existing military electronic systems, Timothy W. Hannemann, the group's vice president and general manager, said Monday.

Known as the Microelectronics Technology Support Program (MTSP), the contract has a $650 million ceiling and pre-qualifies the four companies to replace and upgrade obsolete electronic parts, modules and systems in fielded weapons systems through retrofits and to incorporate advanced microelectronic technology.

Individual projects and tasks of varying dollar amounts, up to the contract's ceiling, may be awarded to TRW and others at the discretion of the Air Force over the life of the contract. Details about specific work that may be awarded and its value are not available at this time.

''One of the main goals of MTSP is to provide the Air Force advanced microelectronic support to improve the reliability and maintainability of the electronic content of fielded weapons,'' said Hannemann.

Tasks are expected to cover a wide range, including: engineering analysis replacement methodology, prototype circuit design, wafer fabrication, packaging, prototyping, testing/screening, technology insertion and application, and limited production.

Other organizations awarded MTSP contracts, according to the Air Force, are Control Data, Honeywell and Hughes. TRW's is tasked by the Air Force's Air Logistics Center, Sacramento.

The business and technical strengths of TRW's Electronic Systems Group include the management of a wide range of research, development and application tasks, projects and programs (such as MTSP); systems engineering for complex electronic applications; advanced digital signal processing; the design and fabrication of sophisticated microelectronic devices in both silicon and gallium arsenide; and, primarily, design and fabrication of payloads for a wide range of military, civil and scientific spacecraft.

ESG employs approximately 6,150 people.

FORT WORTH, TX (FEB. 12) BUSINESS WIRE - Sunbelt Nursery Group Inc. (ASE:SBN) Monday said that it is changing the date of its fiscal year from Aug. 31 to Jan. 31.

The January year-end is widely used in the retailing industry and will better fit the seasonal pattern of Sunbelt's business.

In a filing with the Securities and Exchange Commission, the company stated it would file unaudited financial results for the five-month fiscal period ended Jan. 31, 1990, and then begin quarterly reporting on the new fiscal year basis. The next annual report will be for the year ended Jan. 31, 1991.

Commenting on the expected operating results for the five months ended Jan. 31, 1990, Donald W. Davis, president and chief executive officer, said that comparable store sales should be up slightly compared to the same period last year. ''We anticipate that the net loss for the five months ended Jan. 31, 1990, will be reduced from the same period last year by approximately $5 million.''

Sunbelt Nursery Group is the dominant nursery enterprise in six of the 11 largest lawn and garden markets in the United States with 97 stores that feature nursery stock and lawn and garden supplies.

GOLETA, CA (FEB. 12) BUSINESS WIRE - Applied Magnetics Corp.'s (NYSE:APM) Vice Chairman and Chief Executive Officer Ben J. Newitt announced at the annual shareholders meeting held Friday, Feb. 9, 1990, in Santa Barbara, the election of William R. Anderson, president of Applied Magnetics Corp., to the board of directors.

Bill Anderson has been an employee of the company for over 24 years, holding various engineering, sales and management positions. Other directors re-elected were H.R. Frank, chairman; B.J. Newitt, vice chairman; William E. Terry; Robert C. Tetherow; R.C. Mercure Jr.; and Herbert M. Dwight Jr.

Newitt also stated that the company's lenders had agreed to amend credit agreements with Applied Magnetics in connection with a pretax reserve of $18.5 million charged against income in the first quarter of 1990. The provision was made because of the uncertain collection of notes and accounts receivable from MiniScribe Corp., which is operating under the protection of Chapter 11 of the Bankruptcy Code.

As a result of this provision, Applied Magnetics was not in compliance with certain covenants of its lending agreements.

Ending on a very positive note, Newitt announced a new all-time high backlog of open orders at the end of January 1990 amounting to $130,755,000, compared with $112,400,000 at Dec. 31, 1989. He stated further that most of the company's facilities around the world are increasing production and that sales revenues are expected to increase throughout the balance of this year.

LAS VEGAS (FEB. 12) BUSINESS WIRE - Automobile dealers will now be able to benefit from the advantages of an integrated laser printing system developed by Reynolds and Reynolds, the industry's leading supplier of business forms and computer systems to automobile dealers.

The ERA Laser Print System, in certain dealership applications, provides an alternative to the traditional impact printer. ''In those applications like repair orders, where multi-part forms have traditionally been required, laser printing offers some advantages,'' said Ed Zentz, vice president, marketing, Reynolds' Computer Systems Division.

Laser printers are heralded for clear, high-quality printing, reliable performance in lower volume applications and their inherent impact on reducing paper flow within the dealership. ''Reynolds' approach is unique because we protect the investment the dealer has made in creating an image on their current forms through color and illustration, by accommodating those same features on the cut-sheet forms used in the ERA Laser Print System. In addition, Reynolds knows how to produce cut sheet forms designed to maximize laser printing applications,'' said Zentz.

Reynolds' ability to integrate laser printers with its ERA in-house computer system strengthens those advantages. ''The ERA system's totally integrated design can actually reduce the flow of paper work within the dealership. The dealer can begin eliminating the number of copies from some of their current forms because ERA sends that information electronically, reducing the need to rekey information from a form,'' Zentz said.

While laser printers can reduce paper flow and streamline some applications within the dealership, they are not the solution for every area in the dealership, according to Zentz.

''If necessary, the laser printer can provide multiple copies on demand. All copies are the same high quality as the first. The Laser Print System integrated with the ERA in-house system, also provides the option of delaying additional copies, or sending them to another printer, which is very important in quickly satisfying the customer.

''Dealers need to look to companies like Reynolds and Reynolds, with long histories in the auto industry, to evaluate the dealership and recommend the most appropriate computer system and business form solution,'' Zentz said.

Reynolds and Reynolds, headquartered in Dayton, Ohio, is a major supplier

of information processing systems, including business forms and computer systems to automotive, professional, medical and general business markets.

SAN FRANCISCO (FEB. 12) BUSINESS WIRE - If you're an older worker, the place to work in California is Wells Fargo Bank.

That's the opinion of the Los Angeles Council on Careers for Older Americans. They've just selected Wells Fargo as the 1990 recipient of the Business Leader Award. The bank is being recognized by the council for its active recruitment of older workers, its placement of retirees in temporary positions, and for its retirement, career planning and personal growth leave programs.

Since Wells Fargo began its in-house program to hire bank retirees as temporary workers, 575 from Wells Fargo have signed up, a tenth of the bank's retiree population.

Wells Fargo is also being honored for its personal growth leave program, which gives employees who've been with the bank for at least 10 years an opportunity to take one to three months time off to pursue a personal

interest.

Last year, assistant vice president Barbara Jordan, 52, took advantage of the bank's growth leave to achieve her personal goal: she placed first in both the 100-meter and 200-meter swimming races at the Masters World Championships competition in Australia for those age 50 and older, coming within 12 seconds of her backstroke time when she competed in the 1952 Olympics.

Stephen Enna, Wells Fargo's personnel director and executive vice president, will receive the council's Business Leader Award on March 15 in Los Angeles at a reception hosted by the Los Angeles Times.

CHARLOTTE, N.C. (FEB. 12) BUSINESS WIRE - Datasouth Computer Corp. Monday announced the availability of a bar code option for their DS 180 product line of heavy-duty dot matrix printers.

With the growing use of bar codes to increase speed and minimize errors in data entry, there is increased demand for bar-code capability in markets such as manufacturing, warehouse, shipping and other industrial-related markets. These applications are often forms oriented with a variety of formats including single- and multipart forms, fabric-metalized labels and card-stock documents.

''We have traditionally sold our printers into vertical markets such as healthcare, transportation and distribution,'' said Datasouth president Jim Busby. ''Bar codes are a logical extension of the DS 180 print capabilities as we respond to the expanding needs of markets that are very familiar to Datasouth.''

Datasouth's DS 180 line includes DS 180 Plus and the DS 180 DD. Both printers feature a 9-wire printhead and are plug compatible with IBM 3270 and S/3X environments.

The printers are also ASCII compatible and are available with LA 120 DECwriter emulation for the DEC marketplace. They print at 180 characters per second, and both feature standard parallel and serial interfaces. While both printers print through nine-part forms legibly, the DS 180 DD is customized for forms applications that require immediate tear-off of a printed form, without forms waste.

''The addition of bar codes coupled with our capability to print thick

forms adds a new dimension to our product line that will greatly benefit the typical user in these industrial markets,'' added Busby.

Bar code capability will be sold as an option on the DS 180 product line for $100. DS 180 and DS 180 DD printers that are currently installed may be upgraded for $100.

Located in Charlotte, Datasouth was founded in 1977 to design, manufacture and distribute heavy-duty dot matrix printers. With speeds ranging from 180 to 400 cps, Datasouth printers are intended for tasks such as printing multipart forms, invoices, labels, checks, bar codes and high-speed report printing.

A variety of available interfaces allows plug compatibility with virtually any system. Datasouth sells its products through distributors, VARs and systems integrators.

TORRANCE, CA (FEB. 12) BUSINESS WIRE - MDT Corp. (NASDAQ:MDTC) said that on Feb. 10 it adopted a shareholder rights plan to discourage abusive takeover tactics.

The rights will be issued as a dividend to shareholders of record on Feb. 27. If an entity acquires more than 20 percent of the company's stock, or in the event of a squeeze-out merger, holders of the rights would be entitled to purchase either the company's stock or stock in the acquiring entity at half of market value.

The company will be entitled to redeem the rights for a nominal amount at any time until the 10th business day following public announcement that a 20 percent position has been acquired.

Details will be mailed to shareholders on or about March 30.

SAN FRANCISCO (FEB. 12) BUSINESS WIRE - Scottish & Newcastle Breweries PLC, a leading international brewer and one of Britain's largest companies with $2 billion in annual sales, has opened its first office in the United States, the company said Monday.

The U.S. subsidiary, Scottish & Newcastle Importers Co., is located in San Francisco. The company named Michael Campbell-Lamerton, 31, as general manager of the U.S. unit.

Scottish & Newcastle distributes three products in the United States; Newcastle Brown Ale and McEwan's Export Ale, each available in bottles at retail and on draft; and McEwan's Scottish Ale, available in 12-ounce bottles.

The company said it is locating its U.S. headquarters in San Francisco to take advantage of West Coast market opportunities as part of its commitment to expanding market share in San Francisco. ''The recent trend toward microbreweries on the West Coast is a response to consumer demand for premium beer and ale, the kind that has been manufactured in Britain for centuries,'' said Alick Rankin, chairman of Scottish & Newcastle Breweries PLC.

Although sales of beer in the United States have remained flat, during the last several years, Rankin said imported British beer sales in the United States have experienced double-digit growth. ''We want to be a part of that growth as Americans seek out distinctive flavors available in quality imported ales.''

#90043b0151 02/12/1990 ~Business Wire
SALEM, OR (FEB. 12) BUSINESS WIRE - Stockholders of United Savings Bank, Salem, have approved a merger with First Security Corp., Salt Lake City.

M.J. Burford, United Savings Bank's president and chief executive officer, announced that the merger was approved by over 77 percent of the

shareholders and would close on March 2. Regulatory authorities have already approved the merger.

Under terms of the merger agreement, United Savings Bank shareholders will receive $0.7083 shares of First Security Corp. common stock for each outstanding share held of United Savings Bank stock. United common stock closed Friday at $19.50 bid, $20 asked. First Security common stock closed at $31.25.

Burford said, ''We are extremely pleased to be joining the First Security team. The merger will extend the range of financial products and services we can provide our customers in Oregon.

''First Security is a strong, profitable, well-managed banking and financial services company. It has a strong presence in growing markets. It has a long history of responding quickly and creatively to customers' varied and changing needs. Its banks currently serve 500,000 households in Utah, Idaho and Wyoming. First Security is 'customer driven,' the cornerstone of our own business philosophy.

''Last year, First Security's earnings totaled $43.1 million, the second best year in the company's history and an increase of more than 30 percent over 1988. Like United Savings Bank, First Security has a strong capital position, with primary capital equal to 8.33 percent of total assets,'' Burford said.

Mr. Eccles, chairman and chief executive officer of First Security Corp., said, ''Acquisition of United Savings Bank will mark our initial expansion into an adjoining state. We are delighted, to say the least, that United Savings Bank, with its wealth of experience, knowledge and skills, is becoming an integral part of the First Security organization.''

The acquisition of United Savings Bank is the fourth merger announced by First Security Corp. in the last year. First Security has completed acquisition of Davis County Bank in Utah and Twin Falls Bank and Trust Company of Idaho and has also announced an agreement to acquire the Desert Bank in Utah.

With assets of $5.8 billion, First Security Corp. is the largest financial services organization headquartered in the Intermountain West. It is the oldest continuously operating multi-state bank holding company in the United States. Other subsidiaries include a leasing company, an investment management firm, two insurance companies, and a discount brokerage firm. The corporation's shares are traded over the counter -- NASDAQ symbol FSCO.

BEVERLY HILLS, CA (FEB. 12) BUSINESS WIRE - Litton's Guidance and Control Systems division has been awarded $10.7 million by the U.S. Air Force to produce additional laser gyro aircraft inertial navigation systems.

The funds are for 113 more Litton LN-93 and LN-94 systems, including spares and documentation. A total of 1,268 systems has been ordered to date, with 540 already delivered.

The LN-93 is built for use in a variety of fixed wing aircraft and helicopters, including the F-16, F-4, C-130 and A-7, as well as the MH-60 and MH-47 helicopters. It is also being provided for a U.S.A.F. YF-22 Advanced Tactical Fighter prototype and to Israel for its F-16C/D aircraft. The LN-94 is being produced for the U.S.A.F. F-15.

Work on the two systems will continue to be performed in Woodland Hills, Calif., Salt Lake City, Utah, and Grants Pass, Ore.

Litton's Guidance and Control Systems division, based in Woodland Hills, is a world leader in inertial navigation and has received orders for more

military laser gyro systems than all other suppliers combined.

Litton is a technology-based company providing advanced electronic and defense systems, resource exploration services and industrial automation systems for U.S. and world markets.

ANAHEIM, CA (FEB. 12) BUSINESS WIRE - COMARCO Inc. (NASDAQ:CMRO) Monday announced that the motorist aid callbox system it manufactures exclusively for GTE Cellular Communications Corp., a subsidiary of GTE Mobilnet, has been selected for installation on roadways throughout California's Riverside and San Bernardino counties.

The board of the Riverside County and San Bernardino County SAFE (Service Authority for Freeway Emergencies) unanimously chose GTE to supply up to 2,000 solar-powered, cellular-based callbox systems for delivery over the next year. This selection will bring the installed COMARCO callbox base to almost 5,000 units. The bi-county SAFE selected the GTE/COMARCO team because of its technically superior design together with the lowest cost mong the competitive bidders.

The installed callbox system, when operated, provides voice communication between stranded freeway motorists and law enforcement agencies which greatly reduces the police response time to accidents and other roadway incidents. The system is similar to those COMARCO- manufactured units which have been operating very successfully in San Diego and Orange counties for the past two years. Approximately 25,000 calls per month are made in the two counties.

Harrison Young II, COMARCO's president and chief executive officer, said: ''This award solidifies our lead position in this expanding market segment. With GTE, we are currently bidding on the supply of several thousand units for the Bay Area Metropolitan Transit Commission SAFE. Our superior product and dominant market position certainly strengthens our ability to win. Working with GTE, we plan to continue to market callbox systems throughout the United States.''

COMARCO Inc. provides engineering and computer-based services and products to the government, commercial and industrial markets.

#90043b0181 02/12/1990 ~Business Wire

PORTLAND, OR (FEB. 12) BUSINESS WIRE - PacifiCorp Monday reported earnings for 1989 of $3.62 per share -- up 5 percent from $3.46 a year ago.

After reflecting the effect of a two-for-one common stock split effective March 1, 1990, earnings per share for the year would be $1.81 compared with $1.73 in 1988.

For the year ended Dec. 31, 1989, PacifiCorp revenues were up 6 percent, or $198 million, to $3.7 billion, as all operating units posted revenue gains.

Net income was $466 million, 4 percent higher than the $447 million reported in 1988. Earnings contribution available to common stock improved 4 percent, or $18 million, to $444 million. Each of the company's core business units, comprised of electric utility operations, mining and resource development and telecommunications, posted earnings contribution gains.

PacifiCorp's earnings per share for the fourth quarter of 1989 were 97 cents on a pre-split basis, or 48 cents on a post-split basis, an increase of 17 percent from the same quarter a year ago.

Total revenue for the fourth quarter of 1989 was $992 million, an increase of $60 million, or 6 percent from the fourth quarter of 1988.

NERCO's quarterly revenues increased $37 million, or 20 percent, to a record $215 million because of substantially increased precious metals and coal sales. Pacific Telecom's revenue rose 18 percent to $169 million, largely the result of the December 1988 acquisition of an international communications carrier. Electric operations' revenue was up $3 million, or 1 percent, as increased revenue from sales to other utilities overcame merger-related price reductions which resulted in a decline in general sales revenue. Total energy sales volume was up 6 percent for the quarter as sales to other utilities increased 22 percent and general sales rose 3 percent.

PacifiCorp's income from operations for the fourth quarter of 1989 was down 3 percent or $8 million. A slight gain in electric operations was offset by declines in the other business units. NERCO's operating income declined $5 million or 15 percent, as a result of pre-tax restructuring charges totaling $10 million associated with closing two small non-core subsidiary operations. Telecommunications' and financial services' operating income declined $2 million each.

TUCKER, GA (FEB. 12) BUSINESS WIRE - Southern Electronics Corp. (NASDAQ: SECX) Monday reported record sales and net earnings for the second quarter of its 1990 fiscal year.

For the quarter ended December 1989, net sales totaled $30,509,000, up 28 percent from $23,924,000 in the same quarter for the previous year. Net earnings amounted to $1,107,000, including an extraordinary credit of $248,000, compared with net earnings of $622,000 in the year-earlier period.

This represented an earnings increase of 78 percent. Earnings per share totaled 38 cents, including nine cents of extraordinary credit, compared to 21 cents, a year ago.

Net sales through six months were $55,406,000, up 24 percent from $44,693,000 in the year-earlier period. Net earnings for the six months totaled $2,009,000, including an extraordinary credit of $500,000, compared with net earnings of $1,036,000 in the year-earlier period.

This represented an earnings increase of 97 percent. Year-to-date earnings per share totaled 69 cents, including 18 cents of extraordinary credit, compared to 35 cents in the previous year.

In commenting about the results, Gerald Diamond, president and chief executive officer, said, "During calendar year 1989, Southern Electronics posted annual sales in excess of $100 million. We are proud of the diligent efforts of all of our employees in achieving this record.

"Based on our operating performance, Southern Electronics repaid $1 million of long-term debt on Jan. 3, 1990. This payment brought the total of long-term debt reductions over the past year to $5 million. With the second fiscal quarter results, the company achieved positive stockholders' equity status."

Diamond added, "The company is enthusiastic about its prospects for growth during the remainder of fiscal year 1990. We plan to continue to increase our sales staff as we remain focused on expanding our active dealer base and product offerings."

Southern Electronics Corp. is a distributor of microcomputers, computer peripheral products, and cellular telephone products, serving retailers in the Southeastern United States.

LOS ANGELES (FEB. 12) BUSINESS WIRE - ARCO and Indalsa, a Madrid-based operator of highway, novelty food stores and restaurants in Spain, have signed a long-term licensing and joint-venture agreement that provides for the opening of more than 600 am/pm mini markets in Spain and Portugal.

The agreement, which was finalized Monday at ARCO's worldwide headquarters in Los Angeles, outlines the structure of the joint-venture company, ''am/pm Mini Markets, S.A.,'' established by am/pm International, a wholly owned subsidiary of ARCO Products Co., and Indalsa.

Under terms of the agreement, am/pm International will own 33 percent of am/pm Mini Markets, S.A., and Indalsa will own the remaining 67 percent. In addition, am/pm Mini Markets, S.A. has purchased from am/pm International a license to use the am/pm brand and systems in Spain and Portugal.

The purpose of the joint-venture company will be to own, operate and franchise, stand-alone, predominantly non-gasoline convenience food stores using am/pm mini market trademarks, designs and operating systems.

This joint-venture expansion into Spain and Portugal is am/pm International's first undertaking in Europe and its first foreign joint venture. In 1988, ARCO entered into similar licensing ventures with Kyodo Oil of Tokyo, calling for 500 am/pm mini markets to be built in Japan, and with Wei-Chuan Foods Corp. in Taiwan, where another 500 am/pm mini markets are planned.

To date, there are 36 ''stand alone'' am/pm's operating in Taiwan and six in Tokyo that also sell gasoline.

The first three am/pm mini markets are scheduled to open in Madrid this year.

Most of the am/pm mini markets planned for Spain will be located in metropolitan Madrid and Barcelona and will be conversions of existing store fronts to the new modern am/pm store look.

The new Spanish am/pm mini markets will feature am/pm's distinctive Western-style product mix, including fast foods such as hamburgers and hot dogs. Stores will also include am/pm's frozen deserts section with frozen yogurt and soft drinks. All of the Spanish am/pm offerings will be

modified for local tastes and will include local products like Bocadillos.

Am/pm International, as part of its responsibilities through am/pm Mini Markets, S.A., will also assist in the design, selection and construction of the first three units in Madrid, as well as help establish the joint venture's headquarters organization.

SALT LAKE CITY (FEB. 12) BUSINESS WIRE - Dan S. Bushnell, chairman of Salt Lake City-based Alta Gold Co. (NASDAQ:ALTA) announced that the company's gold production for the 12 months ended Dec. 31, 1989 was 72,000 ounces.

The company is a result of a merger of Pacific Silver Corp. and Silver King Mines Inc. which was effective on Nov. 24, 1989. 1989 production was up 16 percent over the production of 62,000 ounces of gold for the 12 months ended Dec. 31, 1988.

The company also announced that it is changing from a March 31 to a Dec. 31 year end, and has hired Arthur Andersen & Co. to audit its financial statements for the nine months ended Dec. 31, 1989.

The company is contemplating a possible write-down of certain deferred exploration and development costs relating to its base metals properties as a result of lower base metals prices. Such write-downs would be reflected in its 1989 results.

During 1989, Alta Gold commenced gold production at its Golden Butte, Easy Junior and Elder Creek properties in addition to continued gold and silver production from its Robinson and Sunnyside mines. The company expects to commence gold production during 1990 at the West Liberty property on the Robinson project and will commence zinc, copper, lead and silver production at its Ward polymetallic project.

Development activities have begun on the Pan gold project west of Ely, Nev. Gold production for 1990 is expected to increase to approximately 125,000 ounces.

NEW YORK (FEB. 12) BUSINESS WIRE - Leucadia National Corp. (NYSE, PSE:LUK) announced that pursuant to a merger agreement entered into between Leucadia and BRAE Corp. (NASDAQ:BRAE), Leucadia's wholly owned subsidiary, Brae Acquisition Corp., had commenced its offer to purchase any and all outstanding shares of common stock of BRAE at a net cash price of $6.25 per share.

Based upon the recommendation of a Special Committee of Directors and the opinion of an investment banking firm retained by the Special Committee as to the fairness of Leucadia's Offer from a financial point of view, the BRAE Board of Directors approved the Offer and recommended acceptance of the Offer by BRAE stockholders. The Offer and withdrawal rights will expire at 6 p.m. New York City time on Monday, March 12, 1990, unless extended.

Leucadia beneficially owns approximately 48.7 percent of BRAE's outstanding common stock (approximately 57.8 percent on a fully diluted basis).

The Carter Organization Inc. is acting as information agent for the Offer.

RICHMOND, VA (FEB. 12) BUSINESS WIRE - Cadmus Communications Chairman Wallace Stettinius Monday announced that Arthur R. Myers Jr., Cadmus vice president, treasurer and chief financial officer, has assumed the new position of chief administrative officer at The William Byrd Press, a Cadmus subsidiary.

David E. Bosher, currently Cadmus Corporate Controller, has been promoted to the position of vice president and treasurer for Cadmus.

''Bosher's promotion helps facilitate Myers' desire to rejoin Byrd's management group on a full time basis,'' Stettinius explained. ''While we will miss Art's contribution at the holding company level, we are pleased with his decision to again play a key role in the management of our largest subsidiary.''

Myers, 40 joined The William Byrd Press as Treasurer in 1983 from the Richmond accounting firm of A.M. Pullen & Company, where he was a partner. He was named Byrd's vice president, finance and

administration in 1985. He has served as Cadmus vice president and treasurer since Cadmus was formed in 1984.

A native of Virginia Beach, Myers holds a bachelor's of science degree with honors in accounting from Virginia Commonwealth University and is a Certified Public Accountant.

Bosher, 36, who is also a Certified Public Accountant, joined Cadmus as Corporate Controller in May 1988 after two years with the Richmond based investment firm, Davenport & Company of Virginia.

Previously, Bosher was employed with the A.H. Robins Company, also of Richmond, where he was Director of Corporate Accounting. A native of Richmond, Bosher holds a master's degree in business administration and a bachelor's of science degree in business administration from the The University of Richmond.

Headquartered in Richmond, Cadmus is a graphics communications holding company specializing in financial and promotional printing, point-of-purchase advertising, full service direct marketing, and complete production services for publications. Cadmus common stock is traded through the NASDAQ National Market System, Symbol CDMS.

#90043b0265 02/12/1990 ~Business Wire
HOUSTON (FEB. 12) BUSINESS WIRE - U.S. Home Corp. (NYSE:UH), Monday reported for the year ended Dec. 31, 1989 net income was $1,339,000, or $.03 per share, compared to net income of $5,028,000, or $.13, for the year ended Dec. 31, 1988.

Results for 1989 include an extraordinary gain of $14,866,000 from the early extinguishment of debt. Total revenues for the year ended Dec. 31, 1989 were $675,558,000 including $643,167,000 from housing operations and $32,391,000 from financial services compared to total revenues of $735,807,000 for 1988, including $672,891,000 from housing operations and $62,916,000 from financial services.

For the quarter ended Dec. 31, 1989, the company reported net income of $46,000 compared to net income of $1,334,000 for the fourth quarter of 1988. Fourth quarter 1989 results include an extraordinary gain of $7,274,000 from the early extinguishment of debt.

Revenues for the fourth quarter were $165,665,000 of which $157,751,000 were from housing operations, compared to 1988 fourth quarter revenues of $193,076,000 of which $181,369,000 were from housing operations.

New homes delivered in 1989 were 5,437 units compared to 6,178 units in 1988. Deliveries include 203 homes and 195 homes, respectively, delivered in 1989 and 1988 by joint ventures in which the company participates.

New homes delivered in the fourth quarter, including deliveries by joint ventures, were 1,302 compared to 1988 fourth quarter deliveries of 1,612. The dollar value of the Dec. 31, 1989 backlog, excluding joint venture activity, was $207,013,000 compared to $197,757,000 at December 31, 1988. The average price of homes sold in 1989 was $116,500 compared to $106,500 in 1988.

Results in 1989 were favorably affected by reductions in selling, general and administrative expenses of $8.4 million, an eight percent reduction from the prior year.

Net income in 1989 was impacted by a loss of $4.6 million from discontinued operations and by provisions taken of $9.2 million relating to the write-down to their net realizable value of certain housing, land options and marketing assets in markets in which the company has closed or reduced operations.

In 1989 U.S. Home made a significant progress in reducing its debt burden and improving cash flow. During the year, the company retired approximately $94 million principal amount of its public debt resulting in a reduction in its total housing debt of $64.4 million, net of additional

borrowings. The reduction of debt reduces future annual cash interest obligations by over $9 million.

In 1989 U.S. Home continued to streamline operations, deploying assets in strong markets in California and Florida and reducing or closing operations where returns did not warrant the investment. Operations were closed in Albuquerque, Atlanta and Charlotte and reduced in Phoenix and Tucson.

U.S. Home, with this streamlining and significant reduction in debt, has improved the company's prospects for earnings and its ability to compete effectively for financing and take advantage of opportunities existing in the homebuilding industry in the 1990's.

#90043b0266 02/12/1990 ~Business Wire

LAKEWOOD, CO (FEB. 12) BUSINESS WIRE - K N Energy Inc. (NYSE:KNE) Monday reported 1989 net income of $14.8 million, or $1.40 per common share after preferred stock dividends.

In 1988, the company had a net loss of $6.2 million, or 89 cents per common share after preferred dividends and before an extraordinary after-tax gain of $21.8 million, or $2.39 per common share, from settlements of coal slurry pipeline litigation. Total 1988 net income, including the extraordinary gain, was $15.6 million, or $1.50 per common share after preferred dividends.

The 1989 results were favorably impacted by strong fourth quarter performance as a result of increased natural gas sales and transportation throughput, higher extracted product prices, the resolution of certain rate cases in Nebraska and an operating profit in the mineral resources segment compared with a loss for the same period in 1988.

In the fourth quarter of 1989, operating revenues for the company were $103.7 million, compared with $87.1 million in 1988. The company had net income for the 1989 fourth quarter of $9.0 million. After payment of preferred dividends, K N Energy earned 92 cents per common share in the period.

The results include interest receivable income, $1.4 million after tax, or 15 cents per common share, resulting from a federal income tax refund. In the 1988 fourth quarter, including the extraordinary gain from litigation settlements, the company had net income of $0.2 million, or a loss of 4 cents per common share after payment of preferred dividends.

''K N Energy's refocused efforts over the past two years have paid off with substantive results in 1989,'' said Charles W. Battey, chairman and chief executive officer. ''K N had a number of major marketing successes in 1989, which reflects the company's strong emphasis on acquiring significant new long-term business,'' he said. Battey noted that K N Energy's natural gas throughput, which combines natural gas sales and transportation volumes, increased from 89.3 billion cubic feet (Bcf) in 1988 to 105.5 Bcf in 1989, an increase of 18.1 percent. The company recently began deliveries under separate 7-year natural gas supply contracts to The Kansas Power and Light Co. and to The City of Colorado Springs.

''I am also pleased to report that the coal operations of Wyoming Fuel Co. K N's wholly-owned subsidiary, showed an operating profit in the fourth quarter, and it is expected 1990 coal operations will be profitable,'' said Battey.

For the year 1989, K N Energy reported operating revenues of $353.3 million, a five percent increase compared with $335.2 million in 1988. K N Energy, with operations in seven states, supplies natural gas to residential, commercial, industrial and agricultural customers through three pipeline systems.

Principal operations serve over 300 communities and 220,000 direct customers in Colorado, Kansas, Nebraska and Wyoming. Operating one of the 10 longest natural gas pipeline systems in the United States, K N Energy has annual sales exceeding $350 million and assets in excess of $540 million.

SAN JOSE, CA (FEB. 2) BUSINESS WIRE - Valid Logic Systems Inc. (NASDAQ:VLID) Monday announced record financial results for the fourth quarter of 1989 and for the year ended Dec. 31, 1989.

Revenues for the quarter were $49,752,000, an increase of 18 percent compared to $42,155,000 in the fourth quarter of 1988. Net income for the fourth quarter 1989 was $4,310,000, a 74 percent increase compared to net income of $2,480,000 for the fourth quarter of 1988. Earnings per share for the quarter rose 63 percent, to 13 cents, compared to earnings per share of 8 cents for the fourth quarter of 1988.

For the year ended Dec. 31, 1989, revenues were $173,856,000, an increase

of 23 percent compared to $141,117,000, for the like period in 1988. Net income for 1989 was $10,002,000, an increase of 29 percent compared to net income of $7,744,000 for 1988. Earnings per share for the year ended Dec. 31, 1989 increased to 31 cents, compared to 27 cents for 1988.

''These strong financial results represent record totals across the board, and clearly establish Valid as the second largest EDA company worldwide,'' said W. Douglas Hajjar, president and chief executive officer. ''We are especially pleased with the significant growth achieved during the fourth quarter, at a time when our competition has been reporting lower than expected results.''

Hajjar noted that Valid had experienced strong growth in all of its worldwide operations during the fourth quarter, including improved European results and continued high growth in the Far East.

''While revenues were distributed across our product line, gains were particularly strong with respect to our PCB and IC design products,'' stated Hajjar. ''Our Allegro PCB design system has emerged as one of the premier products in its field, gaining acceptance from a wide range of system design companies. Also in the fourth quarter, we began shipments of our new Construct IC layout editor and of our Compose 2.0 chip assembly environment. The strength of these new products enabled us to record a number of direct wins against our most significant competition in the IC field.

''We remain encouraged by the outlook for Valid in 1990,'' said Hajjar. ''Recent announcements by our competition have served to confirm the validity of our RISC/UNIX platform strategy where we enjoy a considerable advantage in both experience and installed base, having already shipped over 10,000 UNIX-based workstation seats.

''The market softness and uncertainty being forecast by our competition should present numerous opportunities for us in the coming year. In addition, we expect a number of new opportunities to be generated by our introduction of two major new CAE simulation products during the first half of the year.''

Valid designs, manufactures, markets and supports a full line of EDA solutions based on industry standard hardware, operating systems and networks. Valid products are used to develop electronic systems, including integrated circuits (ICs), application-specific ICs (ASICs), and primed circuit boards (PCBs).

Valid has sales and support operations in more than 40 locations worldwide. Valid corporate headquarters is located in San Jose.

SANTA ANA, CA (FEB. 12) BUSINESS WIRE - McDonnell Douglas Field Service Co. (MDFSCO) Monday signed an exclusive contract with Penril DataCom, headquartered in Gaithersburg, Md., naming MDFSCO as the on-site hardware manitenance supplier to Penril DataCom's customer base.

The contract offers MDFSCO's maintenance to Penril's existing and future customers in the United States. In addition to providing maintenance services, MDFSCO will handle the installation and warranty services for all future Penril customers.

''This contract will broaden our customer base, improve utilization of human resources and increase service revenues by $1 million,'' said MDFSCO President Bert Novak. ''Computer communications are very important to our customers and we are very pleased to extend our service capabilities in this arena,'' he said.

Under the terms of the contract, MDFSCO will provide Penril's customers on-site maintenance and installation service on modems, muxes and data switches from service centers located in 125 major metropolitan cities in the United States.

Customers are guaranteed four-hour response via MDFSCO's central dispatching capabilities which utilize automatic call-handling and call-escalation where their services calls are tracked through closeout.

Penril markets its products to both independent sales organizations (ISOs) and a direct sales force throughout the United States.

Penril manufactures modems, muxes and data switches for computer to computer communications. Their revenues for 1989 were $27 million.

McDonnell Douglas Field Service Co. recently announced assumption of all sales and marketing responsibility for McDonnell Douglas computer products sold through ISO distribution in North America. Since 1967, MDFSCO has grown into one of the largest support organizations in the nation, with almost 1,000 professionals in 125 locations.

BOSTON (FEB. 12) BUSINESS WIRE - Novell Inc. (NASDAQ:NOVL) and Retix Monday announced a joint development agreement under which Retix will provide software that enables X.400 APIs.

Under the terms of the agreement, Retix will supply to Novell software compliant with the specifications set forth by the X.400 API Association in June 1989. Novell will incorporate the software as a NetWare Loadable Module (NLM) into an enhanced version of its Message Handling System (MHS) server to be bundled into NetWare 386. Programs utilizing MHS will then be able to communicate seamlessly through an X.400 gateway server operating on the same system.

''This agreement furthers the emergence of NetWare 386 as a dominant network operating system in the corporate environment,'' stated Steve Frankel, Retix president. ''Under NetWare, we can now offer a complete electronic messaging solution which implements X.400, the emerging global messaging standard. This enriches the MHS investment made by over 40 applications developers,'' Frankel added.

Darrell Miller, an executive vice president of Novell, who made the announcement jointly with Retix, stated, ''The marriage of Novell's NetWare 386 and MHS technology with the X.400 capabilities from Retix will help accelerate the growth of the network computing industry.''

Novell Inc. is the leading independent provider of open, high-performance systems software products. The company's NetWare network operating system has become a standard for personal computer-based local area networks. Novell's revenue for fiscal 1989 was $422 million; its common stock is traded on NASDAQ under the symbol NOVL.

Retix designs, manufactures and markets OSI and internetworking products. Founded in 1985, Retix has over 130 original equipment manufacturer licensees worldwide and has installed thousands of internetworking products. Retix sells to OEMs, distributors, systems integrators, value-added resellers and large end users in the United States, Canada, Europe, Australia, South America, the Middle East and Asia.

NORWALK, CT (FEB. 12) BUSINESS WIRE - Great Northern Nekoosa Corp. announced that the review prepared for it by Goldman Sachs that was

unsealed Monday is not indicative of the value of the company today.

The document, which was prepared by Goldman approximately a year ago and presented to GNN early last year, was originally prepared for a different purpose than evaluating a bid for the company. The analysis was prepared based on public information and a limited amount of input from the company and no due diligence at the corporate or divisional level.

In commenting on the report, Douglas C. Wright Jr., the company's chief financial officer said: ''We consider the report stale and of no relevance. It represents Goldman's thinking one year ago regarding what an outsider's general perspective might be and is not comparable to their recent evaluations, which have been based on extensive confidential information and substantial due diligence.''

MARLBORO, MA (FEB. 12) BUSINESS WIRE - George Pavloff has been named vice president of sales and marketing for Sequoia Systems Inc. to replace Nicholas Bologna, who has announced that he will be leaving the company to pursue other interests.

Pavloff will have responsibility for the worldwide sales and marketing functions at Sequoia.

Most recently, Pavloff has been the vice president of marketing and sales for CADAM Inc., a California-based software company with annual revenues of $150 million. In that role he managed a worldwide marketing and sales group of approximately 285 people and a network of about 175 resellers. Previously a subsidiary of Lockheed, CADAM was recently acquired as a subsidiary of IBM Corporation.

In making the announcement, Sequoia's executive vice president and chief operating officer, Michael Bruce commented that, ''George Pavloff has an exceptional track record as a sales and marketing executive at various organizations. He will be a real asset to Sequoia as we seek to expand our organization and increase our penetration in various vertical markets.''

Prior to his position at CADAM, Pavloff held the position of president and chief executive officer of Lex Computer Systems. He also held the position of president and chief operating officer at GMD Systems International, and Tominy Inc., and was an assistant vice president at Infotron Systems Corp.

He also served for 20 years in various management positions at IBM, including positions as director of value added remarketing and director of special systems marketing.

Nicholas Bologna, who had held the position of vice president of sales and marketing for Sequoia since August of 1987 said: ''I've accomplished the goals that I set-out for myself when I joined Sequoia, that being to bring our sales and marketing organization from a start-up stage to a mature and structured organization, in preparation for an initial public offering.

Soquoia Systems Inc. designs, manufactures and supports fault-tolerant systems to serve the on-line transaction processing (OLTP) needs of companies. Sequoia's systems have an open architecture adhering to industry standards and a UNIX-based operating system. The company also offers the Pick Open Architecture.

With a worldwide sales and support organization and on-line service, Sequoia has set new standards in service and reliability. Major customers include manufacturers, distributors, banks and financial institutions, insurance companies, telecommunications operations and federal agencies.

DALLAS (FEB. 12) BUSINESS WIRE - Spectrum Information Technologies Inc. (NASDAQ:SPCL) Monday announced the execution of a definitive merger agreement with LTC Technologies, d/b/a Source One Systems Inc., of Houston providing for the acquisition of Source One by Spectrum.

The merger agreement contemplates that Source One would become a wholly owned subsidiary of Spectrum and that the current shareholders of Source One would receive an aggregate of 1,150,000 shares of Spectrum common stock. The proposed acquisition of Source One is contingent on customary closing conditions.

Spectrum contemplates that the acquisition of Source One would be accounted for by the pooling-of-interests method. For its most recently completed fiscal year ended Dec. 31, 1989, Source One had unaudited revenues of approximately $2,641,000 and an unaudited net loss of approximately $222,000.

Source One is a major value added reseller (VAR) of laptop computers, focusing on the Fortune 1000 market. Source One also distributes a variety of proprietary laptop computer enhancements including hard-disk drive upgrades and communications products.

According to Dana C. Verrill, Spectrum's president, Spectrum's actions are designed to help focus its strategic direction and enhance its ability to capitalize on Spectrum's leadership position in the emerging field of cellular data communications technology.

''We are now in our strongest position ever to capitalize on the exploding growth of the data communications industry and maintain our leadership position in the portable data products segment of this industry.''

Spectrum, a publicly held, integrated technology company, along with its subsidiaries has the demonstrated capability to develop, deliver and support a wide array of state-of-the-art telecommunications and portable data products. Whether equipping field personnel with portable computers, providing host-site computers and networks, or tying the two together with untethered, wireless communications technology, Spectrum is an industry leader.

HONOLULU (FEB. 12) BUSINESS WIRE - John C. Couch, president and chief executive officer of A&B-Hawaii Inc. (ABHI), Monday announced the closing of a Hawaii property sale and a Colorado acquisition.

The previously announced sale of Maui Lani, a 965-acre undeveloped residential property in central Maui between Kahului and Wailuku, was closed Jan. 31, 1990. The parcel was sold to Maui Lani Partners for $48.5 million. The sale is expected to add $28,444,000, or 62 cents a share, to net income for the quarter.

In Colorado, A&B Properties Inc., a subsidiary of ABHI, acquired a property adjacent to its previous purchase of the Arapahoe Marketplace in Greenwood Village, a Denver suburb. The additional property, which includes 40,685 square feet of land and a 7,300-square-foot building, was acquired for $683,000. This transaction completes A&B's acquisition of the 16.2-acre Arapahoe Marketplace block.

Couch said, ''As we have done with the proceeds of other property sales over the past year, we plan to re-invest the proceeds from the sale of Maui Lani in high quality, income-producing properties through tax-deferred exchanges.''

A&B-Hawaii Inc. is the property development/management and agribusiness subsidiary of Alexander & Baldwin Inc. (NASDAQ:ALEX).

#90043b0338 02/12/1990 ~Business Wire

SANTA CLARA, CA (FEB. 12) BUSINESS WIRE - Siliconix Inc. (NASDAQ:SILI) announced that its 16-week fourth-quarter sales were $39.3 million; for the year 1989 ended Dec. 31, sales were $122.5 million.

In the fourth quarter, there was a net loss of $9 million and a $26 million loss for the year 1989. It should be noted that the Q4 numbers included year-end charges of $4.6 million, an additional reserve for various inventory issues, and a $0.6 million write-off of capital assets associated with discontinued products.

Siliconix president and chief executive officer, Dr. Richard E. Lee, said that the book-to-bill ratio in Q4 stayed at 0.96 (i.e. no change vs Q3) and that the short-term forecast showed no significant upturn for new order bookings.

Therefore, the company will continue downsizing to achieve profitability some time in Q2 1990. Without the year-end inventory adjustments, the operating gross margin in Q4 improved from 30 percent in Q3 to 34.3 percent, which Lee said was very encouraging.

Also, he observed that throughout 1989, the company had minimized spending cuts in Engineering & Development to ensure a healthy flow of new products in the 1990-91 era. In fact, in 1989 the company spent $18.8 million, or 15.4 percent, of sales on Engineering & Development.

Siliconix develops, manufactures and markets semiconductor products -- both discretes and ICs. The company is a leading supplier of MOSPower transistors, multichip modules, and SMARTPOWER ICs.

Also, it holds dominant marketing positions in small-signal FETs and analog switch/multiplexer ICs.

SANTA CLARA, CA (FEB. 12) BUSINESS WIRE - Applied Materials Inc. (NASDAQ/NMS:AMAT) reported net sales of $138.8 million which resulted in

net income of $11.1 million, or 66 cents per share, for the three months ended Jan. 28.

These results compared to a net income of $13.5 million, or 81 cents per share, on net sales of $106.7 million in the like quarter a year ago. Backlog rose to $189.8 million, a company record, compared to $165.6 million at the end of first quarter 1989 and $188.4 million at the end of fiscal year 1989.

As expected, earnings in the quarter were below those of the prior year due to the impact of a weaker Japanese yen, higher operating expenses in relation to net sales, and a less favorable product mix.

Research, development and engineering to support new product development programs and broaden application engineering efforts continued at the previous quarter's levels, up $7.7 million, or 54 percent, over last year's first quarter.

Applied Materials Inc. is a global growth company and the leading independent producer of wafer fabrication systems for the worldwide semiconductor industry.

SACRAMENTO, CA (FEB. 12) BUSINESS WIRE - System Integrators Inc. (SII), a leader in the design and integration of publishing systems for the newspaper industry, Monday announced a $10 million contract for a news publishing system for The Washington Post, replacing their existing RayEdit system which had been supplied by Raytheon in 1980.

SII's IBM PS/2 workstations will be installed over four phases. These new workstations will be connected to a Tandem-based SII Editorial System via industry standard local area networks.

This new SII editorial system will harness the benefits of industry standard hardware and software platforms, while providing The Washington Post with upgradeable productivity solutions now and into the future. The Post system will rely upon the proven fault-tolerance of the Tandem system as well as the SII's database management and production control software.

The result is a hybrid system that combines the best of both worlds; ''off-the-shelf'' technology and proven solutions for the rigors of publishing a large metro daily.

With headquarters in Sacramento, System Integrators Inc. designs, manufactures, markets and services publishing systems for editorial, advertising, pagination and imaging applications for the news publishing industry worldwide.

Its customer base includes the Los Angeles Times, the Chicago Tribune, the Dallas Times-Herald, Fairchild Publications, Le Monde (Paris), The Daily Mail (London), The Financial Times (London), Helsinki Sanomat (Finland), Die Welt (W. Germany), the Cairns Post and the Sydney Morning Herald (Australia), the Japan Times, and the Singapore Straights Times.

The company has installed more than 300 systems throughout North America, Europe, the Middle East and Asia/Pacific.

BOSTON (FEB. 12) BUSINESS WIRE - DAVID Systems Monday announced at Networld its entry into a new 10BASE-T unshielded twisted-pair Ethernet networking market segment believed to be worth $500 million.

The company is targeting this basic PC LAN segment with the launch of an Ethernet LAN product that offers, for the first time, low-cost unshielded twisted-pair Ethernet.

VolksNet, the new entry unveiled here today, promises unprecedented levels of price/performance for small network configurations.

According to DAVID Systems, VolksNet achieved its attractive price/performance through the use of a DAVID-developed ASIC (Application Specific Integrated Circuit) in its Hub.

Using a low-power, one-micron CMOS process, this DAVID exclusive device offers the equivalent of 170,000 transistors with fully integrated IEEE 802.3 multi-port re-timing repeater function capability. The Hub has 12 twisted-pair data link ports for workstations, a standard IEEE 802.3 AUI (Attachment Unit Interface) port, and 28 status LEDs.

Connection to the computer is made using industry-standard 10BASE-T Ethernet adapter boards. Western Digital and Racal Interlan have announced 10BASE-T Ethernet network interface cards that have already been successfully tested with VolksNet, and a 3Com board is in the process of

being tested.

VolksNet components have all the features of the emerging IEEE 10BASE-T standard for transmitting 10 megabits-per-second Ethernet on unshielded twisted-pair telephone wiring.

These include: Link Integrity Test, Intelligent Squelch, 5-volt peak-to-peak signaling, pre-equalization, Jabber function at Hub and TP-MAU (Twisted-Pair Medium Attachment Unit), full IEEE 802.3 repeater, auto partition and twisted-pair to twisted-pair Hub connection.

The Intelligent Squelch and pre-equalization combine to provide basic error rates identical to coaxial cable Ethernet.

DAVID Systems products emphasize integrated solutions for LANs, voice and data which are easy to expand and adapt to changing customer needs.

SAN JOSE, CA (FEB. 12) BUSINESS WIRE - International CMOS Technology Inc. (NASDAQ:ICTI/ICTIW) Monday announced it has received a preliminary commitment for a working capital gurantee totaling $3 million.

This agreement follows a Jan. 5, 1990 commitment from the Export-Import Bank of the United States (Eximbank) for a one-year $3 million loan. This commitment is contingent to ICT obtaining a lender satisfactory to the Eximbank prior to June 30th, 1990. The U.S. government created Eximbank to encourage U.S. companies to export goods.

For the quarter ended Dec. 29, 1989, over 65 percent of ICT's product revenues were sold overseas.

These additional funds will allow International CMOS Technology to increase inventory, shorten existing lead times, purchase additional wafers, and increase customer backlog orders. These positive changes will be very apparent to all of ICT's customers.

''This preliminary commitment provides extremely favorable terms that will enable ICT to continue a curve of rapid growth, success and penetration of foreign and domestic markets. ICT is pleased to have Eximbank as a business partner,'' stated Drew Osterman, president and chief executive officer.

International CMOS Technology Inc. (ICT) designs, manufactures and markets user-programmable integrated circuits. ICT's products include a variety of memory and logic devices, and the development tools for designing with user-programmable products. ICT is a publicly owned and traded company under the NASDAQ symbols ICTI, common stock and ICTIW, Warrants.

SAN JOSE, CA (FEB. 12) BUSINESS WIRE - BT Tymnet Inc., provider of the international value-added network TYMNET, in conjunction with British Telecom al-Saudia Ltd., has won a major contract to supply, install and maintain a private packet-switched data network for the Saudi French Bank.

The U.S. $2 million contract consists of equipment supplied by BT Tymnet, and will be installed and maintained by British Telecom's newly formed joint-venture company in Saudi Arabia, British Telecom al-Saudi.

The Saudi French Bank's choice of network provider was based on the need to have a backbone that can fully support their completely automated data service objectives, both present and future. The network will enhance communications between the bank's 60-plus branches throughout the kingdom.

''We look forward to working with Al Bank Al Saudi Al Fransi (the Saudi French Bank) for what is recognized to be one of the most integrated customer applications of X.25 throughout the Middle East,'' said Andrew Thomson, BT al-Saudia's general manager.

''Our goal at BT Tymnet is to provide the highest possible level of support and service to our customers -- whether it's in dedicated, hybrid or shared network applications. BT Tymnet's business solution, together with BT al-Saudia, demonstrates our ongoing commitment to delivering the best in worldwide networking services,'' said Mark Baker, chief executive officer of BT Tymnet Inc.

BT Tymnet Inc., an international value-added network supplier, is one of the world's largest providers of shared, dedicated and hybrid network solutions. The company owns and operates the TYMNET Network which offers protocol conversion, error-protection, enhanced security features, electronic data interchange (EDI), card services, and electronic messaging.

The TYMNET Network is accessible from most countries throughout the world.

British Telecommunications plc

British Telecommunications plc, a leading world player in telecommunications, operates one of the largest communications networks in the world, has annual revenues of almost $19 billion, employs about 247,000 staff and has over 100 offices in 30 countries.

In North America, companies within the British Telecom group employ over 3,500 personnel and provide international networks, PBX, business systems, electronic mail, enhanced information services, integrated trading systems datacoms equipment, optoelectronics, voice messaging, radio paging and mobile communications.

WESTBORO, MA (FEB. 12) BUSINESS WIRE - Banyan Systems Inc., a leading supplier of software and hardware for organizational network computing, Monday announced the appointment of K. Wayne Fitzsimmons to the position of vice president, international.

In his new role, Fitzsimmons will be responsible for overseeing the management and expansion of Banyan International marketing, sales and support channels.

Prior to joining Banyan, Fitzsimmons was employed by Data General since 1972 in various international sales management capacities. From 1983 until his departure, he was the company's vice president, Americas and Far East, with responsibility for sales and service operations in Australia, New Zealand, Asia and Latin America.

Under his leadership revenues for these areas grew 250 percent in four years to exceed $100 million. Earlier, Fitzsimmons also served as general manager, Data General U.K. Ltd. from 1980 to 1983 and general manager, Data General Australia Pty from 1973 to 1979.

According to Banyan President and Chief Executive Officer David C. Mahoney ''It was crucial that Banyan's new vice president, international, be an exceptional performer with a proven track record. In view of the dramatic market changes now taking place in Europe and the rest of the world, the Banyan of the future must be cast as a truly international business, not merely a U.S. concern with foreign offices.

''During his tenure at Data General, Wayne contended very impressively and successfully with the same type of challenge. He is an ideal choice to be

Banyan's new vice president, international.''

In the year ended Dec. 31, 1989, Banyan posted revenues of $80 million, up 70 percent from 1988. International revenues comprised 19 percent of the total, up 75 percent over 1988.

Born in Australia, Fitzsimmons holds a communications engineeringh degree from the University of Queensland in Brisbane, Australia. Among his other activities he is president of the New England-Australian Business Council; a Fellow of the Institution of Engineers, Australia; and a foundation member and former deputy chairman of the Australian Information Industry Association.

WESTFORD, MA (FEB. 12) BUSINESS WIRE - Concurrent Computer Corp. (NASDAQ/NMS:CCUR) Monday announced the first family of RISC-based (Reduced Instruction Set Computing) technology for UNIX-based real-time computing.

The Series 8000, available in three configurations, employs an enhanced version of Concurrent's industry-leading real-time UNIX operating system, RTU 6.0. These enhancements include a frequency-base scheduler, fault tolerant capabilities and improved response time.

Other features of the Series 8000 announcement include a wide range of customized solutions for real-time transaction processing, signal analysis training simulation, and measurement and control.

Based on the RISC technology of MIPS Computer Systems Inc. R3000/3010 chip the new Concurrent systems offer real-time users exceptionally fast compute performance of 20 to 160 MIPS, superior real-time capabilities and leading-edge UNIX enhancements such as fixed priority task scheduling and high throughput.

The Series 8000 with RTU 6.0 reduces context switch time to as much as one-fourth that of other systems for faster deterministic response to external events and increased throughput.

''RISC performance alone in a standards-based package isn't enough to satisfy real-time users,'' said John Barlow, Concurrent's principal manager, RTU marketing.

''While this market demands the traditional benefits of real-time technology - very fast guaranteed response times, breadth of real-time

programming tools and exceptionally high throughput - users are also increasingly hungry for the portability of UNIX.''

Consisting of three systems - 8300, 8400 and 8500 - the 8000 family is sold in both single and multiple CPU configurations. Prices of the 8300 systems start at $55,900 while those of the 8400 begin at $57,400. The 8300 systems are expected to ship in June 1990, and the 8400 systems are expected to ship in April 1990.

The largest of the new systems, the 8500, has a base price of $93,500. It is expected to be available for shipment in June 1990.

Concurrent Computer Corp. is the leading supplier of high-performance, real-time computer systems worldwide. With systems ranging from $10,000 to more than $4 million, the company is focused on real-time simulation, measurement and control, C4I (command, control, communicate, compute and intelligence) and transaction processing markets.

CARLSBAD, CA (FEB. 12) BUSINESS WIRE - International Totalizator Systems Inc. (NASDAQ/NMS:ITSI), a recognized worldwide leader in the supply of computerized ticketing systems, announced record income for the year ended Dec. 31, 1989, of $3.65 million, or 49 cents per share, 45 cents per share fully diluted, on revenues of $32 million.

The year-end results compare with a net loss of $2.89 million, or 41 cents per share, on $21.1 million of revenues for the year ended Dec. 31, 1988. The company achieved 1989 fourth-quarter record results of $1.75 million, or 22 cents per share, 20 cents per share fully diluted, on revenues of $9.5 million.

Commenting on the results, James T. Walters, ITS president and chief executive officer, said: ''I am very pleased to announce these results, which are all-time high figures for the company. We have now shown five consecutive quarters of earnings growth since fourth quarter of 1988.

''Many critical measurements of a company's strength and profitability stand out in our impressive performance for 1989: We booked $41.8 million in new and repeat business, while our backlog at year-end was an impressive $21.1 million, or double 1988's backlog figure; shareholder's equity increased 117 percent in 1989 over 1988; our cash and working capital positions both increased by over $2.4 million at year-end 1989 compared to 1988; and long-term debt to total capitalization was 24

percent at year-end 1989 versus 56 percent in 1988.

''Clearly, our efforts to maintain profitability by delivering products on time, by minimizing costs and by working to achieve competitive margins on our contracts are paying off in a very substantial way.

''Now, with the introduction of our ATB airline ticket printer, we face even greater challenges in the years ahead. Further, we are aggressively conducting proposal and client follow-up efforts on the wagering side of the business. We expect to see some rewards for those efforts in the foreseeable future.''

ITS designs, manufactures and markets computerized ticketing systems and terminals for use in ticket-processing applications worldwide.

MOBILE, AL (FEB. 12) BUSINESS WIRE - QMS Inc. (NYSE:AQM) announced Monday that it has introduced the world's first color Adobe PostScript printers that support Japanese character sets.

The QMS ColorScript 100 Model J series printers are able to produce over 16 million colors and output Kanji, the traditional Japanese character set along with two other Japanese character sets. These three combined alphabets contain over 8,000 characters.

''We expect our Japanese operations to grow significantly from a sales base that was previously nonexistent,'' said James L. Busby, QMS Inc. president and chief executive officer. ''The QMS ColorScript 100 Model J printers demonstrate our commitment to being an international leader in providing color print solutions.''

The QMS ColorScript 100 Model J series will be available in production quantities in the third quarter of 1990. Distributors and pricing for the Japanese market will be announced at a later date.

QMS Inc. is a leader in the rapidly expanding, nonimpact print systems market and is a major producer of enhancement products for impact printers. The company offers a broad selection of intelligent laser and thermal transfer printers available for electronic publishing, office automation, advanced imaging and automatic identification applications.

LOUISVILLE, KY (FEB. 12) BUSINESS WIRE - Rally's, Inc. (NASDAQ:RLLY), the nation's largest chain of double drive-through hamburger restaurants, Monday announced the secondary offering of 1.3 million shares of common stock at $12.25 per share.

All of the 1,327,540-share offering, underwritten by Montgomery Securities is being sold by Chapco, Inc., and affiliated parties. The offering completes the November 1989 settlement among major shareholders regarding the change in control of the company. The company itself offered no shares, and the offering does not increase the number of shares outstanding.

The underwriters have been granted an option to purchase up to an additional 199,130 shares of stock from the selling stockholders to cover over-allotments.

Rally's, headquartered in Louisville, Ky., operates and franchises 200 double drive-through, quick-service hamburger restaurants in 23 states. The restaurants provide extremely fast service and feature a low-priced, high-quality limited menu.

OAKLAND, CA (FEB. 12) BUSINESS WIRE - Dreyer's Grand Ice Cream Inc. (OTC:DRYR) announced Monday the completion of the acquisition on Feb. 9 of Barkulis Brothers Inc., the exclusive distributor of Dove International products in substantially all of Illinois, Wisconsin, Indiana and a portion of Iowa.

Dreyer's acquired all of the outstanding stock of Barkulis Bros. for $9.0 million in cash. Dove International premium ice cream novelty products distributed by Barkulis Bros. include Dove Bar, Rondo, Snickers, Milky Way and Three Musketeers.

Separately, Dreyer's announced that it will begin distribution of its full line of premium quality ice cream and yogurt products in the New York

metropolitan market. The company's products, Edy's Grand Ice Cream, Edy's Grand Light and Edy's Frozen Yogurt Inspirations, will complement Edy's existing distribution of Ben & Jerry's Homemade Ice Cream products in New York City, Nassau, Suffolk and Westchester counties and northern New Jersey.

Finally, Dreyer's has formed a 50-50 joint venture with the Invus Group Ltd. to market and sell Fruitola!, Dreyer's all natural fruit and granola frozen dairy snack. The joint venture will be responsible for future market expansion of Fruitola! and similar products.

Under the recently concluded agreement, Dreyer's received $2.5 million for 1/3 of Fruitola! and has contributed the remaining 2/3 in return for a half interest in the joint venture. Invus invested a total of $5.0 million for its half interest.

Dreyer's Grand Ice Cream Inc. manufactures and distributes a line of premium quality ice creams and other premium frozen dairy products made only from the finest ingredients available.

IRVINE, CA (FEB. 5) BUSINESS WIRE - Laser Precision Corp. (NASDAQ:LASR) announced Monday that it has reached a settlement of its lawsuit with Minnesota Mining and Manufacturing Co.

As part of the settlement, Laser Precision has agreed not to employ Peter Milstead, the former 3M/Photodyne employee whose hiring by Laser precipitated the lawsuit, until Aug. 1, during which time his salary will be paid by 3M.

A spokesperson for the company also stated that as part of the agreement 3M will drop all of its claims for damages against Laser Precision, and will be dismissing the action.

The settlement agreement is subject to the preparation of definitive legal documents prepared within the next 20 days.

Laser Precision Corp. is a manufacturer of test and measurement instruments combining advanced optical designs with microprocessing technology. The company's products are used in fiber optic telecommunications, laser research, quality control and chemical analysis.

Its Radiometric and Fiber Optic Division is located in Utica, N.Y., and

its Analytical Instrument Division and corporate headquarters are located in Irvine.

MOUNTAIN VIEW, CA (FEB. 5) BUSINESS WIRE - Drexler Technology Corp. (NASDAQ:DRXR) Monday announced results for the fiscal 1990 third quarter and first nine months.

For the three months ended Dec. 31, 1989, the company had a net loss of $1,588,000, or 23 cents per share, compared with a profit of $252,000, or 4 cents per share, for last year's third quarter. Third-quarter revenues were $499,000 vs. $2,570,000 for the year-earlier period.

For the nine months ended Dec. 31, 1989, the net loss was $5,031,000, or 73 cents per share, compared with a net loss of $2,145,000, or 32 cents per share, for the like period last year. Revenues for the nine months were $1,359,000 compared with $5,668,000 for the year-earlier period.

There were no licensing revenues in this year's first nine months, compared with $4,056,000 in last year's first nine months, which included $2,167,000 in the third quarter of last year from the sale of LaserCard equipment licenses. The decrease in revenues for this year's third quarter and nine months is attributed mainly to this difference.

During the third quarter, the company's new subsidiary, LaserCard Systems Corp., for the first time shipped LaserCard systems to companies in France and West Germany. Although not contributing substantially to revenues for the quarter, the initial deliveries to these two countries are milestones for the company and are expected to trigger additional equipment sales in Europe.

The U.S. Department of Veterans Affairs is now actively participating with LaserCard medical information systems in both New York State and Houston. In the New York State system, the Drexler cards are used in Nippon Conlux reader/writers. In Houston, the Drexler cards are used in CSK Corp. reader/writers at the Houston Veterans Affairs Medical Center (VAMC), in a program that was announced on Jan. 29.

An additional 20 hospitals around the world are currently evaluating optical memory card systems using cards manufactured by Drexler Technology.

Drexler Technology Corp. is headquartered in Mountain View. The company

manufactures LaserCard optical memory cards, develops related software and LaserCard-based workstations, and distributes emulsion photoplates. At Dec. 31, 1989, the company had 6,901,921 shares of common stock outstanding.

SAN JOSE, CA (FEB. 5) BUSINESS WIRE - In a demonstration of its commitment to building strong Third Party relationships, Unisys' Distributed Systems Division (DSD) Monday announced major expansions in their highly successful Developer Relations Program.

Key elements in the introduction are the new Verified Solutions Program, an annual Developer's Conference, Portation Center Facilities, a worldwide on-line database, expanded technical training services and development software starter kits.

The Verified Solutions Program, available to qualified members of the Developer Relations Program, is designed for greater access to customers through Unisys direct sales channels. Privileges include listing in the worldwide Unisys Applications Catalogue, joint press releases and joint participation with Unisys at key industry tradeshows.

The 1st Annual Developer's Conference, to be held Feb. 15 in Dallas, will be the launching point for a series of technical conferences designed as a platform for discussion of current development tools and CTOS directions.

The new West Coast Portation Center Facilities, designed for the most up-to-date CTOS development in the world are available to all members of the program. The center features the newest equipment and software offered in the workstation market.

The Unisys Worldwide On-Line Database allows developers to have their

products and applications readily accessible to Unisys direct sales force personnel seeking customer-specific solutions on a system-wide basis.

Existing Technical Services are being expanded to include CTOS training for new developers. In addition to an 800 number for technical support, courses will be offered in CTOS programming concepts, methods for solution integration with existing Unisys products and the use of Unisys' set of developer tools based on the CTOS API.

The Development Software Starter Kits, a new addition to the System Purchase Plan, provides the developer with a wide array of software tools including OS software, Utilities software, software to create documentation and full user documentation.

Unisys is a $10 billion manufacturer of commercial information systems, defense systems and related services. It has more than 80,000 employees and 60,000 customers in more than 100 countries.

LOS ANGELES (FEB. 12) BUSINESS WIRE - MAXXAM Inc. (''MAXXAM'') Monday reported record net income of $116.8 million, or $12.97 per share, for the year ended Dec. 31, 1989, compared with $17.5 million, or $2.29 per share,

for the year ended Dec. 31, 1988.

Revenues in 1989 were $2.4 billion compared with $519.2 million in 1988. In 1988, MAXXAM reported income from discontinued oil, gas and geothermal operations of $13.8 million, or $1.81 per share.

For the fourth quarter of 1989, MAXXAM reported net income of $45.2 million, or $4.74 per share, compared with a net loss of $5 million, or 59 cents per share, for the fourth quarter of 1988.

Revenues in the fourth quarter of 1989 were $626.9 million compared with $353.2 million in 1988. In the fourth quarter of 1988, income from discontinued oil, gas and geothermal operations was $7.7 million, or 90 cents per share.

Income from discontinued operations in the 1988 periods represents the gain and related tax benefits realized on disposition of MAXXAM's oil, gas and geothermal operations upon consummation of the merger of MCO Resources Inc. with a subsidiary of United Meridian Corp.

Since Oct. 28, 1988, KaiserTech Limited (''KaiserTech'') has been a wholly owned subsidiary of MAXXAM. MAXXAM's consolidated statement of income includes KaiserTech's consolidated results of operations from Nov. 1, 1988. Commencing with the second quarter of 1988 through Oct. 31 1988, KaiserTech was accounted for by the equity method of accounting.

MAXXAM operates in three industry segments: aluminum operations, forest products operations and real estate management and development.

FREMONT, CA (FEB. 12) BUSINESS WIRE - Mylex Corporation (NASDAQ:MYLX) announced Monday that it has signed an agreement to provide customized 80286 systems boards to GreatWest Technology Ltd. (''GTL''), a major supplier of computer equipment to ComputerLand.

The contract is automatically renewable after the initial one year period for additional one year periods.

Mylex has received from GTL an initial order for 2,000 80286 systems boards, the minimum number of boards GTL has agreed to purchase from Mylex in the first year of the contract. Total purchase price exceeds $550,000. GTL will also pay to Mylex an engineering fee for the development of the systems boards.

Dr. Akram Chowdry, President of Mylex Corp., stated, ''We are very pleased to be the technology company GTL chose to engineer and manufacture its systems boards. As evidenced by GTL's initial purchase order for the entire first year contract minimum, we expect that it will continue to place orders for additional systems boards in the current year.''

Dr. Chowdry further noted, ''Coming on the heels of our distribution agreement with Softsel Computer Products and our technology licensing agreement with Samsung Electronics Co., Ltd., this contract constitutes another major step in Mylex's long-term strategy to supply our products to a growing customer base of major distributors, VARS and OEMs.''

Mylex Corporation was founded in 1983 and designs, develops, manufactures and markets computer products which enhance the performance of IBM and IBM-compatible personal computers, microprocessor systems, and workstations. Its product portfolio, based on the popular Intel 80386 microprocessor, includes high performance system boards and high-resolution graphics boards.

The Company recently introduced a product line based on the Intel 80486 microprocessor. Mylex products are recognized in the marketplace for both their high performance and high quality standards.

#90043b0655 02/12/1990 ~Business Wire

STAMFORD, CT (FEB. 12) BUSINESS WIRE - American Television and Communications Corp. (NASDAQ:ATCMA), the nation's second-largest cable television operator, reported record results for the year and fourth quarter which ended Dec. 31, 1989.

The gains came largely because of continued strong operating performance, the acquisition of cable television systems from Centel Cable Telvision Co. and the consolidation of Memphis CATV Inc., now wholly owned by ATC. The company adopted a new method of accounting for income taxes in 1989 and restated previous results for that change.

Revenues for the year were $973.4 million, a 19.9 percent increase compared with 1988 revenues of $811.9 million. Net income increased to $95.1 million for 1989, or 87 cents per share, compared with $62.2 million or 57 cents per share, for the same period a year ago.

Results for 1988 were affected by a one-time pretax charge of $19.9 million, or 11 cents per share, for the reorganization and relocation of ATC's executive offices.

For the fourth quarter, the company generated revenues of $256.3 million, a 20.9 percent increase compared with 1988 when revenues were $212.1 million. Net income for the last three months of 1989 was $26.3 million, or 24 cents per share, up nearly 32.7 percent from $19.8 million, or 18 cents per share, in 1988.

Operating cash flow was $115.9 million, 26.7 percent higher than the $91.5 million reported a year earlier, and operating cash flow margin climbed to 45.2 percent, up from 43.1 percent for last year's fourth quarter. Operating income rose 22.5 percent to $68.5 million for the fourth quarter of 1989.

Interest expense for the fourth quarter increased primarily because of higher debt balances as well as higher interest rates. Debt increased mainly as a result of the Centel acquisition.

ATC, an 82-percent-owned subsisidaury of Time Warner Inc., owns or manages cable television operations serving approximately 4.4 million basic cable customers with 3.22 million premium subscriptions in 33 states.

MONTGOMERY, AL (FEB. 12) BUSINESS WIRE - Durr-Fillauer Medical Inc. (NASDAQ/NMS:DUFM) Monday announced record 1989 revenues and income from continuing operations.

For the year ended Dec. 31, 1989, revenues increased 20 percent to $705,805,000 from revenues of $587,666,000 in 1988. Income from continuing operations increased 27 percent to $14,498,000 from $11,448,000 in the year-earlier period. The fully diluted earnings per share comparison was $1.48 vs. $1.32, an increase of 12 percent.

Revenues for the fourth quarter of 1989 were $188,599,000 compared with $156,946,000 for the fourth quarter of 1988. Income from continuing operations for the final quarter of 1989 was $4,418,000, or 44 cents per share, compared with fourth quarter 1988 income of $3,595,000, or 40 cents per share.

Commenting on the results, W.A. Williamson Jr., chairman, said: ''The year just ended was our thirtieth consecutive year of increased revenues and

earnings. All three of our divisions reported improved results for 1989.

''The company's largest division, Wholesale Drug, reported revenues up 27 percent and income from continuing operations before taxes up 19 percent. The Medical-Surgical Division had a 6 percent increase in revenues and 5 percent higher pre-tax income. Revenues for the Orthopedic Division rose 11 percent and pre-tax income was up 26 percent.''

Williamson noted that the higher number of shares outstanding for 1989 was due to the successful conversion in April of the company's 8-1/2 percent Convertible Subordinated Debentures into common stock.

Durr-Fillauer Medical Inc. distributes pharmaceuticals, drugstore sundries medical products, veterinary supplies and orthopedic devices. Durr-Fillauer's shares are traded in the NASDAQ National Market System with the Symbol DUFM.

BRANFORD, CT (FEB. 12) BUSINESS WIRE - Intel Corp., Santa Clara, Calif., Monday announced an agreement with Multiflow Computer Inc., based here, giving Intel access to Multiflow's Trace Scheduling compilers, which may be used with future Intel microprocessors.

Under the terms of the agreement, Intel's interest in Multiflow will consist of access to Multiflow's software, an equity investment and engineering funding, totaling $4 million.

''Intel is exploring a number of approaches to keep the performance of Intel's X86 and i860 microprocessors on the leading edge,'' said Albert Yu Intel vice president and general manager for the Component Technology and Development Group. ''This investment in Multiflow's technology is part of Intel's plan to develop or acquire the technology necessary to deliver the highest performance architectures to the marketplace.''

Intel will be able to use Multiflow's Trace Scheduling compiler to research the benefits of instruction-level parallelism. Instruction-level parallelism is a component of the PAX (Parallel Architecture Extended) standard for the i860 architecture. This technology agreement complements efforts underway in the loop-level and program- level parallelism components of the PAX standard.

Multiflow has implemented the technology in its TRACE Series of supercomputers, which employs software-managed overlapped execution to

enable simultaneous execution of up to 28 operations per clock cycle.

Software-managed overlapped execution, according to Donald E. Eckdahl, president of Multiflow, ''takes advantage of inherent fine-grain parallelism in application codes. The difference between this approach and others involving parallelism is that it is at a level below the languages or operating systems being used.''

Intel Corp. manufactures microcomputer components, modules and systems. Multiflow Computer Inc. manufactures distributed supercomputers for scientific, engineering and general purpose technical applications. NOTE: i860 is a trademark of Intel Corp. Multiflow, TRACE and Trace Scheduling are registered trademarks of Multiflow Computer Inc.

HERNDON, VA (FEB. 12) BUSINESS WIRE - David C. Lucien, president and chief executive officer of TEMPEST Technologies Inc. (NASDAQ: TTOI) announced Monday that the company has received a contract from Alcatel Business Systems B.V. of the Netherlands, valued up to $3 million.

The contract provides for the delivery of up to 350 TEMPEST personal computer systems and printers over a 12 month period with deliveries beginning in December of this year. An initial delivery order has been received for the first 143 systems.

This is the first major contract for the company in Europe and it is expected to substantially add to the company's presence within the NATO countries.

TEMPEST Technologies Inc., a publicly held company headquartered in Herndon, designs and manufactures modifications for computer and peripheral equipment to comply with military standards and TEMPEST specifications established by the U.S. Government. Its shares are traded on the NASDAQ under the symbol TTOI.

NEW YORK (FEB. 12) BUSINESS WIRE - Columbia Pictures Entertainment, Inc. (Columbia) and Orion Pictures Corporation (Orion) announced today that the two entertainment companies have entered into a major agreement for both international theatrical distribution of Orion product through the facilities of Columbia under the direction and control of Orion and the international home video distribution of Orion's next 50 motion pictures. The agreement also includes the licensing of free television rights to certain Orion library features. The arrangement includes the payment of an advance to Orion of $175 million. The announcement was made jointly by Peter Guber and Jon Peters, Co-Chairmen of Columbia, and Arthur Krim, Chairman, and Eric Pleskow, President, of Orion.

David Matalon, Executive Vice President of Columbia, said, ''We think this is an ideal arrangement for both Orion and Columbia. We see the international arena and markets like theatrical and home video continuing to grow in importance in terms of revenue potential. We think this arrangement with Orion is a really significant step in our longer term plan to become the leading entertainment company internationally.''

Bob Meyers, President of Orion Pictures International, stated, ''We are very appreciative of the various distribution companies abroad who have served Orion Pictures well in the past eight years.'' He added, ''The time has come, however, to coordinate Orion's foreign theatrical distribution in a single unified operation. We are delighted that we are achieving this result through this agreement with Columbia's well established and highly regarded overseas distribution organization.''

The two companies indicated that, subject to Orion's existing contracts, Columbia will begin distributing Orion's product in the international theatrical marketplace immediately. It is anticipated that the first product to be released in international home video under the terms of this new arrangement will be sometime in the next year to 18 months.

Both companies expressed the hope that the new agreement would lead to other relationships of mutual interest.

STAMFORD, CT (FEB. 12) BUSINESS WIRE - The board of directors of Pitney Bowes Inc. (NYSE:PBI) Monday increased the quarterly cash dividend on the

company's common stock 15 percent to 30 cents per share from 26 cents per share, payable March 12 to stockholders of record Feb. 23.

The previous cash dividend increase was effective with the March 1989 payment.

Chairman and President George B. Harvey said, ''This dividend increase, which indicates an annual dividend payment rate of $1.20 per share, reflects the confidence we have in our performance prospects in the 1990s.

''In 1989 we set in motion bold strategies to enhance our competitiveness around the globe and to assure that we satisfy customer needs: We launched a comprehensive program to ready our manufacturing, selling, service and administrative organizations for the transition to the new generations of technologically advanced products that we will introduce in the 1990s; we increased our direct selling capabilities in the international markets that will offer high growth during the next decade; with the integration of Pitney Bowes Management Services and the newly acquired Pandick Technologies, we developed a powerful organaization with which to take advantage of the high growth opportunities in our mailroom and reprographics management business; and, for the first time in our history, we achieved a double A rating from both Standard and Poor's and Moody's.

''These accomplishments and the outlook for our future give us the continuing confidence that we shall deliver to our stockholders annual compounded revenue growth of 10 percent, annual compounded earnings growth of 12 percent, and a return on stockholders' equity approaching 20 percent.''

The board of directors also declared a quarterly cash dividend of 53 cents per share on the company's $2.12 convertible preferred stock, payable April 1, 1990, to stockholders of record March 16, 1990, and a quarterly cash dividend of 50 cents per share on the company's 4 percent convertible cumulative preferred stock, payable May 1, 1990, to stockholders of record April 6, 1990.

Pitney Bowes is a $2.9 billion multinational manufacturing and marketing company which provides mailing, shipping, copying, dictating and facsimile systems; item identification and tracking systems and supplies; mailroom, reprographics and related management services; and product financing.

CHICAGO (FEB. 12) BUSINESS WIRE - Responding to the critical need for more adequate retirement planning on the part of many Americans, Kemper Financial Services, Inc. has introduced an investment product designed to provide individuals with a secure means of funding their retirement while taking advantage of high return opportunities available from the stock market.

The Kemper Retirement Fund offers investors a guarantee that their original investment will be protected at maturity. Through the use of U.S. Government Zero Coupon Bonds, the Fund provides a guarantee that investors who reinvest all dividends and hold their shares will receive their original investment at maturity (approximately ten years), while the stocks in the Fund provide the opportunity for long-term capital growth.

The Kemper Retirement Fund minimum investment is $1,000, or $250 for an Individual Retirement Account (IRA). Other features include the ability to exchange into any of the other Kemper Mutual Funds after six months at net asset value (without sales charge), and redemption of shares on any business day at the then current net asset value, which may be more or less than the original cost. The exchange privilege is subject to suspension, modification or termination by the Fund.

As part of the introduction of the new fund, Kemper Financial Services is offering a first-of-its-kind ''Retirement Calculator.'' This calculator helps investors quickly estimate their retirement ''income gap,'' the difference between current retirement savings efforts and what will be needed at retirement to support their current standard of living. The calculator is available free by calling 1-800-733-7100, extension 1990.

Kemper Financial Services, the Fund's investment manager and underwriter, has been an investment manager for over 40 years, and has approximately $42 billion in investment company assets under management.

#90043b0675 02/12/1990 ~Business Wire

MELBOURNE, Australia (FEB. 12) BUSINESS WIRE - Pacific Dunlop Ltd. Monday announced an A$153.3 million profit after tax attributable to shareholders for the six months ended December 31, 1989.

This is an increase of 23 percent over the corresponding period of 1988.

Earnings per share increased to 21.8 Australian cents, from 19.3 Australian cents, an increase of 13 percent. Sales during the six months were A$2.6 billion, an increase of 18 percent.

A non-recurring gain of A$51.2 million was made on investments. Under the revised Australian accounting standards introduced this year, this gain is required to be included as part of trading profit and has been treated as an abnormal item. It is excluded from all comparative figures and ratios.

Directors have declared an increased interim dividend of 9.5 Australian cents a share, fully franked (last year 7.5 Australian cents a share). This maintains the higher rate of the final half of 1989. The dividend will be paid on May 3, 1990 to shareholders registered at the close of

business on April 2, 1990.

The chairman, Sir Leslie Frogatt, said the company continued to perform well in the light of reduced demand, particularly in the Australian retail sector.

The company's strength, depth of management and marketing performance are reflected in the continuing real growth achieved in most core businesses.

Continued productivity gains in the tire, and industrial, foam, fiber and cables businesses resulted in strong performances and increased market share. The distribution group performed well, with increased returns from the Repco operations.

International businesses made good progress, with Ansell, GNB Batteries and the new medical group all achieving excellent sales gains and improved market share.

Pacific Dunlop is a global company which manufactures and markets consumer and industrial products including batteries, footwear and apparel, tires and latex and medical products.

VANCOUVER, B.C. (FEB. 12) BUSINESS WIRE - The directors and management of Fair Harbour Mining Corp. are pleased to announce that the company has Monday completed the acquisition of its interests, previously announced, in 24 heavy crude wells in Saskatchewan.

The initial acquisition cost of $100,000 cash has been paid in full.

''With our joint operators in Calgary we will commence immediately with returning the first 12 wells to production. This first phase of our production plan should be completed by mid April,'' says Claus Andrup, Fair Harbour's director for corporate affairs.

He continues: ''Our goal for Fair Harbour is to achieve a net cash flow to the company of between $300,000 and $500,000 in the first twelve months of production.''

Simultaneous to production Fair Harbour will pursue a program of

developing increased production from existing reserves in place, particularly from the company's Lashburn leases near Lloydminster. Per: ''C. Philip Yeandle''

CONCORD, MA (FEB. 12) BUSINESS WIRE - Arnold M. McCalmont, chairman and CEO of Technical Communications Corp., (NASDAQ: TCCO) told stockholders attending the company's annual meeting in Concord Monday that sales for the first quarter of fiscal 1990 ended Dec. 30, 1989, were $2,584,743 with net earnings of $301,724, or 25 cents per common share. Revenues for the same period a year ago were $5,551,382 and net income of $1,094,027, or 90 cents per common share.

McCalmont reminded shareholders the company will continue its historical pattern of uneven quarters. He said, "You can't get a good feel for TCC on a quarterly basis because of the cyclical nature of our business and our recognition of revenue at shipment rather than percentage of completion. We must be viewed on a year-to-year basis."

Commenting further on the first quarter, McCalmont reported, "First quarter results were in line with expectations." He stated, "We continue to expect the second half of fiscal 1990 will be our strongest period." McCalmont predicted TCC will continue to grow in fiscal 1990 though not at the same rate experienced over the last two years.

He added significant new investment this year will be made in sales and engineering areas "which permit us to pursue new market opportunities." The CEO stated, "The first half of fiscal l1990 will be devoted to building backlog which should result in expanded shipments in the second half. Our current backlog, up ten percent from the end of the fiscal year, is $5,145,236 vs. a backlog of $5,343,066 a year ago."

Commenting on the company's performance in fiscal 1989, McCalmont stated, "The excellent performance was achieved due to expansion into new worldwide markets, customer acceptance of products introduced in the previous year and successful implementation of our strategy of pursuing larger contracts."

The company also announced at the annual meeting plans to establish an employee stock ownership plan (ESOP) later this year. McCalmont said, "This will provide TCC employees with a significant ownership position in the company and further motivate our employees to continue the company's outstanding performance."

It is expected the ESOP will acquire approximately 15 percent of the company's outstanding common stock, primarily from sources that include the McCalmont family. There are 1,223,376 common shares presently outstanding, and the McCalmont family will still retain significant ownership.

Technical Communications Corp. designs, manufactures, and markets high-performance secure communications systems and cryptographic devices used to protect sensitive communications sent over voice, data, and facsimile networks.

#90043b0680 02/12/1990 ~Business Wire

LAS VEGAS (FEB. 12) BUSINESS WIRE - A new electronic parts catalog system designed exclusively for the small automobile dealer was announced Monday by Reynolds and Reynolds at the National Automobile Dealers Association (NADA) convention in Las Vegas.

''The new PartsVision system has broadened the market appeal of this exciting technology. Now, the small dealer with one or even two franchises can automate his parts department with a very competitively priced, one- to four-workstation, electronic parts catalog system,'' said Ed Zentz, vice president, marketing, Reynolds' computer systems division.

''In the past two years we have installed hundreds of PartsVision systems in dealerships in North America. The market consistently told us we have the best product out there, as evidenced by the fact that our closest competitor has yet to install 100 systems. However, we realized that to fully provide electronic parts catalog systems to the market, we needed to develop a system specifically for the small dealer,'' Zentz said.

Reynolds also announced it will now offer a Labor Time Guide software application for VIM III and VIM/NET in-house system customers who have the PartsVision system. ''This new application further strengthens the advantages image-based systems provide to the parts and service areas. Service departments now have access to Labor Time Guide data in addition to parts information they share with the parts department through PartsVision,'' said Zentz.

The product will be called ServiceVision. The initial Labor Time Guide application will automate the process of determining accurate labor operation codes, operation descriptions, standard completion times, additional allowances and policy codes.

To date, Reynolds has released electronic parts catalog systems for General Motors dealers in the U.S. and Canada; and Jeep/Eagle, Mercedes-Benz, Chrysler and Honda/Acura dealers in the U.S. Systems are currently being developed for Volvo, and Nissan dealers in the U.S.

Reynolds and Reynolds, headquartered in Dayton, Ohio, is a major supplier of information processing systems, including business forms and computer systems to automotive, professional, medical and general business markets.

#90043b0690 02/12/1990 ~Business Wire

TORONTO (FEB. 12) BUSINESS WIRE - Deprenyl Research Limited (Toronto Stock Exchange:DEP,NASDAQ:DEPLF) reported Monday record highs in ELDEPRYL sales and company revenues and earnings for the year ended Dec. 31, 1989.

Sales of ELDEPRYL for the 12 months ended Dec. 31, 1989 were CAN$1.7 million compared to CAN$360,000 for the previous year.

Net income including nonrecurring items for the 12 months ended Dec. 31, 1989 was CAN$3.1 million, or 70 cents per share compared to CAN$40,000, or 1 cent per share for the previous year.

Net income before nonrecurring items for the 12 months ended Dec. 31, 1989 was CAN$311,000, or 7 cents per share compared to CAN$31,000, or 1 cent per share for the previous year. Average shares outstanding for both periods were 4,414,377.

Net income before nonrecurring items of CAN$311,000 includes a profit from investing activities of CAN$828,000 partially offset by a loss on pharmaceutical operations of CAN$403,000 and investor relations cost of CAN$114,000.

Deprenyl Research Limited owns the Canadian rights to ELDEPRYL. Parkinson's disease, a progressive neurological disorder, affects more than 70,000 Canadians primarily over the age of 50.

ELDEPRYL currently offers Parkinson's patients therapy which substantially enhances traditional approaches to the disease. Preliminary findings of the DATATOP study show ELDEPRYL could also be indicated for a much larger market, people with early untreated Parkinson's.

The study, released in the Nov. 16, 1989 issue of the New England Journal of Medicine, found that ELDEPRYL delayed the onset of disability necessitating traditional Levodopa therapy (the primary end point) which tends to lose its effectiveness over the longer term and often produces severe side effects.

Deprenyl Research Limited is a Toronto-based prescription pharmaceutical company which commenced opeations in February, 1988 to import the product ELDEPRYL for the treatment of Parkinson's disease. Over the last year, the company has evolved into an organization with the capability to license, develop and market ethical pharmaceutical products.

ELDEPRYL is a registered trademark licensed by Deprenyl Research Limited from Somerset Pharmaceuticals Inc., Denville, N.J.

TOLEDO, OH (FEB. 12) BUSINESS WIRE - Dana Corp. Monday reported sales of $4.87 billion for the fiscal year ending Dec. 31, 1989, down slightly from 1988's record $4.94 billion sales.

Net income for 1989 was $132 million compared to $162 million in 1988, and earnings per share were $3.24 vs. $3.99 in 1988.

Sales for the fourth quarter of 1989 were $1.12 billion compared to $1.24 billion for the same period last year. Net income for the quarter was $20.7 million in 1989 and $43.7 million a year earlier. Earnings per share for the fourth quarter were 51 cents compared to $1.08 for the fourth quarter of 1988.

Dana's Board of Directors, meeting today in Toledo, declared a 40 cents

per share quarterly dividend payable on March 15, 1990, to shareholders of record March 2, 1990. The March dividend is the 209th consecutive dividend and continues the $1.60 annual rate established in October 1988.

SPRINGFIELD, MA (FEB. 12) BUSINESS WIRE - Monarch Capital Corp. (NYSE:MON) announced Monday that it will discontinue its real estate and venture capital operations and concentrate on its two core businesses: variable products and disability income insurance.

This action resulted in a special charge of $39.3 million -- $59 million pre-tax -- against fourth quarter earnings. Reflecting the charge, Monarch reported a net loss for the quarter of $35.4 million, or $5.45 per common share, compared with net income of $2.8 million, or 30 cents per common share for the 1988 fourth quarter. Seizing Core Business Opportunities

Fourth Quarter Continuing Operations Income of $5.9 Million

Monarch reported pre-tax income from continuing operations of $5.9 million for the fourth quarter of 1989, against $7.4 million in the 1988 fourth quarter. Net income for the 1988 fourth quarter included an $11.9 million gain on termination of Monarch's pension plan.

In addition, income from insurance operations rose from $4.4 million in the fourth quarter of 1988 to $12.2 million in the 1989 fourth quarter. This was due primarily to decreased operating expenses and a $4.3 million increase in realized gains on investments.

Monarch reported pre-tax income from continuing operations of $12.5 million for the year. After deducting the special charge, Monarch showed a 1989 net loss of $24.4 million, or $4.05 per common share.

Pre-tax income from continuing operations decreased from $29.2 million in 1988 to $12.5 million in 1989. Gains of $11.9 million on the pension plan termination and $1.3 million on restructuring benefitted 1988 results.

For the year, the effect of a 2 percent increase in the loss ratio for disability income insurance, an increase in interest expense, and a decline in investment management fees was offset by decreased operating expenses and a $5.6 million increase in realized gains on investments.
Discontinued Operations Reported

The special charge for discontinued operations reflect the net expected loss from disposition of the company's real estate and assets of its Monarch-Narragansett venture capiyal operation, together with a provision for estimated costs of disposing of these assets over the next three years. Costs of disposition include operating expense, carrying costs and other related expenses.

Monarch-Narragansett has equity holdings in a number of publicly-and privately-held companies. Monarch noted that its investment in Monarch-Narragansett was made for the purpose of eventual liquidation of the underlying venture holdings.

CAMBRIDGE, MA (FEB. 12) BUSINESS WIRE - MathSoft Inc., the worldwide leader in mathematical software, Monday announced the launch of their educational program, ''Math Is Radical.''

Developed in conjunction with the National Council of Teachers of

Mathematics (NCTM), ''Math Is Radical'' is a national high school mathematics education program designed to raise and develop students' mathematics skills and offer teachers a tool for teaching mathematics in the classroom.

MathSoft is donating a retail value of three million dollars of software to U.S. high schools and has developed materials to support the ''Math Is Radical'' program. To date, 180 high school in 43 states and territories, including Puerto Rico, American Samoa and Guam, are participating in the first year of ''Math Is Radical.''

The NCTM, an international professional organization of teachers dedicated to the improvement of classroom instruction in mathematics at all levels, has recognized ''Math Is Radical'' as a program which assists in their efforts to implement their Curriculum and Evaluation Standards For School Mathematics.

Also as part of the ''Math Is Radical'' program, students are encouraged to use their mathematics skills in the ''Math Is Radical'' contest, developed specifically to increase mathematics performance by solving real-world problems -- either by using MathCAD or by using pencil and paper. Entry forms, rules, and colorful ''Math Is Radical'' contest posters are included in the ''Math Is Radical'' introductory package.

The ''Math Is Radical'' Advisory Board will judge all entries and will award cash prizes in September of 1990 for problem-solving (either using or without using MAthCAD) in the following categories: Grand Prize; Best of in Algebra, Pre-Calculus and Calculus; and a number of Honorable Mentions.

Introduced in 1986, MathCad was invented by MathSoft's co-founder and chairman, Allen Razdow, based on his experience as a physicist at M.I.T. He envisioned a better way to perform mathematical analysis using a computer that technical professionals, educators and students would find natural to use.

MathCAD is breakthrough, because of the live document interface feature. It allows students to use a computer in the same way they work with pencil and paper. Equations appear as they would in a textbook using standard mathematical notation. Results are automatically calculated as numbers, plots or tables and are combined with text, all in the same live document.

MathSoft Inc. is the leading developer and marketer of mathematical software for teaching professionals.

ACTON, MA (FEB. 12) BUSINESS WIRE - The Co-operative Bank of Concord, (NASDAQ:COBK) reported Monday consolidated net earnings of $538,000, or 16 cents per share, for the third quarter ended Jan. 31, 1990, compared with $718,000, or 21 cents per share, for the same period last year.

Consolidated net earnings for the nine month period were $2,275,000, or 67 cents per share, compared with $904,000, or 27 cents per share, for the prior year.

The decrease in quarterly earnings is directly attributable to the continued softness in the Massachusetts real estate market. Loans on a non-accrual status increased to $8,045,000 and other real estate owned increased to $8,218,000 during the quarter.

Total non-performing assets, excluding those assets guaranteed as to principal and interest by the Randolph assistance agreement, equalled 2.47 percent of total assets and 2.93 percent of loans receivable at Jan. 31, 1990.

During the quarter, new loan originations and purchases were $47,275,000 and loan sales to the secondary markets totaled $56,399,000. For the nine months ended Jan. 31, 1990, loan originations and purchases were $174,808,000 and loan sales $101,292,000.

The bank paid its 16th regularly scheduled quarterly dividend of 15 cents on Jan. 15, 1990.

The Co-operative Bank of Concord, the largest co-operative bank in Massachusetts with assets in excess of $650 million, is a state-chartered, FDIC-insured co-operative bank with headquarters in Acton, and 14 retail banking offices in Middlesex, Norlfolk and Plymouth counties.

LAS VEGAS (FEB. 12) BUSINESS WIRE - Reynolds and Reynolds, a leader in providing business forms to automobile dealers for over 50 years, continues to develop business forms programs with automobile manufacturers.

Over the past six months, the company has developed a number of business

forms arrangements with General Motors, Chrysler and Ford.

The strategic partnership with manufacturers has paid off in several significant types of forms business, including General Motors' Mr. Goodwrench Quick Lube Plus, GM's Design Group stationery, Chrysler's MOPAR XPRESS Lube, and GM's Saturn Division.

Reynolds and Reynolds, a major supplier of information processing systems, including business forms and computer systems to automotive, professional, medical and general business markets, outlined the details of the agreements while at the National Association of Automobile Dealers convention in Las Vegas. Reynolds and Reynolds is headquartered in Dayton Ohio.

Mr. Goodwrench Quick Lube Plus - Targeted to Mr. Goodwrench dealers, the Quick Lube Plus program is designed to provide increased business opportunities and consumer acceptance with a no-reservation, quick oil and lube service. Reynolds is the exclusive provider of the Mr. Goodwrench Quick Lube Plus forms for the auto dealer enrollment package.

GM Design Group Stationery Program - Reynolds has developed stationery to GM Design Group specifications for Buick, Oldsmobile, Cadillac, Chevrolet, Pontiac and GMC Truck. Perfect for single GM franchise dealers, as well as multi-franchise dealers who want to run a special campaign for a single car line, the new stationery is consistent with the entire GM communications program which includes sales literature, advertising, ceiling danglers and door decals.

Chrysler's MOPAR XPRESS Lube - Reynolds is developing the forms and enrollment materials for this program which is designed to provide additional business opportunities to the over 5,000 Chrysler dealers nationwide. ''Reynolds has taken an important role in ensuring that the Chrysler MOPAR XPRESS Lube Program starts off successfully. They have been an effective partner in the entire process - from concept to implementation,'' said Richard Bentzen, service marketing manager, Chrysler Service and Parts Operations.

GM Saturn Division - Reynolds has the exclusive development arrangement of about 100 forms to be used by Saturn dealerships. The forms under development include checks, invoices, stationery, cash receipts, parts tickets, work orders, financing and insurance forms and buyers orders.

#90043b0738 02/12/1990 ~Business Wire

BOSTON (FEB. 5) BUSINESS WIRE - Psychemedics Corp. (NASDAQ:PCMC) Monday introduced two testing products which detect methamphetamine and marijuana through the use of the company's hair sample testing technique.

The announcement was made by Dr. Lawrence A. Kaufman, president and chief executive officer of Psychemedics Corp.

These new products, called GS/MS Confirmation Tests, complete Psychemedics' five-drug screen/confirmation methodology which detects cocaine, opiates, PCP, and now marijuana and methamphetamine through the use of hair sample analysis instead of the traditional urinalysis technique.

The introduction of these new products caps a 12 year research and development effort conducted under the direction of Dr. Werner Baumgartner at the company's Santa Monica, Calif. laboratories.

GC/MS Confirmation (Gas Chromatography/Mass Spectroscopy) complements Psychemedics' proprietary RIAH (Radioimmunoassay of Hair) Screening procedure which provides historical, quantitative and qualitative information regarding an individual's pattern of drug use.

The non-invasive technique is based on a simple scientific principle, whereby as the blood circulated through the body it nourishes the hair follicle.

If there are drugs in the blood, traces become entrapped in the core of the hair in amounts roughly proportionate to those ingested.

In addition to the dectection of long term usage of drugs, the hair test has proven highly accurate in independent testing, is more cost effective than urinalysis when used in pre-employment and employee screening programs; and resists attempts of evasion and false negatives due to temporary abstention, excessive fluid intake, or the substitution or adulteration of specimens.

''Psychemedics Corporation is the only company in the world with the commercially available methodology to screen for drugs of abuse through hair testing,'' said Kaufman.

''By now offering a complete screening/confirmation product we're providing our clients with the most reliable, straight forward and comprehensive approach to ensuring a drug-free workplace.''

Psychemedics' drug testing method is being used by over 50 corporations, banks, hospitals and some government agencies nationwide including Steelcase Corp., Caesar's Tahoe Casino, Michigan National Bank, Chapparral Steel and the Federal Reserve of Chicago.

#90043b0744 02/12/1990 ~Business Wire

WHITE PLAINS, NY (FEB. 12) BUSINESS WIRE - IPCO Corp. (NYSE:IHS) Monday reported a net loss of $3,925,000, or 78 cents per share, for the three-month period ended Dec. 31, 1989 on revenues of $27,632,000.

The loss includes $291,000, or 6 cents per share, relating to the disposal of the Whitestone Products Division. This compares to a loss of $1,549,000, or 31 cents per share on revenues of $29,760,000 for the second quarter of 1988.

Second quarter 1988 results included a loss from discontinued operations of $1,678,000, or 34 cents per share, which offset income from continuing operations of $129,000, or 3 cents per share.

For the six month period ended Dec. 31, 1989, the company reported a net loss of $4,148,000, or 82 cents per share, on revenues of $57,538,000. The loss includes $950,000, or 19 cents per share, relating to the disposal of the company's Whitestone Products Division.

This compares to a loss of $2,651,000, or 53 cents per share on revenues of $59,973,000 for the comparable six month period in 1988. First half of 1988 results included a loss from discontinued operations of $2,825,000, or 57 cents per share, which offset income from continuing operations of $174,000, or 4 cents per share.

Richard Block, the recently elected CEO and President of IPCO, noted that second quarter results of fiscal 1990 includes significant restructuring charges related to the reduction of personnel at the corporate headquarters.

Block stated that, ''Our new management team is now in place and charges incurred in connection with changes in management, which exceeded $2.2 million in the second quarter, are behind us.''

Block also reported that the company's revitalization program is proceeding. ''We are aggressively seeking to improve operations in the Sterling Optical Division upon which management is placing its primary emphasis for the future growth of the company.''

The company is continuing its previously announced search to determine whether an appropriate buyer on satisfactory terms can be identified for the Whaledent Division.

#90043b0755 02/12/1990 ~Business Wire

WAYNE, NJ (FEB. 12) BUSINESS WIRE - GAF Corp. announced Monday that it has completed the transfer of its surfactant chemicals business to Rhone-Poulenc Inc., the U.S. subsidiary of the French chemicals firm, for a total consideration of $480 million plus assumption of certain liabilities.

Under the transaction, GAF received $450 million in cash and will retain a continuing interest in the business. The cash will be used to retire $235 million principal amount of Senior Subordinated Increasing Rate Notes due March 1994

The notes were issued as part of the March 1989 buyout of GAF by a management group led by Samuel J. Heyman, chairman and chief executive officer of GAF, with the balance to be applied to the reduction of bank borrowings provided in connection with the financing for the buyout transaction by a syndicate of banks led by The Chase Manhattan Bank N.A.

The investment bank firm of Dillon, Read & Co. Inc., acted as GAF's financial advisor in the surfactants transaction.

GAF's surfactants business produces and markets a variety of surfactants and other chemicals, including specialty phosphates, dispersants, polyols, oil field chemicals, silicone products, and textile specialty chemicals. The business includes manufacturing facilities in Spartanburg, S.C., and plants and research facilities in Winder, Ga. and Mississauga, Canada.

Commenting on the announcement, Heyman said, "Our surfactants business has been highly successful due not only to the uniqueness of its products but also because of the quality of our people and a loyal customer following, and we are pleased that the transaction with Rhone-Poulenc will provide maximum continuity for our employees and customers."

GAF Corp. is a leading manufacturer of specialty chemicals and building materials.

#90043b0765 02/12/1990 ~Business Wire
VANCOUVER, BRITISH COLUMBIA (FEB. 12) BUSINESS WIRE - Amax Gold Inc., and Coral Gold Corp. have extended the completion date for a proposed joint venture agreement on Coral's 11,000-acre Robertson gold property in North Central Nevada.

G. Martin Greer, Coral's Chairman and CEO, explained that the extension was required to complete documentation following examination by Amax of the property and related underlying agreements. Originally intended to be finalized on Feb. 1, 1990, the revised timetable calls for the finalization of documentation this week and execution of the agreemnt on Feb. 16th.

Under the proposed joint venture, originally announced on Jan. 3, 1990, Amax will expend up to US$11.5 million in a four-phase exploration and development program on the Roberston property. Amax can earn up to a 70 percent interest in the property by completing a bankable feasibility study and arranging project financing.

Should Coral elect to participate in the development and production financing, Amax's ownership would decrease to 60 percent.

Greer also announced Monday that Amax's initial US$1 million commitment will be applied directly to exploration expenses on the Roberston property. Accordingly, Coral will limit its proposed private placement to US$2 million rather than US$3 million as originally contemplated.

''The advantages to Coral's shareholders are obvious,'' said Greer in reference to the smaller placement.

''The full amount of $3 million will still be available for Coral's property enhancement and working capital, with less dilution of Coral's equity at its present depressed share price.''

RENO, NEV (FEB. 13) BUSINESS WIRE - Intermark Gaming International Inc. Monday announced that it has reached an agreement, subject to final documentation, with Western Savings & Loan Association relating to the company's debt totalling approximately $3.3 million.

As part of the agreement, Western Savings will sell the company's note for

an undisclosed sum of cash and paper to a new consortium of overseas investors with strong financial backing. As a result the board of Intermark Gaming International Inc. will be further strengthened over the course of the next few months.

As a result, the company believes it will be in a stronger position to develop new products and new market growth. In particular, the company is now negotiating with various governments in Eastern Europe to supply keno systems on an exclusive basis.

The company has also reached agreement, subject to final documentation, for two long term exclusive distributing agreements for the sale of Vidiwall and Vidnetics products in the gaming and wagering markets through the company's Imagineering division.

Vidiwall manufactures proprietary, high technology video display walls which will be integrated with Imagineering products for specialized gaming applications. Initial product introductions will be targeted towards Race and Sports Books in Nevada, Race Tracks and Off-Track Betting facilities nationwide.

Vidnetics product combines the computer with interactive video technology tied together through an advanced communications network designed to deliver entertainment, data and personal services in convenient and efficient manner.

Such technology will enable Intermark to provide interactive, video based wagering terminals in conjunction with video display walls to the above referenced markets.

These products are consistent with a strategy to bring exciting, high-tech video based technologies into the gaming arena which will emphasize entertainment value and enhance casino marketing strategies.

Imagineering intends to combine and direct these new products into its existing keno customer base and will be displaying these products at a gaming show at the Tropicana in Las Vegas this week.

CHESTNUT HILL, MA (FEB. 12) BUSINESS WIRE - The Neiman Marcus Group Inc. (NYSE: NMG) announced Monday that the company has filed a lawsuit charging Federated Department Stores Inc., Allied Stores Corp. and Olympia & York CC Ltd., with tortious interference in enticing the former head of its Neiman

Marcus Division to resign from his post to accept the position of chairman of Federated Stores Inc.

The Neiman Marcus Group suit alleges that the defendants pursued Allen Questrom for the Federated position although they knew or should have known that Questrom had a valid employment contract which obligated him to serve as head of the Neiman Marcus Division until Sept. 1991.

The suit, which was filed in State Court in Dallas, Texas, seeks actual and punitive damages. The Neiman Marcus Group consists of three operating units: Neiman Marcus, Bergdorf Goodman, and Contempo Casuals.

NORWALK, CT (FEB. 12) BUSINESS WIRE - Trudy Corp.'s revenues for the third quarter of fiscal 1990 increased 71.6 percent to $3,098,800, compared to revenues of $1,805,400 in the third quarter of fiscal 1989.

Revenues for the first nine months of fiscal 1990 were $6,715,300, an increase of 40.6 percent compared to revenues of $4,775,000 for the first nine months of fiscal 1989. The increase in sales is due to an increase of special market sales over last year.

For the nine months ended Dec. 31, 1989 order bookings were $6,909,500 compared to $5,298,600 a year ago, an increase of 30.4 percent. Company management believes the higher incoming order rate will result in higher revenues for fiscal 1990 compared to fiscal 1989. The order backlog as of Dec. 31, 1989 was approximately $296,700.

The net profit of $207,800 for the third quarter of fiscal 1990 compares to the net loss of $496,800 for the third quarter of fiscal 1989. The net profit of $18,500 for the first nine months of fiscal 1990 compares to the net loss of $1,421,400 for the first nine months of fiscal 1989.

The improved profit performance was due to higher sales volume and decreased expenses associated with the closing of the Carlsbad, Calif. facility, and a reduction of personnel compared to last year.

DALLAS (FEB. 12) BUSINESS WIRE - Publishers Equipment Corp. of Dallas,

and Reading Eagle Co. of Reading, Pa., Monday announced the Eagle's intent to purchase two five-color flexographic press units.

Reading Eagle Co. publishes the Reading Times and Reading Eagle, with a combined circulation of 80,000 daily and 110,000 Sunday. The units are key elements in a program of expansion in both product size and full color pages.

William S. Flippin, publisher, stated, ''The new units will let us give our readers brilliant full color in the Eagle and Times, and our advertisers the benefits of short deadline, professional color in run of press and special section ads.''

A further advantage of the flexo process, according to Gary Owen, national sales manager for Publishers Equipment, is its ability to reproduce intense black and color with inks that do not rub off on the readers' hands or clothing.

Evans Kostas, chairman and chief executive officer of Publishers Equipment Corp., emphasized the increasing importance of flexo color in the growth strategies of leading newspapers.

''We have built real momentum in sales of this unique color unit because it was designed specifically to fit with our customers' needs for more color, more pages, and quick installation in addition to the environmental advantages of the flexo process itself.''

Publishers Equipment Corp., a Dallas-based public company specializes in the design and manufacture of new presses and reengineering of presses and related equipment to the most modern methods of newspaper production.

For additional information, contact Roger R. Baier at Publishers Equipment Corp., Dallas, 214/931-2312 or Gary Owen, Rockford, Ill., 815/874-8877.

LAS VEGAS (FEB. 11) BUSINESS WIRE - Bally Manufacturing Corp. (NYSE:BLY) broke ground Monday for the construction of its new gaming equipment manufacturing facility in Las Vegas.

The company also announced the selection of the J.A. Tiberti Construction Co. as the official contractor for the new facility.

The 150,000-square-foot building, designed by JMA Architects & Engineers, Inc., will occupy ten acres in the Hughes Airport Center in Las Vegas. The company will initially employ approximately 300 people at the facility where production capabilities will include slot machines, video gaming products and on-line lottery terminals.

The new facility will also house the division's administration, finance, research and development, sales, and marketing staffs and is scheduled for completion in the fall of 1990.

In commenting on the new facility, Roger N. Keesee, president and chief operating officer of Bally Manufacturing Corp., said, ''The Nevada plant will bring Bally's manufacturing capabilities closer to our customers. This will enable us to serve our customer base more quickly and efficiently.''

Bally Manufacturing Corp. is a world leader in the leisure industry with four casino hotels, a nationwide network of fitness centers, and a complete line of gaming equipment, fitness products, and lottery products and services.

BRANFORD, CT (FEB. 12) BUSINESS WIRE - Echlin Inc. (NYSE: ECH), for its second fiscal quarter ending February 28, 1990, expects earnings to be about half the 23 cents per share it reported in the same period last year. The estimate was made by Echlin's Chairman and Chief Executive Officer Frederick J. Mancheski.

The earnings shortfall is primarily a result of a decline in unit sales of comparable operations (those part of Echlin for at least one year) of about 8 percent from last year. The sales decline is attributable to the unusually warm winter this year together with a sharp drop in heavy duty original equipment business.

Earnings, which historically are weakest in the second fiscal quarter, will also be impacted by negative currency changes this year.

Echlin's unit sales in its third fiscal quarter, normally a strong quarter are expected to increase slightly from last year's level. Earnings are also expected to improve and exceed the 24 cents per share reported in the third quarter last year.

For the twelve months ending August 31, 1990, earnings are estimated to be

about $1.00 per share, up from the 80 cents per share earned in fiscal 1989.

CLEVELAND (FEB. 13) BUSINESS WIRE - Ameritrust Company National Association announces a unique premium certificate of deposit with tiered interest rate levels tied to the amount of the opening deposit.

The 13-month premium certificate has four interest rates available, based on deposit levels from $500 to $50,000, and is offered to holders of Ameritrust MajorSavers accounts.

Ameritrust is the first bank in Ohio to offer a tiered CD tied to a savings account.

Individuals may open an Ameritrust MajorSavers account at any time, through any Ameritrust office in the state of Ohio. To qualify as a MajorSaver, one needs to maintain $10,000 in any Ameritrust savings plan. MajorSavers enjoy benefits in addition to the premium certificate, including interest bearing checking at no charge, a low fixed rate VISA card fee and waiver of fees on utility bill payments, money orders, travelers checks and bond redemptions.

According to Michael Barnum, vice president, financial services and investments at Ameritrust, ''The premium certificate of deposit has been well received and is already drawing new customers to our bank. Today's sophisticated savers want the security, convenience and high yields offered by this program.''

The new program is marketed under the theme, ''Step Up to Higher CD Rates.'' It is being promoted through TV advertising in selected markets, direct mail and newspaper ads.

Ameritrust Company National Association is the principal subsidiary of Ameritrust Corp., a $11.2 billion bank holding company headquartered in Cleveland. The company has branch locations in Ohio's major cities and in Indiana and Michigan.

VANCOUVER, British Columbia (FEB. 13) BUSINESS WIRE - Amax Gold Inc. and Coral Gold Corp. have extended the completion date for a proposed joint venture agreement on Coral's 11,000-acre Robertson gold property in North Central Nevada.

G. Martin Greer, Coral's Chairman and CEO, explained that the extension was required to complete documentation following examination by Amax of the property and related underlying agreements. Originally intended to be finalized on Feb. 1, the revised timetable calls for the finalization of documentation this week and execution of the agreement on Feb. 16.

Under the proposed joint venture, originally announced on Jan. 3, 1990, Amax will expend up to US$11.5 million in a four-phase exploration and development program on the Robertson property. Amax can earn up to a 70 percent interest in the property by completing a bankable feasibility study and arranging project financing. Should Coral elect to participate in the development and production financing, Amax's ownership would decrease to 60 percent.

Greer also announced Monday that Amax's initial US$1 million commitment will be applied directly to exploration expenses on the Robertson property. Accordingly, Coral will limit its proposed private placement to US$2 million rather than US$3 million as originally contemplated.

''The advantages to Coral's shareholders are obvious,'' said Greer in reference to the smaller placement. ''The full amount of $3 million will still be available for Coral's property enhancement and working capital, with less dilution of Coral's equity at its present depressed share

price.'' -30--lt/ph

     #90043b0798 02/12/1990 ~Business Wire

STEVENS POINT, Wis.(FEB. 13) BUSINESS WIRE - First Financial Corp. (OTC:FFHC) Monday reported net income for the year ended Dec. 31, 1989, of $14.4 million or $2.50 per share.

This compares to net income of $14.6 million or $2.64 per share in 1988.

For the fourth quarter of 1989 the company recorded net income of $1.6 million, or 27 cents per share, compared to earnings of $2.9 million, or 51 cents per share, for the comparable period in 1988.

The year-end and fourth quarter results included an additional $3 million in general loan loss reserves. This brings First Financial's total reserves for loan losses to $14.4 million or 30 percent of non-performing assets.

''No one enjoys setting up additional loss reserves, especially with a good overall year such as we had,'' said John C. Seramur, president and chief executive officer. ''However, after a thorough analysis our board of directors and senior management concluded that it was in the best interest of our company and shareholders to add to loan loss reserves at this particular time,'' Seramur stated.

Seramur cited a slowdown in the real estate market and more stringent standards being applied in recent examinations conducted by the federal examiners as major reasons for the addition to loss reserves in the fourth quarter.

''This loan loss provision serves to further strengthen the company's already solid foundation as we enter the 1990s and enhance the quality of our balance sheet,'' Seramur said.

''Our near record earnings for 1989, even with the loan loss provision, are significant because they were achieved in an environment of rising interest rates and soft loan demand. We were also fully taxed in 1989, after using all of the tax loss carryforwards from a prior acquisition, and paid higher special regulatory assessments and federal insurance premiums in 1989,'' said Seramur. ''Perhaps, a more accurate measure of our growth is 1989 pre-tax income, which increased by $5.0 million or 28 percent over 1988,'' Seramur added. The results of Port Savings Bank, which was acquired on May 31, 1989, are included in the financial

statements since that date. This acquisition was accounted for as a purchase.

Higher net interest income combined with tightly controlled operating expenses were factors in the company's steady performance in 1989. Net interest income rose 6 percent to $73,831,000 for 1989, compared with $69,740,000 in 1988.

First Financial's ratio of equity to assets was 5.58 percent at year-end 1989, up from 5.49 percent at the same time in 1988. Shareholders' equity was $137,081,000 or $23.93 per share at Dec. 31, 1989, up over 8 percent from $126,248,000 or $22.11 at year-end 1988.

''The acquisition of Illini Federal Savings & Loan by our major subsidiary First Financial Bank, was completed on Jan. 19, 1990, officially marking our entry into the Illinois market. This acquisition may have a short-term impact on earnings as we consolidate operations, but we expect it to add to total earnings by the end of the year. Because Illini Federal's net worth was below regulatory requirements, the acquisition will reduce our ratio of equity to assets. We will bring these numbers back to current levels through normal growth in earnings,'' Seramur said.

''The expansion into Illinois is an investment that brings many opportunities for future growth. This potential, combined with our extensive branch network in Wisconsin, innovative products and services and financial strength, puts us in an excellent position for continued success in 1990,'' said Seramur.

First Financial Corp. is the holding company for First Financial Bank, FSB Wisconsin's second largest financial institution, and First Financial-Port Savings Bank, S.A., of Port Washington, Wis. The company has total assets of approximately $2.9 billion and 77 banking offices in Wisconsin and Illinois. First Financial shares are traded in the national over-the-counter market with the listing symbol FFHC.

#90043b0799 02/12/1990 ~Business Wire

BILLERICA, MA (FEB. 12) BUSINESS WIRE - Adage Inc. (NASDAQ:ADGE) Monday reported a net income for the third quarter of fiscal 1990, ended Dec. 30, 1989, of $878,000, or 10 cents per share, as compared with a net loss of $1,455,000, or 17 cents per share, for the same period a year ago.

In the quarter ended Dec. 30, 1989, $550,000, or 6 cents per share, represents income recognized from discontinued operations relating to

proceeds received from liquidation of inventory that exceeded previous estimates made of net realizable value. The company reports income from continuing operations in the current period of $328,000, or 4 cents per share, compared to $235,000, or 3 cents per share, for the quarter ended Dec. 31, 1988.

Net loss for the first nine months of fiscal 1990 was $3,407,000, or 38 cents per share, compared with a income of $6,374,000, or 74 cents per share, in the first nine months a year ago. Income from continuing operations for the current nine month period was $946,000, or 11 cents per share, compared to $229,000, or 3 cents per share, last year.

In the nine months ended Dec. 30, 1989, a net loss of $3,400,000, or 38 cents per share, was recognized on the disposal of the company's graphics terminal operations. In the nine months ended Dec. 31, 1988, $8,620,000, or 97 cents per share, represents a gain net of income taxes on sale of the company's customer service business.

That period also includes an extraordinary item of $1,818,000, or 20 cents per share, relating to the utilization of tax loss carryforwards.

#90043b0804 02/12/1990 ~Business Wire

NEW YORK (FEB. 12) BUSINESS WIRE - TII Industries Inc. (ASE:TI) announced Monday that sales for the second quarter of fiscal 1990 (ended Dec. 29, 1989) increased to $7,260,000 or 41 percent from the first quarter of fiscal 1990 (ended Sept. 29, 1989).

Sales for the first six months of fiscal 1990 (ended Dec. 29, 1989) were $12,414,000 down from the $18,689,000 reported during the first six months of fiscal 1989 (ended Dec. 30, 1988).

Sales for the second quarter of fiscal 1990 show considerable strength from first quarter levels in the wake of business interruptions caused by strikes at several of the Regional Bell Operating Companies, principal customers of the company, the last of which was not settled until November 1989.

Sales were also adversely affected by Hurricane Hugo which struck the company's main manufacturing facility in Puerto Rico on Sept. 18, 1989 and increasing competitors in several of the company's principal product lines.

During the second quarter and first half of fiscal 1990 the company reported operating and net losses vs. operating and net profits during the

comparable periods of fiscal 1989. This was principally as a result of the absence of $4,018,000 of income associated with the previously announced settlement of an arbitration with AT&T and the reduced sales from prior year levels.

In October of 1989 the assets of Intercom Systems Inc., (formerly Teleprobe Systems, Inc.), an affiliate of the company, were sold. Proceeds from the sale are expected to approximately equal the company's remaining investment in the affiliate and no further losses are anticipated.

The company remains in default with respect to principal payments on its outstanding bank debt, however, progress is being made toward restructuring these loans.

NEW YORK (FEB. 12) BUSINESS WIRE - Skadden, Arps, Slate, Meagher & Flom expanded its international practice to include Eastern European and Soviet transactions, the New York-based international law firm announced Monday.

The law firm has retained attorney George Gluck, whose practice is centered on Hungary, as a legal consultant and Dr. Vladimir Kvint, a well-known Soviet economist, as a business consultant.

Gluck, 41, who is fluent in Hungarian, has been practicing corporate and international law in New York since 1979. Since 1983 his work has been focused on Hungarian clients doing business in North America and North American and European entities doing business in Hungary.

Gluck was born in Budapest but left Hungary with his family in 1956, moving to Toronto. He holds a Masters Degree in International Affairs from the Fletcher School of Law and Diplomacy and an LL.B from the Osgoode Hall Law School in Toronto.

His office will be located at 919 Third Avenue, which is Skadden, Arps' headquarters building in New York. He will be available to work with Skadden Arps' clients on their Hungarian matters and will be able to call upon Skadden Arps' resources on behalf of his clients.

Skadden Arps has also entered into a consulting relationship with Dr. Vladimir Kvint, 40, of the U.S.S.R in order to assist the law firm's clients that wish to do business in the Soviet Union.

Kvint is vice chairman of the Scientific Council for Regional Economy of the Academy of Sciences of the U.S.S.R. At the Academy of Sciences, Kvint serves as deputy to Abel Aganbegyan, the chief economic advisor to President Mikhail Gorbachev. In addition to working with Kvint, Skadden, Arps will enter into a mutual cooperation agreement with the East-West Business Circle Foundation in Moscow, of which Kvint is chairman

Born in Krasnoyarsk, Siberia, Kvint received his masters degree in economics from the Plekhanov Institute in Moscow and a doctorate degree from the Institute of Economy at the Academy of Sciences of the U.S.S.R.

Kvint will be based in Moscow, but is expected to meet regularly with Skadden Arps' clients in the law firm's U.S. and international offices.

Skadden, Arps has been steadily expanding its international practice throughtout the past few years, establishing offices in Tokyo, London, Sydney and Hong Kong, in addition to its seven offices in the United States. Recently the law firm announced that it would open new offices in Brussels and Toronto within the first quarter of 1990.

WASHINGTON (FEB. 12) - U.S. President George Bush Monday said he hoped the resignation of Israeli trade minister Ariel Sharon would clear the way for greater progress in the stalled Middle East peace process.

Bush said in a televised news conference that Prime Minister Itzhak Shamir, Sharon's principal opponent, supported the peace talks. If Sharon's resignation cleared the way for peace, he said, then it is a positive development.

Earlier in the day, the State Department categorically refused to make any comment on the Israeli developments, saying it was an internal matter for the Israelis to deal with.

The United States and Egypt have been working for months with Israel and the Palestine Liberation Organisation, trying to implement a peace plan initiated by Shamir.

The next step of the plan was to have been a meeting of U.S., Egyptian, and Israeli foreign ministers in Washington. But the meeting has been delayed, since Egypt and Israel have been unable to agree on some of the peace plan's elements.

WELLINGTON (FEB. 12) - Continuing deaths among the world's rarest penguin species could be the result of a global climate change, a scientist studying the mysterious deaths said Monday.

New Zealand Department of Conservation scientist Jim Mills will be one of a group of scientists attending an emergency meeting in Dunedin Tuesday to discuss the crisis facing the bird.

In the last month 120 adult yellow-eye penguins have died for little apparent reason.

The yellow-eye (megadyptes antipodes) breeds around the southeast coast of

the South Island of New Zealand and is already under pressure as its normal breeding areas are developed or turned into farmlands.

Actual numbers of the bird are not known but they are believed to have a very narrow breeding range outside New Zealand.

Mr. Mills said an incursion of warm water from the north had killed off krill, a species of minute shrimp, in the areas used by the yellow-eyes. He said he did not know if the warm water was a chance event or part of a long-term change in seawater circulation patterns.

Mr. Mills has said two of the past three breeding seasons of the red-billed gull failed in Kaikoura, a coastal area 100 kilometres (65 miles) south of here. He blamed the failure on the lack of krill.

TOKYO (FEB. 12) - Japanese voters are increasingly dissatisfied with their standard of living, according to an opinion poll published Monday, less than a week before general elections that will decide Japan's political future.

The poll of nearly 2,000 people, conducted by the daily newspaper Yomiuri, showed that while a growing number of Japanese believe their economy is flourishing -- up 13 per cent compared with a similar poll in February 1989 -- five per cent more respondents said in 1990 that their standard of living had dropped in the preceding year.

Among the most frequently cited causes was high inflation, noted by 70 per cent of respondents or 14 per cent more than last year.

Forty-four per cent of respondents said they had to work overtime to maintain their standard of living, while 60 per cent said they favored more days of leave without a reduction in salary.

JAKARTA (FEB. 12) - Indonesia has shortlisted the number of bidders for a lucrative 300 million dollar contract to expand its telephone networks to NEC Corp. of Japan and a Dutch subsidiary of American Telephone and Telegraph, a minister revealed here Monday.

Coordinating minister for the economy, Radius Prawiro, said the two companies were chosen from among five bidders to build Indonesia's second telephone digital switching equipment for 350,000 new lines.

Officials said Fujitsu of Japan, a Dutch subsidiary of French Alcatel and an Australian unit of Sweden's Erricson had been eliminated from the race after the government went through the technical considerations.

Research and technology minister, Jusuf Habibie said they were now looking at the commercial aspects but the final decision was up to President Suharto.

Eleven firms submitted their proposals when the tender was opened two years ago and industry sources said that the contract's worth could eventually reach two billion dollars over time with repeat orders and spare parts supplies.

Officials said the eventual winner would have to work together with PT Elektrindo Nusantara, a private firm owned by one of Mr. Suharto's son.

The first digital system was awarded in 1982 to Siemens AG of West Germany which worked with state-owned PT Inti.

MELBOURNE, Australia (FEB. 12) - Manufacturer Pacific Dunlop Ltd. reported Monday a 153.3 million Australian dollar (114.3 million U.S.) interim net profit for the six months to December 31, 23 percent up on the same period in 1988.

The rubber goods, clothing and footwear group said the profit, up on 125 million dollars (93 million U.S.) the previous year, came from sales totalling 2.6 billion dollars (1.9 billion U.S.), an 18 percent increase over the last half of 1988.

But the company was being hurt by Australia's economic slowdown, it said.

Finance director Ian Clark said the softening in the economy was reflected in the group's order book with every division, except cables, working to "very short" order.

"It's just about overnight now," he said.

Managing director Philip Brass said Pacific Dunlop was optimistic the situation would be short-lived.

"There is a recognition that you've got to have essential products and ... primarily, we are in the essentials business in the underwear category, footwear and industrial footwear."

Directors declared fully franked interim dividends of 9.5 cents a share.

On the Australian share market Monday, Pacific Dunlop rose two cents to 5.08 Australian dollars (3.79 U.S.).

LONDON (FEB. 12) - World orders for new ships rose by nearly five per cent in the last quarter of 1989 compared with the previous quarter, to 31 million tons deadweight, which was the highest level since September 1984, statistics published on Monday by Lloyd's Register of Shipping showed.

Some 87 percent of the orders were for delivery by the end of 1991.

Orders placed with the Soviet Union and with Norway more than doubled in the last quarter of 1989 compared with the third quarter. Orders placed with South Korea fell by 9.6 percent.

Orders for oil tankers represented 38.1 percent of the total.

MANILA (FEB. 12) - A cardiologist presented here Monday a cheap, disposable silicone mask intended to protect a person from being infected with AIDS while reviving a heart-attack victim by mouth-to-mouth resuscitation.

Dr. T. Anthony Don Michael, a lecturer at the ongoing World Congress of Cardiology in Manila, said his patented "kiss of life" mask was prompted by fear of the deadly AIDS virus among medical personnel and other people.

Acquired Immuno-Deficiency Syndrome (AIDS) kills victims by destroying the body's ability to fight disease, and is transmitted primarily through the exchange of bodily fluids.

Because some medical personnel afraid of contracting the disease are refusing to administer cardio-pulmonary resuscitation (CPR) in the crucial three-minute period following a heart attack, more people are now dying unnecessarily, Dr. Michael said.

A victim suffers brain damage or death if CPR is not administered within three minutes, he added.

The mask, expected to be marketed in the United States in the next two months at three dollars apiece, is fitted over the mouth of a person who has stopped breathing.

A protruding tube allows another person to breathe into the victim's mouth, but a one-way valve inside the tube prevents the victim's saliva or blood from being ingested by the rescuer.

The mask was the only one so far in the U.S. tested to protect people from AIDS, Dr. Michael said, adding the mask also protects against transmission of the hepatitis virus.

Dr. Michael, 53, a Sri Lankan-born Briton applying for U.S. citizenship, said he had used the device in a flight in the U.S. when a fellow passenger suffered respiratory arrest.

BRUSSELS (FEB. 12) - The European Economic Community (EEC) should maintain its sanctions against South Africa until it sees a decisive step towards the end of apartheid, a senior EEC official said here Monday.

Manuel Marin, in charge of development at the EEC's executive Commission, said "we must maintain sanctions until the situation is clear enough to show that the movement (towards the abolition of apartheid) is irreversible."

EEC foreign ministers, meeting in Dublin on February 20, are discuss any early lifting of sanctions by the Community.

Britain, alone among its EEC partners, has called for sanctions against South Africa to be ended, in response to the freeing of jailed anti-apartheid leader Nelson Mandela.

The Community in 1986 banned imports of South African gold coins, steel and iron, and set a voluntary bar on new investments in South Africa.

But it has continued to admit South Africa's three biggest exports: raw gold, diamonds and coal.

#90043d7560 02/12/1990 ~French/German News Agency

NICOSIA (FEB. 12) - Kuwait has called for OPEC's oil-production quota system to be scrapped as soon as possible, saying it is no longer relevant for price stability in the face of fast-growing demand.

Kuwaiti Oil Minister Sheikh Ali al-Khalifa, interviewed Monday in the Nicosia-based Middle East Economic Survey (MEES), said OPEC members should be encouraged to produce above quota if prices surpass an agreed average level.

"From a practical standpoint the quotas are already irrelevant, so all that is needed is a recognition of that fact," the minister said.

He said the quota system established by the 13-member cartel, which "has hardly been honored by anybody," could not deal with a faster-than-expected demand that was likely to leave only "a very few countries" with any excess production capacity.

Sheikh Ali said the Organisation of Petroleum Exporting Countries should maintain the price of crude at between 18 and 20 dollars over the next three to four years, and that this could best be achieved without fixed quotas.

He proposed that if the average price falls below that level, producers with spare capacity "get together and see what they can do to reduce their own production, and to a lesser degree, possibly also the production of others."

The minister admitted that Kuwait was producing above its first-quarter quota of 1.5 million barrels a day agreed at an OPEC meeting in November.

"I think that our obligation to stay within the quota applies when the price of the OPEC basket is below 18 dollars a barrel.

"If the price is above 18 dollars a barrel, I think everyone should be, and even be encouraged to be, producing above quota," he said.

He did not specify Kuwait's current production, but MEES estimated it at between 1.8 million and two million barrels a day.

Sheikh Ali outlined an intensive program to increase Kuwaiti's crude-oil output capacity - currently around 2.5 million barrels a day - but did not give details of the new production target.

Sheikh Ali had told the November OPEC meeting in Vienna that Kuwait would reduce production by 500,000 barrels a day to stick to its given quota.

#90043d7580 02/12/1990 ~French/German News Agency
LONDON (FEB. 12) - Grain coal and ore freight rates slipped lower last week, compounding the previous week's easier trend, but by the weekend the market appeared steady at lower levels, and brokers were hoping the decline had bottomed out.

The Baltic International Freight Futures Exchange (BIFFEX)'s Baltic Freight Index (BFI) fell through the key 1,600 point for the first time since the

start of the year, ending down 55 points on the week at 1,583.

A range of reported fixtures at lower rates set the downward trend in motion, while lack of activity on major routes weighed on sentiment later on. Brokers said Soviet charterers were still picking up bargain tonnage, but that there are still reports that congestion in Soviet ports has caused them to reduce activity.

U.S. Gulf Panamax (50,000-70,000 ton) loaders were being fixed at 14.00 dollars per ton for European destinations, against a going rate of 14.60 at the end of 1989.

And Panamax vessels on the U.S. North Pacific to Japan route were fixed at 16.50 dnne against 16.55 the previous week.

Details of two U.S. Gulf to Japan fixtures for similar sized grain carriers emerged at relatively firm rates of 26.25 and 26.90 dollars per ton, a dollar and more better than the going rate at the start of February, but brokers said these deals were probably arranged some time ago.

#90043d7610 02/12/1990 ~French/German News Agency

GIFU, Japan (FEB. 12) - Japanese Prime Minister Toshiki Kaifu Monday criticized U.S. congressmen for seeking to impose unilateral sanctions against what they call Japan's unfair trade practices.

"I understand there are various kinds of argument in the United States but we cannot accept negotiations bent on unilateral punitive measures," Mr. Kaifu told a press conference in this central Japan city.

The prime minister, stumping for general elections next Sunday, was referring to calls by some U.S. congressmen for the imposition of the so-called "Super-301" provision of the 1988 U.S. trade act.

The congressmen seemed if they were "raising a sword," Mr. Kaifu said. "We will seek to settle the question by quiet discussion based on mutual confidence."

In May, the U.S. Trade Representative Office named Japan, India and Brazil as countries engaged in unfair trade practices and threatened to impose sanctions, possibly punitive duties, under the Super-301 clause if no solution to the trade disputes were found in three years.

The office said Japan had been unfair by blocking foreign access to its markets for telecommunications satellites, lumber and super computers.

BEIJING (FEB. 12) - Chinese environmental experts said here Monday the country's ecological problems are growing and cannot be solved as long as money is lacking and technology remains outdated.

Chinese air and water quality have become poorer with economic development, they said at the start of a one-week conference.

The meeting, organized by the Chinese government and the United Nations Development Program (Undp), has attracted 50 Chinese politicians and environment experts and 14 foreign experts.

It is to make proposals to fight pollution in China, emphasizing low-cost technology that China can afford.

Studies show air pollution in Chinese cities exceeds government limits. Acid rain is a serious problem in the south. Factory and household effluent is regularly dumped in rivers flowing through cities.

BERLIN (FEB. 12) - East German government and opposition parties called Monday for German monetary union and urged Bonn to carry out rapidly an undertaking made in December to provide financial aid to avert destabilisation in the East bloc country.

Representatives of 16 groups and parties, meeting at Niederschoenhausen castle in the north of East Berlin, said monetary union would be "an important stage on the way to economic unity of the two Germanies".

They also called for the creation of a "German Council" as part of the build-up to a German confederation.

The meeting, the 12th of a series of round-table sessions involving government and opposition groups, came on the eve of an inter-German summit in Bonn where Prime Minister Hans Modrow will be accompanied by several ministers, including eight ministers without portfolio named by former opposition groups.

The round-table called on Bonn to help stem the flow of East Germans heading west by paying the 10 to 15 billion Deutsche marks (5.5 to 8.8 billion dollars) promised in aid at an inter-German summit in Dresden, East Germany, last December.

Since the beginning of the year, up to 2,000 East Germans per day have been leaving jobs and homes to cross into West Germany. Recent reports have

indicated that the East German state faces bankruptcy if the exodus continues.

The West German aid would help to calm the situation, a round-table motion said.

Participants also agreed that discussion of German neutrality need not be a prior condition to German reunification, though they reaffirmed East German opposition to extending the eastern frontier of the western defence alliance NATO (North Atlantic Treaty Organisation) as far as the Polish frontier.

Mr. Modrow, whose delegation will spend two days in Bonn, heads a "government of national responsibility" charged with running the country until free elections scheduled for March 18.

#90043d8090 02/12/1990 ~French/German News Agency

KOSHIGAYA, Japan (FEB. 12) - Japanese Prime Minister Toshiki Kaifu on Monday entered the final week before crucial legislative elections, battling to bolster the image of his ruling Liberal Democratic Party (LDP).

Perched on the top of a truck, Mr. Kaifu, dressed in a blue suit and his trademark polka dot tie, on Sunday addressed a silent crowd huddled against a driving rain in the business center of Koshigaya, a Tokyo suburb.

"The LDP is the only party which can respond to the challenges of the 21st century," said Mr. Kaifu who is fighting to avoid a defeat for his party, which has ruled Japan for 35 years, in February 18 lower house elections.

He warned that the main opposition Japan Socialist Party (JSP), had "not given up its goal of a socialist revolution."

Koshigaya, one of the many bedroom communities outside Tokyo, is in one of the four voting districts of Saitama, a traditional pro-LDP area where the conservative ruling party controls three of the four lower house seats.

Behind the crowd of mostly ageing supporters, people were indifferent to the rally. At a hair salon a stone's throw away from Mr. Kaifu's makeshift platform, workers and clients turned their back on the premier.

At a shop selling jeans, blaring disco music drowned out Mr. Kaifu's voice.

"I don't like Kaifu," said 24-year-old saleman Sigeru Masami. "He is not doing what he says. This meeting is not good for business. Young people are avoiding the area today."

Mr. Masami has not decided who will get his vote, like 30 percent of the Japanese electorate which opposing parties are trying to woo in the week before Japan's political future is determined.

While the latest polls indicate that the LDP should at least control a simple majority of 257 seats of the 512-member lower house of the Diet (parliament), albeit with independent support, Mr. Kaifu, 58, continues his non-stop campaign.

Before arriving in Koshigaya, the prime minister took five minutes to stop off at a sports center in the same district, where a group of women dressed in leotards waited to perform open-air aerobic exercises under a huge red tarp.

LONDON (FEB. 12) - The British cleaning and laundry services group Godfrey Davis Holdings on Monday launched a takeover bid worth 138 million pounds (about 248 million dollars) for Sketchley, a company active in dry cleaning, working clothes and drink vending machines.

Sketchley management did not comment, but the main shareholder Mercury Asset Management with 17.1 per cent of the capital, accepted the offer.

Godfrey Davis offered five new shares and 350 pence in cash for three Sketchley shares, which was equivalent to 380 pence per share.

Sketchley jumped 38 pence on the news to 402 pence, easing later to 386 pence.

The market was expecting a counter bid.

Sketchley made improved taxable profit in the year to March 1989 of 17.3 million pounds on turnover of 217 million pounds, compared with 13.4 million pounds on turnover of 181 million pounds the previous year.

But in April to September 1989 the pre-tax profit fell by 25 per cent to 5.4 million pounds, and turnover fell by 11 per cent to 92.2 million pounds, compared with the same period the previous year.

Godfrey Davis made improved pre-tax profit of 17.1 million pounds on turnover of 256 million pounds in 1988 compared with 13.9 million pounds on turnover of 222 million in 1987. The company has said that it expects that its taxable profits will have risen by 26 per cent in 1989 to 21.5 million pounds.

In making the bid, Godfrey Davis management said that the Sketchley board

was inconsistent in its strategy.

BRUSSELS (FEB. 12) - A growing number of mysterious objects have been sighted in skies over Belgium, raising Ufo (unidentified flying object) fever to new levels.

After the first sightings several weeks ago, things had quieted down, but over the past few days many witnesses have come forward, claiming to have seen huge forms hovering over houses and streets.

People's accounts of what they had seen were remarkably similar: they all reported that the Ufos were triangular in shape, up to 50 metres wide and 70 metres long.

The objects glided through the air almost in silence, as if they were propelled by an electric motor. Sometimes they stopped, lighting up the ground with swivelling searchlights, other times they move at great speed.

At the end of November, two policemen spotted an Ufo in eastern Belgium, near the border with West Germany, and pursued it in their car for several kilometres. Since then, more than 600 people all over Belgium have noticed strange goings-on in the sky and reported their findings to Ufo experts.

Fifty Belgians were attending a soccer match when they saw a huge flying object hovering over the pitch. As a result, the match was interrupted.

Other witnesses have reported that the Ufos flew close to power lines, as if trying to recharge their energy supplies.

In another incident, a couple in Charleroi saw a disc-shaped object over their house, lighting up the garden with its bluish glow. The next morning the electricity cables near where the light was most intense were severed the couple said.

TAIPEI, Feb 12 (AFP) - Taiwan is to open direct trade ties with the Soviet Union in response to calls from the business community to ease trade restrictions with the communist nation, a cabinet official said Monday.

Following rapid-fire political changes in Moscow, cabinet ministers agreed Monday to permit local businessmen to trade directly with the Soviet Union, Taiwan's largest trading partner in Eastern Europe, the official said.

Opening direct trade would enable local exporters to diversify their overseas outlets and help Taiwan manufacturers acquire cheaper raw materials, the cabinet official said, adding that the policy would become effective after the approval of Premier Lee Huan, expected this week.

The right-wing Nationalist government here has allowed only indirect business contacts between its citizens and the Soviet Union and Albania, which it considers hostile. Trading with other Eastern European countries is unrestricted.

The Soviet Union indirectly shipped 105.57 million U.S. dollars' worth of goods to Taiwan last year, a 242 percent surge over 1988, according to statistics compiled by the Board of Foreign Trade (BOFT).

And sales by this export-oriented island to the Soviet market were multiplied by a factor of 10 in the same period, growing 914 percent to 35.77 million dollars.

The most exported items were consumer goods, electrical appliances and information products while lumber, minerals and industrial raw materials comprised the bulk of imports from the Soviet Union, the BOFT said.

Taipei will open trade offices in Moscow once the cabinet officially allows direct trade with the Soviet Union, Vice Economic Minister Wang Chien-shien said last month.

Eastern Cosmetic Corp., a Taiwan-based manufacturer, has said it would set up a 10-million-dollar joint-venture beauty products factory in the Republic of Georgia in Taiwan's first investment in the Soviet Union.

#90043d8450 02/12/1990 ~French/German News Agency

BEIJING (FEB. 12) - China plans to cut down on imports of certain building materials to save on foreign exchange needed to pay off the country's 40-billion-dollar foreign debt, a published report said here Monday.

The official China Daily, citing an official of the State Bureau of Building Materials Industry, said China can produce materials of similar quality itself and avoid squandering its hard-earned foreign exchange.

The official said the move was justified because China had to use its hard currency to pay off the country's foreign debt.

China imported 2.34 billion dollars' worth of building materials between 1980 and 1988, the official said.

The English-language daily said the measure would affect the import of materials which China had a capacity to produce such as certain types of glass, glass fiber, plastics, flax or cotton wallpaper, plaster stone plates, aluminum alloy doors and marble and granite stone plates.

The restriction follows the December devaluation of China's currency, the yuan, by 21.2 percent, a move making imports that much more expensive and the foreign debt more burdensome.

The official said the restrictions were not deep enough as the list of affected items only concerned some 10 percent of all imports of building materials.

He suggested that more items be restricted, including imports of cement, certain porcelain wares and kinds of glass.

China produces 200 million tons of cement a year and should be able to export three million tons a year by 1995, the daily said.

After encouraging a rash of hotel construction in the late 1970s, Beijing announced early this month that no more major hotels would be built 0for several years.

The announcement is in line with an austerity plan launched in September 1988 to rein in the country's then double-digit inflation.

#90043d8500 02/12/1990 ~French/German News Agency

TEHERAN (FEB. 12) - French and Japanese firms have been awarded contracts to rebuild two oil platforms in the southern Gulf that had been destroyed by the U.S. Navy, Oil Minister Gholamreza Aqazadeh announced here.

The minister, quoted Monday in the newspaper Islamic Republic, said Neptune Style and Toyomenkava of Japan would repair the Salman platform.

The 300-million-dollar contract was signed by the Iranian Oil Ministry and authorities in Abu Dhabi, United Arab Emirates, as the platform is located in waters shared by Iran and the UAE.

Costs incurred by the companies in the reconstruction of the Salman facility would be reimbursed through oil deliveries from Iranian and UAE reserves once the platform is operational, Mr. Aqazadeh said.

The French company Entreprise pour les Travaux Maritimes (ETPM) will repair the Nasr platform near Sirri island, which can produce 100,000 barrels a day, he told the paper. He put the value of the contract at 45 million dollars.

The U.S. Navy patrolled the waters of the Gulf during the eight-year Iran-Iraq war, principally to defend U.S.-registered Kuwaiti tankers against possible Iranian attack.

But U.S. forces opened fire on the platforms in retaliation for what officials in Washington said had been provocation by Iranian naval units.

#90043d8520 02/12/1990 ~French/German News Agency

Taipei (FEB. 12) - Taiwan's Board of Foreign Trade (Boft) announced Monday the lifting of import restrictions on a number of agricultural and industrial raw materials from mainland China.

Alexander Chen, a spokesman for the Boft, said the move was an attempt to help local businessmen suffering from rising production costs to better compete in international markets.

A total of 61 new items was approved, bringing the total number of goods approved for indirect import from the mainland to 153. The new items include zinc ingots, tin foil, lumber, dried watermelon seeds, and garlic bulbs.

The plan still needs the approval of the ministry of economic affairs.

Direct trade and contact between the two sides has been banned since the Kuomintang government retreated to Taiwan after losing the mainland to the Chinese communists in 1949.

Despite Taipei's official ''three no's policy'' - no contact, no compromise and no negotiations with China - during the past two years the government has allowed increasing non-official, people-to-people contacts, and has turned a blind eye to increasing business ties.

Indirect trade between the two sides - mainly channeled through Hong Kong - reached an estimated record 3.5 billion U.S. dollars in 1989, according to the Boft, up from 2.72 billion dollars the year before. Trade is expected to increase further in 1990.

#90043d8530 02/12/1990 ~French/German News Agency

LONDON (FEB. 12) The higher than expected 0.8 percent rise in British factory output prices in January, giving a year-on-year rise of 5.2 percent, undermined the Sterling sector, dealers said here on Monday.

Three-month interbank rate rose to 15-14 percent from 15-18 percent, while

the 9-12 percent gilt due '99 dipped to 90-1732 from 90-2632.

Other data included January output prices, which were down 0.9 to give a year-on-year rise of 3.0 percent, and January retail sales, which fell by 1.3 percent against forecasts of a 0.9 percent drop.

In the German sector, talk of German currency union and reunification continued to undermine sentiment.

The 7-14 bund due Jan 2000 dipped to 91.60 from 92.92 on Friday. The French sector followed the Germans, but to a lesser degree. The 8-18 percent O.A.T. due '99 dipped to 88.87 percent from 89.23 on Friday.

OSLO (FEB. 12) - The Norwegian shipping and engineering group Kvaerner earned pre-tax profits of 719 million kroner (111 million dollars) last year, up from 381 million kroner in 1988, the company announced today.

Total revenues increased from 8.5 to 9.8 billion kroner (1.520 billion dollars) in the same period.

Kvaerner's shipping division was most profitable, with earnings of 430 million kroner, followed by the engineering division (200 million kroner).

The off-shore division lost 165 million kroner.

The company expects its 1990 results to be even better, chief executive Erik Toenseth told a press conference here.

#90043d9030 02/12/1990 ~French/German News Agency

PARIS (FEB. 12) - France's second violent storm in two weeks has left major damage, particularly in the west of the country, and one person missing, authorities said Monday.

Fifteen crewmen were waiting to be evacuated by helicopter from a Cypriot freighter, the Breithorn, that developed technical problems early in day off Lorient, on the Atlantic coast.

But 90 kilometer-an-hour (55 mph) gales and waves up to 15 meters (almost 50 feet) high were impeding the rescue operation.

In the southeast, a man who took his catamaran out Sunday was feared lost after his boat washed up empty on a beach at Vignerolles.

Winds of up to 155 kilometers an hour (95 mph) battered the Brittany coast, overturning a 75-ton crane in the port of Brest, while a 77-year-old woman had her foot sliced off when a gust slammed shut a metal door.

In the southwestern resort of Biarritz, tables and chairs at beach-side cafes were swept along for 50 meters (yards) when the sea flooded the boardwalk, while huge waves crashed over a breakwater and damaged cars at Ciboure, near Saint-Jean-de-Luz.

Wind also partly destroyed a shopping center near the western city of La Rochelle.

A storm on February 3 killed 23 people in France, 13 of them in the Paris region.

#90043d9050 02/12/1990 ~French/German News Agency

NUUK, Greenland (FEB. 12) - U.S. officials have authorized Soviet scientists and military experts to visit the U.S. radar base at Thule, northwestern Greenland, radio reports said here Monday.

The Soviet Union has long argued that the sophisticated base violated the Anti-Ballistic Missile treaty signed by Washington and Moscow in 1972 and vainly requested inspection by Soviet experts.

But Washington had rejected allegations that the Thule radar was an offensive facility that threatened the security of the Soviet Union.

Last October the U.S. administration acknowledged Soviet "concern" over Thule and the Fylingdales radar station in Britain and pledged to move on the inspection issue.

Danish Foreign Minister Uffe Ellemann-Jensen welcomed the U.S. authorization Monday, saying Denmark and Greenland had backed the inspection demand for years.

"The warning radar at Thule will have a particularly significant position in view of nuclear disarmament," Mr. Ellemann-Jensen said.

Greenland is a Danish county with full internal self-government but Copenhagen remains in charge of its defence and foreign policy.

Mr. Ellemann-Jensen earlier said the Thule radar was a "barking basset hound that will not bite."

#90043d9190 02/12/1990 ~French/German News Agency

LONDON (FEB. 12) - The British agrofoods group Dalgety earned pre-tax profits of 57.1 million pounds (94.2 million dollars) in the second half of 1989, a rise of 10.4 percent on the figure for the same period in 1988, the company said here Monday.

Sales in the same period - the first half of Dalgety's accounting year - were 2.46 billion pounds, up from 2.32 billion pounds in the same period of 1988.

The results were well above analysts' expectations, and Dalgety's stock fell by just one penny in early trading, on a market which was moving sharply downwards.

An interim dividend was set at 7.15 pence, as against 6.5 pence a year earlier. Earnings per share were 16.7 pence, as against 15.2 pence.

#90043d9210 02/12/1990 ~French/German News Agency

ATHENS (FEB. 12) - The Greek national unity government broke down Monday after a dispute with Prime Minister Xenophon Zolotas and is to be replaced by a cabinet virtually without political affiliation, officials said here Monday.

The new government composed of members of the caretaker national unity cabinet which ruled between October 12 and November 22 would be sworn in Tuesday, the officials said.

The announcement was made after the government grouping conservatives, socialists and communists broke down following a row between Prime Minister Xenophon Zolotas and leaders of the three main parties.

Mr. Zolotas said that almost all ministers with party affiliation would be replaced by technocrats who ran the shortlived government of Yannis Grivas last year.

The prime minister earlier met with leaders of the three parties which backed his government, Constantin Mitsotakis of the conservative New Democracy party, Andreas Papandreou of the Pan-Hellenic Socialist Movement (PASOK) and communist Harilaos Florakis.

Mr. Zolotas said the three leaders had pledged support for his new government. The new cabinet list was to be published later Monday after a meeting between Mr. Zolotas and President Christos Sartzetakis.

The interim cabinet to be sworn in Tuesday will be the fourth multi-party government in seven months.

Greece has had no stable government since June 18 when a general election gave no clear majority to any party. Another election on November 5 produced a similarly inconclusive outcome.

Mr. Florakis, leader of the communist-dominated Coalition of the Left for Progress, said friction and divergences between members of the outgoing government had become so frequent and entrenched that "we couldn't go on like that any more".

Mr. Zolotas himself will keep his post. He has no party affiliation but is reputed to be a liberal.

Foreign Minister Antonis Samaras (New Democracy), Economics Minister Georges Gennimatas (socialist) and Defence Minister Tzannis Tzannetakis (New Democracy) were said to leave the government. They were expected to be replaced by ambassador Georges Papoulias, former EEC commissioner Georges Kontogiorgis and admiral Theodoros Deyannis.

Mr. Samaras is to stay in charge until his return from the Open Skies conference in Ottawa where he will meet with his Turkish counterpart Mesut Yilmaz.

Last Thursday, Mr. Mitsotakis said that the "chaotic" situation in the country was turning Greece into "a Third World nation".

He said domestic policy was paralysed by the government's "inability" to take or enforce any decision due to persistent disagreements between the parties represented in the cabinet.

Former socialist premier Andreas Papandreou's army promotions had been one of the reasons for the latest dispute in cabinet ranks.

Greeks are to vote in legislative elections on April 8 for the third time in less than a year.

The 300 members of the Greek parliament are due to vote on February 23 to elect a new president to replace Mr. Sartzetakis. Mr. Sartzetakis has said he will not seek reelection and there are no other candidates so far.

#90043d9230 02/12/1990 ~French/German News Agency

CAPE TOWN (FEB. 12) - U.S. black civil rights activist and politician Jesse Jackson met with South African President Frederik de Klerk here Monday and compared him to Abraham Lincoln, the anti-slavery president of the U.S. civil war era.

Shortly before he met Mr. De Klerk at his official residence, the Reverend Jesse Jackson likened his "courage" in freeing South African black nationalist leader Nelson Mandela to that of Lincoln, one of the great heroes of U.S. history.

In an address at the Cape Town Press Club, Mr. Jackson congratulated Mr. De Klerk warmly for deciding to release Mr. Mandela, leader of the African National Congress (ANC), on Sunday after 27 years in prison.

Mr. Jackson, who has been visiting South Africa since early last week, also urged Mr. Mandela and Mr. De Klerk to build on their relationship. The two have met twice at the presidential residence Tuynhuys, on December 13 and last Friday.

"On a society torn apart with fear and distrust, leaders mist show courage and the capacity o be bridge-builders", he told the press club.

Before meeting the South African President, Mr. Jackson held talks with Foreign Minister Pik Botha, who said they had had an "open and fruitful exchange of views".

During the 40-minute meeting, the two "discussed the removal of discrimination, of apartheid, and the future of South Africa", Mr. Botha added.

#90043d9260 02/12/1990 ~French/German News Agency

MOGADISHU (FEB. 12) - Somalia's development plans have been badly hampered by inadequate external financial aid, recurrent drought and other factors, a senior government official said here Monday.

Programmes to boost growth in the private sector, in food production and rural development had therefore not yielded the desired results, permanent secretary at the foreign ministry Ahmed Mohamed Aden said at the opening of a three-day symposium on Somalia's development needs in the 1990s.

Director General in the National Planning Ministry Hussein Elabe Fahiye said that for Somalia to achieve its target 5.5 per cent annual growth rate, it would require additional efforts to mobilize both domestic and foreign resources.

Somalia, one of the world's poorest countries, at present has no government. President Mohamed Siad Barre dissolved his cabinet January 9 complaining that his ministers had failed to tackle the country's economic and social problems.

#90043d9310 02/12/1990 ~French/German News Agency
HANOVER, WEST GERMANY (FEB. 12) - East and West Germany are to co-operate on energy production and related environmental problems, officials of the giant West German group Preussen Elektra said Monday.

A preliminary agreement was signed here by officials from East Germany's electricity generating industry and from Preussen Elektra and the Bayernwerk company in the west.

One of the first results of the agreement is expected to be the building of conventional power stations in the West German Baltic city of Luebeck and in Rostock, further along the coast in East Germany.

Later, the parties to the agreement plan to set up joint ventures, shared equally between East and West.

In a separate development, the West German precious metals and chemicals group Degussa said on Monday that it was opening offices in both East Berlin and Dresden, after receiving approval from the East German authorities.

Degussa said the offices would be used to recruit East German staff, who will undergo training in West Germany.

The company, one of the 20 biggest in West Germany with 1987-88 sales of some 13.6 billion Deutsche marks (8.1 billion dollars), is asking former employees to come out of retirement to take part in the training program.

PARIS (FEB. 12) - The main French airline pilots' union on Monday called on its members working for the national carrier Air France to strike next Saturday and Sunday.

The strike call came as a separate two-day walk-out by all French airline pilots and mechanics was due to end here late on Monday.

Air France's management stressed that talks were underway on the pilots' demands. The union is calling for increased salaries, better working conditions and an end to what it describes as "the transfer of Air France's activities to other companies."

The new strike is likely to cause major disruption in the airline's 300 daily medium and long-haul flights over the weekend.

#90043d9390 02/12/1990 ~French/German News Agency
NEW DELHI (FEB. 12) - Afghan Foreign Minister Abdul Wakil arrived here Monday for talks on the eve of the first anniversary of the Soviet troop withdrawal from Afghanistan.

Mr. Wakil was greeted by Indian Foreign Minister Inder Kumar Gujral on his arrival for the four-day visit, his first since Prime Minister Vishwanath Pratap Singh's National Front government took power in November.

He is to hold talks with the Indian ministers of defence, civil aviation and communication, in addition to Mr. Gujral.

His visit will end with a press conference Thursday before flying back home.

New Delhi has maintained friendly ties with the Soviet-backed Afghan government of President Najibullah.

Mr. Gujral said in a message to a seminar here Sunday that a negotiated Afghan settlement would help the "restoration of peace and stability in our region."

"We are for the strict and sincere implementation of the Geneva accords by all parties", Mr. Gujral said, adding that India supported a peaceful settlement among the Afghans themselves without external interference.

#90043d9600 02/12/1990 ~French/German News Agency

MILAN, Italy (FEB. 12) - Edizione, the holding company of the Italian leisurewear and ski equipment empire Benetton-Nordica, has agreed to sell its 50 per cent stake in the Italian subsidiary of the British insurance company Prudential to a French group, Edizione said here Monday.

Under the agreement, said to be worth between 80 and 100 billion lire (64 and 80 million dollars), the French group Abeille is to take over Prudential Italy's general-risk insurance sector, while the British parent group will continue to run the company's recently-launched life insurance operation.

Gianni Mion, a top official of Edizione, said the company was also pulling out of its two other holdings in the financial services sector - a 12 percent stake in the regional Banca del Friuli and a 21 percent holding in the ISA banking group.

He said the moves would allow Edizione, which holds 80 percent of the Benetton leisure-wear group and 100 percent of the Nordica ski company, to further strengthen its industrial activities, notably through Nordica.

The agreement is expected to be approved next week by the boards of the companies concerned.

Edizione had consolidated sales of some two trillion lire (1.6 billion dollars) last year.

MADRAS, India (FEB. 12) - Guerrillas from the Liberation Tigers of Tamil Eelam (LTTE) have killed seven Indian troops in an ambush in Sri Lanka, the Indian army said here Monday.

An unspecified number of soldiers belonging to the army engineering corps of the Indian Peace-Keeping Force (IPKF) were attacked by LTTE men at Kanniya in Sri Lanka's Trincomalee district late Sunday, an IPKF news release said.

The IPKF personnel were returning from doing renovation work on a temple when their vehicle was ambushed, it said.

LTTE sources in this southern Indian city accused the IPKF of having gone to the rescue of Eelam National Libertion Front, a rival Tamil group, in a fight between the two factions recently.

All the major Sri Lankan Tamil groups have their offices here, the capital of predominantly Tamil Nadu state.

Indian troops were dispatched to the neighbouring island nation under the 1987 India-Sri Lanka peace pact.

Meanwhile, a LTTE delegation led by Anton Balasingham has arrived here for another round of talks with Tamil Nadu chief minister Muthuvel Karunanidhi beginning Tuesday.

Mr. Karunanidhi, whose ethnic Tamil Dravida Munnetra Kazhagam is administering Tamil Nadu, has been asked by Indian Prime Minister Vishwanath Pratap Singh to mediate with Tamil groups to help solve the problem of Tamil separatism in Sri Lanka.

#90043d9930 02/12/1990 ~French/German News Agency

BEIRUT (FEB. 12) - Rival Christian fighters traded sporadic artillery fire Monday in mountains north of the Lebanese capital, where both sides have reportedly sent reinforcements.

The Lebanese Forces (LF) militia said it was using French-built Milan missiles to repel attacks launched by Lebanese Army soldiers loyal to General Michel Aoun.

But the fighting was less heavy than Saturday, when the army mounted its bid to capture the mountainous LF stronghold of Kesrouan, some 20 kilometres (12 miles) from Beirut, security sources said.

At least 491 people have been killed and 1,832 wounded, mostly fighters rather than civilians, since a battle for supremacy in Christian territory erupted January 31, according to a new toll compiled from hospital reports.

Troops and militiamen also battled with artillery earlier Monday in Ashrafiyeh and Ain Remmaneh, LF-dominated residential areas in Christian east Beirut surrounded by Aoun loyalists.

Fighting in east Beirut was sporadic over the weekend, but residents, who have been forced to take shelter in basements without water and electricity,
said they feared a major onslaught by the army.

Two figures from the Maronite church had almost 10 hours of talks Sunday with Gen. Aoun at his headquarters in the Baabda presidential palace, but the meeting apparently ended without result.

The warring factions have ignored nine cease-fires since the fighting erupted with Gen. Aoun's call for LF fighters to lay down their arms.

Western military experts say Gen. Aoun will soon have to decide whether to

focus his firepower on Ashrafiyeh and Ain Remmaneh or Kesrouan further north.

Attacking LF positions in the capital would entail major political risks in light of the enormous civilian losses such an assault would cause, they said.

But taking Kesrouan would require a huge troop commitment, forcing the general to redeploy troops from positions opposite Syrian forces.

NEW YORK, United Nations (FEB. 12) - U.N. Secretary General Javier Perez de Cuellar wants the five permanent members of the Security Council to give the world body a precise mandate to intervene in Cambodia, diplomats said Monday.

Mr. Perez de Cuellar told ambassadors of the five nations -- China, France, Britain, the Soviet Union, and the United States -- during a meeting Monday that the United Nations needed a clearly defined and realistic operational plan, the diplomats said.

U.N. intervention in the Southeast Asian nation was approved in principle by the five permanent council members during a January 15-16 meeting in Paris.

Mr. Perez de Cuellar said the cost of such an intervention -- estimated to be high -- should be studied carefully, the diplomats said.

Analysts here said it was likely more U.N. personnel would go to Cambodia -- where an alliance of three rebel groups has been fighting since 1979 to oust the Hanoi-installed government in Phnom Penh -- than have gone to Namibia to oversee that African territory's transition to independence.

The United Nations has dispatched more than 7,000 military, police and civilian observers to Namibia, a territory formerly controlled by South Africa which elected an assembly in November to write a constitution.

The five permanent Security Council members were due Monday to define the U.N. role in observing a cease-fire in Cambodia and forming a provisional U.N. administration there in a run-up to U.N.-supervised elections for a new government.

The United Nations has formed a task force headed by Mr. Perez de Cuellar to study these issues, a U.N. spokesman said.

NAIROBI (FEB. 12) XINHUA - THE PAN AFRICA PAPER MILLS OF KENYA, THE LARGEST PAPER PRODUCER IN EAST AND CENTRAL AFRICA, IS CARRYING OUT AN EXPANSION PROJECT TO BOOST ITS ANNUAL PRO- DUCTION FROM 66,000 TONS TO 131,000 TONS.

THE COMPANY'S GENERAL MANAGER V.D. SABOO WAS QUOTED AS SAYING BY LOCAL PRESS TODAY THAT THE MOVE IS PROMPTED BY KENYA'S INCREASING DEMAND FOR PAPER PRODUCTS WHICH IS ESTIMATED AT 130,000 TONS ANNUALLY.

STATISTICS SHOW THAT LOCAL CONSUMPTION REACHED 120,000 TONS IN 1988, EXCEEDING THE COUNTRY'S PRODUCTION BY 22,000 TONS.

IN A RECENT REPORT THE COMPANY ATTRIBUTED THE GROWING DEMAND OF PAPER PRODUCTS TO THE PROVISION OF EDUCATION FACILITIES AND RAPID URBANIZATION.

SINCE IT WAS ESTABLISHED IN 1974, THE COMPANY HAS SAVED KENYA AN ESTIMATED 5.8 BILLION SHILLINGS (ABOUT 268 MILLION U.S. DOLLARS) THROUGH THE SUBSTITUTION FOR IMPORTS AND EARNED 403 MILLION SHILLINGS FROM EXPORTS.

OREM, UT (FEB. 12) PR NEWSWIRE - Wicat Systems Inc. (NASDAQ: WCAT), announced today that it was awarded a contract by All Nippon Airways of Tokyo, Japan for a computer-based training system.

The contract award is valued at approximately $360,000.

Under the terms of the contract, Wicat will provide a 2255 fileserver and 12 WITS 2000 student workstations. Initially, the training system will be used to deliver Boeing 747-400 maintenance courseware. Delivery is scheduled for March at All Nippon's Haneda Airport facility.

"Our aviation training expertise has allowed us to build a dynamic list of aviation clients. We are pleased to have All Nippon join us as the most recent addition to our growing number of clients in the Pacific Rim," stated Robert Medenhall, president and CEO. He went on to say that other Pacific Rim customers include, Japan Air Lines, Cathay Pacific, Thai Airways, Singapore Airlines, and Korean Air.

Wicat Systems is a world leader in technology-based training and education

solutions, providing products and services to help clients achieve 30 to 50 percent learning improvement in schools, industry and government. Wicat's stock is traded in the NASDAQ market under the symbol WCAT.

#90043p0153 02/12/1990 ~PR Newswire

LEXINGTON, KY. (FEB. 12) PR NEWSWIRE - Record life insurance sales for 1989, along with an increase in net earnings, was reported today by Kentucky Central Life Insurance Company (NASDAQ-NMS: KENCA).

The announcement was made by W.E. Burnett, Jr., chairman of the board and president of the 87-year-old Lexington-based insurer.

The company had $17.5 billion in life insurance sales for the 12 months ended December 31, 1989, compared to $14.1 billion for 1988, an increase of 24 percent.

Life insurance in force at year-end was $48.6 billion, compared to $39.5 billion a year ago, an increase of 23 percent. A goal of $50 billion of life insurance in force, established in 1984, will soon be reached.

Net earnings for 1989 were $35.2 million, compared to $34.6 million for the previous year, up 2 percent. On a per share basis, earnings rose from $2.56 per share to $2.60 per share.

For the fourth quarter of 1989, net earnings amounted to $4.7 million, equal to 35 cents per share, compared to $8.6 million, or 63 cents per share, for the corresponding quarter a year ago.

Fourth quarter earnings were affected by the recalculation of the provision for estimated federal income tax, resulting in a 55 percent increase over third quarter estimates.

Revenue gains for 1989 were satisfactory. Total revenue was $433.2 million, compared to $382.5 million for 1988, a gain of 13 percent.

CHICAGO (FEB. 12) PR NEWSWIRE - R.R. Donnelley and Sons Company (NYSE: DNY) announced today that the Federal Trade Commission has requested additional information relating to Donnelley's acquisition of the

Meredith/Burda Companies.

In late 1989, Donnelley announced that it had entered into a definitive agreement with Meredith Corporation and Franz and Frieder Burda, joint owners of Meredith/Burda, to acquire Meredith/Burda's four printing plants and three pre-press facilities. The FTC's request extends the waiting period required by law and will delay the closing of the agreement beyond the first quarter of 1990.

#90043p0157 02/12/1990 ~PR Newswire

PITTSBURGH (FEB. 12) PR NEWSWIRE - Equibank today announced the expansion of its five-year program aimed at helping low- and moderate-income home buyers throughout western Pennsylvania.

Known as the Affordable Home Loan Program, it will make $50 million available over a five-year period at a below-market, fixed interest rate with no discount points, application or origination fees, according to Nicholas Zennario, Equibank president.

Qualified buyers in low- and moderate-income areas can obtain financing under this program to purchase existing property, acquire and rehabilitate a residential dwelling or build a new home.

"This new program significantly expands Equibank's community reinvestment commitment which already includes substantial business and consumer loan portfolios in low- and moderate-income neighborhoods, small business support programs, minority enterprise assistance and a host of funding and support efforts for civic and educational purposes," Zennario said.

"The Affordable Home Loan Program is one more illustration that Equibank is a healthy, committed partner in community development," he said.

Recently, however, Equibank's mortgage lending record in certain census tracts in the City of Pittsburgh between 1984 and 1988 was called into question.

In 1984, Equibank was in severe financial difficulty. As part of its successful effort to solve its problem and become a vital community resource, Equibank sold its mortgage portfolio and virtually ceased mortgage origination.

Once the new management team returned the bank to profitability and preserved the jobs for the vast majority of its almost 2,000 employees, it was then able to reactivate its mortgage lending business in 1988. At

that time, Equibank hired a senior mortgage lender, created a mortgage department, and took the steps necessary to reestablish itself in the mortgage business in 1989 and beyond.

Equibank's reentry into the mortgage business has achieved significant results in a very short period of time. Equibank made more mortgage loans in the City of Pittsburgh in 1989 than in the previous five years combined. Additionally, mortgage loans in low- and moderate- income areas increased sevenfold between 1988 and 1989. Today, Equibank is a major underwriter of mortgages and is actively seeking that business, according to Zennario.

Equibank is a subsidiary of Equimark Corp., a diversified financial services institution with $3.8 billion in assets. Equibank, with assets of $3.1 billion, operates 56 offices in southwestern Pennsylvania.

CONTACT: Nicholas J. Zennario, president, 412-288-5300, or

#90043p0159 02/12/1990 ~PR Newswire
BINGHAMTON, NY (FEB. 12) PR NEWSWIRE - Centuri, Inc. (NASDAQ: CENT), today announced that its wholly-owned subsidiary, Outdoor Sports Headquarters, Inc. (OSHI), has acquired Munson Sporting Goods Co., Inc., a distributor of outdoor sporting goods, from Intermark, Inc. (AMEX: ISI), a La Jolla, Calif.-based diversified operating and holding company.

The purchase price was not disclosed.

Munson Sporting Goods Co., Inc., distributes a variety of outdoor sports equipment including hunting, fishing, camping, marine and athletic

equipment, throughout the Far West from distribution centers located in Costa Mesa, Calif., and Fife, Wash. The company had approximately $39 million in sales in its year ended March 31, 1989. OSHI, a wholly owned subsidiary of Centuri, Inc., distributes similar sporting goods nationwide and had sales of approximately $182 million in its fiscal year ended Dec. 31, 1989. Other recently consummated acquisitions by OSHI are expected to add approximately $40 million to annualized sales in fiscal 1990.

Commenting on the transaction, Milton Koffman, chairman and chief executive officer of Centuri, Inc., said, "The acquisition of Munson Sporting Goods Co., Inc., will allow our sporting goods sales to exceed $250 million on an annualized basis. We look forward to servicing the extensive group of quality retailers served by Munson. We believe that, over time, we shall realize substantial economics of size as a result of this acquisition." The executive added that the transaction will provide the company with substantially increased market penetration in some of the fastest growing regions of the country.

OSHI is the largest nationwide distributor of hunting, fishing, camping and archery equipment in the United States. Centuri, Inc., in addition to OSHI, holds an 85 percent interest in Poloron Products, Inc. (NASDAQ: PPRI), which manufactures and markets modular and mobile housing through its Poloron Homes of Pennsylvania, Inc., subsidiary.

OTISVILLE, NY (FEB. 12) PR NEWSWIRE - Alliance Pharmaceutical Corp. (NASDAQ: ALLP) announced that it has elected two new members of its board of directors, expanding its membership from seven to nine members at a directors' meeting held Feb. 2, 1990. The two new members are Engelbert J. Guenster, Ph.D. and Thomas F. Zuck, M.D.

Dr. Guenster directs the international hospital products business at Boehringer Ingelheim GmbH (BI). Prior to joining Bioscientia (one of BI's affiliated companies) in 1983 as vice president-marketing and sales, he held various senior marketing positions with other pharmaceutical companies, including Sandoz and Miles Technicon. He received his Ph.D. in chemistry from the University of Mainz (West Germany) in 1975 and worked in research at the Institute of Polymer and Analytical Chemistry in Mainz. Dr. Guenster brings both research and international hospital marketing experience to the board of Alliance. BI owns approximately 5 percent of the equity in Alliance, and has marketing and distribution rights in some of Alliance's products.

Dr. Zuck is professor of Transfusion Medicine and director of Hoxworth Blood Center at the University of Cincinnati Medical Center. He was formerly director of the division of Blood and Blood Products at the Office of Biologics Research & Review with the U.S. Food and Drug Administration. He has served in numerous scientific and professional societies, including as president of the American Association of Blood Banks, and editor-in-chief of the journal, "Transfusion." Dr. Zuck is a retired U.S. Army Colonel, where he was a commander of the Letterman Army Institute of Research and, for many years, involved with the Army's blood substitute development program. Dr. Zuck received his LL.B from Yale Law School and his M.D. from the Hahnemann Medical College. He has served as a consultant to Alliance for more than one year.

Alliance Pharmaceutical Corp. is involved in the development, manufacturing and early-stage marketing of medical and pharmaceutical products. It is pursuing the commercial development of products in four fields of application: contrast agents for diagnostic imaging; oxygen-carriers, including use as a temporary blood substitute; cell growth factors and regulators; and immunology products. Research and development

efforts involving the contrast agents and oxygen-carriers are conducted at the company's San Diego facility. The activities associated with the cell growth factors and immunology products are conducted at the Otisville, N.Y. facility.

#90043p0170 02/12/1990 ~PR Newswire

OKLAHOMA CITY (FEB. 12) PR NEWSWIRE - Devon Energy Corporation (AMEX: DVN) today reported that both 1989 reserves and production established new records for the second consecutive year. Year-end 1989 proved oil and gas reserve estimates increased 35 percent above those of the prior year; also, 1989 oil and gas production rose 27 percent over 1988 figures.

Total proved reserves as of year-end 1989 rose to 178.6 equivalent billion cubic feet (EBCF) from 131.9 EBCF one year earlier (equating one barrel of oil to 6,000 cubic feet of gas in order to combine the two). Production for 1989 jumped to 11.9 EBCF from 9.3 EBCF in 1988.

The company attributed most of the reserve increase to its coal-seam methane gas interests in the Northeast Blanco Unit of the San Juan Basin. Devon Energy's Northeast Blanco Unit reserves grew by 185 percent to 90.3 billion cubic feet of natural gas from the year earlier figure of 31.7 billion. As of Sept. 30 and again as of year-end 1989, the company revised its reserve estimates upward for the unit. Also, in October and again in December of 1989, Devon Energy acquired additional interests in the unit.

Most of the company's reserves in this unit are associated with a 100-well project to produce natural gas from coal seams. Since the wells in the unit are just now being brought to producing status, the unit affected the company's year-end reserves but not 1989 production. The increase in production resulted from two oil and gas property acquisitions consummated in May and October 1988.

The company's year-end 1989 estimates of future net revenues and pre-tax 10 percent present value were $219.1 million and $137.3 million respectively. Again, these were record levels and were approximately 55 percent greater than the Dec. 31, 1988 levels.

All estimates of reserve volumes, future net revenues and pre-tax present value were prepared by independent reserve engineers using Securities and Exchange Commission guidelines.

#90043p0174 02/12/1990 ~PR Newswire

NEW YORK (FEB. 12) PR NEWSWIRE - Avon Products Inc. (NYSE: AVP) reported earnings from continuing operations in 1989 of $152.4 million, or $2.10 per share. This is an increase from 1988 of 26 percent from $121.1 million, or $1.66 per share, before a $20 million cumulative effect of an accounting change.

Sales increased eight percent to $3.3 billion from $3.1 billion in 1988. Net earnings in 1989 were $54.6 million, or 34 cents per share, after a non-cash charge of $97.8 million, or $1.76 per share, for discontinued health care operations. In 1988, Avon had a net loss of $404.5 million, or $6.79 per share, caused by losses of $545.6 million from discontinued operations.

The charge provided in the fourth quarter of 1989 was primarily for the two Mediplex health care divisions that had not been disposed of and reflects current realizable value. The company has reached an agreement in principle to sell all the shares of The Mediplex Group Inc. for $100 million in cash and notes immediately convertible to cash. The buyer will also assume Mediplex's leases, mortgages and liabilities.

With the sale, Avon will have divested all of its health care operations. Proceeds of the sale will be used to reduce debt.

James E. Preston, Avon's chairman and chief executive officer, said the company's emphasis on cash flow paid off in a dramatic reduction in debt. Consolidated total debt decreased to $838.1 million at the end of 1989 from $1.1 billion at the end of 1988. Debt was further reduced in early January to about $630 million after the sale of Avon's Parfums Stern subsidiary.

"Our 1989 results mark the fourth consecutive year of increases in sales and pre-tax profits in our core beauty and direct selling business," Preston said. "Once again our international businesses were especially strong, led by Latin America."

In the fourth quarter, Avon reported earnings from continuing operations of $72.1 million, or $1.12 per share, a 27 percent increase from $56.6 million, or 89 cents per share, in 1988.

Sales were $1.03 billion in the fourth quarter, up two percent from $1.01 billion in the same quarter of 1988. There was a net loss in the fourth quarter of $25.7 million, or 61 cents per share, after the charge for discontinued operations, compared with net earnings of $56.6 million or 89 cents per share in the fourth quarter of 1988.

U.S. direct selling sales in the fourth quarter declined less than one percent and pre-tax profit was off 11 percent. International sales were up three percent and pre-tax profit was up 14 percent. Retail sales were up nine percent and pre-tax profit was up more than 100 percent.

LONG BEACH, CA (FEB. 12) PR NEWSWIRE - CF Ocean Service, an international ocean freight company specializing in the complete movement of less-than-containerload shipments of import and export cargo, has named David Westurn managing director of operations in Australia and New Zealand.

Westurn most recently served as director of sales for CF Ocean Service at its headquarters in Long Beach.

"David's experience and expertise in the international freight shipping business will further strengthen our presence in the Pacific Basin." said Ned Moritz, general manager of CF Ocean Service. "His responsibilities will be to build and service our base of Australia and New Zealand customers and to increase our market penetration in these countries."

A 25-year veteran of the freight transportation industry, Westurn will oversee CF Ocean Service sales activities in Sydney, Brisbane, and Melbourne, as well as local agent relationships including: International Freight Forwarding, Adelaide, Australia; Strang Limited, covering freight operations throughout Australia; and Freightways International Limited, which provides broad coverage throughout New Zealand.

CF Ocean Service is operated by Con-Way Transportation Services, a $600 million regional trucking and intermodal freight transportation company based in Palo Alto, Calif. Con-Way Transportation Services also operates CF Truckload Service, a full truckload and intermodal rail piggyback company, Fort Worth, Texas; and the Con-Way regional next-day trucking companies -- Con-Way Western Express, Santa Fe Springs, Calif.; Con-Way Central Express, Ann Arbor, Mich.; Con-Way Eastern Express, Rutherford, N.J.; Con-Way Southern Express, Charlotte, N.C., and Con-Way Southwest Express, Dallas.

MONTVALE, NJ (FEB. 12) PR NEWSWIRE - The Great Atlantic & Pacific Tea Company, Inc. (NYSE: GAP) said today that it had completed the consolidation of its A&P Michigan operations into the Borman's subsidiary which it acquired last year, and announced the following organizational changes:

Robert Toomey, executive vice president of the company's Waldbaum, Inc. subsidiary, has been appointed group vice president for the combined Farmer Jack/A&P operations, reporting to Paul Borman, chairman of Borman's Inc. Borman will report directly to James Wood, chairman, president and chief executive officer of A&P.

James Madden, senior vice president of A&P, who was responsible for the past year's consolidation, will now focus on the Kohl's Food Stores' subsidiary in Wisconsin, A&P-Canada, and his other corporate responsibilities.

Marvin Biltis, formerly president of Farmer Jack, is considering reassignment to another A&P division. Marvin Berman, vice president-Farmer Jack operations and Thomas Montgomery, vice president-A&P operations, will now report to Toomey.

#90043p0185 02/12/1990 ~PR Newswire

RALEIGH, NC (FEB. 12) PR NEWSWIRE - A Nuclear Regulatory Commission report on Carolina Power & Light Co.'s (NYSE: CPL) Harris plant near New Hill indicates excellent performance.

The Systematic Assessment of Licensee Performance Report evaluates seven areas of plant performance. The Harris report identifies major strengths in the five areas of plant operations, radiological controls, emergency preparedness, engineering and technical support, and safety assessment and quality verification. The report also notes there were no major weaknesses identified in any functional area.

According to the NRC, "The assessment indicates significant progress has been made in five of the seven functional areas and that a superior level of performance has been achieved." The NRC suggests in its report that plant management increase its involvement in the other two areas of maintenance and surveillance, and security.

"There are many CP&L employees who contributed to the excellent performance of the Harris plant and we are committed to maintaining our performance at a high level," said Harris Nuclear Project Manager R. B.

Richey.

The annual NRC report on the Harris plant covers the period July 1, 1988, through November 30, 1989. It is a formal assessment that supplements the normal regulatory processes of the NRC. NRC reports of this type are issued routinely on all commercial nuclear power plants in the United States.

The NRC report evaluated the Harris plant's performance in seven areas. In each area, the plant is assigned a rating of one ("1"), two ("2") or three ("3"). A "1" rating indicates that reduced NRC attention may be appropriate; a "2" rating indicates that NRC attention should be maintained at normal levels; and a "3" rating indicates that increased attention should be given by both the NRC and the licensee.

In the report on the Harris plant, the NRC assigned five category "1's", two category "2's," and no category "3's."

The draft NRC report will be discussed at a metting of the NRC and CP&L Tuesday, February 20 at 1:00 p.m. The meeting will be at CP&L's Energy and Environmental Center near New Hill.

BRISTOL, VA (FEB. 12) PR NEWSWIRE - Charter Federal (NASDAQ-NMS: CHFD) announced today that it had signed an agreement to sell its credit card portfolio with approximately $29.1 million in receivables to First Atlanta Bank, NA, contingent upon approval from the Federal Trade Commission and the U.S. Justice Department. The sale is expected to be completed this month.

"We are very pleased by this pending sale, which was undertaken in keeping with our strategic plan announced in December 1989," said E.L. Byington, Jr., Chairman and Chief Executive Officer of Charter Federal. "The gain of approximatley $2 million we anticipate realizing from the sale will certainly hasten our return to profitability." Byington said the high cost of servicing the credit card portfolio and the relatively small size of the portfolio had prevented it from being profitable for Charter Federal.

This action is consistent with the capital plan filed by Charter Federal with the OTS, which provides for a drastic reduction in operating expenses reduction in total assets, elimination of high cost funding and restructuring of certain high cost operations.

First Atlanta Bank, NA, is a subsidiary of First Wachovia Corporation (NYSE: FW). It has issued credit cards since the late 1960s and currently processes over one million accounts with receivables exceeding $1 billion.

Charter Federal, which began operation in 1920, is a federally-chartered stock Savings Bank headquartered in Bristol, Virginia, with 35 branch offices throughout Southwest and Southside Virginia and East Tennessee.

WATERTOWN, MA (FEB. 12) PR NEWSWIRE - Summit Technology, Inc. (NASDAQ: BEAM) today announced -- the Visions '90 marketing seminar held in Venice, Italy Jan. 26, 1990 has resulted in orders of 14 ExciMed(tm) UV200 Ophthalmic excimer laser systems, representing sales of $4.2 million. The total company backlog is currently $6.0 million.

The Visions program, now entering its third year, focuses on educating ophthalmologists on the therapeutic applications of the excimer laser through in-depth didactic session and hands-on wet labs. Fifteen Visions '90 programs will be held throughout 1990 on both domestic and international locations. More the 100 physicians were trained at the Venice, Italy program and over 400 have attended Visions since the program's inception in 1988. Physicians may receive CME credits for the course.

Summit is now listed on the "Federal Reserve Board of Governor's List of Marginable OTC Stocks." This listing becomes effective Feb. 12, 1990.

Summit Technology, Inc. has established a leadership position in designing manufacturing and marketing medical excimer laser systems. A major focus of the company's business is in ophthalmology where applications have been developed for the treatment of common vision disorders including near-sightedness, far-sightedness, glaucoma, astigmatism, and superficial diseases of the cornea. To date, the Summit Technology ExciMed(tm) excimer laser systems have been used to treat several hundred patients in clinical trials domestically and internationally.

#90043p0195 02/12/1990 ~PR Newswire

PRINCETON, N.J. (FEB. 12) PR NEWSWIRE - CYTOGEN Corp. (NASDAQ: CYTO) announced today that EuroCetus B.V., the European subsidiary of Cetus

Corp. (NASDAQ: CTUS), has submitted an application to the Committee for Proprietary Medicinal Products (CPMP) requesting marketing approval for OncoScint(R) CR103.

OncoScint CR103 is a monoclonal antibody-based pretherapeutic imaging agent being developed for use in the diagnosis and follow-up of patients with colorectal cancer. The product was licensed to EuroCetus by CYTOGEN as part of an agreement reached in October 1989.

"The OncoScint product filing is consistent with our plan to offer the oncology community a range of novel, complementary, proprietary and licensed products supported by a highly responsive, specialized service-oriented organization," said Filippo La Monica, president, EuroCetus.

OncoScint CR103 uses a novel site-specific linker technology proprietary to CYTOGEN. The product, which will be supplied by CYTOGEN, is a fast, simple and easy to prepare kit. In September 1989, CYTOGEN submitted a Product License Application (PLA) to the Food and Drug Administration (FDA) requesting approval to market OncoScint CR103 in the United States.

The CPMP, which meets in Brussels on a regular basis, acts as a centralized body for the review of applications for approval of biotech and high-tech drugs and to issue opinions regarding drug approvals for member countries of the European Community (EC). The committee is comprised of representatives from the EC member nations. The rapporteur or sponsoring country for the OncoScint product submission is The Netherlands.

Monoclonal antibody-based imaging agents are being developed in nuclear medicine to detect and stage cancer and to monitor patients with suspected recurrent disease. Upon injection into the patient, the monoclonal antibody seeks out and binds to specific malignant cells. Radioactivity from an isotope attached to the antibody is then detected outside the body by a gamma camera, which visualizes the exact location and extent of disease.

The Western European cancer diagnostic market is growing rapidly. The need for early detection of primary and recurrent cancers has increased the demand for more precise preoperative and pre-treatment staging.

The CYTOGEN and EuroCetus agreement is an exclusive distribution and supply arrangement covering the marketing of CYTOGEN Corp.'s OncoScint and OncoTec cancer diagnostic imaging product lines in Europe. Other CYTOGEN products covered by the agreement which are in advanced stages of development include agents for detecting ovarian and prostate cancers.

CYTOGEN Corp. is a biopharmaceutical company which has developed proprietary systems for linking drugs and diagnostic agents to monoclonal antibodies in order to optimize the function of the antibody as a delivery

vehicle. With major emphasis on human cancer, current product development efforts at CYTOGEN are focused on improved cancer diagnostic imaging agents and the targeted delivery of cancer therapeutic agents directly to tumor sites.

Cetus Corp. is a leading biotechnology company primarily engaged in the development, manufacture and marketing of pharmaceutical products to treat cancers and serious infectious diseases. The company is also developing commercial applications of its GeneAmp(TM) polymerase chain reaction (PCR) technology. Founded in 1971, Cetus is based in Emeryville, Calif., and also operates in EuroCetus in Amsterdam, Netherlands.

LOS ANGELES (FEB. 12) PR NEWSWIRE - RTD's Transit Police is the most qualified law enforcement organization to provide security for passengers and facilities on the Metro Blue Line when it opens in July, the RTD board of directors has decided.

After hearing presentations for Blue Line security plans from the Los Angeles County Sheriff's Department and RTD Transit Police, the board voted 9-2 to give the assignment to RTD's police force, citing the force's superior knowledge in transit-related crimes and problems as a crucial deciding factor.

"While we recognize the L.A. County Sheriff's Department as a first-rate law enforcement organization, we have given our vote of highest confidence on Blue Line security matters to the RTD Transit Police," said RTD Board President Gordana Swanson. "The Transit Police also has demonstrated its excellence over the years, and it has the added experience of having worked exclusively in a transit atmosphere.

"We give the Transit Police our full support, knowing that Blue Line passengers and equipment will be safe under its watchful eyes," Swanson said.

The Los Angeles County Transportation Commission (LACTC) recommended that the Sheriff's Department handle Blue Line security at an estimated cost of $10 to $11 million a year on a contract basis. The board opted to assign the Transit Police to the task at an estimated cost of $6.7 million yearly.

"As operator of the Blue Line, the RTD board of directors believes it has taken the most prudent, cost-effective step in giving this assignment to the Transit Police," Swanson said. "We appreciate the LACTC's support on

this matter, and look forward to working with the Commission in obtaining adequate funding levels to keep the Blue Line safe and attractive for all future riders."

#90043p0198 02/12/1990 ~PR Newswire

HOLMDEL, NJ (FEB. 12) PR NEWSWIRE - Researchers at AT&T Bell Laboratories have reported the first fabrication and data transmission using two new types of photonic integrated circuits (PICs). A photonic integrated circuit uses light (photons) as well as electrons to process information.

The new devices are semiconductor chips that use integrated optical waveguides to pipe light from one optical device to the next. Both chips herald progress toward a practical means of fully utilizing the vast frequency or color range of the optical spectrum for fiber-optic communications.

One of the new chips, called a balanced heterodyne receiver PIC, can replace all the discrete optical devices needed for coherent reception techniques with a single semiconductor chip.

The PIC, several millimeters in size, is capable of receiving light signals using the same principles as conventional FM radio receivers. Its tuning range, however, is 35,000 times larger than the entire commercial FM radio spectrum, with access to a correspondingly larger information broadcast capacity.

This single optical chip may someday allow users to select from many tens of optical fiber broadcast channels in much the same way that radio receivers select radio channels. Each channel in such a system would be capable of carrying thousands of voice channels or a digital high-definition TV signal.

The other new PIC is a single-chip transmission source for use in optical fiber systems employing wavelength division multiplexing (WDM). This is a technique where a number of independent conventionally encoded optical signals of different colors can be combined onto the same optical fiber separated at the receiver using optical filters.

The WDM PIC, also several millimeters in size, integrates on a single chip four independently tunable high-speed quantum-well lasers. The lasers then combine their output through an on-chip optical amplifier for injection into a single fiber.

The chip has demonstrated error-free transmission with all four lasers

simultaneously transmitting at two billion bits per second, for a total of eight billion bits per. This corresponds to 125,000 digitized voice channels on a single optical fiber.

The progress on new PICs reported here stems from advances in crystal growth, processing techniques, and device design.

#90043p0202 02/12/1990 ~PR Newswire

LOS ANGELES (FEB. 12) PR NEWSWIRE - ARCO (NYSE: ARC) and Indalsa, a Madrid-based operator of highway, novelty food stores and restaurants in Spain, have signed a long-term licensing and joint venture agreement that provides for the opening of more than 600 am/pm mini markets in Spain and Portugal.

The agreement, which was finalized today at ARCO's worldwide headquarters in Los Angeles, outlines the structure of the joint venture company, "am/pm Mini Markets S.A.," established by am/pm International, a wholly owned subsidiary of ARCO Products Company, and Indalsa.

Under terms of the agreement, am/pm International will own 33 percent of am/pm Mini Markets S.A., and Indalsa will own the remaining 67 percent. In addition, am/pm Mini Markets S.A. has purchased from am/pm International a license to use the am/pm brand and systems in Spain and Portugal.

The purpose of the joint venture company will be to own, operate and franchise, stand-alone, predominantly non-gasoline convenience food stores using am/pm mini market trademarks, designs and operating systems.

This joint venture expansion into Spain and Portugal is am/pm International's first undertaking in Europe and its first foreign joint venture. In 1988, ARCO entered into similar licensing ventures with Kyodo Oil of Tokyo, calling for 500 am/pm mini markets to be built in Japan, and with Wei-Chuan Foods Corporation in Taiwan, where another 500 am/pm mini markets are planned. To date, there are 36 "stand alone" am/pm's operating in Taiwan and six in Tokyo that also sell gasoline.

The first three am/pm mini markets are scheduled to open in Madrid this year.

Most of the am/pm mini markets planned for Spain will be located in metropolitan Madrid and Barcelona and will be conversions of existing store fronts to the new modern am/pm store look.

The new Spanish am/pm mini markets will feature am/pm's distinctive Western style product mix includig fast foods such as hamburgers and hot dogs. Stores will also include am/pm's frozen desserts sections with frozen yogurt and soft drinks. All of the Spanish am/pm offerings will be modified for local tastes and will include local products like Bocadillos.

Am/pm International, as part of its responsibilites through am/pm Mini Markets S.A., will also assist in the design, selection and construction of the first three units in Madrid, as well as help establish the joint venture's headquarters organization.

NEWARK, NJ (Feb. 12) PR Newswire - The $200 introductory air fare offered by British Airways (ADS - NYSE: BAB) for seats on the first two weeks of its new flights between Newark and London has been sold out in a record four days.

"The launch roundtrip fare, which went on sale last Thursday, Feb. 8, valid only for flights departing Newark, March 25 through April 7, was sold out in an incredible short period of time," stated John Power, senior vice president, marketing, North America for the British carrier.

"This initial response, during the traditional winter season, indicates there are thousands of individuals who work or live in Northern New Jersey, northeastern Pennsylvania and mid-town or downtown Manhattan that are interested in patronizing this convenient air bridge to London."

British Airways' exclusive service to Heathrow from Newark begins on Sunday, March 25, with daily TriStar flights departing from Terminal B at 6:45 p.m. Each flight will offer First Class, Club Class and Economy class seating.

Information on U.K. or European holiday programs, flight schedules and air fares may be obtained from any travel agent, British Airways sales office or by calling the airline at its toll-free number, 1-800-AIRWAYS.

#90043p0211 02/12/1990 ~PR Newswire

BURLINGAME, CA (FEB. 12) PR NEWSWIRE - The American Red Cross announced

today that contributions to its 1989 disaster relief fund campaign, begun in September, totaled $144.5 million, highest in its peacetime history.

The Red Cross said $52.5 million of the total, or about 37 percent, was designated by the donors for earthquake relief. That includes funds contributed in Northern California and elsewhere in the country.

The Red Cross said its disaster relief expenses since the fund drive began last September following Hurricane Hugo total $68.7 million to date. That represents expenses or $55.4 million in the Hugo- devastated Carolinas and Caribbean, $1.2 million for flood and tornado assistance in Texas, Louisiana, Kentucky, and Alabama, and $12.1 million in Northern California.

The Red Cross emphasized that it is continuing to incur expenses as a result of those 1989 disasters, and it may be months before the total cost is known, although final disaster expenditures could top $94 million.

The Red Cross has established a $10 million Northern California Earthquake Relief Fund to meet extraordinary disaster-related needs in Northern California. The fund's 10-member committee, chaired by John Place, former CEO of Crocker Bank, has requested proposals for relief programs from all stricken areas.

The deadline for submitting proposals is Feb. 16. John Place said that if the approved proposals exceed the presently allotted $10 million, more money will be added to the earthquake fund.

"We have always said that the Red Cross responds to disaster relief needs, regardless of cost," he said. "Human needs that are disaster-related will be met. If we need more money to do that, we will get it."

According to Red Cross policy, funds designated for specific disasters but not needed are placed in the Red Cross Disaster Relief Fund to be used in future calamities.

"We are very proud of the American public for this outpouring of assistance to disaster victims," said Sue Richter, western regional vice president of the Red Cross, "and we are equally proud that they placed their trust in the Red Cross to use their contributions efficiently and effectively.

"We view that as a major stewardship responsibility, and we will distribute the fund to the best of our ability," she said.

SAN JOSE, CA (FEB. 12) PR NEWSWIRE - Wyse Technology Inc. (NYSE: WYS) announced today an Intel 80286-based IBM PC AT-compatible personal computer with maximum flexibility and excellent price/performance to increase its share of the high-volume, entry-level PC market through its resellers. According to market research, Wyse is the largest supplier of PCs through distributors in the United States and the second largest through value added resellers.

"Wyse is targeting the WY-2012i at the high-volume, 286-based PC market," said Bill Seymour, Wyse's vice president of personal computers and monitors. "International Data Corp. predicts that 44 percent of the IBM PC and compatibles market in the U.S. in 1990 will be based on the 286 microprocessor, larger than any other processor segment. The WY-2012i will allow Wyse to take full advantage of the low-end 286 business opportunity. Wyse also offers a high-performance 16 MHz 286 system for more demanding users."

Wyse's highly flexible WY-2012i offers four mass storage shelves, eight expansion slots, the capability to expand to 4MB of on-board memory, and a 200-watt power supply, so it can be configured by resellers to support a wide range of end user requirements. The WY-2012i has a suggested retail price of $1,499 in a single-floppy version and $2,199 for a 40MB hard drive version, including MS DOS and keyboard.

"Wyse is on target with the WY-2012i," said Jud Beamsley, president of Tech Aids, one of Wyse's distributors. "The new personal computer provides the functionality, quality and price that our customers want in the 1990s. It is an excellent price/performance value."

According to an IDC report issued in December 1989, Wyse sold more personal computers than any other vendor through distributors in the United States in 1988, with 12 percent of all shipments through distributors. IDC numbers show that Wyse shipped 10 percent of all PCs sold in the United States in 1988 through the VAR channel, second only to IBM which sold 14 percent.

Wyse Technology is a leading supplier of microprocessor-based products, which include terminals, IBM PC-compatible computers, monitors and multiuser systems. The company sells its product through customers that add value, such as distributors, VARs and original equipment manufacturers. Headquartered in San Jose, Wyse operates sales offices across the United States and in Canada, Australia, Hong Kong and Western Europe. The company employs about 2,800 people worldwide. Revenue for fiscal year 1989 was $452.3 million.

CONTACT: Kathryn Watson, 408-473-2066, or Melissa Clyne, 408-473-2193, both of Wyse; or Mary Carlisle of Thomas Associates, 415-325-6236, for Wyse

SAN DIEGO (FEB. 12) PR NEWSWIRE - Specialized Systems Inc. (NASDAQ: SSII) today announced the results of its Special Meeting of Shareholders. Chairman Stephen J. Nemergut called the meeting to order at approximately 9 a.m. The inspector of elections informed the chairman that a quorum was present and Nemergut began the discussion of the various proposals set forth in the company's proxy materials disseminated to shareholders in January 1990.

Based upon the determination of the independent election committee, the inspector of elections, and management of the company, the shareholders approved the following proposals:

1. Proposal to ratify agreement for exchange of stock; 2. Proposal to amend the articles of incorporation to authorize additional shares of common stock; issuance of additional shares; 3. Proposal to change the company name; 4. Proposal to ratify the past acquisition by the company of common shares of Applied Marketing Inc. and to authorize the purchase of all remaining common shares of Applied Marketing Inc. not currently owned by the company; and 5. Proposal to appoint new independent accountants.

With this action by the shareholders, the company has finally completed its reverse acquisition of Kentana Development Inc., a Corsicana, Texas-based land acquisition and development company. The company intends to notify the NASD of this activity today and will request that its ticker symbol be changed to KDII.

The company intends to file a Form 8-K with the Securities and Exchange Commission describing the effects of the transaction and presenting financial statements for the period ending Jan. 31, 1990, on a consolidated basis. The board of directors of the company will meet on the afternoon of Feb. 12, 1990, to consider further actions which may be necessary as a result of the completion of the acquisition.

CONTACT: Nicholas F. Coscia of Dennis & Coscia, 619-792-7300, for SSI Inc.

PASADENA, CA (FEB. 12) PR NEWSWIRE - Conversion Industries Inc. (AMEX: CVD) today announced that it has reached an agreement in principle to acquire Coast Machinery Movers of South El Monte, Calif. The acquisition, valued at $6.3 million, will be completed by an exchange of shares, with Conversion issuing 840,000 shares of common stock in exchange for 100 percent of Coast's outstanding stock.

Coast, through its power construction division, has significant experience in the construction of natural gas fired power plant facilities. In addition, the company is involved in the rigging and moving of heavy equipment and machinery used in manufacturing facilities. Coast has been in operation 20 years and generated revenues for the year ended Dec. 31, 1989 of approximately $10 million with cash flow, on adjusted basis, of approximately $700,000. Currently, the company has a backlog in excess of $6 million.

Coast is currently owned by one of Conversion's directors, who will retain management responsibility. After the exchange of shares, Conversion will have approximately 3,400,000 shares outstanding, with management holding 40 percent. If, at the end of one year after the transaction closes, Conversion's share price is below $7.50, an adjustment will be made to the purchase price. Additional shares will be issued at the then market value for the variance between the share market value of the $840,000 and $6.3 million.

"This acquisition represents another step in Conversion's realizing its objective of being a fully integrated independent power producer," said John McGrain, chairman of the board. "In addition to our expertise in cogeneration project development, Conversion will now be in a position to undertake the construction of its own projects that should add substantially to revenues and earnings," he added.

Conversion's development and construction of cogeneration projects is enhanced by its 52 percent ownership position in Calgary, Alberta- based Colin Energy Corp. (Toronto: CN). Colin is developing substantial oil and

natural gas reserves, representing a consistent fuel supply, a key component to developing cogeneration power production projects.

Conversion also holds a 46 percent interest in PEC Energy Inc. (Vancouver: PEK), located in West Plains, Mo. PEC through its wholly owned subsidiary Perennial Energy Inc., designs, builds and installs packaged cogeneration systems. Perennial to date has created more than 80 facilities.

#90043p0220 02/12/1990 ~PR Newswire

BEREA, OH (FEB. 12) PR NEWSWIRE - As a result of a substantial increase in both new policies and renewals during 1989, Central Reserve Life (NASDAQ: CRLC) recorded premium income of more than $100 million for the first time, Fred Lick Jr., chairman and chief executive officer, said today. The company specializes in providing preferred risk accident and health coverage for small employer groups.

"This milestone was especially gratifying since it was accompanied by higher profits," he added. "It indicates we are not only writing more business, but we are able to effectively manage the cost of servicing our policyholders," Lick said.

For example, he noted the company had reduced administrative expenses as a percentage of premiums by two percentage points. These costs represented 18 percent of 1989 premiums, compared to 20 percent in 1988.

"The reduction can be attributed to the greater efficiencies resulting from a more streamlined operation, as well as the higher level of premiums recorded this year," Lick said.

Central Reserve Life, according to Lick, "is now instituting a number of even tigher internal controls, including a new method of establishing renewal rates and a plan for making general agents more responsible for the losses within their area," Lick continued. "We expect this multi-faceted program will further increase our profitability in the years ahead."

EARNINGS OF $2.6 MILLION

Based on unaudited results, Central Reserve Life's 1989 premiums were $108,459,000, up 25 percent from $86,984,000 in the year earlier. Investment income increased 14 percent, to $4,294,000, compared to $3,754,000 in 1988. Total revenues climbed to $113,017,000, up from

$90,914,000.

Net income for the year was $2,658,000, or 65 cents per share, a gain of 29 percent from $2,066,000, or 51 cents per share, in the year ago period.

For the final three months of 1989, premiums were $29,367,000, compared to $23,615,000 in the year ago quarter. Total income was $30,803,000, up from $24,668,000 in the previous year and net earnings were $877,929, or 22 cents per share, up slightly from $844,793, or 21 cents per share.

"The forth quarter is traditionally a period of higher benefit payments," Lick noted.

NUMBER OF POLICIES INCREASES

He reported group certificates in force increased by 13 percent in the past year, to 67,945. More than 28,000 new policies were issued in 1989, while policy lapses were down 6 percent from the prior year.

"A change to a method of instituting renewal rates based on policy anniversary dates caused the reduction in lapses," Lick said.

While medical costs once again increased faster than the general rate of inflation during 1989, he noted the company's incurred loss ratio only a percentage point -- to 69 percent of premiums. In 1988 the ratio was 68 percent and in 1987, it was 73 percent.

"We continue to monitor the claims experience of our policyholders and necessary rate increases are made when required," Lick said.

RESERVES UP $4 MILLION

Central Reserve's benefits and claims amounted to $74,559,000 in the past year, up 27 percent from the year earlier.

The company added $4 million to its reserves and accruals for future claims in 1989. Currently, these reserves total more than $27.4 million.

Shareholders' equity at the end of the year was $19.5 million, or $4.95 per share, compared with $17.8 million, or $4.55 at the end of the prior year. Cash dividends of $1 million, equal to 26 cents per share, were paid in 1989, up 9 percent from $939,179, or 24 cents per share in 1988. This was the ninth consecutive year of higher cash dividends to shareholders.

Central Reserve Life is a leading insurer of preferred risk accident and health insurance, specializing in groups of less than 25 employees. Based in Berea, Ohio, the company currently concentrates its activities in 14 of

the 33 states in which it is admitted to sell insurance. Common stock is traded over the counter under the NASDAQ

NEW YORK (FEB. 12) PR NEWSWIRE - General Instrument Corporation (NYSE: GRL) announced today that Garden State Cable TV has selected the Jerrold Division of General Instrument to supply more than $15 million worth of cable television electronics and design services for its rebuild. Garden State Cable TV, headquartered in Cherry Hill, N.J., serves 59 municipalities in five south Jersey counties.

The rebuild will include new distribution equipment including fiber optics and new converters for the system subscribers resulting in improved picture quality and expanded program selection.

Jerrold will provide it's IMPULSE 7000 cable converters for the system upgrade. These new state-of-the-art converters provide pay-per-view services at the touch of a button, as well as remote channel selection and volume control.

Garden State also has chosen Jerrold's new SX amplifier line for the rebuild. The SX amplifier is designed to accommodate ever-expanding cable

technologies and can be used with both coaxial and fiber optic cable. It was designed with cable operator input and is compatible with all Jerrold amplifiers presently in use.

The rebuild, which is expected to take four years, will cover Garden State's 3,200-mile franchise area in southern New Jersey and include 170,000 subscribers. The new system will offer 54 channels of programming.

"Garden State Cable is an industry leader," said Frank G. Hickey, chairman of the board and chief executive officer of General Instrument. "We're gratified to be part of this important rebuild and impressed with the extent of the Garden State upgrade. It demonstrates that they are committed to providing the best possible service to their subscribers."

According to Patrick McCall, general manager of Garden State Cable, the purpose of the rebuild is "to provide improved service as quickly as possible."

"When we took over what was NYT Cable TV last year, we promised we would take steps to dramatically improve cable service in the south Jersey area. This announcement is just one phase -- one large phase, for sure -- of these improvements," McCall added.

Garden State Cable TV is the 16th largest cable television system in the country.

General Instrument is the industry leader in cable TV electronics, coaxial cable and satellite encryption systems. The company's primary strategies are directed toward communications systems. The common stock of the company is listed on the New York, Midwest, Pacific and London stock exchanges.

WEST PALM BEACH, FL (FEB. 12) PR NEWSWIRE - Steego Corporation (NYSE: STG) today announced that it has signed an agreement to sell its wholly owned Canadian auto parts subsidiary, McKerlie-Millen, Inc., to PT Astra International Inc. of Jakarta, Indonesia. Consummation of the transaction is expected to occur on or about March 15, 1990 and is subject to regulatory approval and certain customary pre-closing conditions.

McKerlie-Millen management believes that joining the Astra Group will be a very positive step in the development of the company. The Astra Group is a diversified business conglomerate with automotive as one of its main businesses. The group's total sales in 1989 were approximately U.S. $2.0

billion. Combining Astra's extensive resources with McKerlie-Millen's strong market position and solid management and employee base will put the company in a unique position to take advantage of the many opportunities being created by the significant changes taking place in the North American aftermarket.

Gregory Stone will remain as president and CEO, reporting to a Canadian board of directors of which he will be a member. No changes in management personnel or operating procedures are anticipated.

MCLEAN, VA (FEB. 12) PR NEWSWIRE - Neuromedical Technologies, Inc. (NASDAQ: NMTI) announced that the company today sold its 80 percent interest in Neuro Scan, Inc., a supplier of medical software, to Neurosoft Inc., of El Paso, Texas, the former 20 percent shareholder of Neuro Scan.

Under the agreement, Neurosoft is responsible for operational expenditures of Neuro Scan since Jan. 1, 1990. The purchase price for the 80 percent interest in Neuro Scan is $200,000 to be paid from royalties on sales of Neuro Scan's SCAN and STIM software. As part of the transaction Neuromedical Technologies agreed to provide Neurosoft with short-term funding not to exceed $20,000 per month for six months, such amounts to be repaid in addition to the $200,000 purchase price.

Philip D. Green, president of Neuromedical Technologies, stated: "This agreement allows Neuromedical to concentrate on the development of its patented medical technology, Transcranial Electrostimulation Therapy (TCET) which is now undergoing clinical trials in smoking cessation."

Neuromedical Technologies, Inc. is listed on the NASDAQ wire under the symbol "NMTI."

LAS VEGAS, NE (FEB. 12) PR NEWSWIRE - Hyundai Motor America has announced the appointment of Dennis Lamont as executiv vice president and chief operating officer of the newly formed Hyundai Motor Finance Co.

"The new captive finance company," Lamont said, "will concentrate initially on providing retail financing for qualified buyers of Hyundai

cars." Operations started on Jan. 15 and will be expanded to serve all Hyundai dealers in the United States by June. "This timetable is ambitious," Lamont added, "it will be the fastest internally developed launch of nationwdie operations for a captive finance company in the industry."

Leasing and dealer inventory financing will be added in the second quarter to complete the customary product line for a captive finance company. "Our goal," Lamont affirmed, "is to support the sale of Hyundai automobiles by ensuring that Hyundai dealers have competitive financing programs for qualified buyers. We will achieve that goal through innovative financing plans, as well as new ways of delivering services."

Recognized as a leading expert in the auto financing arena, Lamont began his career in 1967 with Ford Motor Credit Co., where he held various management positions in both the domestic and international areas of finance and credit during his 15-year tenure.

In 1982 he joined Citicorp Acceptance Corp. as vice president, responsible for planning, developing and implementing auto financing operations throughout the United States.

Prior to joining Hyundai, Lamont was president and chief executive officer of Security Pacific Auto Finance since 1986.

Lamont received his bachelor of science degree in economics from the University of Detroit and his master of business administration degree from the Harvard Business School.

He resides in Orange County, Calif., with his wife Dory. In his spare time Lamont enjoys Dory, travel, reading and golf.

FINDLAY, OH (FEB. 12) PR NEWSWIRE - Cooper Tire & Rubber Company (NYSE: CTB) reported record sales and earnings for the fourth quarter and full year ended Dec. 31, 1989.

Net income for the year reached a record $58.2 million, up 42 percent from income in 1988 of $41.1 million. Per share earnings amounted to $2.84 in 1989 compared with $2.01 in 1988. Net sales also reached a record of $866.8 million for the year, increasing 16 percent over the previous record of $748.0 million set in 1988.

Sales in the fourth quarter of 1989 were $208.3 million versus $195.2

million in the fourth quarter of 1988. Net income amounted to $18.0 million, equal to 88 cents per share, compared with 1988 quarter earnings of $13.9 million or 68 cents per share.

During the year stockholders' equity climbed to $310.1 million, an increase of 20 percent. Equity per share, or book value, at year end amounted to $15.08 compared with $12.60 at year-end 1988. Return on beginning of year stockholders' equity was 22.6 percent in 1989 and 18.5 percent in 1988.

ATLANTA (FEB. 12) PR NEWSWIRE - Thomas W. Crawford, president and chief executive officer of Southern Heritage Insurance Co., today announced unaudited estimated operating results for the fourth quarter ended Dec. 31.

The three month period ending Dec. 31 produced a pretax profit of approximately $327,000 or $.12 per share compared to a pretax profit of $319,000 or $.12 per share for the same period in 1988. The company expects to show pretax profit for the year of approximately $108,000, compared to a $10,000 profit in 1988.

Crawford stated that the 1989 results are encouraging and confirm the integrity of the company's underwriting philosophy, pointing out that 1989 was the worst catastrophe and storm year in inusurance industry history and that the company's operations in Alabama and Virginia are still maturing. Crawford stated the company's operating expense ratio continued to improve in 1989.

The net incurred loss ratio for 1989 was 57.0 compared to the industry loss ratio which is in the 70s.

Southern Heritage is a personal lines property and casualty company conducting business in Alabama, Georgia and Virginia maintaining its corporate headquarters in Tucker, Ga.

CHANTILLY, VA (FEB. 12) PR NEWSWIRE - Fairchild Industries Inc. today reported higher sales and net earnings from continuing operations for both the second quarter and six-month periods ended Dec. 31, 1989, compared to

similar periods one year ago.

Sales increased to $110 million from $75 million and net earnings from continuing operations increased to $3.5 million from $0.8 million in the second quarter period. For the six-month period sales rose to almost $200 million from $149 million and net earnings from continuing operations increased to $4.3 million from $1.7 million.

The increase in sales and earnings was due in part to the inclusion of the Specialty Fasteners Division in the 1989 periods subsequent to the merger with Banner Industries (NYSE: BNR) in August 1989. (The Specialty Fasteners Division was contributed to the company by Banner Industries as part of the merger.)

Sales and earnings also benefited by improved performance at other Fairchild operations particularly the Aerospace Fasteners Division and Fairchild Communication Services.

The following table presents comparative second quarter and six- months financial information for 1989 and 1988. The prior year second quarter and six-month periods benefited from earnings from discontinued operations of $3.1 million and $6.1 million, respectively, and from tax benefits from utilization of net operating loss carryforwards of $1.5 million and $3.5 million in the respective periods.

Fairchild will file its quarterly report on Form 10-Q with the Securities and Exchange Commission by the close of business on Feb. 14, 1990. Copies of Form 10-Q will be available upon written request to the Corporate Secretary, Fairchild Industries Inc., P.0. Box 10803, Chantilly, Va., 22021-9998.

Fairchild is a majority-owned subsidiary of Banner Industries Inc. with interests in aerospace fasteners, tooling for plastics and communications services. The company's Series A Convertible Preferred Stock is listed on the New York Stock Exchange (FEN PrA).

FINDLAY, OH (FEB. 12) PR NEWSWIRE - Patrick W. (Pat) Rooney, today, was elected President - The Cooper Tire Company, a division of Cooper Tire & Rubber Company (NYSE: CTB). Mr. Rooney will assume total responsibility for all tire operations in his new position. The position was previously held by William T. Fitzgerald who was elected President and Chief Operating Officer of Cooper Tire & Rubber Comapny in November 1989.

Concurrently, Mr. Rooney was elected to the board of directors for a term expiring in 1991. The board of directors at their regular meeting increased the size of the board from ten to eleven directorships.

Pat Rooney -- age 54 -- began his career with the Company in 1956 as a sales trainee. In 1958 he became a territory sales representative and in 1960 was named manager of tread rubber sales. In 1965 he became general sales manager of the Cooper brand and was elected vice president in 1969. In 1984 he was given responsibility for all tire division sales, and in 1987 was elected vice president -- marketing for Cooper's tire operations.

Rooney is a graduate of the University of Findlay, has attended many American Management Association seminars, and is a graduate of the advanced management program at Harvard University.

Mr. Rooney is a member of Rotary International and the Findlay- Hancock County Chamber of Commerce and has been active in many civic and educational organizations in the community, including the University of Findlay, the YMCA and the Community Improvement Corporation.

#90043p0239 02/12/1990 ~PR Newswire

NEW ORLEANS (FEB. 12) PR NEWSWIRE - Cucos Inc. (NASDAQ: CUCO) announced today that its board of directors has adopted a Shareholder Rights Agreement designed to enhance the ability of all Cucos' shareholders to realize the long-term value of their investment in the corporation.

The Rights Agreement is intended to deter coercive or unfair takeover tactics, to prevent an acquirer from gaining control of Cucos without offering fair and equal treatment to all of Cucos' shareholders and to discourage anyone from attempting to "greenmail" the corporation.

Details of the Rights Agreement will be summarized in a letter that will be mailed on or before Feb. 28, 1990, to all shareholders of record as of Feb. 12, 1990.

Vincent J. Liuzza Jr., chairman and president of Cucos stated: "The board believes that the Rights Agreement will protect the interest of shareholders in the event Cucos is confronted with coercive or unfair takeover tactics, including offers that do not treat all shareholders equally, the acquisition in the open market of shares constituting control without offering fair value to all shareholders, and other coercive or unfair tactics that could impair the board's ability to represent shareholders' interest fully. The board adopted the Rights Agreement after long and careful study. We know of no current or pending interest

in acquiring control of Cucos."

Liuzza further stated: "The Rights Agreement is not intended to prevent an acquisition of the corporation on terms that are favorable and fair to all shareholders. However, the agreement will deter any attempt to acquire the corporation through the use of abusive tactics that are calculated to deprive the shareholders and their board of directors of their ability to determine the corporation's future."

The adoption of the agreement does not weaken the financial strength of Cucos nor interfere with its growth opportunities. Moreover, the issuance of the rights has no dilutive effect, will not affect reported earnings per share, and will not change the way in which shares of Cucos common stock are currently traded. The rights will trade as part of the regular certificates.

Cucos Inc. is a full-service specialty restaurant chain offering moderately priced, Sonoran-style Mexican appetizers, entrees and complementing beverages which operates nine company-owned and 20 franchised restaurants located primarily in the southeastern United States.

NEW YORK (FEB. 12) PR NEWSWIRE - NCR Corporation (NYSE: NCR) today released its architecture for the next era of computing. NCR's Open,

Cooperative Computing Architecture (OCCA), based on an open client- server model, provides customers with a bridge to future technologies while protecting their information system investments.

"OCCA is the foundation for NCR's vision of the future of computing," said Gilbert P. Williamson, NCR president, "which is to make available -- transparently -- the computing resources of an entire enterprise, right at the user's desktop."

Open, Cooperative Computing Architecture is composed of three major elements:

-- The structure, which defines the logical relationship of the various system components;
-- The interfaces, which define the connections of the components;
-- And the rules, which define how the components interact with each other.

OCCA provides a blueprint to customers for making long-term system decisions. It also assists third-party software developers and system integrators to create new products for a truly open, cooperative computing environment.

The five layers of NCR's OCCA structure include the:

-- Human Interface Layer, which provides a consistent and intuitive graphical user interface across multiple applications and operating systems;
-- Application Environment Layer, which offers services for integrating existing applications and developing new ones;
-- Cooperative Services Layer, which serves two purposes: One, to support the distribution of applications and information across the network. Two, to provide a secure, reliable and well-managed cooperative environment;
-- Communication Services Layer, which facilitates the movement of information across local area networks and wide area networks.
-- Base Platform Layer, which contains the operating systems (UNIX, DOS and OS/2), hardware and the physical network.

The second major element of NCR's Open, Cooperative Computing Architecture is the use of open interfaces, based on industry standards. This allows systems from many vendors to interoperate, and frees customers to choose the best technology for their needs based on cost and functionality.

Based in Dayton, Ohio, NCR Corporation develops, manufactures, markets and supports business information systems for worldwide markets.

#90043p0247 02/12/1990 ~PR Newswire
NEW YORK (FEB. 12) PR NEWSWIRE - Building on its leadership as a major vendor of open systems, NCR Corporation (NYSE: NCR) today announced a comprehensive product and marketing strategy for the 1990s, "Open, Cooperative Computing: the Strategy for Managing Change."

At the same time, NCR announced Open, Cooperative Computing Architecture (OCCA) and previewed the NCR System Software Platform.

"Open, Cooperative Computing will not only provide solutions for today's business problems but will also lay the foundation for the emerging technologies of the future," said Gilbert P. Williamson, NCR president.

While Open, Cooperative Computing (OCC) is a natural evolution of NCR's decade-old commitment to building products based on open industry standards, it also marks a new chapter in computing history, said Charles E. Exley, Jr., NCR chairman and CEO, "the era of cooperative computing."

Exley characterized this emerging era as "one in which a new information infrastructure will allow users to process information on an enterprise-wide basis."

Exley noted that since the mid-1950s, business computing has progressed through a number of stages, including centralized batch processing, time-sharing, and the emergence of departmental processing with the advent of minicomputers in the mid-1960s.

The appearance of personal computers in the business environment in the early 1980s "transformed the face of computing," Exley said, and led to the current networking era of computing, in which attempts are being made to connect "islands of information."

The Open, Cooperative Computing strategy is NCR's answer to meeting the needs of its customers, as validated in a year-long, worldwide marketing research study.

With headquarters in Dayton, Ohio, NCR Corporation develops, manufactures, markets and supports business information systems for worldwide markets.

CAMBRIDGE, MA (FEB. 12) PR NEWSWIRE - Index Technology Corporation

(NASDAQ: INDX), a leading developer of computer-aided software engineering (CASE) products for systems analysis and design, today reported record revenues for the quarter ended Dec. 31, 1989, of $11,411,000, up 31 percent over 1988 fourth quarter revenues of $8,723,000. Net income for the period was $463,000, or 10 cents per share, compared with net income of $985,000, or 22 cents per share, for the same period a year ago.

For the year ended Dec. 31, 1989, revenues were $37,993,000, an increase of 28 percent over 1988 revenues of $29,571,000. Net income for 1989 totaled $2,312,000, compared to net income of $2,735,000 for all of 1988. Earnings per share for the year were 50 cents, compared with earnings per share of 70 cents for 1988.

"The fourth quarter was the strongest revenue period in our history, and sales growth for the year reflects the continued expansion of our installed base; however, earnings fell below expectations largely because of lower than anticipated returns from European operations, where we are investing heavily to expand our direct presence," said Richard A. Carpenter, president and chief executive officer of Index Technology. "We expect that our strategic investment in the company's sales and marketing capabilities and in development of the next generation of our product line will continue to put pressure on earnings until the delivery of those new products later in the year."

During the quarter, Index Technology passed the $100 million milestone in total corporate revenues since the company's founding in 1983.

Also during the quarter, Index Technology announced that IBM had agreed to a major purchase of its Excelerator Series of CASE products to support a wide range of IBM's software development activities. With this agreement, by the end of 1991, IBM will have installed more than 3,000 copies of Excelerator on PS/2 workstations, making IBM one of the largest front-end CASE users in the world.

Also during the quarter, Index Technology announced a Japanese language version of its Excelerator Series, which will be distributed by IBM/Japan. Index Technology also saw strong sales to major corporations as the company's flagship product, Excelerator, has increasingly become the standard front-end CASE tool on which corporate information systems are being designed.

Index Technology's Excelerator is the world's most widely used systems analysis and design CASE product, with an installed base of more than 19,000 copies. The company, founded in 1983, markets its products from its Cambridge, Mass., headquarters, from field sales and support offices throughout the U.S. and Canada, through subsidiaries in the U.K., France and Australia, and through third-party distributors, providing coverage in approximately 25 countries worldwide.

LAS VEGAS (FEB. 12) PR NEWSWIRE - Showboat, Inc. (NYSE: SBO) today announced it has obtained a $25 million loan commitment from First

Interstate Bank of Nevada, N.A. to be secured by Showboat's Las Vegas casino-hotel. The funds will be used primarily for the expansion and refurbishment of the company's Las Vegas facility.

Interest-only payments are due in the first year, carried at the bank's prime rate plus 1.5 percent, thereafter, at prime plus 1 percent, after a 1.50 times fixed charge coverage ratio has been maintained for four consecutive quarters. After the first year, monthly payments will be computed on a 10-year amortization schedule with the note due Sept. 30, 1996.

In making today's announcement, J.K. Houssels, chairman, stated, "We are pleased with the additional financing and the support given us by First Interstate Bank. Now we can complete our short-term renovation and refurbishing plans at Las Vegas Showboat. This should enable us to regain and enhance the Showboat's position as one of the city's popular attractions for local residents and tourists alike."

Showboat, Inc. through its subsidiaries operates hotel-casino resorts in Las Vegas and Atlantic City featuring casino gambling, bowling and other sports attractions and special events.

LATHAM, NY (FEB. 12) PR NEWSWIRE - Coradian Corporation (NASDAQ: CDIN), announced today that Mitel Inc. (Mitel), subsidiary of Mitel Corporation (NYSE: MLT), has reached an agreement in principle to acquire, by means of a cash merger, all of the issued and outstanding securities of Coradian Corporation.

The parties have not reached agreement on all material terms of the transaction, but have signed a letter of intent, providing for the payment by Mitel of up to an aggregate of $10 million, exclusive of liabilities, based upon, among other things, the financial condition of Coradian on Sept. 30, 1989. Such price is subject to numerous adjustments and, in particular, will be reduced in the event of adverse operating results prior to the date of the merger. Approximately 25 percent of the purchase price will be held in escrow after the closing to cover any such reduction or adjustment. Based upon the number of shares of stock presently outstanding and a review of Coradian's existing options, warrants and convertible securities, Coradian has estimated that upon the merger, Coradian's security holders will receive up to approximately $.49 for each share of common and preferred stock (on a diluted basis and without

differentiation as to class), subject to reduction as noted above.

Coradian intends to retain an investment adviser to assist it in the allocation (if any) of the purchase price among the various classes of Coradian's securities. The transaction is subject to numerous conditions, including without limitation, approval by the boards of directors of both Mitel and Coradian, and by the stockholders of Coradian, completion of Mitel's due diligence investigation, receipt of any necessary regulatory and other consents, and the execution of a mutually acceptable definitive agreement and plan of merger.

Mitel Corporation is an international manufacturer of sophisticated, reliable business telecommunications systems and public switching systems, with annual revenues of more than $400 million. More than 120,000 Mitel telecommunications systems have been sold in over 80 countries. Mitel Corporation's common shares are traded on the Toronto, Montreal, New York and London stock exchanges under the symbol MLT.

Coradian, headquartered in Latham, is one of the leading independent interconnect companies in the United States with over $27 million in sales recorded in 1988. Coradian Corporation is traded on NASDAQ under the symbol CDIN.

NEW YORK (FEB. 12) PR NEWSWIRE - Dr. Kenneth E. Blackman, president of Applied DNA Systems, Inc. (NASDAQ: ADNA, ADNAZ) (the company), today announced the acquisition of 50 percent of Analytical Biosystems Corporation (ABC), which brings the company's ownership of ABC to 100 percent. The company acquired the 50 percent interest in ABC through the issuance of 600,000 shares of its common stock to each of the two other shareholders, the Brown University Research Foundation (BURF) and Brown University (as trustee of a trust created by Dr. M. Boris Rotman), in exchange for their interests in ABC.

ABC was founded in 1985 by the company, BURF and Rotman to commercialize a chemosensitivity assay, informally referred as the Rotman assay and currently know as the Fluorescent Cytoprint Assay (FCA), which was developed by Rotman at Brown University.

The FCA is a patented "in vitro" assay which measures the effectiveness of specific chemotherapeutic drugs in destroying cancer cells. To date, clinical trials compiled by ABC indicate better than 95 percent accuracy in determining when tumors are resistant to particular chemotherapeutic

drugs and more than 88 percent accuracy in identifying the chemotherapeutic drugs that will be effective.

ABC currently holds an exclusive commercial license to the technology from BURF and upon repayment of prior loans of approximately $200,000 from BURF and ABC, will obtain ownership of all issued and pending patents related to the technology worldwide.

ABC's laboratory facility, located in Warwick, R.I., is licensed by the state of Rhode Island to perform the FCA and holds a federal laboratory license, which enables ABC to commercialize the FCA in most of the United States. ABC currently processes 15 to 25 assays per week from diverse medical institutions from across the country.

Today's acquisition represents the conclusion of negotiations started by Donald Bachmann, the company's late chairman, CEO and CFO. After his sudden and untimely death in January, the remaining members of the board of directors elected Henry P. Renard, an active and contributing outside director of the company since 1987, as acting chairman and CEO. At that same meeting, Rotman also was appointed to the board to fill a vacancy created by the recent untimely death of outside director (and assistant secretary) Martin Zimmerman. Alain Klapholz, a vice president of the company, was appointed assistant secretary and CFO.

Renard is an executive vice president with Inverness Counsel, Inc., an investment counsel firm with funds of over $1 billion under management. Blackman, who joined the company in 1987, is president and COO of the company as well as president of ABC. He has over 20 years' experience in the biotec and pharmaceutical industries. Rotman is a professor of medical sciences at Brown University. Klapholz, who joined the company during 1988 and was appointed vice president in 1989, has over eight years' experience with public companies in the health care field.

PITTSBURGH (FEB. 12) PR NEWSWIRE - David H. Weis, president, Thermal Industries Inc. (NASDAQ: THMP) today reported second quarter and six-month sales and earnings.

THERMAL INDUSTRIES INC.

Period ending	Quarter		Six Months	
Dec. 31	1989	1988	1989	1988
Net sales	$7,588,000	$8,843,000	$15,294,000	$16,665,000
Net income	200,000	178,000	400,000	509,000
Income per share	$.10	$.09	$.21	$.26

Comments:

Quarterly net income increased in spite of the sales decline. This was primarily due to increased operating efficiency in the new plant and strict control of expenses companywide. The Atlanta branch was closed Dec. 31 due to low sales and continuing losses. A new branch is being opened in Syracuse, N.Y. The pace of incoming orders is still soft but the good weather in January has produced a firming trend.

NEW YORK (FEB. 12) PR NEWSWIRE - Sequoia Partners, L.P. today announced that it is sending a letter to Lionel Pincus, chairman of Counsellors Tandem Securities Fund, Inc. (NYSE: CTF), stating that it will seek to replace a majority of the fund's board of directors at its 1990 annual meeting scheduled for April 10. A group lead by Sequoia presently owns approximately 22 percent of the fund's common shares.

Counsellors Tandem is managed by a subsidiary of E.M. Warburg Pincus & Co. Inc. of New York, a manager of LBO funds, venture capital funds, and mutual funds. Three of the fund's seven directors are employees of Warburg Pincus or its affiliates.

Timothy Hurley, the general partner of Sequoia, stated, "We are extremely displeased by the recent actions by the fund's directors. The board continues to resist taking the actions, which in our view are necessary, to eliminate the discount from net asset value at which the fund's common shares have historically traded."

Hurley added, "The board, in our opinion, under the guise of providing shareholders an opportunity to vote on proposals to open-end or liquidate the fund, has, in reality, restricted the ability of shareholders to direct the fund to take either step to eliminate the discount."

The proposals that the board intends to introduce will only be advisory motions which the current directors will not be legally bound to implement and apparently will not even support. In addition, the current board has indicated it will require an absolute two-thirds, (66- 2/3 percent) vote for passage of these non-binding advisory motions, even though legally the fund's articles and by-laws do not require a super-majority vote for passage for such advisory proposals.

Hurley also stated, "Even if this super-majority requirement could be met, which I consider very unlikely without management's support, additional board action and another costly shareholder meeting would be required to implement the designated action to eliminate the discount."

Hurley also criticized the fund's sudden adoption of amendments to the fund's by-laws on the eve of the record date for the annual meeting. These amendments restrict the ability of shareholders to nominate directors and to submit proposals for consideration at shareholder meetings and further entrench management.

Last Friday Sequoia asked to meet with Pincus and the fund's board to discuss its concerns and to suggest alternative actions. They refused to meet.

Hurley concluded, "In light of the board's refusal to meet with us, and

its refusal to endorse open-ending or liquidating the fund, we have no choice but to seek to elect new representatives to the fund's board that we believe will favor such steps as a means of maximizing shareholder value. Accordingly, we intend to nominate a slate of directors to oppose the incumbent board by management's deadline of Feb. 18, 1990."

BLOOMSBURY, NJ (FEB. 12) PR NEWSWIRE - Wedco Technology Inc. (AMEX: WED), a provider of custom material processing services and manufacturer of related machinery for the plastics industry, today announced its operating results for the nine and three-month periods ended Dec. 31, 1989.

Periods ended	Nine months		Percent
Dec. 31	1989	1988	change
Net revenues	$16,297,374	$17,430,107	(6.5)
Operating income	2,135,972	3,694,239	(42.2)
Income before income taxes	1,990,135	3,178,614	(37.4)
Net income	1,411,370	2,770,409	(49.1)
Net income per common share	$.45	$.85	--
Average shares outstanding	3,136,228	3,258,193	--
Periods ended	Three months		Percent

Dec. 31	1989	1988	change
Net revenues	$5,412,166	$5,660,430	(4.4)
Operating income	551,706	899,305	(38.7)
Income before income taxes	206,165	785,057	(73.7)
Net income	208,977	667,611	(68.7)
Net income per common share	$.07	$.20	--
Average shares outstanding	3,064,528	3,258,148	--

In commenting on these results, President and Chairman William E. Willoughby stated, "As anticipated in the prior quarter, the continued softening of U.S. market conditions being experienced by our polyethylene producers has directly contributed to the decline in our sales for the nine-month period ended Dec. 31, 1989.

This decline, coupled with the fixed nature of certain operating costs and the overall increase in interest expense which resulted from increased borrowings used to finance our capital expansion and stock buy-back programs, has lead to a similar decline in our pre-tax earnings during this same period. Despite these short-term declines, we remain committed to the payment of our next regular dividend of $.075 per share in March of 1990 and to the completion of our capital expansion program. We eagerly await commencing operations in our new facilities in Gainsborough, England; Alberta, Canada; and Houston, Texas, during the fourth quarter of fiscal 1990."

DETROIT (FEB. 12) PR NEWSWIRE - If you are about to announce one of the "sweetest" deals ever on a new car, why not choose Valentine's Day to do so? Oldsmobile did just that with a program beginning Feb. 14, running through April 3.

The Oldsmobile Cutlass Calais will be advertised for as little as $9,395 in certain areas and $9,840 in others, depending upon state laws regarding the advertising and transportation costs. Now, when you add factory-to-dealer incentives, the opportunity has even greater value.

"This special offer is available through Oldsmobile dealers in the central sales region," said Ted. J. Madzia, assistant general sales and service manager of Oldsmobile. "It was presented in Detroit and Jacksonville, Fla., where it was a big hit, and we feel it will have the same success throughout the remainder of the region which consists of Michigan, Ohio, Kentucky, Florida, Georgia, Alabama, Indiana, Tennessee, West Virginia and Western Pennsylvania."

Madzia added, "This unique program is but one more unique example of Oldsmobile's regional marketing initiatives and customizing a sales and marketing program for a particular area of the country."

STAMFORD, CT (FEB. 12) PR NEWSWIRE - The board of directors of the managing general partner of Rayonier Timberlands, L.P. (NYSE: LOG) announced a 20 cent quarterly increase in the quarterly distribution to 90 cents per publicly traded Class A unit payable March 30, 1990, to unitholders of record Feb. 28, 1990.

In making this announcement, the board also indicated that, barring unforeseen market developments, they expect to maintain this quarterly distribution through 1990. The board stated that this increase was a reflection of the partnership's improved cash flow. The partnership's cash flow is affected by the cyclical nature of the timber market, and future cash distributions may increase or decrease, depending on business results.

The board further indicated that, in accordance with the partnership agreement, the distribution policy is to make quarterly distributions to Class A unitholders from cash available from operations after provision for working capital, capital expenditures, contingencies, asset

acquisitions and such other reserves as the managing general partner's board of directors deems appropriate.

Rayonier Timberlands, L.P., grows and sells timber on 802,000 acres in the southeast U.S. and on 384,000 acres in the northwest U.S. Partnership units were first sold to the public in November 1985.

#90043p0301 02/12/1990 ~PR Newswire

WAYNE, PA (FEB. 12) PR NEWSWIRE - SunGard Data Systems Inc. (NASDAQ-NMS: SNDT) reported today that net income for the year ended Dec. 31, 1989, was $17,119,000, an increase of 9 percent over 1988 restated net income of $15,767,000.

Earnings per common share of $1.22 for 1989 represents an 8 percent increase over restated earnings per common share of $1.13 for 1988.

Due to the November 1989 acquisition of Dyatron Corp. (NASDAQ: DYTR), which has been accounted for as a pooling-of-interests, 1988 results have been restated from those previously reported.

For the quarter ended Dec. 31, 1989, net income was $4,218,000, compared with restated net income for the fourth quarter of 1988 of $5,179,000. Earnings per common share for the fourth quarter were $.30 vs. restated earnings per common share of $.38 for the fourth quarter of 1988.

Fourth quarter and full-year 1989 results also include a charge of $975,000 for merger costs, which is equivalent to earnings per common share of approximately $.07.

Revenues for the full year were $201,093,000, an increase of 22 percent over restated revenues of $164,800,000 for 1988. Fourth quarter revenues were $53,223,000, an increase of 16 percent over 1988 restated revenues of $45,817,000.

Based upon previously reported 1988 results prior to restatement for the Dyatron acquisition, 1989 net income of $17,119,000 represents an increase of 53 percent over 1988 net income of $11,224,000, while 1989 earnings per common share of $1.22 represents an increase of 17 percent over earnings per common share of $1.04 for 1988.

James L. Mann, president of SunGard Data Systems Inc., said, "We are pleased that our record of significant, predictable growth continued in 1989. We continued to successfully penetrate new markets and extend our product offerings, and we completed three complementary acquisitions during the year, including Dyatron Corporation, which is our largest acquisition to date. As a result of these events, as well as our pending acquisition of Warrington Financial Systems, we believe we have further enhanced our ability to achieve continued growth in the years ahead."

SunGard Data Systems Inc. is the leading provider of comprehensive disaster recovery services for large-scale computer installations and is the largest diversified provider of proprietary data processing and software to the financial services industry. The company's common stock is reported on the NASDAQ National Market System under the symbol SNDT.

ST. LOUIS (FEB. 12) PR NEWSWIRE - The May Department Stores Company (NYSE: MA) has named Steven J. Douglass chairman of May Company, Ohio, effective Feb. 15. Douglass currently serves as senior vice president and chief financial officer of the company's Robinson's department store division based in Los Angeles.

Thomas J. Hogan continues as president and chief executive officer of May Company, Ohio. Douglass succeeds Donald R. Andrus, who recently was named chairman of the Foley's division in Houston.

In making the announcement, May Vice Chairman Lawrence E. Honig said, "We are very pleased that Steve Douglass is moving to May Company, Ohio, as chairman. In his 14 years with May, Steve has accumulated valuable experience at three divisions -- including May Company, Ohio -- and at the corporate office as well. May Company, Ohio will benefit significantly from his broad base of skills. Steve and Tom Hogan will make a powerful and effective management team."

Douglass joined May Company in 1976 as director of corporate reporting and analysis. He was named divisional vice president, credit, for May Company, Ohio, in 1979, rejoined the corporate office in St. Louis in 1980 as vice president of planning, and became senior vice president of planning in 1982. In 1986, Douglass served as chairman of the O'Neil's division in Akron, Ohio, and later in the year was named senior vice president and chief financial officer at Robinson's.

A native of Portland, Ore., Douglass received a B.S. degree from Marquette University and an MBA degree in finance from the University of Detroit. He is married to the former Linda Olin of Minneapolis and they have three children.

May Company, Ohio, is headquartered in Cleveland and operates 16 stores throughout the state.

The May Department Stores Company is one of the largest retailers in the United States, operating more than 290 department stores and 2,700 specialty shoe stores in 47 states and the District of Columbia.

HOUSTON (FEB. 12) PR NEWSWIRE - U.S. Home Corp. (NYSE: UH), today reported that for the year ended Dec. 31, 1989 net income was $1,339,000, or 3 cents per share, compared to net income of $5,028,000 or 13 cents for the year ended Dec. 31, 1988. Results for 1989 include an extraordinary gain of $14,866,000 from the early extinguishment of debt. Total revenues for the year ended Dec. 31, 1989 were $675,558,000 including $643,167,000 from housing operations and $32,391,000 from financial services compared to total revenues of $735,807,000 for 1988, including $672,891,000 from housing operations and $62,916,000 from financial services.

For the quarter ended Dec. 31, 1989, the company reported net income of $46,000 compared to net income of $1,334,000 for the fourth quarter of 1988. Fourth quarter 1989 results include an extraordinary gain of $7,274,000 from the early extinguishment of debt. Revenues for the fourth quarter were $165,665,000 of which $157,751,000 were from housing operations, compared to 1988 fourth quarter revenues of $193,076,000 of which $181,369,000 were from housing operations.

New homes delivered in 1989 were 5,437 units compared to 6,178 units in 1988. Deliveries include 203 homes and 195 homes, respectively, delivered in 1989 and 1988 by joint ventures in which the company participates. New homes delivered in the fourth quarter, including deliveries by joint ventures, were 1,302 compared to 1988 fourth quarter deliveries of 1,612. The dollar value of the Dec. 31, 1989 backlog, excluding joint venture activity, was $207,013,000 compared to $197,757,000 at Dec. 31, 1988. The average price of homes sold in 1989 was $116,500 compared to $106,500 in 1988.

Results in 1989 were favorably affected by reductions in selling, general and administrative expenses of $8.4 million, an 8 percent reduction from the prior year. Net income in 1989 was impacted by a loss of $4.6 million from discontinued operations and by provisions taken of $9.2 million relating to the write-down to their net realizable value of certain housing, land options and marketing assets in markets in which the company has closed or reduced operations.

In 1989 U.S. Home made a significant progress in reducing its debt burden and improving cash flow. During the year, the company retired approximately $94 million principal amount of its public debt resulting in a reduction in its total housing debt of $64.4 million, net of additional borrowings. The reduction of debt reduces future annual cash interest obligations by over $9 million.

In 1989 U.S. Home continued to streamline operations, deploying assets in strong markets in California and Florida and reducing or closing operations where returns did not warrant the investment. Operations were closed in Albuquerque, N.M., Atlanta and Charlotte, N.C. and reduced in Phoenix and Tucson, Ariz. U.S. Home, with this streamlining and significant reduction in debt, has improved the company's prospects for earnings and its ability to compete effectively for financing and take advantage of opportunities existing in the homebuilding industry in the 1990's.

TAMPA, FL (FEB. 12) PR NEWSWIRE - Musselman Steel Corporation ("Musselman"), a structural steel engineering and fabrication company announced today completion of a merger with Ivory Coast, Inc., a publicly traded OTC company. Pursuant to the terms of the merger agreement, Musselman will become a wholly owned subsidiary of Ivory Coast. Frank R. Esposito, Sr. has been elected as the chairman, president and CEO of Ivory Coast and will own a controlling interest in Ivory Coast. Norman H. Waite has been elected executive vice president of Ivory Coast. Esposito has stated that he will apply to have Ivory Coast's stock listed on the National Association of Securities Dealers Automated Quotation System ("NASDAQ") as soon as possible.

Musselman Steel recently reported unaudited results of operations from its first quarter ending Dec. 31, 1989 wherein it had sales of $3.5 million and earnings in excess of $180,000. This compares with sales of $2,000,000 and a loss of $220,000 for the comparable quarter ended Dec. 31 1988.

Musselman Steel, established in 1950, is a structural steel fabricator servicing the construction industry in the state of Florida. The company operates its own manufacturing facilities consisting of 117,000 square foot plant with multiple crane capabilities and a monthly plant capacity of 1,500 tons. Some of Musselman's completed large projects include: Tampa International Airport, Airside F ($3.7 million contract); Disney Yacht Club ($2 million); Motorolla ($.6 million); University of South Florida Activity Center ($.7 million); and Universal Studios ($1.1 million).

SAN FRANCISCO (FEB. 12) PR NEWSWIRE - Chevron Information Technology Co. (CITC), a unit of San Francisco-based Chevron Corporation, has selected AT&T and Hughes Network Systems to negotiate agreements for what are generally known in the telecommunications industry as Customized Network Services. These multi-year, discounted-price contracts will combine voice and data transmission circuits with other telecommunications services, such as network management, network design, billing/administration and maintenance.

"These innovative agreements will offer substantial costs and labor benefits to Chevron," said Bill Houghton, president of CITC. "We have taken a large portion of Chevron's network activities, roughly $50 million per year, and we are asking these vendors to provide custom-designed solutions at a large discount. We expect to improve network availability and quality of service to CITC's internal 'clients' while significantly reducing their costs.

"Telecommunications plays an important role in helping run Chevron's business efficiently. We also expect these agreements will allow us to exploit new technologies that could give us an advantage in the marketplace."

The contracts will take several more months to negotiate, and the agreement with AT&T will require approval by the Federal Communications Commission under Tariff 12, which typically takes an additional 60 days.

Plans call for full implementation by the end of 1991. CITC expects to reduce about 70 positions by 1991, many of which are currently held by contractors. Houghton stressed that "People-related issues will be given our highest priority during this transition." CITC coordinates all of Chevron's telecommunications, data processing and management information services for the Chevron companies.

BUFFALO, N.Y. (FEB. 12) PR NEWSWIRE - Comptek Research, Inc. (AMEX/BSE: CTK), today announced that it has received a subcontract from the Sierra Nevada Corporation, Reno, Nev., to customize eight electronically-equipped command centers for the Department of Energy. The mobile command centers which are used for mission planning, control of resources and communications during tactical situations, will ultimately be delivered to the United States Air Force Tactical Air Command.

Comptek's subcontract from the Sierra Nevada Corporation has a total value

of $1,764,000 through June of 1991, with the initial seven month base period of this cost plus fixed fee contract valued at $210,000. The first four-month option period is worth $942,000, and the last six months of the contract are valued at $612,000. The contract builds upon Comptek's expertise in supplying mobile communications and command posts to support Air Force requirements.

Sierra Nevada's staff is developing the prototype under a "technology transfer" program, where the government transfers new technology to industry. Comptek will support Sierra Nevada Corporation in the manufacture and test of subsequent units in a production environment at its Cheektowaga, New York, facility. According to Jack E. Wagner, Chairman President and Chief Executive Officer of Comptek, a need for additional units has been identified by the Air Force, and may lead to follow-on work.

Comptek Research, Inc., with offices in eleven cities in the U.S., develops command, control, communications and intelligence systems and electronic defense systems, primarily for the Department of Defense. Related activities include the design and development of software for naval warfare, shipboard and aircraft combat systems and specialized technical services.

#90043p0321 02/12/1990 ~PR Newswire

BOULDER, CO (FEB. 12) PR NEWSWIRE - Synergen Inc. (NASDAQ: SYGN), today reported that its revenues for 1989 increased by 103 percent to $14,796,000 from $7,275,000 for the previous year.

The net loss for the year was $1,310,700, or 15 cents per share, compared to a net loss of $5,163,600, or 55 cents per share, for 1988.

For the fourth quarter ended Dec. 31, 1989, the company reported a net loss of $845,700, or 10 cents per share, on revenues of $4,466,700, compared to a net loss of $1,892,200, or 21 cents per share, on revenues of $1,619,500 for the like period in 1988.

Jon Saxe, president and chief executive officer of Synergen, commented, "Our revenues for 1989 more than doubled to $14.8 million, mainly from our agreement with Hoffmann-La Roche to develop IL-1ra as a treatment for rheumatoid arthritis and other inflammatory diseases."

Saxe added, "During the past year, Synergen also began Phase II clinical trials to evaluate our bFGF product for treating chronic skin ulcers. Our neuroscience research included such advances as the identification of a novel protein called CNTF that has potential as a treatment for serious

neurological disorders."

Synergen expects that its operating results will fluctuate significantly from quarter to quarter primarily due to the timing of revenues received from joint venture partners.

Synergen is a biotechnology company developing products to treat inflammatory diseases, vascular disorders and neurological conditions using recombinant DNA technology and the latest advances in molecular and cellular biology.

#90043p0322 02/12/1990 ~PR Newswire

TULSA, OK (FEB. 12) PR NEWSWIRE - The Williams Companies, Inc. (NYSE: WMB) today reported 1989 net income of $52.5 million, or $1.17 per share, on revenues of $1.7 billion.

In 1988, the company had restated net income of $116.4 million, or $3.06 per share, but $102.2 million of that sum, or $2.69 per share, came primarily from proceeds of the sale of Agrico Chemical Company the preceding year.

Income from continuing operations in 1989 was $52.5 million, or $1.17 per share, compared with restated income from continuing operations of $14.2 million, or 37 cents per share, in 1988. Revenues for both years were comparable.

"1989 began to reflect our company's underlying earning potential, which we anticipate will be more fully realized in 1990 and the coming decade," said Joseph H. Williams, chairman and chief executive officer of the $3.9-billion energy transportation and nationwide digital telecommunications corporation.

"We see a number of challenges, but more importantly, we see growth opportunities for our natural gas and petroleum pipeline companies, as well as for our telecommunications unit," he said.

Williams noted several factors expected to impact future performance: Although the telecommunications industry is increasingly price-sensitive, demand remains strong. WilTel's operating profit should continue to increase in 1990.

The long-range outlook for the company's interstate natural gas systems is positive because of improved rates and strategic geographic location between long-term supplies and vital markets. However, warm weather in

early 1990 indicated the possibility of an operating profit decline in Williams Natural Gas Company.

Construction is to start in late 1990 of the 904-mile Kern River Gas Transmission Company pipeline to supply natural gas to California in 1991.

The company's gas marketing and intrastate pipeline unit should perform better in 1990 because of the absence of contract reformation charges experienced in 1989, and its reorganization is expanding its national scope.

NEW YORK (FEB. 12) PR NEWSWIRE - The Rouse Company (NASDAQ: ROUS) of Columbia, Md., today announced financial results for 1989.

Earnings before depreciation and deferred taxes from its operating properties were $60,205,000, up 17 percent from $51,424,000 in 1988. The company reported that total earnings before depreciation and deferred taxes were $57,084,000, a decline of 13 percent from $65.3 million in 1988. This anticipated result was largely due to a planned reduction in revenues and earnings from the sale of land in Columbia. Net earnings were $9,733,000 compared to the $19,992,000 recorded in 1988.

Current value shareholders' equity, derived through appraisal of the market value of the company's assets, was $1.73 billion, or $34.80 per share (after the assumed conversion of all outstanding convertible subordinated debentures). These figures compare with 1988's current value shareholders' equity of $1.49 billion, or $30.65 per share.

The Rouse Company is one of the nation's leading real estate development and management organizations. It operates 77 retail projects in the United States and Canada totalling more than 45 million square feet of space. The Rouse Company also operates more than 100 office projects totalling over 9 million square feet and is the developer of the new city

of Columbia, Md.

PHILADELPHIA (FEB. 12) PR NEWSWIRE - Jetronic Industries, Inc. (AMEX: JET) today announced that it had reached a five-year standstill agreement with a shareholder group, led by Flagship Acquisition Corp. and JettAir Holdings, that had initiated an unsolicited tender offer for all of the company's shares.

Jetronic rejected the tender offer because its board of directors and an independent investment banker determined that the offer was illusory and inadequate, and it previously filed suit against the Flagship group alleging that the tender offer not only was illusory but violated the federal securities laws. The standstill agreement grants Jetronic or its nominee the option to purchase the shares held by JettAir Holdings at more than 25 percent below the group's purchase price for the shares.

The Flagship group owns 201,000 shares of Jetronic stock, or 8.18 percent of the outstanding shares. Its average purchase price was $3.55 per share for a total of $713,000. As part of the agreement, Jetronic received an option to buy any or all of those shares at $2.61 per share, for a total of $525,000, until July 8, 1990. If that option is not exercised, from

July 9, 1990, to Feb. 8, 1995, Jetronic can buy any or all of the shares at the group's cost, or $3.55 per share.

During the five years the standstill arrangement is in effect, Flagship is free to sell the shares in the open market, but it cannot sell more than 2 percent of the outstanding shares of Jetronic common stock within any three-month period.

As a result of the standstill agreement, the group's tender offer has been withdrawn and all litigation between Jetronic and the Flagship group will be dismissed with prejudice, including the company's lawsuit in federal court alleging violations of the securities laws and the Flagship group's state court action for inspection of the company's share register and other books and records.

In approving this agreement, the Jetronic board also expressed its determination to continue considering alternative ways to enhance shareholder value. In this regard, Daniel R. Kursman, Jetronic's chairman and president, said that the board is expected to meet shortly with Legg Mason Wood Walker, Inc., its financial adviser, to review a number of alternatives aimed specifically at enhancing shareholder value.

LAWRENCE, MA (FEB. 12) PR NEWSWIRE - First Essex (NASDAQ: FESX) announced today that net income for the fiscal year ended Dec. 31, 1989 was $2,968,000 (or 47 cents per share) compared to $4,614,000 (or 66 cents per share) in 1988.

Net interest income after provision for possible loan losses totaled $6,201,000 for the year, a decrease of 61.5 percent compared to $16,086,000 for 1988.

The provision for possible loan losses totaled $10,799,000 for the year compared to $1,583,000 for 1988. At Dec. 31, 1989, the allowance for possible loan losses totaled $7,249,000 compared to $2,430,000 at Dec. 31, 1988.

At Dec. 31, 1989, non-accruing loans were $19.7 million compared to $21.2 million at Sept. 30, 1989. Other real estate owned at Dec. 31, 1989 totaled $12,480,000 compared to $5,281,000 at Sept. 30, 1989.

The net loss for the fiscal quarter ended Dec. 31, 1989 totaled $750,000 (or 12 cents per share) compared to net income of $1,448,000 (or 21 cents per share) for the same period in 1988. Net interest deficit after provision for possible loan losses totaled $5,021,000 for the quarter, compared to net interest income of $4,469,000 for the same period in 1988.

The provision for possible loan losses for the fourth quarter totaled $9,128,000 compared to $300,000 for the fourth quarter in 1988. Securities gains realized in the fourth quarter of 1989 totaled $7,707,000 compared to $901,000 in the fourth quarter of 1988. After realizations of gains in the fourth quarter of 1989, First Essex had net unrealized securities gains of $5,839,000 remaining in its investment portfolio.

First Essex Bancorp, Inc. is the holding company of First Essex Savings Bank, Lawrence, Mass., and First Essex Bancorp of New Hampshire, Inc. and its subsidiary, First Essex Savings Bank of New Hampshire, Windham, N.H. First Essex Bancorp subsidiaries now have 10 bank offices in northeastern Massachusetts and two offices in southeastern New Hampshire. The company had total assets at Dec. 31, 1989 of $641 million.

MINNEAPOLIS (FEB. 12) PR NEWSWIRE - Officials of regional brokerage firm John G. Kinnard & Co., and its parent company Kinnard Investments Inc. announced a management reorganization today and two large stock transactions involving the company's former top two officers and 28 employees.

Former Dain Bosworth Inc. executive Robert Martin and 27 other Kinnard employees have purchased approximately 435,000 shares and warrants in a private placement for nearly $1.2 million. Kinnard also announced it contributed $731,500 to its employee stock ownership plan (ESOP), which also has been used to purchase common stock from the company.

Martin, 62, a long-time senior executive vice president at Dain Bosworth who retired six months ago, was elected Monday as chairman of the board and chief executive officer. He also now is a major stockholder of the publicly traded company.

Thomas Mulvaney, 52, chief operating officer and director, has been named president. He has been with the company 17 years.

Howard O'Connell has resigned as president, treasurer and board member. Plato Mavroulis has resigned as executive vice president but will remain on the board of directors. Both will remain with the company as vice chairmen.

O'Connell, Mavroulis and outside director Hilding Nelson sold 370,000 Kinnard shares to the company for $2.375 per share. The NASDAQ stock closed Friday at $2 bid, $2-3/8 ask.

Kinnard's $731,500 payment to the ESOP contributed significantly to 1989 losses of $1 million for the fourth quarter and $906,651, or 46 cents per share, for the year ended Dec. 31. Annual revenues increased 32.1 percent over 1988 to $19,310,112.

O'Connell said the large ESOP contribution and year-end loss, however, will provide the company with a $713,536 tax refund that combined with the $1.2 million employee stock purchase will increase Kinnard's net worth.

O'Connell and Mavroulis have managed the company for more than 25 years and helped it grow from an organization with 30 employees into a well-capitalized regional brokerage firm with 140 brokers and nearly 300

total employees in 30 branch offices in seven states. The firm was founded in 1944 by John G. Kinnard as a distributor of mutual funds, later evolving into a full-service securities firm.

Kinnard Investments Inc., Minneapolis, principally through its subsidiary John G. Kinnard & Co., operates a regional full-service securities firm with 30 branches in seven states.

#90043p0362 02/12/1990 ~PR Newswire

SEATTLE (FEB. 12) PR NEWSWIRE - The newest commercial jet offered by Boeing Commercial Airplane Group, the 737-500, was certified today for commercial flight by the U.S. Federal Aviation Administration following an extensive flight test program, the company announced.

The jetliner completed approximately 650 hours of tests, including 375 hours of flight tests.

"Mechanical dispatch reliability during the test program exceeded 99 percent," said Charlie Higgins, Boeing 737 test certification and performance manager.

Higgins attributed the high reliability to the experience gained in developing two other new 737 family members and to the intensive planning and monitoring of the test program by a team of Boeing flight test and engineering personnel.

This newest twinjet provides airline operators with a new-generation replacement for the ubiquitous 737-200 twinjet. It is about the size of the familiar -200 aircraft, but with all of the advanced technologies of the larger 737-300 and 737-400 models.

Engines for the -500 are from the same CFM56-3 series of powerplants offered on the -300 and -400 models. This engine series is noted for its exceptional fuel efficiency, low noise and high reliability. The -500 will consume up to 20 percent less fuel per seat than a comparably configured -200.

These advanced engines assure that the 737-500 will be a good community neighbor at even the most noise-sensitive airports. In fact, the takeoff, sideline and approach noise levels are below the stringent "Stage 3" limits set by the U.S. government.

A fully integrated flight management system (FMS) for automatic control

and guidance is incorporated in the 737-500 as it is in other new-generation 737 family members and the larger 757 and 767 types. The flight decks of all 737 models are available with an electronic flight instrument system (EFIS), incorporating cathode ray tube displays for primary flight instrumentation.

The 737-500, with 108 seats in mixed class, is the shortest-fuselage version of the new advanced technology 737s. It complements the 737-300, seating 128 passengers, and the 146-seat 737-400.

The three new generation 737s enable airlines to select the sizes that match traffic loads, with full assurance that crews can operate any of the models due to a common type rating. Other advantages of commonality include reduced training costs and the ability to keep maintenance and spare parts costs to a minimum.

First launched in May 1987, the 737-500 rolled-out of the Renton plant on June 3, 1989. First flight occurred on June 30, 1989.

First deliveries to Southwest Airlines (USA) and Braathens SAFE (Norway) will begin in late February and early March, respectively.

LONG BEACH, CA (FEB. 12) PR NEWSWIRE - The British Petroleum Co. issued a purchase order Feb. 10 to Southwest VECO Inc. of Long Beach to clean the shoreline from the Huntington Beach Pier to the Santa Ana River Delta.

VECO is the same firm commissioned by Exxon to cleanup the Valdez oil spill in Prince William Sound from March to September 1989.

VECO is employing workers around the clock to hire cleanup personnel, procure supplies and equipment, and clean the shoreline. An average of 500 yards of shoreline have been cleaned per shift, totalling 1,000 yards of beach per day. VECO had 200 employees on the beaches by 6 a.m. Sunday with the intent of increasing the number of yards of shoreline that can be cleaned each day.

NEWBURY PARK, CA (FEB. 13) PR NEWSWIRE - Definicon International Corp.

announced today that the company intends to be acquired by Helionetics Inc. (PSE: HLX, NASDAQ: HLXC) in a merger plan which will be presented to Helionetics' shareholders for their approval.

Definicon International expects revenues for 1990 to approximate $25/30 million, nearly three times that achieved by Helionetics in 1989. Dr. Vincent P. Williams, said that Definicon's profits before taxes and extraordinary items would approximate $2.5 million and this level of earnings should provide Helionetics International with a solid base to substantially increase its business opportunities in future years.

Williams further stated that this agreement with Helionetics to merge resulted in part because of the inability of L.C. Wegard, the lead underwriter, to consummate the firm commitment underwriting agreement with respect to Definicon's recently aborted initial public offering.

Helionetics International will offer a range of computer products to the domestic and international marketplaces; these lines will include high voltage power conditioning units for mainframe computers and a range of SPARC-based microcomputers which will provide a level of computational capability and price/performance in excess of the SPARC-based workstations offered currently by Sun Microsystems.

#90043p0376 02/12/1990 ~PR Newswire

GLENDALE, CA (FEB. 13) PR NEWSWIRE - Citadel Holding Corp. (AMEX: CDL) announced net earnings of $3,606,000, or $1.09 per share, for the three months ended Dec. 31, 1989, and $8,140,000, or $2.47 per share for the year ended Dec. 31, 1989, compared to net earnings of $4,880,000, or $1.48 per share, for the fourth quarter of 1988 and $24,080,000, or $7.32 per share, for the year ended Dec. 31, 1988.

Net earnings for the fourth quarter reflected $5.3 million of nonrecurring legal charges. Normalized fourth quarter 1989 earnings of $6.8 million before these charges and their tax effect have recovered substantially from the second and third quarter lower levels largely due to a higher net interest rate margin. The margin, which had declined from 1.41 percent at the beginning of 1989 to 1.07 percent at June 30, 1989, grew to 1.55 percent at Sept. 30, 1989 and reached the year's high of 2.q6 percent at Dec. 31, 1989.

Earnings for the year 1989 reflected an earlier write-off in the third quarter of 1989 of $2.1 million of capitalized costs upon the decision to terminate studies of a potential acquisition of Valley Federal Savings. Increases to loan loss reserves of $8.4 million, primarily for general

loss reserves and certain larger loans and largely provided in the first nine months of the year, substantially exceeded reserves of $1.6 million provided in 1988. The impact of these writeoffs and reserves was reduced by an insurance recovery of $2.5 million in the second quarter of 1989. Earnings in 1988 had included gains on sales of Federal Home Loan Mortgage Corp. preferred stock which, net of tax, increased 1988 earnings by approximately $1.5 million.

#90043u0150 02/12/1990 ~United Press International

WASHINGTON (FEB. 12) UPI - In the praise that greeted the release of jailed black nationalist Nelson Mandela, President Bush and Congress signaled a go-slow approach toward the relaxation of economic sanctions against South Africa.

Bush offered hope of ''a peaceful evolution towards a totally racially free South Africa.'' Rep. William Gray, D-Pa., applauded the move as evidence of change, but said, ''How far it's going to go, it's too early to determine.''

Although the release of Mandela was an important symbolic victory for opponents of apartheid, backers of the sanctions used since 1986 to punish South Africa for its racial policies demanded more concessions in exchange for easing the pressure.

Even Bush, who has opposed the sanctions, appeared bound by law to wait and see whether Mandela's freedom is followed by other tangible steps sufficient to meet conditions set by Congress for revision or repeal of the sanctions.

Having opposed those measures from their inception, Bush also for the first time acknowledged the sanctions may have helped persuade South African President Frederik de Klerk to free Mandela after 27 years as one of the world's most famous political prisoners.

Bush summoned reporters to an impromptu Rose Garden news conference Sunday afternoon to announce he had telephoned Mandela to say all Americans ''were rejoicing at his release'' and to invite him to Washington.

Mandela ''sounded restrained,'' he said, and ''expected he would be able to accept'' the invitation to the White House.

''All in all, I'm sure he enjoyed this first day very, very much,'' Bush added.

Earlier Sunday, Assistant Secretary of State Herman Cohen said the administration would be reviewing U.S. policy in light of Mandela's release, but said any modification would be done in consultation with Congress.

In fact, Congress lay down five conditions in 1986 for any change in the sanctions, including the release of all political prisoners, the repeal of state-of-emergency regulations and the start of negotiations on power sharing with the black majority.

The law now bans new U.S. business investments in South Africa, landing rights in the United States for South African aircraft, U.S. government purchases of certain South African products and high-technology exports to South Africa.

Bush acknowledged sharp ''differences of opinion'' over the value of the sanctions and said, ''Let's just rejoice in the fact that Mr. de Klerk took some forward steps and let us rejoice in the fact that Mr. Mandela is free.''

''I'm not going to express my view on sanctions at this time,'' Bush said. ''We've had momentous events, and I think the thing is to let these events settle in.''

Gray echoed the sentiments of many members of Congress on the ABC News program ''This Week with David Brinkley'' when he said ''it's too early to determine'' when or whether the legal conditions for repeal of the sanctions will be met.

''Although we welcome it and we applaud the move by Mr. de Klerk, the fact is that South Africa is still not free,'' he said. ''There are 23 million black South Africans that don't have the right to vote, that don't have the right to live where they want or travel where they want.

''So we've got to see what this first step means in terms of that process '' Gray said.

Gray, the architect of the sanctions legislation, contended that the measures have caused the South African economy to plummet as the government in Pretoria has been denied foreign capital and credit. Bush, like Reagan, has argued the sanctions have had a more painful impact on blacks in South Africa than on the government.

But support for the sanctions came Sunday from no less a figure than Mandela himself, who said in his first public address in almost three decades that ''to lift sanctions now would be to run the risk of aborting the process towards the complete eradication of apartheid.''

#90043u0160 02/12/1990 ~United Press International
MOSCOW (FEB. 12) UPI - West German Chancellor Helmut Kohl ended a two-day visit to Moscow saying he had a promise from Soviet President Mikhail Gorbachev to leave the time frame for German reunification for Germans to decide.

Kohl, who arrived Saturday for a hastily arranged visit, also predicted at a news conference that West Germany and East Germany would again be one nation soon.

Foreign Minister Eduard Shevardnadze and other Soviet officials saw Kohl and West German Foreign Minister Hans-Dietrich Genscher off at Moscow's Vnukovo Airport Sunday, Tass said Sunday.

''I thank General Secretary Gorbachev that he has made possible this historical outcome,'' Kohl told reporters at a news conference late Saturday night.

''This is a good day for Germany and a good day for me personally,'' a smiling Kohl said after meeting with Gorbachev for two hours.

The agreement on reunification reversed the Soviets' 45-year refusal to allow a reunited Germany so as to prevent any chance of a powerful Germany again posing a miltary threat to the Soviet Union.

For Gorbachev, the agreement carries enormous political risk, because 20 million Soviets died in World War II, first repulsing and then defeating the Germans.

Kohl was asked directly whether German reunification would be completed before a pan-European security conference in 1992 that will discuss the changing European order.

''I do not believe that the decision requires such a long time to be taken '' Kohl said. ''We are in a very dynamic process that is not being accelerated by us, but by East Germany.''

Kohl admitted that he was surprised by the rapidity of events across the border.

''If the question had been asked of me even recently, I would have made a wrong forecast.''

Kohl said his talks with Gorbachev at the Kremlin had produced an important breakthrough.

''Gorbachev has unmistakably assured us that the Soviet Union will respect the decision of the Germans to live in a united state and that it is up to the Germans to determine the time frame and the path toward unity.''

Kohl said such a dialogue would begin next month after East Germany holds its first free elections since World War II, March 18.

''We will discuss this question when the East German government, which will be freely elected, begins to discharge its duties,'' he said. ''At that time, we will express our views on that matter.''

A host of questions remains in connection with German reunification, including whether a single Germany would remain within NATO, as the United States wants, or would become a neutral country outside the two major military blocs, as the Soviet Union wants.

Kohl and Genscher said the NATO issue would be discussed at the 35-nation Conference on Security and Cooperation in Europe this year.

Kohl said the issue would also be addressed this year in separate six-way talks among the United States, the Soviet Union, France and Britain - the four wartime allies that still control Berlin - and the two Germanys.

''The visit did not result in a real change in the German situation,'' said Jans-Jochen Vogel, chairman of the opposition Social Democratic Party. Kohl's view of Saturday's meeting as a ''historic event'' was exaggerated, he said.

Gorbachev's recognition of the right of the Germans to decide their own future was nothing new, Vogel said. The West German Green Party agreed that Soviet policy regarding German unification remained the same as in past months.

#90043u0180 02/12/1990 ~United Press International

NEW DELHI, INDIA (FEB. 12) UPI - Pakistan's support for pro-secession Moslems in the troubled Kashmir Valley constitutes ''an unacceptable interference in the affairs of India,'' the government said.

India urged its neighbor to pursue a ''path of peace.''

Meanwhile, Pakistani officials said Indian troops fired Sunday on Pakistani demonstrators who ran across the cease-fire line dividing the disputed region of Kashmir, killing at least two people and wounding six in the second such incident in a week.

The officials said Indian and Pakistani border forces exchanged fire for

about 30 minutes across the frontier following the incident, but no further casualties were reported.

Local officials in the town of Chakoti, about 60 miles northeast of Islamabad in Pakistan's Kashmir region, said about 12 villagers shouting anti-Indian slogans ran across the cease-fire line into India's Jammu and Kashmir state despite warnings by security forces on both sides.

An Indian government-imposed curfew brought life to a virtual standstill throughout the strife-torn valley Sunday, stifling anticipated violence by Moslem separatists on the anniversary of the death of a militant leader.

''Prime Minister Benazir Bhutto's statement and the resolution moved in the joint session of Pakistan's Parliament ... constitute an unacceptable interference in the affairs of India,'' a government spokesman said.

Bhutto, during a joint session of Pakistan's Parliament, which began Saturday on the 3-week-old uprising against Indian rule in Kashmir, reiterated her country's support for the pro-secession Moslems. Legislators adopted a resolution that called upon India ''to desist from its ruthless attempt to suppress the demand of the people of Jammu and Kashmir for self-determination.''

The resolution also reaffirmed Pakistan's demand for a plebiscite under U.N. auspices to decide the future of the region.

The Indian spokesman said that evidence of Pakistani involvement in the Kashmir region has been shown to Pakistani officials in the past few weeks and that further evidence would be provided.

''We propose to furnish further evidence to the Pakistani government about the nefarious designs of anti-Indian forces operating from Pakistani soil '' the spokesman said. ''While reiterating our resolve to repulse any untoward and unwarranted incursions into our sovereign territory, we once again urge Pakistan to adopt a path of peace.''

In addition to the government precautionary curfew imposed throughout the northern state of Jammu and Kashmir, pro-secession Moslems also directed residents to remain indoors to commemorate the death anniversary of Maqbool Butt.

The double-curfew brought an uneasy calm to the valley, which has been rocked by near-daily violence for the past three weeks.

With shops closed and residents staying indoors, the only movement throughout the region was that of tens of thousands of security force personnel, witnesses said.

Life in Srinagar, the state's summer capital 400 miles north of New Delhi, along with the rest of the region was virtually paralyzed, witnesses said.

Butt - founder of the Jammu and Kashmir Liberation Front, the popular and most powerful of all the Moslem radical groups pressing for Kashmir's secession from India - is widely regarded as a martyr throughout the valley. He was hanged in 1984 for killing a police officer.

Authorities, expecting trouble on the death anniversary, announced the curfew late Saturday over government-run radio.

More than 100 people - most shot by security forces during demonstrations - have died since large-scale violence erupted Jan. 20, according to official sources. The government puts the number of dead in the 30s.

The drive for independence is supported by virtually all 3 million of the region's Moslems. They share a belief that their interests have been consistently neglected by the Hindu-dominated New Delhi government.

Kashmiris also are angered because New Delhi failed to keep its promise to the United Nations to hold a plebiscite to determine the status of the region.

India controls about two-thirds of Kashmir, with Pakistan holding the rest. Both countries dispute each other's claim.

#90043u0196 02/12/1990 ~United Press International

(FEB. 12) UPI - The head of a House subcommittee on Africa says Sunday's release of Nelson Mandela is ''really only the beginning'' of reform in South Africa. Democratic Representative Howard Wolpe of Michigan says officials in South Africa still ''cling to the fantasy'' they can retain control or veto power in the political system.

More than 40-thousand people cheered Mandela in Cape Town Sunday as he praised the recently-legalized African National Congress. Mandela raised a clench fist while standing under the group's flag of green, gold, and black. The nationalist leader maintained that most black and white South Africans- quote- ''realize apartheid has NO future.''

Paramedics and witnesses in Cape Town say 200 people were wounded and one killed when police fired buckshot at accused looters before Mandela appeared. A second black man was killed by rampaging youths. At Sunday's rally, Mandela reserved the right to use force for what he described as a defense against apartheid.

The Salvadoran Red Cross reports government military bombs killed five

civilians in northern El Salvador Sunday. The fighting came as a U-S congressional delegation arrived in San Salvador to look into whether Washington should continue to fund the Salvadoran military. The group will also investigate the November slayings of six priests.

Secretary of State Baker met Sunday in Ottawa, Canada, with 16 NATO representatives to discuss a Soviet proposal for superpower troop cut in Europe. Last week, Soviet President Gorbachev countered a U-S plan for cuts by proposing even further reductions. Sunday's meeting between Baker and his NATO counterparts is fulfilling a promise to consult U-S allies first.

A publicist for Billy Idol say the British rock singer is ''safe and sound'' after surgery Sunday for injuries suffered in a motorcycle accident. The 34-year-old pop singer was hurt Tuesday when his motorcycle struck a car at a Hollywood intersection. The performer suffered a compound fracture of his right leg and a broken left arm.

#90043u0207 02/12/1990 ~United Press International

ATHENS, GREECE (FEB. 12) UPI - Iran marked the 11th anniversary of its revolution with marches and a mass rally in Tehran's Freedom Square, official reports from Tehran said.

The U.S. State Department had issued an alert Thursday to Americans that pro-Iranian Hezbollah terrorists might be planning attacks on U.S. interests in Western Europe to mark the 11th anniversary of the revolution.

In Tehran, President Akbar Hashemi-Rafsanjani, one of the architects of the revolution that toppled the shah, addressed the rally at Azadi, or Freedom, Square where he paid tribute to the late Ayatollah Ruhollah Khomeini, the state-owned Islamic Republic News Agency said.

The rally culminated 11 days of ceremonies in Tehran, where the anniversary celebrations were held for the first time since Khomeini died June 2.

Tehran radio, monitored in Athens, said huge crowds marched through the streets of the capital chanting slogans and carrying huge pictures of Khomeini, who led the revolution against the shah in 1979.

The authorities replayed on a public address system a speech Khomeini made at Behesht Zahra cemetery, some 10 miles south of Tehran, Feb. 1, 1979, the day he returned to Iran after 15 years in exile.

Tehran radio quoted a reporter who viewed the crowd from a helicopter as saying an estimated 5 million people turned out for the marches and rally,

an apparent exaggeration. Independent estimates of the crowd were not immediately available.

Over the past 10 days, Iran celebrated what is officially known as the ''10-Day Dawn,'' marking the period between Feb. 1, 1979, when Khomeini returned, and Feb. 11, when he seized power.

Military maneuvers, a film festival, an Islamic conference, special plays and book and picture exhibitions were held to mark the occasion.

Iran had complained to the United Nations about the State Department warning, saying the alert was baseless and was issued to blemish Iran's image abroad.

On Friday, however, Iran's new spiritual leader, Ayatollah Ali Khamenei, mounted a pulpit for the first time in months to renew Khomeini's death call against British author Salman Rushdie for writing the novel ''The Satanic Verses.''

Most Moslems consider the novel blasphemous, but several Western leaders expressed dismay at the renewal of the murder call against Rushdie.

Khamenei's move shattered the view that Iran was moving toward moderation in the wake of Khomeini's death.

IRNA paraphrased Rafsanjani as saying in his speech at Azadi Square that Iranians ''owe the Islamic system in Iran to the lofty ideals of Imam Khomeini, and that they will owe the permanency of the same ideology to his trusted student, Ayatollah Khamenei.''

On Feb. 1, Hojatoleslam Ahmed Khomeini, the late Iranian leader's only surviving son, kept the ayatollah's anti-American sentiments alive in a fiery speech at Behesht Zahra.

''Those who think of making compromise with the United States are not treading the Imam's (Khomeini's) path,'' IRNA quoted him as saying.

In Baghdad, the Mojahedin Khalq Organization, an Iranian opposition group in exile, said Khamenei's renewed death call against Rushdie was probably intended to draw attention away from an internal power struggle among the ruling clerics.

A Mojahedin statement said some 400 clerics from the pragmatic and the hard-line camps met in late January in a bid to reach a compromise, but failed.

The pragmatists, led by Khamenei and Rafsanjani, pushed the hard-liners into the sidelines after seizing control in a series of moves after

Khomeini died, but diplomats said the hard-liners still controlled Parliament and were by no means a spent force.

MEANGUERA, EL SALVADOR (FEB. 12) UPI - The largest repatriation ever in Central America is bringing thousands of Salvadoran refugees from

neighboring Honduras to start a precarious new life in the battle zone they fled almost a decade ago.

Hundreds of bamboo-frame houses with plastic and straw roofs have sprung up in four closely knit settlements where the Torola river meanders around the rural municipality of Meanguera, 70 miles northeast of San Salvador in Morazan province.

''We are really glad to be back on our own land,'' said Catarino Ramirez, a 50-year-old farmer whose family of 11 formed part of a group of 443 refugees to make the 22-mile trip from Colomoncagua, Honduras, Friday.

The Ramirez family, carting bundles of clothing, household goods and some rough furniture, staked out a sloping plot among trees and began making plans to put up temporary housing.

''For now, we are going to sleep under the trees,'' Ramirez said.

The United Nations High Commission for Refugees has been moving groups of refugees every four days from the Colomoncagua camp in Honduras.

In December, about 1,500 refugees ignored official Salvadoran objections and left the camp on foot, prompting Alfredo Cristiani's Salvadoran government to agree to a U.N.-organized and funded repatriation of the remaining 7,000.

Roberto Rodriguez, the commission's representative in El Salvador, said the move should be completed by Feb. 20.

''Colomoncagua (refugee camp) will have disappeared from the map,'' Rodriguez said. ''It will be history.''

Many of the returning refugees said they left for Honduras to escape the civil war and indiscriminate bombing by the armed forces. Church and human rights groups documented a series of massacres carried out in the area by the army in 1981, in which 700 to 1,000 civilians were killed.

The refugees chose to live north of the Torola, in mountainous wooded terrain controlled by rebels of the Farabundo Marti National Liberation Front, or FMLN.

Government and FMLN representatives said they would not conduct operations in the settlements, but on Feb. 1, a visit by Vice President Francisco Merino was followed by a confrontation in which helicopters and planes strafed a hillside within 2 miles of the area.

''The rocketing has caused a lot of worry in the community,'' said Sara Rodriguez, 24, who works on a public relations committee. She said

government troops still view the refugees as rebel supporters, but added: ''We didn't come back to support either side. We just want peace.''

Other problems related to living on the rebel side of the river include a virtual economic blockade in effect for the past nine years, with government troops allowing almost no trade between residents and people south of the Torola.

Federal public services, such as roadworks, electricity, medical attention and education have been non-existent.

Roberto Rodriguez said Colomoncagua was maintained by the United Nations at a monthly cost of $200,000 and that the new settlements face a hard road to self-sufficiency, with children comprising 60 percent of the population and adult males only 13 percent.

''There are members of the international community that are ready to donate materials if non-government agencies are allowed to distribute them and work with the repatriated community,'' Rodriguez said.

Refugee spokeswoman Maybel Reyes said Merino agreed during his visit to allow relief agencies to work with the refugees, to provide some government services and to allow free flow of trade.

''They have said 'yes' to everything,'' Reyes said. ''But we need (the non-government agencies) now and we need the materials now and it has not yet begun to happen.''

#90043u0236 02/12/1990 ~United Press International

BEIRUT, LEBANON (FEB. 12) UPI - Clerics shuttled between strongman Gen. Michel Aoun and Christian militia leader Samir Geagea in an effort to end warfare that has killed at least 432 people over 11 days and forced thousands of families into darkened shelters.

Christian officials said a mediation committee of three Christian clergymen held lengthy, separate talks Sunday with Aoun and Geagea as the foes' forces strengthened positions, poising for a new round of fighting.

Geagea asked that hostilities stop immediately while Aoun demanded an outright rejection by the militia of the Taif accord, an agreement to end the civil war worked out last year by parliament in the Saudi resort of Taif.

Aoun, who spurned the accord for failing to ensure a speedy withdrawal of Syria's 25,000 troops, has refused to abandon the presidential palace in the Christian enclave to pro-Syrian President Elias Hrawi.

Geagea angered Aoun when he refrained from making a clear stand on the Taif agreement and recognized Hrawi.

The latest fighting broke out Jan. 31 when Aoun, who commands a 15,000-strong force, declared his intent to disarm's Geagea's 10,000-man militia.

Police said the battles have killed at least 432 people and wounded 1,700. Papal Nuncio Pablo Puente has arranged several short-lived cease-fires, the latest taking effect late Saturday.

Backed by dozens of tanks, heavy artillery and rockets, Aoun's forces have launched waves of attacks against militia strongholds and cut its main supply route by closing the coastal road north of Beirut.

Until Sunday, many rotting corpses remained scattered on roads in east Beirut as thousands of families huddled in underground shelters without electricity. Many civilians have refrained from moving about for fear of tripping mines that the rival forces planted on roads. The warfare has spread chaos, encouraging thugs to plunder residents' vacated homes.

''We have launched patrols as of tonight to restore law and order in our areas,'' Geagea's militia announced Sunday evening. The force controls the residential areas of Ashrafieh, Dora, Karantina, Furn Shubbak and Ain Al Rummaneh.

While the clerics maintained their goodwill efforts, the rivals reinforced their positions.

Hundreds of Aoun's army troops equipped with tanks and heavy artillery were sent to heights east of the militia-controlled port town of Jounieh, 12 miles north of Beirut, security sources said. The gunmen responded by fortifying their trenches and positions.

The reinforcements were ordered a day after the antagonists fought a bitter battle in the strategic Jounieh region during which Aoun's forces attempted to thurst into the nearby district of Kesrouwane, the militia's heartland.

The fighting has continued despite peace appeals by Pope John Paul II.

''I hope that General Aoun would listen to the voice of the highest spiritual authority in the world,'' said Beirut's Maronite bishop, Khalil Abi Nader. The pope had sent a letter to Aoun urging him to cease hostilities.

#90043u0238 02/12/1990 ~United Press International
NEW YORK (FEB. 12) UPI - The interesting thing about ''The Kennedys of Massachusetts'' is what it is not - it is not another John-and-Jackie story, nor is it what it started out to be, which is a history of the Fitzgerald and Kennedy families dating back to the potato famine.

It also is not, as originally envisioned, an 11-hour maxi-series but instead is a three-part, six hour miniseries to air on ABC Sunday, Feb. 18 Monday, Feb. 19 and Wednesday, Feb. 21, 9-11 p.m. Eastern time each night.

The miniseries is the story of Rose and Joseph P. Kennedy, from the time of their courtship in 1906 to 1960 and the presidential inauguration of their second son, John F. Kennedy.

It is a saga about the roots of a famous American family, in a very different time and place, taking certain liberties with imagined conversations but not with historical events.

William Petersen stars as Joe, Annette O'Toole is marvelous as Rose - who in real life will be 100 years old in July - and the large cast also includes Charles Durning as Rose's father, John Francis ''Honey Fitz'' Fitzgerald, and Pat Hingle as P.J. Kennedy, Joe's father.

It is based on Doris Kearns Goodwin's book, ''The Fitzgeralds and the Kennedys,'' which began earlier with the arrival of the immigrants fleeing the Irish potato famine in the 1860s and traced the two families as they succeeded in Boston politics and business.

Durning, who makes a wonderful old rogue as Honey Fitz, comes to the role naturally - his own father was an Irish immigrant who came to New York State from Donegal.

''I wish they had gone back to Honey Fitz's beginning,'' Durning said in a telephone interview from Boston, where he was performing with Kathleen Turner in the Broadway-bound revival of Tennessee Williams' ''Cat On A Hot Tin Roof.''

''I think 'War and Remembrance' killed all the incentive for a longer miniseries. It was fascinating how Honey Fitz started. He sold newspapers on the streets in Boston when he was a kid, he came up very much the hard way.''

The miniseries begins with Honey Fitz's inauguration as mayor of Boston, a scandal-ridden regime that was par for the course in Boston politics.

''He was such a charming, lovable rogue,'' Durning said of Honey Fitz. ''There was no shame at all - in those days as long as you took care of

your constituency, which he did very well, they would vote you back in and he knew that.''

The love-hate relationship within the families fascinates him.

''They keep the family together,'' he said, ''but the women turn hard because the men make them so; they become almost shrews because of the men who then wonder what happened to the lovely innocents they married.

''That's what happened to Honey Fitz's wife. She became a shrew. I'm sorry they didnt go into that more. That relationship started to disintegrate after the political scandals and at age 55 he took up with his secretary.''

Her name was Toodles.

He said that on the one hand it was Honey Fitz who encouraged his Kennedy grandsons to womanize, but on the other hand, ''he was the one who discovered what John had, and that he could be president one day. John's own mother and father never paid much attention to him.''

Their focus, as the miniseries makes plain, was Joe Jr., who was killed in action during World War II.

Author Goodwin believes ''the miniseries really captures that quality of John Kennedy that I don't think is widely known, as somebody who was very hurt by the family structure, because Joe Jr. was so favored'' and he had to ''form a personality apart from that, almost against his family, and thus became the person that we knew as John Kennedy.''

There is a good deal of material in the book and miniseries that was not previously known - for instance that Joe Kennedy agreed to a lobotomy for his retarded daughter, Rosemary, which he kept secret from his wife. The operation was a botched disaster.

Goodwin is an historian whose husband, Richard Goodwin, was a speechwriter for John Kennedy and a close friend of Robert Kennedy.

She said she had been working on the book for about two years when she discovered there were 150 cartons of papers stored in the attic at the Kennedy compound in Hyannisport. Nobody had gone through them until Sen. Edward Kennedy gave her permission.

''And then as the book went on, I think, to be honest, some of the Kennedy family members began to worry what is in these cartons,'' she said. ''I remember one time when I came across these huge cartons that had to do with Gloria Swanson's income tax statements, then I knew that nobody had been through these cartons.''

The cartons, she said, ''contained every check Joe Kennedy had ever written, every letter written from one another to the family, every income tax statement, ever memo, every letter to the kids.''

''The Kennedys of Massachusetts'' presents an intriguing period portrait of a family and a time - and some wonderful performances, particularly by Annette O'Toole as Rose, an Irish rose who grew some sharp thorns.

#90043u0241 02/12/1990 ~United Press International

MOSCOW (FEB. 12) UPI - Cosmonauts Anatoli Solovyov and Alexander Balandin raced toward a Tuesday docking with the Mir space station on the 10th manned mission to the Soviet Union's giant orbiting complex.

Their silver-tipped, 184-foot Soyuz TM-9 rocket rumbled off the ground at the Baikonur Cosmodrome in the Soviet Central Asian republic of Kazakhstan at 9:16 a.m. Sunday, the official Tass news agency said.

Flight commander Solovyov, making his second trip to the Mir, and engineer Balandin, on his first space journey and also trained to fly the Soviets' Buran shuttle, were feeling well, Tass reported three hours into the mission. The Soyuz's onboard systems were working normally, it said.

The three-stage rocket carrying Solovyov, 42, and Balandin, 36, trailed an orange flame as it left the same desert launching pad from which Yuri Gagarin became the first man in space April 12, 1961.

Engineers filled the Soyuz earlier Sunday with the liquid fuel - kerosene and liquid oxygen - that the Soviets claim does less harm to Earth's ozone layer than the solid propellant used by the United States.

''The crew is to dock the spaceship with the Soviet orbital complex Mir and then replace the crew of the fifth main expedition, Alexander Viktorenko and Alexander Serebrov, who are in their sixth month of working in orbit and who are expected to return to Earth on Feb. 19,'' Tass said.

The spaceship was scheduled to dock with the Mir - which means ''peace'' in Russian - on Tuesday, bringing the 22nd and 23rd cosmonauts to the complex since it was launched Feb. 20, 1986, and opening the next chapter in the Soviets' troubled space-station program.

As Solovyov and Balandin streaked toward the Mir, American engineers at the U.S. Jet Propulsion Laboratory in Pasadena, Calif., tried to determine why the main camera on the $1.4 billion Galileo Jupiter probe malfunctioned Saturday after an otherwise flawless flyby of Venus.

Solovyov is on his second mission to the Mir. A cosmonaut for 14 years and a Communist Party member since 1971, he did not make his first space flight until 1988, when he commanded a joint Soviet-Bulgarian crew on the space station.

Balandin also waited a long time for his debut mission, after reaching the rank of cosmonaut in 1978. He has belonged to the party - still a near-requisite for success in the Soviet Union despite Mikhail Gorbachev's democratization drive - for nine years.

The Soviets' 68th manned launch comes in a period of unprecedented criticism of the entire space program by newly emboldened lawmakers who, under Gorbachev's promotion of political openness, have questioned its direction and annual tab of $17.1 billion.

During their stay on the Mir, Viktorenko and Serebrov have done hundreds of medical and biological experiments and research for the Soviets' beleaguered agricultural program.

The crew also performed tasks outside the space station, testing the manned maneuvering unit, or ''space armchair,'' a device that allows cosmonauts to propel themselves while inspecting the Mir's external surface and doing other maintenance.

Soviet space officials, who have warned that the space program could be destroyed by penny-pinching legislators, are trying hard to make the program self-funding.

Many of the experiments on the Mir involve research into commercial production of organic and non-organic materials that might be produced better in conditions of weightlessness. The materials include various semiconductor substances, metals, alloys and glass.

The Soviets hope to earn as much as $40 million by charging foreign nations and businesses that want to conduct tests in a Kristall module, scheduled to to arrive at the space station in April, Tass said.

Moscow is also raising money through its new pay-as-you-fly program that charges crews from other countries for trips to the Mir.

There have been four joint missions with foreign cosmonauts to the space station, a Japanese TV journalist is training in Moscow for a trip this year, and British and Austrian cosmonauts are also scheduled to participate.

#90043u0252 02/12/1990 ~United Press International

ANAHEIM, CA (FEB. 12) UPI - An 8-year-old girl riding a train at Disneyland was hit in the back Sunday by a bullet apparently fired from outside the amusement park, police said.

Nayeli Diana Placentia of Downey, Calif., and her family were riding the open-sided, canvas-covered train near the Fantasyland Station when she complained to her parents that something struck her in the back, Sgt. Thomas Lahmon said.

''Anaheim police were summoned about 6:43 p.m. to Western Medical Center, where it was determined that a small bullet wound was found,'' Lahmon said. ''She was transferred to University of California, Irvine, Medical Center, where she is listed in stable condition.''

Lahmon said investigators believe the child was struck by an errant bullet fired into the air from outside the amusement park.

#90043u0262 02/12/1990 ~United Press International

BUCHAREST, ROMANIA (FEB. 12) UPI - Secretary of State James Baker, winding up a weeklong trip to the Soviet Union and Eastern Europe, promised Romania $80 million in food aid but conditioned further U.S. economic help to democratic elections and movement toward a free-market economy.

Baker went to Bucharest Sunday to meet with Prime Minister Petre Roman and President Ion Iliescu, leaders of the provisional government that succeeded dictator Nicolae Ceausescu following his ouster Dec. 22 and execution Dec. 25.

Baker also met with about 40 leaders of opposition political parties, trade unions and student groups in Bucharest before flying to Ottawa for a joint NATO-Warsaw Pact conference on establishing an ''open skies'' military inspection plan covering 23 countries in Europe and North America.

Romania was the last stop on Baker's tour of Eastern Europe and the Soviet Union.

In Bucharest, a city already suffering some food and energy shortages, Baker told government leaders the United States is authorizing an immediate $80 million in food aid, including 500,000 tons of grain and 7,500 tons of butter.

The food will be either given outright to needy Romanians or will be paid for in Romanian currency, with the proceeds then available for economic development projects in Romania.

Baker also told Romanian leaders and opposition groups that further U.S. assistance would come only after the United States was satisfied there would be ''full, free and fair'' elections in the formerly communist nation.

''We want to do our part to assist political pluralism in the free-market economy,'' Baker said.

Elections in Romania are scheduled for May 20.

Some of the opposition leaders told Baker they had asked the United States for help in such elemental areas as supplying typewriters and typing paper and instruction on how to go about establishing a new code of laws.

Milan Mitra, a representative of the drivers' union who met with Baker, said, ''We asked for help from the U.S. Embassy. They promised help. So far there has been nothing.''

Gabriel Nuta, 23, of the Student's League, said before meeting Baker, ''We want the Americans to be tough, to refuse to accept the communists.''

He described the older leaders in the transitional government as ''the old element, communists who have served before and failed.''

A U.S. Embassy official, speaking on the condition of anonymity, said that one of the major problems facing Romania is that the only people who had experience in running a government were faithful communist functionaries who will have to be retained or replaced by inexperienced former members of the political underground during the rule of Ceausescu.

During an overnight visit Saturday in Sofia, Bulgaria, Baker emphasized to communist Prime Minister Andrei Lukanov and members of his government the importance of free and fair elections to continue the revolution that toppled hard-line leader Todor Zhivkov.

Earlier Saturday, Baker made an unprecedented appearance in Moscow before the international relations committee of the Supreme Soviet, or parliament. A day earlier, he met with Soviet President Mikhail Gorbachev and Soviet Foreign Minister Eduard Shevardnadze for arms talks.

#90043u0290 02/12/1990 ~United Press International

(FEB. 12) UPI - Black South Africans Sunday marked the release of their leader in the fight against apartheid, Nelson Mandela . In Mandela's home township of Soweto, thousands of youths ran through the streets celebrating. They flooded onto a soccer field and forced the end of a game. Some said they were more concerned about poverty and education than

Mandela's release. But most chanted Mandela's name.

Mandela is free for the first time since 1962. He had been sentenced to life in prison after being convicted of sabotage. During the years, his release had been called for at rallies worldwide. In Cape Town Sunday, Mandela repeated the statement he made at his trial... that he is prepared to die for a free and democratic South Africa. Mandela's whereabouts overnight are being kept secret. He is due in Johannesburg Monday.

15 U-S lawmakers arrived in El Salvador Sunday to look into the investigation of the slayings of six priests in November. Nine Salvadoran soldiers have been charged in the case. The U-S delegation will also have an eye toward deciding whether the United States should continue to fund the Salvadoran military.

Police say five escaped convicts remain free after breaking out of an Illinois prison Sunday. A sixth was recaptured near his Chicago home later in the day. Officials say the six escaped Sunday by hacking their way through iron bars and then splitting up. Helicopters and dogs are being used in the manhunt. Three of the fugitives had been imprisoned for murder. All are considered dangerous.

NASA's one-BILLION-dollar Galileo probe is busy as an inter-plantary tourist again, snapping pictures of cloud-shrouded Venus. After flying by Venus Friday, a computer glitch caused the the spacecraft to accidentally shoot pictures at a furious clip. The problem has been solved, and Galileo Sunday returned to scheduled shots rather than the unplanned candids. The photos woN'T be radioed back until the probe flies closer to Earth in October, on its way to Jupiter.

#90043u0291 02/12/1990 ~United Press International

OTTAWA (FEB. 12) UPI Foreign ministers from NATO and the Warsaw Pact were in Canada's capital for negotiations Monday aimed at permitting aerial surveillance of each other's military sites.

The talks, scheduled to begin Monday and conclude in mid-April in Budapest Hungary, mark the first international meeting since communist regimes in many Eastern European countries began crumbling late last year.

The conference was originally intended to focus on the so-called Open Skies regime, a pact among the Warsaw Pact nations and Western NATO countries that would allow aerial surveillance flights over each other's military installations.

But Canadian officials said recent developments in Eastern Europe will receive equal attention at the conference.

A pre-conference meeting Monday involving Canadian Prime Minister Brian Mulroney, U.S. Secretary of State James Baker and Soviet Foreign Minister Eduard Shevardnadze will include a discussion of the possibility of German reunification and political events in East Germany, as well as the Open Skies regime, Canadian government sources said.

Baker arrived in Ottawa late Sunday from Bucharest, Romania, after a week in Eastern Europe and the Soviet Union.

Canadian government sources said Baker wants to discuss the future of NATO at the Open Skies conference and whether a reunited Germany might have a role in the Western alliance. U.S. and Soviet proposals for arms and troops cuts in Europe also will be raised, sources said.

A senior Canadian negotiator said in a recent interview that the Open Skies proposal would provide nations with more useful information of each other's military activities than is possible with sophisticated satellite and infrared technology. Aircraft will provide an all-weather capability and allow observers a quick second look at suspect activity.

John Hawes, an officer with the State Department who will lead the American delegation through the detailed negotiations, believes prospects for a formal accord ''are really very good.'' But, Hawes admitted the degree of openness envisioned by negotiators will be ''a new concept for everybody.''

Under the Open Skies proposal drafted last year by NATO, countries would be allowed at least one flight every three months over each country, using unarmed, fixed-wing civilian or military aircraft.

According to the Canadian negotiator, the Warsaw Pact has been unable to work out a common position mainly because the Soviet Union wants a less intrusive surveillance regime than other Warsaw countries.

Soviet officials also have proposed fewer flights, less sophisticated cameras and a common fleet of aircraft and common sensors.

#90043u0302 02/12/1990 ~United Press International

NEW YORK (FEB. 12) UPI - A Brooklyn rabbi shot in the head last week by a man who stole his car to pursue a gem courier died early Monday at Bellevue Hospital, a hospital official said.

Rabbi Haskel Werzberger, 57, died at 12:30 a.m. from massive brain injuries caused by the single gunshot that pierced his skull above the left eye early Thursday morning, said Bellevue Hospital administrator

Robert Frazier.

Werzberger underwent five hours of brain surgery and died without regaining consciousness. He had been on life support equipment since being brought to the hospital, Frazier said.

Followers of the popular rabbi, a leader of the ultra-orthodox Satmar Hasidic Jews and father of six, had maintained a 24-hour bedside vigil in the hospital since the shooting.

''Our prayers were with him and so were our tears,'' said Satmar spokesman Isaac Abraham. ''We in the community tried to assist the police department in the investigation. Yesterday it was a shooting, today it is a homicide.

''That hurts even more because he is no longer with us. He was a great man and he took someone else's bullet.''

Satmar spokesman Issac Abraham said orthodox congregations throughout the world had been reciting psalms on behalf of the rabbi.

''Today was designated as a worldwide day of prayer,'' he said. ''Instead we have a funeral.''

Werzberger was shot just before dawn by a gunman who then stole the rabbi's car to chase a courier who was believed to be carrying at least $250,000 of precious gems, Chief of Detectives Joseph Borrelli said.

Police later recovered the car, which had been smeared with paint in an apparent attempt to erase fingerprints.

The gunman was described by police as a tall, blond-haired man in his late 20s or early 30s, wearing dungarees and a T-shirt. He was armed with a .44 or .45 caliber pistol, police said.

Abraham, a member of the rabbi's synagogue, Congregation Yetev Lev, said the rabbi's family received letters of support from around the world, including one from Gov. Mario Cuomo.

The funeral was scheduled to take place at 8 a.m. Monday in front of Congregation Yetev Lev, 152 Rodney St., in Williamsburg.

A funeral procession was to then accompany the rabbi's body about 50 miles north to Monroe, N.Y. for burial at the Satmar community's cemetery.

#90043u0333 02/12/1990 ~United Press International

MANILA, Philippines (FEB. 12) UPI - President Corazon Aquino said Monday

she has no plans to meet with Defense Secretary Dick Cheney during his scheduled visit next week because of what she said were inaccurate U.S. news reports of earlier visits by U.S. officials.

Commentators said Aquino's decision not to meet with Cheney may be regarded as a snub on an important ally. Washington provided air cover for loyalist forces during the Dec. 1-9 coup attempt, saving Aquino from the sixth uprising in her nearly four years as president of the former U.S. colony.

As part of her ceremonial duties, Aquino usually receives U.S. businessmen lawmakers and other officials.

''Let me clarify here that this has nothing to do with Secretary Cheney personally because I did have the opportunity to meet with him when I made my state visit to the United States in November,'' Aquino said at her weekly news conference.

''However, in view of my very recent experience with the last two American officials who visited here, I believe I've been a victim of inaccurate reporting, not from the Philippine press but from the American Press,'' Aquino said.

Aquino was referring to visits last month to Manila by President Bush's deputy national security adviser, Robert Gates, and Rep. Jim Kolbe, R-Ariz.

The Washington Post and The Los Angeles Times said Gates was in Manila to urge Aquino to ''put her house in order.''

Kolbe later was reported to have said Aquino had agreed to extend U.S. military base rights that expire in 1991. Aquino has repeatedly said she is keeping her options open on a renewal of the base lease.

''I believe it is best at this time to just instruct Secretary (of Defense Fidel) Ramos on whatever there is to say to Secretary Cheney,'' Aquino said.

Cheney left Washington for Hawaii Saturday on an Asian swing that includes stops in South Korea, Japan and Hong Kong to discuss plans to reduce forces in Asia. News reports said Cheney will be in the Philippines Feb. 18-20.

The 1947 lease covering six U.S. facilities, including the sprawling Clark Air Base and Subic Bay Naval complex, will be discussed in exploratory talks expected next month.

Aquino told reporters the talks will discuss Washington's failure to meet

commitments under a 1988 executive arrangement in which the Reagan administration pledged to make its best efforts to secure $962 million in aid to Manila in the last two years of the lease.

Aquino has complained that U.S. aid this year has been reduced by $96 million.

#90043u0335 02/12/1990 ~United Press International

GREENWICH, CT (FEB. 12) UPI - A bottling plant employee in France who used benzene to ''degrease something'' was responsible for the total recall of tainted Perrier mineral water across North America, the manufacturer said.

In a statement released in Paris, Perrier President Frederik Zimmer said ''human error'' caused the benzene contamination that led the company to take up to 72 million bottles of the upscale bubbly beverage off grocery shelves.

Despite company rules prohibiting the chemical's use, the unidentified employee at a Perrier factory in France used benzene ''to degrease something during the bottling process,'' Zimmer said Sunday.

Perrier voluntarily began recalling all bottled mineral water distributed to the United States Friday after it was told by the U.S. Food and Drug Administration that traces of benzene were found in 13 samples of the mineral water.

At the company's U.S. headquarters in Greenwich, Conn., Perrier Group of America President Ronald Davis said the mineral water could be off the shelves in the United States and Canada for two to three months, which could cost the company more than $40 million in sales.

''Although in some places we could be back (on the shelves) before that,'' Davis said. ''We're trying to be as conservative as possible.''

The FDA said the 12 to 19 parts per billion levels of benzene detected posed no significant short-term health risks but were above the maximum contamination level of 5 parts per billion of benzene for public drinking water.

Davis said the recall was extended to Canada late Saturday because Canada and the United States share the same distribution system. He said the company planned to destroy its entire inventory of about 72 million bottles for the United States and Canada.

The statement issued in France said tests conducted Friday at the

Hydrology Institute of Clermont-Ferrand indicated Perrier's southern France springs ''contain no noticeable trace of benzene.''

Zimmer said only bottles shipped to North America were affected because they are bottled separately at the plant at Vergeze, in southern France.

The company president said he believed there was no danger in the water shipped. He added that benzene limits in France are twice the U.S. rate of five parts per billion, and that none of the tests at Vergeze indicated a level higher than 10 parts per billion.

Davis said he could not calculate what the total cost of the recall and production shutdown would be to the company, which has annual sales of about $150 million.

''We're trying to deal with this in the most responsible and professional way possible,'' Davis said. ''(The cost) will be what it will be.''

Davis said he believed Perrier was being unfairly treated by the media, which he claimed was sensationalizing the story.

''People should know there is no more risk to this than drinking a glass of apple juice, which has more benzene in it, or a cup of coffee, which also has more benzene,'' Davis said.

Davis said the company ''was trying to do the ethical thing. We believe we're doing what is right and I think that is a winning strategy over time.''

Benzene is a clear, flammable, poisonous liquid used as a solvent for fats and in making lacquers, varnishes and dyes. It also is believed to be a cancer-causing agent.

JAKARTA, Indonesia (FEB. 12) UPI - Mount Kelud's low-level volcanic eruption rumbled for a third day Monday, and has so far killed at least 17 people and injured 64 others, officials said.

The 5,679-foot Mount Kelud volcano in East Java, 390 miles east of Jakarta erupted shortly before noon Saturday and spewed lava with a ''thunder-like roar,'' heard at least 6 miles away, the officials said.

Along with the 17 people known killed and 64 injured, five others were reported missing, officials said. Up to 4,000 villagers in the surrounding areas were evacuated, but some have begun returning to their homes, the officials said.

The eruption destroyed 156 houses and public buildings and seriously damaged other structures, they said.

Kelud's eruption Saturday was far more powerful than the one in 1966 that killed more than 200 people, geologists said.

Saturday's eruption was Kelud's fourth this century, the deadliest coming in 1919 when some 5,500 people were killed.

Indonesia has the highest density of volcanoes in the world, with 500 in a ''belt of fire'' along the 3,000-mile archipelago north of Australia. Nearly 130 are active and 65 are listed as dangerous.

CORTLAND, NY (FEB. 12) UPI - The daily New York state ski report compiled by Ski Areas of New York Inc.:

Legend: New, new snow; GM, grooming; SM, snowmaking; NS, night skiing.

Surface condition codes: P, powder; PP, packed powder; WP, wet powder; WBP wind blown powder; MGS, machine groomed surface; FG, frozen granular; LG, loose granular; ICY, icy; WG, wet granular; CRN, corn snow; VAR, variable; SPR, spring conditions. The final two numbers refer respectively to number of day slopes open and number of night slopes open.

Key to Cross-Country: TS, track setting in last 24 hours; SM, snowmaking; KM TRAX SET, distance of groomed trail available in system; KM TRAILS, total trail distance open in system; NS, area offers night cross-country facility.

Note: The absence of a ski center listing in the daily report indicates that no report was received from that ski center or that it may be a weekend facility.

#90043u0364 02/12/1990 ~United Press International
(FEB. 12) UPI - A cold front dumped snow and rain across the Pacific Northwest Monday, lifting rivers up to 5 feet above flood stage, while a heat wave blazed through Texas and temperatures dipped below zero in the Great Lakes.

In the Washington Cascades mountain range, plummeting temperatures solidified packed snow and relieved the danger of avalanches at Snoqualmie Pass and White Pass, which had been closed over the weekend.

The National Weather Service issued flood warnings for Washington's Snoqualmie, Skookumchuck, Chehalis and White Rivers. The most severe flooding occurred at Centralia when the Chehalis crested 5 feet above its 65-foot flood stage.

Clear skies prevailed in the nation's midsection but temperatures dropped into single digits in northern Wisconsin and down to 1 below in Marquette, Mich., the NWS said. The mercury rose into the upper 20s to lower 30s in Illinois and Indiana, and were in the 40s in Missouri.

A February heat wave continued Monday in Texas, as a high-pressure ridge lingered over most of the state. Temperatures in the 70s and 80s were common Sunday, with readings of 85 degrees recorded in Alice, Kingsville, Laredo and McAllen. Springlike sunshine produced temperatures well above seasonal normals in Oklahoma. Highs ranged from 76 degrees at McAlester to 68 in Guymon Sunday.

In Southern California, it was sunny and warm with temperatures in the 70s and low 80s as the weekend came to an end. But a long stretch of summery weather was expected to come to an abrupt end Monday as a storm moved down from the Pacific Northwest.

Skies were clear but temperatures were chilly over most of the South, with the mercury dipping to 43 in Knoxville, Tenn., 45 in Atlanta, 47 in Charleston, S.C., 49 in Jacksonville, Fla. and 63 in Miami.

Seasonably cool temperatures and clear skies prevailed throughout the Northeast and Middle Atlantic states, with temperatures ranging from a high of 38 degrees in Washington, D.C. and Roanoke, Va. to a low of 23 degrees in Hartford, Conn.

Light snow drifted into the New York City area, while rain fell in Atlantic City, N.J. Clear skies were reported in Philadelphia, where the temperature hovered around 37 degrees.

JERUSALEM (FEB. 12) UPI - A 15-year-old Palestinian boy died Monday from a gunshot wound suffered in a clash with the army in the Israeli-occupied Gaza Strip, Palestinian and army sources said.

Soldiers shot Hassam Jihad Alziam in the head Sunday during demonstrations in Gaza City. Alziam was taken to Tel Hashomer outside Tel Aviv where he died Monday, the sources said.

Reports of the teenager's death sparked demonstrations in Gaza City Monday and one Palestinian was wounded, Israel Radio reported.

The army broke up the demonstrations with tear gas and plastic bullets, the radio said. The army spokesman had no information on the unrest.

Since the start of the 2-year-old Palestinian uprising agains Israeli occupation of the Gaza Strip and West Bank, at least 640 Palestinians have been killed by Israeli soldiers or civilians.

#90043u0402 02/12/1990 ~United Press International

(FEB. 12) UPI - Christian officials in Lebanon say a three-person team held lengthy, separate talks with the heads of rival Christian militias yesterday, trying to patch together a ceasefire to end a week and a half of bloodshed. Although Samir Geagea stresses a desire to end hostilities immediately, his foe, Michel Aoun, remains reluctant.

The newspaper of Egypt's ruling party issued a scathing denunciation of the Palestine Liberation Organization in a front page editorial yesterday. The criticism follows a P-L-O accusation last week that Israel had aided a deadly attack last Sunday on a bus carrying Israeli tourists in Egypt.

Iran marked the 11th anniversary of its revolution yesterday with marches and a large rally. State-run radio, monitored in Athens, reported President Rafsanjani paying tribute to the late Ayatollah Khomeini. Khomeini seized power February 11th, 1979, 10 days after returning to Iran after 15 years in exile.

An eight-year-old girl is in stable condition this morning after she was hit in the back yesterday by a bullet while she rode a train at Disneyland with her family. Anaheim, California, police believe the girl was hit by an errant bullet fired into the air from outside the amusement park.

Public health officials fear that 1990 will be as bad, if NOT worse, than 1989 in terms of the resurgence of measles. At least 17-thousand cases of measles were reported last year and caused the federal Centers for Disease Control to consider revamping its immunization strategy.

-30- 1689

#90043u0426 02/12/1990 ~United Press International

KHARTOUM, Sudan (FEB. 12) UPI - Ethiopian rebels claimed Monday they had sunk nine government naval ships in four days of heavy fighting for control of the Red Sea port of Massawa, the primary deep-water port for Ethiopian famine relief.

The Eritrean People's Liberation Front, which has been fighting a 29-year war for independence, said its forces launched a savage attack on government troops in Ethiopia's northern province in the pre-dawn hours Friday.

Fighting continued unabated through Monday, the rebels said.

The rebels said their objectives were Massawa and the main road to the Eritrean capital of Asmara, 450 miles north of the national capital of Addis Ababa.

Both have been declared crucial to the supply of food to areas at risk of major famine this year. Only last month, the Marxist Ethiopian government reached an agreement with the three main churches of the country to supply thousands of tons of food to parts of Eritrea and Tigre via the Massawa-Asmara link.

In a statement issued in Khartoum, in Sudan, the secessionist EPLF said it had destroyed nine ''warships'' in the harbor at Massawa and inflicted heavy casualties on government troops.

It restated its claim, first made Saturday, to have control of the town, adding that 46 tanks, together with large numbers of heavy and small arms, had been captured in the battle.

The EPLF said 21 seamen had been captured from the vessels sunk and a large number of land troops were also being held prisoner.

Fighting continued at the town of Keren, 70 miles west of Massawa, the statement said.

The Ethiopian government has not commented on the claims, but has deplored the reopening of hostilities as irresponsible in the light of this year's potential famine.

By the government's estimates, between 1 million and 2 million people face starvation in northern Ethiopia in the coming months. By the estimates of Western relief agencies, that figure could be as high as 4 million.

A famine of such proportions would rank with the country's last major disaster, in 1984 and 1985, in which over 1 million people died.

#90043u0516 02/12/1990 ~United Press International

(FEB. 12) UPI - Violence in South Africa mars Nelson Mandela's first day of freedom... the United States ponders lifting economic sanctions against Pretoria... progress is reported in cleaning the Southern California oil spill... and five fugitives remain at large 24 hours after their escape from a high-security federal penitentiary in Illinois. These stories... and more... next from the wires of United Press International.

In his first day of freedom since being imprisoned for crimes against the state more than 27 years ago, South African black nationalist Nelson Mandela said he would like to think that apartheid can be negotiated away.

But the 71-year-old former head of the African National Congress says that if needs be... violence will be used without regret.

In his words- ''The factors which necessitated the armed struggle still exist today. We have NO option but to continue.''

But speaking before more than 40-thousand admirers in Cape Town, Mandela praised President de Klerk for shaping a policy that NONE of his predecessors would. And he offered an olive branch to the white minority, saying they would have a role in a black-dominated country.

Yeserday's rally was marred by security forces firing birdhot into the fringes of the crowd during minor looting. Two people died and another 200 were wounded.

Washington is greeting yesterday's release of Nelson Mandela with the same

wait-and-see attitude that has shaped the developing U-S policy toward Eastern Europe.

South African President de Klerk has earned across-the-board praise among Capitol Hill lawmakers for his release of Mandela, the man who many regard as the world's most notable political prisoner.

But President Bush and Congress have expressed reluctance at this time in terms of easing economic sanctions against the racially separated country.

Assistant Secretary of State Herbert Cohen says the Bush administration will review U-S policy in light of Mandela's release. But he added NO action would be taken without consultation with Congress.

Four years ago, Congress placed five stipulations on when restrictions against South Africa could be relaxed. They include- the release of all political prisoners, the repeal of state-of-emergency regulations and the start of power-sharing with the black majority.

#90043u0524 02/12/1990 ~United Press International

(FEB. 12) UPI - The National Weather Service has some bad news for crews cleaning up last week's 400-thousand-gallon oil spill in Southern California.

Forecasters say that calm weather in the Huntington Beach area that's helped the cleanup effort will end today with the arrival of a cold front.

Officials say about two-thirds of the sticky mess has either been mopped up, evaporated or broken up by ocean currents.

The four days of warm temperatures and calm winds kept most of the oil from reaching the shore of some of California's most popular and environmentally sensitive beaches.

A Coast Guard spokesman says the oil is a light sheen on the water which is leaving a deposit each time a wave hits land.

But the approaching storm is expected to coagulate the oil into thicker globs that'll pose more danger to birds and fish.

The cleanup is expected to last several more weeks.

At least 100 Chicago area law enforcement officers are sweeping the area for five fugitives who remain at large after escaping from a maximum-security prison early yesterday.

A manhunt led to the capture of one of the six inmates who escaped from the Stateville Correctional Center. 22-year-old Tommy Munoz was caught last evening near his Chicago home.

A Department of Corrections spokesman in Joliet cautions residents to be very alert because all of the remaining escapees are considered dangerous.

Police have issued a nationwide alert for the convicts... three of whom were serving time for murder.

A state police airplane... a helicopter and several canine units were being used to track down the escapees. Authorities say they've had word of several sightings, but nothing that's proved to be factual.

-30- 1904

#90043u0531 02/12/1990 ~United Press International

(FEB. 12) UPI - The Salvadoran Red Cross says at least five civilians were killed and 15 wounded yesterday... including five children... as heavy fighting continues between government forces and rebels.

The Red Cross says the casulties occurred during government bombing raids of a northern province in El Salvador. Four guerrillas and one soldier also were reported killed in the fighting.

The report of the deaths came as a delegation of 15 U-S lawmakers arrived in El Salvador to investigate whether Washington should continue funding the nation's military.

U-S Ambassador William Walker greeted the congressmen... who'll also look into the November 16th slayings of six Jesusit priests. A group of Salvadoran army officers and soldiers are charged with murder in that case.

Congress has threatened to cut U-S aid to the Latin American nation because of the killing of the priests. El Salvador receives 500-Million dollars in U-S aid... 85-Million of which goes to the military.

Israel's Likud Party Central Committee will gather today in a meeting that observers expect to be a key test of Prime Minister Shamir's political power.

Shamir heads the right-wing party, but has encountered stiff opposition from a conservative wing because of the way he has handled the peace process with Palestinians in the occupied territories.

The hardliners are led by Trade and Industry Minister Ariel Sharon . They want the government to exclude Palestinian deportees and Arab residents of East Jerusalem from any peace talks and the future of the occupied

territories.

For his part, Shamir wants to limit the gathering of the three-thousand a vote of confidence on his leadership.

If a compromise canNOT be found, shamir reportedly has considered dissolving the committee and holding a party congress to elect a new Central Committee chairman to replace Sharon.

Recently, Sharon and his followers have resorted to extensive mudslinging in their quest to discredit Shamir.

-30- 2170

#90043u0543 02/12/1990 ~United Press International

BEIRUT, Lebanon (FEB. 12) UPI - Gen. Michel Aoun accused the United States of working together with his Christian rival to oust him by paving the way for Syrian intervention in east Beirut, a Lebanese newspaper reported Monday.

The charge were made in the An-Nahar newspaper as Aoun's forces battled Christian militiamen led by Samir Geagea for the 12th day, shrugging off mediation efforts to stop the violence that has killed at least 432 people.

Aoun, who headed an interim military Cabinet since September 1988, has refused to relinquish powers and leave the presidential palace in the suburban district of Baabda.

The 54-year-old general, who has also refused to step down as military commander and still leads a 15,000-strong army of Christian loyalists, rejects an Arab-brokered peace plan endorsed by Lebanese lawmakers in Taif Saudi Arabia, that resulted in the election of pro-Syrian President Elias Hrawi.

Christian officials said Aoun, who spurned the Taif accord for failing to ensure a speedy withdrawal of Syria's 25,000 troops, has told a mediation committee of local clerics that he would not halt his military campaign unless Geagea rejects the peace accord.

Aoun accused Geagea of secretly coordinating with foreign powers, namely the United States, to help implement the Taif agreement.

The An-Nahar newspaper Monday quoted a spokesman of Aoun as claiming that a U.S. diplomat identified as Faye Johnson and Geagea's Lebanese Forces militia recently agreed on a plan to destabilize the situation in east Beirut.

''The militia planned to attack the army and undertake specific military

steps inside the free (Christian) areas as to create confusion that would lead to a security deterioration,'' the unnamed spokesman told An-Nahar.

''Such a deterioration would facilitate the intervention of Syrian troops in the Christian enclave and overthrow the government of Gen. Aoun,'' the spokesman said.

Sources close to the general charged the militia command had held contacts with local, regional and international quarters before going ahead with its plan. In this respect, the sources said, the Geagea's militia has recently hosted Johnson who served at the U.S. Embassy in Lebanon in 1985.

They also claimed that the American diplomat was President Bush's secretary when he headed the CIA.

While the rivals battled with rocket launchers, mortars and automatic arms Monday, thousands of families remained stranded in underground shelters, security sources said.

''The situation is miserable,'' said Tony Sfair, 53, a resident of the residential area of Furn Shubbak. ''There are many corpses on streets, and no one dares to pick them up.''

Sfair, one of thousands of civilians who fled east Beirut, said he had seen 30 bodies wrapped in nylon bags piled up at Mar Butros Hospital in east Beirut.

''No body cares about corpses, and the wounded are being kept in dimunderground shelters to avert random shooting.''

Many civilians, witnesses said, have refrained from moving around fearing to be hit by mines which the rivals have planted on roads. The warfare has spread chaos, encouraging thugs to rob abandoned fully-furnished houses.

Over the weekend, hundreds of army troops, equipped with tanks and heavy artillery, were dispatched to heights east of the militia-controlled port town of Jounieh, 12 miles north of Beirut, and the gunmen fortified their trenches and positions.

The fighting has continued despite peace appeals by Pope John II.

''I hope that general Aoun would listen to the voice of the highest spiritual authority in the world,'' said the Beirut Maronite bishop, Khalil Abi Nader. The pope had sent a letter to Aoun urging him to cease hostilities.

The battles broke out Jan. 31 when Aoun, who commands a 15,000-strong force, declared his intent to disarm's Geagea's 10,000-man militia.

-30- 4112
#90043u0600 02/12/1990 ~United Press International
SACRAMENTO (FEB. 12) UPI - Republican Sen. Pete Wilson, launched his campaign for governor by declaring he would not have California ''under siege to rapists, thugs and drug dealers.''

Wilson officially kicked off his campaign Sunday armed with the endorsement of 58 police chiefs, 12 district attorneys, 11 sheriffs and nearly 300 prosecutors, including 13 deputies of Democratic Attorney General John Van de Kamp, who is seeking the Democratic nomination for governor. Dianne Feinstein, former Democratic San Francisco mayor, formally announced her candidacy for the top job last week.

Deputy Attorney General George Hendrickson said after Wilson's speech that he believes Wilson will ''appoint good judges who will enforce the laws rather than try to undermine them.''

Hendrickson said the death penalty is an important campaign issue between Wilson and Van de Kamp because ''it exemplifies the differences in their approach to crime.''

Van de Kamp personally opposes capital punishment, but as the state's top prosecutor he has promised to enforce the law in carrying out executions.

Wilson called for tough measures to attack the ''twin perils of crime and drugs,'' and complained the laws frustrate peace officers and endanger citizens because of too many trial delays and too brief prison terms.

''It is a misnomer to speak of a California criminal justice system,'' Wilson said. ''There is no justice when the system itself handcuffs those who fight crime more than it handcuffs those who perform crime.''

He said it is intolerable that people are fearful and have lost confidence in the criminal justice system's ability to protect them.

''As governor I will not have California under seige to rapists, thugs and drug dealers,'' Wilson said.

He called for laws to limit the amount of time for filing new appeals in capital cases, denial of bail to accused drug kingpins and a ''truth in sentencing'' law that would reduce the time off for a convict's work or good behavior and keep them in prison longer so that ''the penalty will fit the crime.''

Californians, he said, ''would be shocked to learn that a typical convicted felon actually serves only half the term he is sentenced to.''

Wilson said he is ''outraged'' that the death penalty has not been enforced in the 12 years since it was legalized, and he reminded his audience that governors have the power to commute death sentences.

Wilson shared the limelight with former Republican Rep. Dan Lungren, who is running for attorney general, saying he needed ''a gutsy, reliable attorney general.''

Wilson, the only Republican to announce his formal candidacy for the governor's office, reviewed his 23-year career in politics and reminded his audiences he had spent a lifetime preparing for the job.

-30- 3029

#90043u0645 02/12/1990 ~United Press International

(FEB. 12) UPI - Stocks closed higher Monday in moderate trading on the Singapore Stock Exchange as institutional buyers pushed the key barometer to a new record high.

The Straits Times Industrial Index climbed 12.25 points to 1593.77, with strong interest focused on blue chips. The narrower All Singapore Index rose 3.22 points to 442.04 on a volume of around 143 million shares.

After a bout of profit taking Friday, investors were back in force with the market steadily climbing from the opening bell, stabilizing in the early afternoon and rising again in a final hour burst of buying.

Analysts said, however, the market was due for a correction following the rapid rise in the last two weeks and uncertainty over the Feb. 18 elections in Japan. "Even though the market has been very bullish, this sort of movement cannot last," one broker said.

On the trading floor, Tat Lee Bank paced the advance, followed by George Kent, Cold Storage, Singapore Land, Magnum Corp. and Fraser and Neave (ordinary shares).

Far East Shipping led the declining issues, followed by Singapore Press (foreign shares), National Iron, Overseas Chinese Banking Corp. and Prima Co.

In Japan, all markets, banks and most businesses and government offices were closed Monday for the National Foundation Day holiday. Trading will resume Tuesday, Feb. 13.

Prices on the Hong Kong Stock Exchange closed mixed in light trading. The key Hang Seng Index, which climbed 160 points overall last week, edged up 0.76 points to 2,894.66. The utility sector climbed 41.05 points,

financials eased 7.10 points, industrials lost 11.79 points and properties closed down 7.10 points.

Volume was a light 859.49 million shares, below the 1.52 billion shares changing hands Friday.

Brokers said the absence of Japanese investors, who were off due to a national holiday, and a consolidation after last week's rally kept the market confined to a narrow trading range.

"It was a quiet day relative to last week, but the volume and the lack of selling indicate the market is still looking healthy. There are still plenty of cushions in the market," said a broker at a local brokerage house.

In Australia, stock prices closed slightly lower in light trading on the Sydney Sharemarket.

The All Ordinaries index fell 7.2 points to 1623.5 in turnover of 78.2 million shares.

Analysts said investors targeted Rodney Adler's FAI Insurance in the wake of the collapse of some of Australia's top entrepreneurial companies.

FAI tumbled 25 cents to $1.90 in heavy turnover. FAI has had financial connections with a string of ailing entrepreneurs enterprises, including the Hooker Corp., Ariadne, Qintex, and Alan Bond's group of companies.

Along with FAI, News Corp. and Adelaide Steamship have come under fire. News Corp. lost 45 cents to $10 and Adsteam lost seven cents to $4.65. Analysts sasid both companies were marked down because of their perceived high debt exposure.

The possibility of lower interest rates failed to spur the banks. NAB Bank lost six cents to $6.50, Westpac Bank eased four cents to $5.74 and ANZ Bank lost five cents to $2.84.

#90043u0652 02/12/1990 ~United Press International

HOUSTON (FEB. 12) UPI - Domestic drilling dropped again last week, accompanied by a slight drop in Gulf of Mexico drilling, industry monitors reported.

A total of 899 rotary rigs were working in the United States last week, compared with 931 the prior week and 746 the same week a year ago, Baker Hughes Inc. reported Sunday.

Offshore Data Services reported two less rigs working in the Gulf of Mexico last week, dropping the utilization rate to 68.8 percent, or 148 working rigs out of a fleet of 215. But three more rigs went to work in European waters, boosting the utilization rate there to 86.5 percent, with 115 rigs working out of a fleet of 133.

There were 535 mobile offshore rigs working worldwide last week out of a total fleet of 670, for a utlization rate of 79.9 percent, ODS said. ODS reported 320 rotary rigs working in Texas last week, compared with 327 the week before and 225 the same week a year ago.

Louisiana reported 137 working rotary rigs last week, compared with 143 the week before and 122 the same week a year ago; New Mexico, 37, compared with 38 the week before and 27 the same week a year ago; and Oklahoma, 124, compared with 120 the week before and 111 the same week a year ago.

There were 215 rotary rigs working in Canada last week, compared with 205 the week before and 164 the same week a year ago.

-30- 1558

#90043u0665 02/12/1990 ~United Press International

HELSINGBORG, Sweden (FEB. 12) UPI - Swedish political parties met Monday as the country inched closer to early general elections after the failure of government-opposition talks over a tough austerity package.

Finance Minister Kjell-Olof Feldt shocked this placid welfare state by announcing sweeping measures last Thursday to heal an ailing economy, in what the opposition immediately dubbed the declaration of an economic state of emergency.

The 1990-1991 proposal called for the forbidding of all strikes, a two-year freeze on wages, prices and municipal taxes and mandatory arbitration.

Statistics provided by the Geneva-based International Labor Organization show that a law directly banning strikes would place Sweden in the company of only eight other countries - Nicaragua, Colombia, Chad, Liberia, Syria, Pakistan, Bangladesh and Thailand.

The Green Party went into caucus Monday to decide how to react to weekend government intransigence over the stringent package, the passage of which has been declared a Cabinet issue.

''There was no movement on the part of the government. We did not negotiate simply in order to save the government,'' said Green Party spokesperson Inger Schorling.

At the same time, opposition Conservatives, Liberals, Centrists and Communists were preparing counter-proposals in a move likely to end at the final reading of the bill Wednesday with the defeat of the government and calling of elections.

The Social Democrat proposal would require wildcat strikers to pay $800 in fines. The proposal also called for companies, instead of the state, to pay allowances during the first two weeks of employee illness. Feldt said this latter measure was designed to save the state $1.5 billion.

Prime Minister Ingvar Carlsson said the proposal must be passed Wednesday in its entirety.

''If Parliament turns down any of the suggestions, the government will resign,'' Carlsson said in an attempt to bulldoze the measures through.

Feldt said Sweden, which several East bloc states have held up as a model for their economic and social policies, was ''rushing at full speed into a cost crisis.''

''It is tough medicine and a deviation from the Swedish model of free wage negotiations, but it is necessary,'' Feldt said.

''It is impossible to have wage increases of 10 to 20 percent when production only increases by one percent. If the merry-go-round continues, the wage market will end up in anarchy,'' Feldt said.

Opposition parties had little sympathy with the Social Democrats who have ruled Sweden for most of this century and have been the sole architects of an expensive welfare state.

''The government is in panic and is pulling the emergency brake. They should get off the train instead. Resign,'' said Ingemar Eliasson, spokesman for the Liberal Party.

Margo Ingvardsson of the Communist VPK said, ''These proposals are like the declaration of a state of emergency.''

Conservative Party spokesman Lars Tobisson described the package as ''the old form of East-bloc politics.''

''While those of the East Bloc are taking off the socialist strait-jacket and introducing market economies, the Swedish government is going the other way,'' Tobisson said.

Sweden is fighting one of Europe's highest inflations at 6.7 percent and several unions have demanded major wage increases. Inflation for 1990 is forecast at up to 9 percent and latest figures from Sweden's Department of

Statistics show industrial wages rose 10.5 percent last year.

Monday's deepening crisis came as bank employees entered the 15th day of an all-out strike and lockout with demands for a 20 percent raise. Sweden's Municipal Employees Union, which counts more than 110,000 members has called a strike Tuesday.

LONDON (FEB. 12) UPI - Stock prices were sharply lower in light trading at midday Monday on the London International stock exchange.

The Financial Times 100-stock index, which fell 17.4 points Friday, was down 16.3 points to 2,297.3. The narrower top 30 industrial average was off 11.2 points to 1,819.5.

Volume amounted to around a light 176 million shares compared with 250 million shares traded during the same period Friday.

Analysts said the retreat followed falls on the West German and British bond markets, which served to increase bond yields and redirect investment from stocks into bonds.

On the economic front, the Central Statistical Office reported Britain's producer output prices, or prices of manufactured goods, rose 0.8 percent in January from December.

The government agency said producer input prices, or prices of raw materials and fuels purchased by the manufacturing industry, fell an unadjusted 0.5 percent in January from December. Economists were forecasting an 0.5 percent drop in input prices and an 0.7 rise in output prices.

Among the most widely traded stocks, Royal Bank of Scotland slipped 13 cents to $3.04. The bank announced Friday that the Kuwait Investment Office had sold a large interest in the bank to a friendly investment fund.

Elsewhere, BICC PLC slipped 20 cents to $6.92 in a weak building sector and Dalgety PLC, a food and agribusiness company, added six cents to $6.08.

#90043u0723 02/12/1990 ~United Press International
(FEB. 12) UPI - It was only a matter of hours before newly freed South African black nationalist Nelson Mandela reaffirmed the same defiant stance that led to his imprisonment more than 27 years ago. Speaking yesterday before 40-thousand supporters in Cape Town, Mandela said he would appreciate peaceful change... but was unafraid of using violence to gain rights for the oppressed black majority.

Mandela later told reporters he is committed to ''a position of peace for South Africa''... and stressed that- quote- ''the armed struggle is just a defensive act against the violence of apartheid . When asked what role he'll play in the African National Congress, Mandela responded- quote- ''NO person has the right to determine what role he is to play in the struggle.''

In Mandela's home township Soweto, thousands of people greeted his release yesterday by pouring into the streets to dance and chant. NOT even thunderstorms daunted the celebration. In response to the fears for Mandela's safety expressed by President de Klerk, one 18-year-old Soweto resident responded- quote- ''He is our leader. He will be safe here with his people.''

The manufacturer of Perrier says ''human error'' caused the benzene contamination that led to the total recall of what could amount to some 72-Million bottles of the upscale beverage from grocery shelves. The head of the French company says an unidentified employee used benzene to ''degrease something during the bottling process.'' Perrier announced the recall Friday.

(FEB. 12) UPI - A published report quotes BILLIONAIRE businessman Donald Trump confirming he and his wife of a dozen years are ending their marriage. But Trump reportedly denies that his Vienna-born wife Ivana initiated the split because of his alleged womanizing. Trump says his wife receive a 25-Million-dollar lump-sum payment and the couple's Connecticut mansion.

Negotiations get underway today in Ottawa, Canada, between foreign ministers from NATO and the Warsaw Pact aimed at allowing aerial surveillance of each other's military sites. But Canadian officials say the scope of the conference will be expanded to include recent developments throughout Eastern Europe since this is the first international meeting since many East Bloc communist regimes faltered last

year.

The National Weather Service says a cold front is headed toward Southern California today, which could hamper cleanup efforts of last week's 400-thousand-gallon oil spill. Four days of warm temperatures and calm seas has kept the oil from hitting some of California's most popular and environmentally sensitive beaches. Officials say about two-thirds of the gooey mess has either dissipated or been cleaned up.

Senior Chinese environmental officials say inadequate funds and backward technology is hindering them from making headway against the country's increased air and water pollution. Speaking in Beijing at an international conference on China's environmental problems, the officials say much of the pollution stems from economic progress achieved in recent years.

CHICAGO (FEB. 12) UPI - The board of UAL Corp., parent of United Airlines, and the carrier's three unions are considering candidates to succeed chairman Stephen M. Wolf under a possible employee buyout, a published report said.

One name said to have been suggested to the board to head an employee-led United is that of Richard Ravitch, New York, former chairman of the Bowery Savings Bank, Crain's Chicago Business newspaper reported Sunday.

Wolf's name "is on no one's list," two sources told Crain's. The sources added, however, there currently is no short list of contenders for United CEO.

Ravitch, who was credited with helping resolve complex labor disputes while he headed New York's Metropolitan Transportation Authority from 1979 to 1983, has told friends he has been approached about the UAL post, Crain's said. Ravitch could not be reached for comment.

Wolf has been under fire from UAL's unions a proposed $6.8 billion employee buyout proposal fell apart last fall.

DETROIT (FEB. 12) UPI - The Justice Department has been asked to investigate whether Detroit's daily newspapers are living up to terms of their joint operating agreement that went into effect more than two months ago.

A published report Sunday said a citizens group, which includes two leaders of a group that opposed the JOA between the Detroit News and Detroit Free Press, have sent a letter to the Justice Department - asking the agency "to investigate, police, and enforce" the agreement to "prevent its deterioration and ... monopoly running amok."

The Justice Department was asked in the letter to investigate whether the papers have reduced space alloted for news - a move that is barred by the JOA contract between Gannett Co. Inc., owner of the News, and Knight-Ridder Inc., owner of the Free Press.

The group also charged that the contract does not provide for the papers to publish joint editions on weekdays, as they did on Christmas and New Year's Day.

"We've had a lot of concern expressed to us by employees, advertisers, and readers that the JOA in Detroit has not gone smoothly and according to what (the newspapers) had promised," Edward Wendover, a Plymouth newspaper publisher and JOA opponent, told the Detroit News.

William Keating, chief executive of the Detroit Newspaper Agency, which runs the papers' business operations, said there is "absolutely no erosion of the news hole, period. It isn't (reduced) and won't be."

Robert H. Giles, editor and publisher of the News, agreed with Keating - saying "I can tell you categorically that we've used more news hole than the agreement calls for."

Keating added that the papers decided to publish joint editions on holidays because "it just makes sense." He confirmed that joint editions are not discussed in the JOA contract. A Justice Department spokesman refused to comment.

The JOA began Nov. 27 after the Supreme Court allowed it to go ahead on Nov. 13, ending 3 1/2 years of legal haggling. Under the joint operating

agreement, business operations for the Free Press and News were combined and the editorial departments were kept separate.

LONDON (FEB. 12) UPI - The historic Savoy Theater, opened more than a century ago to feature the comic operas of the famed team of Gilbert and Sullivan, was in ruins Monday after flames fueled by high winds ravaged its exquisite art deco interior.

The cause of the fire was under investigation. The theater was between productions.

''The auditorium is completely destroyed,'' theater director Julian Courtney said. ''The carved panels designed by Basel Ionides were completely destroyed.''

The blaze was reported at 1:39 a.m. and controlled two hours later by 10 fire trucks and more than 100 firefighters, a London Fire Brigade spokesman said.

Flames shot 50 feet in the air, whipped up by strong winds gusting to 90 mph that also made it difficult for fire crews to direct their powerful jets of water.

Two firefighters were slightly injured and a vagrant was treated for smoke inhalation, the fire spokesman said.

About 130 guests, including actor Richard Harris, and 61 staff at the adjoining Savoy Hotel were evacuated. The hotel was not damaged.

''I was rehearsing 'Henry IV' in my room when I thought my performance was so electric I burnt the theater down,'' said Harris, finding humor wrapped in a bathrobe and standing on a sidewalk.

The three-story theater, adjoining the Savoy Hotel on the Strand, will reopen, Courtney said.

''It's quite impossible to say when. We've obviously got to start from scratch,'' he said.

The theater, designed by C.J. Phipps and financed by impressario Richard D'Oyly Carte, opened in 1881 for the production of Gilbert and Sullivan's operas, which are still widely performed and known for their satirical view of British aristocracy and tradition. The theater was the first public building in London to be lit by electricity.

It opened with ''Patience'' and was followed by ''Iolanthe,'' ''Princess Ida,'' ''The Sorcerer'' and the one-act favorite ''Trial by Jury.''

In 1890, Gilbert quarrelled with D'Oyly Carte over the expense of the production of ''The Gondoliers.'' The financier was especially annoyed by a bill of $850 for carpets. Sullivan supported D'Olyly Carte and the musical partnership broke up.

In 1929, the theater was entirely refurbished by F.A. Turwell and the interior redecorated by Ionides.

#90043u0863 02/12/1990 ~United Press International

ATHENS, GREECE (FEB. 12) UPI - The Iranian oil tanker Kharg 5, damaged in an explosion in the Atlantic almost two months ago, finally unloaded its cargo of crude oil onto another Iranian vessel at sea and headed for a European port for repairs, Tehran radio said Monday.

Mohammad Souri, chief of the National Iranian Tanker Company, told Tehran radio in an interview monitored in Athens that the Kharg 5 and the Shirkuh were bound together for the operation, and a total of 190,000 tons of oil was unloaded from the damaged ship.

On Dec. 18 an explosion occurred aboard the Kharg 5 after the ship was involved in a collison during a storm. The blast damaged one oil tank, spilling its crude into the sa. The remaining 14 tanks were mostly undamaged and retained their cargo. The exact cause of the explosion has not yet been determined.

Western maritime oficials said in January the Kharg 5 spill lost about 70,000 tons of oil in the Atlantic off the Moroccan coast.

Iran however denied the Kharg 5 was responsible for the slick. Souri quoted a British insurance company as saying the Spanish tanker Aragon was responsible.

He said the Aragon spilled 25,000 tons of oil in the north Atlantic off Morocco after a collision on Dec. 26, creating the oil slick spotted in early January. There was no comment from the Spanish authorities.

TOKYO (FEB. 12) UPI - James ''Buster'' Douglas, the newly crowned International Boxing Federation titlest, and Mike Tyson left Japan Monday for the United States where boxing's two other sanctioning bodies will decide who is their champion.

Douglas stopped Tyson's streak of 37 consecutive victories with a knockout at 1:23 of the 10th round Sunday in Tokyo.

The IBF immediately recognized Douglas as the world heavyweight champion. But the World Boxing Council and the World Boxing Association announced six hours later they were suspending recognition of the fight pending a review of a controversial eighth-round knockdown of Douglas.

Referee Octavio Meyran Sanchez said he failed to see a timekeeper's signal to begin a mandatory 10-count for Douglas, allowing him up to 13 seconds to recover.

The WBC said it would meet in Mexico City on Feb. 20 to determine whether to recognize the decision. The WBA planned a similar review next week.

IBF President Robert W. Lee said the IBF will stand by its decision.

''We can't penalize a fighter for following the directions of a referee. Therefore, Douglas, who won the title in the ring, should be recognized by all persons as world heavyweight champion.''

Douglas, 29, was mobbed by dozens of Japanese fans at Tokyo's International Airport at Narita. He proudly showed off his WBC belt that he wore under a sweater.

Accompanied by his 11-year-old son Lamar, Douglas and his entourage boarded a flight for Chicago en route to his home in Columbus, Ohio, where he was expected to arrive at 1:20 p.m. EST. Elated fans planned an airport reception for the victor.

Tyson, who arrived at the airport with promoter Don King, was ushered into the VIP room. Wearing sunglasses to hide swelling of his left eye, Tyson, 23,appeared relaxed, shaking hands with fans and posing for photographs.

Douglas pledged to fight top contender Evander Holyfield in his first title defense, saying he would not consider a rematch with Tyson until after that time.

Holyfield was previously signed to fight Tyson in Atlantic City, N.J., June 18, if Tyson defeated Douglas.

#90043u0947 02/12/1990 ~United Press International

BANGKOK, THAILAND (FEB. 12) UPI - The Burmese army captured a major ethnic rebel headquarters, but another ethnic group repulsed an army assault, killing at least 57 troops near the Thai border, rebel and border officials said Monday.

The Burmese captured the headquarters of the Mon ethnic rebel group at Three Pagoda Pass on Sunday, sending more than 3,000 refugees fleeing into Thai territory, said Kavi Maenmum, chief of the Thai border district at the pass.

Fighting raged for about a week near the Mon headquarters and major trading station about 2 miles inside Burma, Kavi said.

The final assault was made by three Burmese regiments backed by mortars and artillery, he said.

The Thai official said scattered fighting continued Monday as the Burmese conducted mopping up operations.

The fall of the Three Pagoda Pass headquarters, also a major black market trading point, is expected to cripple the Mon group both politically and financially.

Government troops captured and burned the headquarters once before, in 1980, but were unable to hold the area.

Similar attacks were also under way about 100 miles further north along the border, where a senior official of the Karen ethnic group said at least 400 Burmese troops were thrown back from the group's Kawmura Camp.

''At least 57 Burmese troops were killed and a number of them wounded, while we lost two men and 11 wounded,'' the official said in in a telephone interview.

The Kawmura camp, opposite Thailand's Mae Sot district, 250 miles northwest of Bangkok, is one of the ethnic group's largest bases.

''They are still shelling the camp with four mortars and eight artillery pieces,'' the Karen official said.

He said all the Karen civilians from Kawmura were evacuated to a safer location.

He said Burmese troops have fought to within 500 yards of the defensive perimeter of the camp.

''We expect they (Burmese troops) will try to attack again,'' he said.

Somchai Bunchoo, deputy chief of Mae Sot district, confirmed the Karen account, saying at least 400 Burmese troops with heavy arms launched an attack on Friday in an attempt to capture the Kawmura camp, but the bid ended in failure.

''We could hear the sound of the fighting very clearly,'' he said.

Elements of the Karens and the Mons, the largest minorities in Burma, have been fighting the central government for more than 40 years to protect their culture and win regional autonomy.

#90043u0957 02/12/1990 ~United Press International

(FEB. 12) UPI - Black South African leader Nelson Mandela extended an olive branch to the country's white minority today, saying the African National Congress will- quote- ''find a solution which will suit both blacks and whites.'' His comments came less than 24 hours after he was released from prison.

Although Mandela held to his belief that violence is an acceptable means to topple the system of apartheid, he stressed that- quote- ''NO political organization inside or outside Parliament to the A-N-C's total commitment to peace.'' Mandela expressed hope that talks toward racial reform will commence soon.

Eritrean rebels fighting for independence from Ethiopia claimed further successes today in their bid to control the Red Sea port of Massawa. Four days after breaking an unofficial truce that lasted nearly one year, the rebels say they have sunk nine government ''warships'' and have inflicted many casualties on government troops.

Israel's Likud Party will hold an important meeting today that analysts say could present a key challenge to Prime Minister Shamir's political power. But several hours before the gathering's scheduled start finds Shamir and his hard-line foes disagreeing on the meeting's policy and agenda.

The government will continue its quest today to keep behind bars a reputed Chicago mafia boss and four other men who were named in a wide-ranging racketeering indictment handed down last week. The 105-page indictment alleges the five men took part in illegal activities ranging from extortion to murder.

#90043u0960 02/12/1990 ~United Press International

ANALYSIS BY ROBERT SHEPARD

WASHINGTON (FEB. 12) UPI - After several months of investigating the conduct of Rep. Gus Savage, D-Ill., the work of the House ethics committee was nearly undone recently when the panel's report was released.

Savage, who was accused of making sexual advances to a Peace Corps volunteer during a trip to Africa, took advantage of the committee's procedure to claim vindication and to fire off a broadside charge of racism aimed at his House colleagues, the news media, the Justice Department and others.

The ethics committee, in a brief written announcement released on a Wednesday, said it had filed a report on its investigation of the charges against Savage and that the report would be made public. It was learned that the panel planned no disciplinary action against Savage, but the printed report - containing the critical findings of the investigtation - was not available to the public until Friday.

Savage, moving to put his own spin on the case, scheduled a speech in the House chamber Thursday. In that speech, which was carried nationwide over the C-Span cable system, Savage claimed the committee had concluded the evidence against him ''was insufficient even to warrant further investigation, not even a slap on the wrist nor even a mild rebuke.''

The committee report, however, told a different story. ''Savage did, in fact, make sexual advances to the Peace Corps volunteer'' despite her strenuous objections, the report said.

Savage's conduct, while visiting Africa in his capacity as a member of Congress, was ''contrary to the standard of conduct expressed in House rules,'' and ''The committee clearly disapproves of Representative Savage's conduct,'' the report said.

But the way Savage told it to thousands of television viewers, he did not

get ''even a mild rebuke.''

The ethics committee decided not to take any further action against Savage in part because he had written a letter of apology to the Peace Corps volunteer, saying he had not intended to offend her. But the sincerity of that apology is highly suspect.

The unfortunate woman who endured Savage's advances reportedly had to undergo treatment in a program for victims of sexual assault, but Savage, in his speech to the House, tried to suggest the woman's condition predated her encounter with the amorous congressman.

For Savage, the entire matter was a case of racism and he was the innocent victim. As it turned out, racism did indeed become an issue in the case, but it was Savage - not the accusers, investigators or media - who made it so.

The public that heard only Savage's view of the episode was not told that the woman he accosted is black. Nor did Savage mention that the chairman of the House ethics committee, the bipartisan panel that conducted the investigation, is black.

Instead, Savage unleashed a barrage of racist charges, suggesting the allegations were brought against him and the media spotlight was focused on him simply because he is black. There was no mention from Savage of the three other House members - all white - who were accused of sexual misconduct in separate cases and investigated by the ethics committee amid a flurry of news stories about the allegations.

It is not surprising that Savage would attempt some spin control and try to portray himself in the most favorable light, but the House ethics committee should not help in that effort. If the panel finds misconduct it should quickly make that finding known and head off distortions of the truth such as Savage attempted.

#90043u0964 02/12/1990 ~United Press International

BY VERNON SCOTT

HOLLYWOOD (FEB. 12) UPI - Thanks in part to the likes of Frank Sinatra and Zsa Zsa Gabor, who seem to sell their houses when the closets get full, real estate here soars as high as the stars.

The average habitable house north of Santa Monica Boulevard in Beverly Hills, for example, is about $4 million.

Tear-down houses go for $1.5 million - the older, smaller houses that are

bulldozed for far grander things on lots that are often only 70 feet by 180 feet.

Of 200 houses built in Beverly Hills in the past two years, all but five replaced a tear-down.

If the low end of available houses is $2 million in this enclave of the rich and infamous, the high end is out of sight. Some homes in Bel Air and Holmby Hills go for as much as $25 million. Then there is producer Aaron Spelling's 54,000 square-foot mansion, still under construction, which has a price tag estimated at about $30 million.

The man doing the estimating is realtor Mike Silverman, who is as much a celebrity around town as most actors.

Silverman has been buying and selling homes to the big- and small-screen elite for more than 30 years.

Several years ago he sold Frank Sinatra a house atop a peak in the Santa Monica Mountains overlooking Beverly Hills. Sinatra grew tired of it, so Silverman sold it - sight-unseen - to a multimillionaire and his new bride.

After that marriage broke up, Silverman sold it back to Sinatra who kept it several years before selling it again.

''When Frank married Mia Farrow, he asked me to find him a house,'' Silverman recalls. ''I drove him around Bel Air and told him to pick one out. He pointed to a home he liked, but it wasn't for sale.

''I took him back to his office and returned to the house and had tea with the woman who owned it. A few days later Frank bought the house.''

The frequency of marriage and divorce helps keep the market lively. So does the restlessness of celebrities who are compelled to buy upscale. If it isn't celebrities, then it's foreigners who want to live in a star's ex-home.

''Sometimes celebrities buy other celebrities' homes,'' Silverman said. ''That was the case with the Bel Air mansion that is owned now by Marvin Davis. I originally sold it to Dino De Laurentiis for $2 million. Kenny Rogers bought it for $14 million and then sold it to Marvin Davis for over $20 million.''

Silverman also makes his home in Beverly Hills, along with a weekend getaway on the beach at Malibu, surrounded by the likes of Charles Bronson and Jill Ireland, Larry Hagman, Burgess Meredith, Dennis Weaver and others.

Malibu, he says, is in a price-tag class by itself. A lot with 35-foot

frontage goes for more than $1 million if it's on the sand, even if the house is a shack.

''Pia Zadora has a house at the beach on a 30-foot lot and she has it up for sale at $4.5 million,'' Silverman said.

''Real estate keeps going up and up. I sold producer Bob Evans his house for $300,000 off Coldwater Canyon many years ago. He recently turned down the opportunity to sell it for $6 million.

''Tony Curtis paid $300,000 for an estate off Sunset Boulevard and I sold it to Sonny and Cher for over $1 million. It changed hands a couple of more times and then we sold it for $4.2 million. Now it's worth between $10-12 million.''

According to Silverman, some 15 percent of current real estate sales in these prestigious neighborhoods is to foreign buyers, many of them from the Middle East and an increasing number from Japan.

''And there are Chinese buyers coming in now that Hong Kong is about to become part of mainland China.

''There's no chance this real estate will decrease in value because everybody in the world wants to live here,'' he said.

''The surprising thing is the number of people who pay cash, as much as $10 million to buy a house outright. That goes for Americans as well as foreigners.

''Right now Holmby Hills is the most prime real estate, aside from Malibu, because the lots are bigger,'' he said.

''Prices will continue to go up unless they repeal the law of supply and demand. There is a limited amount of property in this area and there are thousands of potential buyers.

''I won't say a movie star's house will sell for a higher price than if it were owned by a non-celebrity, but it increases interest in the property and helps to sell it. There are a lot of rich, bored people in the world who like to say they live in a house that once belonged to a star.''

The cliche about the three most important considerations in real estate - location, location, location - holds true for Beverly Hills, where prices increase in $400,000 increments as the buyer moves northward from Santa Monica Boulevard to Sunset Boulevard.

''The 500 block is the bottom where you can find a tear-down for $1.6 million, which amounts to a vacant lot,'' Silverman said. ''The 600 block

would start at $2 million and so on.

''Back in the 1920s and 1930s when most of these homes were built, they sold for an average $50,000. Now a house that is worth moving into will cost at least $3.5 million.

''There are still bargains to be had, but that doesn't mean they're inexpensive. A house worth, say, $4 million, may be on the market for $3.5 million. That's underpriced and a good deal.''

#90043u0974 02/12/1990 ~United Press International

(FEB. 12) UPI - The promise of a high-end product at a low end price is often advertising hyperbole, but Power Up Software delivers the goods with Express Publisher, its new desktop publishing program for IBM compatibles.

Express Publisher wins high marks in the critical tests of any successful application: support, intuitive ease of operation and quality results.

All of this, however, needs considerable computing power. System requirements include 640K RAM, DOS 3.0 or higher and a hard disk.

And you will use up considerable memory, a minimum 2MB for the application and possibly double that if you install the more than 100 clip-art images. The numbers expand even faster if more of the optional images are stored on the hard disk. But the results are worth it.

You will quickly be producing high quality news letters and releases, thanks to documentation written by people who use English as a first language and computerese as a second.

All 193 pages and six appendix sections of the Express Publisher manual put the first time user immediately at ease, but provide plenty of meat for experienced computer users, too.

Customer support provided by Power Up, of San Mateo, Calif., is another plus for Express Publisher. Dumb questions often come up and you need to talk with someone human who can get you out of whatever mess you are in.

I did it twice with really minor problems and got the answers I needed. The only drawback is that the support desk is open only 9 a.m. to 5 p.m. Pacific time Monday through Friday, and most problems seem to come up late on a Friday night when there's no one around.

But Power Up is there if you need it, a plus for anyone spending money on

an application who has a question that the manual cannot immediately answer.

End results are also award winners from Express Publisher.

The program features user-friendly pull-down menus that quickly guide the new user through the various steps needed to turn out top quality products.

There is also an on-line Help directory - hit F1 - to guide you through any problems.

The menus and on-line Help make the program so intuitive that it is easy to put aside everything and work just from the screen. And the documentation is still there if you get into real trouble.

Because desktop publishing applications use so much memory, it is best to compose copy on a word processor first, then import it into Express Publisher.

Then let Express Publisher do its stuff, with layout, headers, graphics and typestyles. The result is a print-shop quality piece of work.

Express Publisher imports text from both Microsoft Works and Word, along with MicroPro WordStar and WordStar 2000, WordPerfect and IBM Displaywrite 4.0.

You have at your fingertips a wide range of 300 DPI text and graphics possibilities. To say nothing of scalable fonts, from 6 to 144 points, that can be accessed ''on the fly.''

Express Publisher also allows importation of art and graphics from other applications, including any put into the TIFF format by scanners such as Logitech's Scanman Plus.

The ability to access items in the Tagged Image File Format opens the creative window, allowing you to put anything a scanner can scan directly into your Express Publisher document. This can range from photographs and charts, to copies of letters or art.

Text automatically wraps from column to column, or you can break it up over several columns on consecutive pages. The text also wraps around the graphics you import.

You can even set up Templates for items that are done on a continuing basis, say newsletters or news releases for the office - or for church, Brownies , Cub Scouts, whatever. And the results are always totally professional.

The documentation contains several examples of what is possible, but what you can achieve is limited only by your own imagination.

The more than 100 clip art choices in the setup disk should be enough for most users. If not, Power Up has four portfolios available at additional cost. They include two for business and one each for education and special occasions, enough to make you want to add extra computer memory, say a 40MB hard disk or higher.

All of this is like handing peanuts to someone who is addicted to peanuts. The time spent working with Express Publisher can really become fun. It is amazing how many different approaches there are to the same theme.

Software: Express Publisher by Power Up Software Corp., 2929 Campus Dr., San Mateo, Ca 94403; System requirements: IBM or 100 percent compatible, DOS 3.0 or higher, hard disk, CGA, Hercules, EGA or VGA graphics capability, mouse, laser, inkjet or dot-matrix graphics printer. Price: $149.95; Reviewer's evaluation: (On scale of 1 to 5) 5 - unqualified recommendation.

JOLIET, IL (FEB. 12) UPI - The hunt for three murderers and two other prisoners who cut through metal bars and escaped from a maximum-security prison focused Monday on the Chicago area, where at least two of the escapees had relatives.

A sixth fugitive from Joliet Correctional Center, Tommy Munoz, 22, was captured near his home on Chicago's South Side Sunday evening, state Corrections Department spokesman Nic Howell said.

An anonymous tip led authorities to Munoz, who had been imprisoned on narcotics convictions and for intimidating a witness, authorities said.

A nationwide alert was issued for the remaining five fugitives.

''Basically, everybody should be very cautious anywhere. These guys are dangerous,'' Howell said. Three of the convicts were serving time for murder and are considered ''extremely dangerous,'' he said. One is convicted in three killings.

The six escaped from a disciplinary segregation unit of the maximum-security prison, 45 miles southwest of Chicago. The escape was confirmed at 7 a.m. Sunday, Howell said.

There was an obvious ''breach of security,'' Howell said.

''They were in adjoining cells in the west cellhouse segregation unit. They cut their way out of their cells. Then they knocked out a window and cut a bar over that window. They dropped to the ground and they had to scale a 6-foot-tall fence.''

The escapees still at large were identified as James F. Allen, 40, of Chicago, convicted of three murders; Dave Rodriguez, 21, of Chicago, convicted of murder; and Daniel Johnson, 24, of Bureau, Tenn., also convicted of murder.

Police also sought Terry W. Colburn, 21, of Fulton, Mo., a convicted burglar, and Ron Roach, in his 20s, of Wyoming, Ill., also convicted of burglary.

Both Allen and Rodriguez were believed to be headed toward the Chicago area, according to police.

Joliet police notified Chicago authorities early Monday that Rodriguez might be driving a stolen two-door red 1984 Datsun with a damaged left rear panel.

Police said it also was likely Allen would flee to Chicago because he has relatives in the Cabrini-Green project run by the Chicago Housing Authority.

The prison, one of two in Joliet, was placed on indefinite lockdown when the escape was discovered early Sunday, confining the prison's 1,390 inmates to their cells, Howell said.

ELKINS PARK, PA (FEB. 12) UPI - GMAC Mortgage Corp. announced Monday completion of an agreement to acquire Residential Funding Corp., a subsidiary of Anchor Savings Bank FSB of Hewlett, N.Y.

RFC, headquartered in Minneapolis, is one of the nation's leading companies in the purchase and sale of "AA" rated mortgage pass-through securities and maintains a master servicing portfolio of nearly $8 billion. RFC, which provides mortgage services to more than 400 lenders, will become a wholly owned subsidiary of GMAC Mortgage of Elkins Park, Montgomery County.

Through the acquisition, GMAC plans to expand the range of mortgage products and services it offers. Of particular interest is RFC's skill in the acquisition and marketing of jumbo loans and related mortgage securities which complements GMAC's strength in other product areas,

officials said.

GMAC is one of the nation's largest mortgage lenders, servicing a portfolio of nearly $30 billion, representing nearly 400,000 customers. The company is a wholly owned subsidiary of General Motors Acceptance Corp., a subsidiary of General Motors Corp.

GMAC has over 70 offices for residential customers, nine income property financing offices and major servicing centers in Philadelphia and Waterloo Iowa.

RFC has a staff of more than 200 in seven locations. RFC will continue to operate under existing management at its present locations.

#90043u1065 02/12/1990 ~United Press International

JOHANNESBURG, SOUTH AFRICA (FEB. 12) UPI - At least 24 people have been killed in a coastal province where weekend fires set by rival black groups forced an estimated 2,000 squatters to flee, police said. The arson continued Monday.

Residents said they believed the killings in Natal province were connected to intercommunal strife and were unrelated to Sunday's release of African National Congress leader Nelson Mandela.

Residents, however, said there were several attacks on pro-Mandela marches in Durban black townships on Sunday carried out by black vigilantes opposed to the ANC.

In Johannesburg Monday, police reported a group of 50 blacks carrying stones and clubs allegedly tried to disarmed a construction site security guard and then cornered him, prompting him to open fire. One man was killed and three were lightly injured, a police spokesman said.

It was not clear what prompted the Johannesburg incident.

In Natal, hundreds of shacks and brick homes have been set on fire over the weekend and the arson continued Monday in the squatter settlement of Richmond Farm, forcing an estimated 2,000 squatters to flee their homes and seek refuge in the nearby colored township of Newlands East, just north of the Indian Ocean port of Durban.

As many as 3,000 people have died since violence erupted in Natal in September 1987 between members of Chief Mangosuthu Buthelezi's conservative Zulu Inkatha Movement and supporters of the more radical anti-apartheid umbrella United Democratic Front.

In Mpumalanga near the Natal provincial capital of Pietermaritzburg, 10 people were killed, including a policeman, police said. Widespread unrest also occurred including Pietermaritzburg, Kwamashu and Lamontbille.

One man was axed to death in front of two policemen Sunday who said they were unable to stop the attack in Kwamashu township, where sporadic shooting occurred Monday.

''We were all alone on duty here and were not able to do anything to help them,'' one policeman said.

The deaths brought to at least 24 people killed in Natal province since late Saturday. Most of those killed were stabbed or shot, residents and police said.

NEW YORK (FEB. 12) UPI - Time Warner Inc. Monday reported a fourth-quarter loss of $222 million, compared with net income of $56 million, or 97 cents a share, in the last quarter of 1988.

The publishing giant said the loss reflected the Aug. 1, 1989 acquisition of Warner Communications Inc., and interest payments on the leveraged buyout. The acquisition boosted the company's fourth-quarter revenues to $3.09 billion, compared with $1.2 billion in the fourth quarter of 1988.

For fiscal 1989, the company reported a loss of $256 million, also reflecting the Warner acquisition, compared with net income of $282 million, or $4.88 a share, in the previous year. Revenues for 1989 were $7.64 billion, compared with $4.5 billion in 1988.

Time Warner is the world's largest media and entertainment company and owns a number of magazines with international circulation, including Time, Sports Illustrated, People, and Fortune. The company also publishes books. Its entertainment divisions include movie production and distribution, music publishing and cable television programming and distribution.

BRUSSELS, BELGIUM (FEB. 12) UPI - A delegation from the Supreme Soviet, the Soviet legislature, arrived Monday for an unprecedented meeting with the North Atlantic Assembly, NATO's interparliamentary organization.

The Soviet delegation is scheduled to meet with NATO Secretary-General Manfred Woerner on Wednesday, and participate for the first time in Assembly sessions on Thursday and Friday.

Gen. John Gavin, NATO supreme allied commander for Europe, will address the Soviets on Thursday morning as part of a joint meeting of the Assembly's Political Committee and its Committee on Defense and Security.

The 184-member Assembly includes members of the national parliaments from each of the 16 NATO countries.

The delegation from the Soviet legislature is headed by Valentin Falin, chief of the international department of the Central Committee of the Communist Party. Other Soviets include Marshal Sergei Akhromeyev, former chief of staff of the Soviet armed forces.

Other NATO officials scheduled to participate in the meetings include Gen. Vigleik Eide, chairman of the NATO military committee, and Henning Wegener NATO assistant general secretary for political affairs.

#90043u1138 02/12/1990 ~United Press International

KAMPALA, UGANDA (FEB. 12) UPI - A British Broadcasting Corp. journalist was arrested by Ugandan authorities during the weekend, relatives of the detained man said Monday.

He was the third journalist in 10 days to be held for questioning as the government cracked down on press activities in the capital, Kampala.

Hussein Abdi, the BBC's Swahili and Somali language correspondent, was removed from his house on Saturday by plain clothes security men, his relatives said.

They took him for questioning in connection with allegedly embarrassing questions put to Zambian President Kenneth Kaunda at the close of a state visit two weeks ago.

Abdi was due to be charged with defamation later Monday, police sources said.

Two other Ugandan journalists were arrested Feb. 3 over the same press conference incident, in which Kaunda was reportedly asked why he did not step down in favor of a younger man.

Both of those journalists were freed by a Kampala chief magistrate on technical grounds, but promptly re-arrested and returned to police cells. One, Alfred Okware, editor of a weekly Ugandan publication, was charged with sedition for possessing a document published by a rebel Ugandan organization.

The other was later released.

The government suspended all foreign press accreditation on Feb. 8, requiring journalists belonging to or working for non-Ugandan organizations to re-apply for work permits.

#90043u1148 02/12/1990 ~United Press International

NEW YORK (FEB. 12) UPI - Drexel Burnham Lambert Inc. said Monday the financial service firm was seeking a major investor or a merger agreement due to cashflow problems at its parent company.

"Senior members of the firm have concluded that Drexel should seek a major investor or a merger partner for the firm," Drexel said. "Preliminary discussions toward that end have already begun." Drexel did not disclose who were the potential investors or buyers, nor what was the size of the investment sought.

The company cited difficulties on the securities market and cashflow problems at its parent company, Drexel Burnham Lambert Group Inc., as the main reasons for the decision.

"The unsettled markets, particularly in the high yield area. have adversely affected the liquidity of our parent corporation, Drexel Burnham Lambert Group, which has consolidated net worth of over $800 million," the firm said. Drexel stressed that it "continues to have good liquidity and has excess regulatory capital."

A spokesman also denied that Drexel was about to file for protection under Chapter 11 covering limited bankruptcy. There had been numerous rumors on Wall Street in the past months about the financial woes of the firm.

In 1988 Drexel was rocked by a financial scandal which led the firm to agree to pay a $650 million settlement. The charges were filed by the Securities and Exchange Commission which accused the company, its senior executive for junk bond trading, Michael Milken, and other officers with insider trading, stock manipulation and other violations of securities

laws.

#90043u1152 02/12/1990 ~United Press International
AMRITSAR, INDIA (FEB. 12) UPI - Sikh radicals, in a series of bomb and gun attacks across northern Punjab state, killed 19 people in a 24 hour period ending Monday, including a local leader of former prime minister Rajiv Gandhi's Congress (I) Party, police said.

The 19 total was the largest number of people killed by Sikh radicals in a single day since the government of V.P. Singh assumed power last December.

Sikh radicals bombed a bus in Batala, 30 miles northeast of Amritsar killing three passengers and injuring six others, the Press Trust of India said.

Sikhs also bombed the Police Training College at Phillaur killing two officers and injuring six other people.

In the nearby town of Jullunder, radicals killed Jagdish Singh, a local leader of Gandhi's Congress (I) Party, police said.

In other violent incidents, police said Sikh radicals killed at least 13 people, including six members of a single family.

Police blamed the violence on extremists who have been waging a bloody campaign since 1983 to set up an independent state called ''Khalistan'' or ''Land of the Pure'' in Punjab. The six-year-old campaign has left more than 6,000 people dead.

Sikh radicals allege that Sikhs, who make up two percent of India' s 820 million people, need a separate state to escape discrimination, practiced by the Hindu-dominated central government.

#90043u1161 02/12/1990 ~United Press International
BRUSSELS, BELGIUM (FEB. 12) UPI - European Community proposals to combat money laundering by criminals, floated a month ago, have gained support and could be approved this week by the powerful EC Commission, sources said Monday.

The anti-laundering package was first proposed as a toothless recommendation to the 12 nations of the European Community, but it now may be issued as a set of binding directives with added clout, officials said.

They may extend beyond banks to casinos, money-changers and other

businesses handling large cash sums. "Otherwise, money might simply be shifted toward other less-controlled financial institutions," said Sir Leon Brittan, Community commissioner for financial services.

An EC source said the top administrative Commission will discuss and probably approve a draft version of the proposal Wednesday. Commission vice president Brittan proposed the measures in January to meet new risks arising from Europe's 1992 single-market program. Most national restrictions on cross-border capital movements are to be lifted in July under the phased plan for integration by the end of 1992.

Initially submitted as a proposed recommendation, the package of measures may instead take the tougher form of a directive. "It's a question of a trade-off between something that can be adopted quickly, which is not binding, versus something that would take longer but have a binding effect " the Commission source said.

Directives adopted by the EC's governing Council of Ministers require member states to adopt corresponding national laws, usually within two to three years of final Council action.

The anti-laundering measure will likely require the reporting to authorities of transactions deemed "suspicious," rather than establishing across-the-board requirements for specifically defined transactions.

In the United States, for example, all cash transactions of more than $10,000 must be reported to the U.S. Treasury. "We didn't see that as particularly well-suited to the situation in Europe," the Commission source explained.

Brittan told a financial ethics conference in Brussels Monday that it would be up to member states, not the Commission, to set penalties for violations of the new money-laundering control laws.

"It is in everyone's interest to prevent the financial institutions being misused by organized criminals," said Brittan, the EC commissioner for financial services. "The Commission intends to ensure that liberalism does not mean license for criminals."

Money laundering is the process by which drug profits and other monies derived from criminal activities are converted from cash receipts into bank deposits and other negotiable financial assets.

SKOKIE, IL (FEB. 12) UPI - Brunswick Corp. Monday reported a fourth-quarter net loss of $5.9 million compared with earnings of $17.1 million, or 20 cents a share, for the year-ago quarter. Revenues also were down to $635.4 million, compared with $752 million in the 1988 fourth quarter.

For all of 1989, Brunswick reported a net loss of $71.3 million, compared with net earnings of $193.1 million, or 82 cents a share, in 1988, which included a onetime gain of $10.6 million on the sale of the filtration technology business of its Technetics Division. Revenues for the year declined to $2.83 billion, compared with $3.28 billion in 1988.

Brunswick Chairman Jack F. Reichert said Monday the company was proceeding with its previously announced plan to dispose of both the Technetics Division and its Industrial Products Division.

The 1989 results included an after-tax restructuring charge of $79.2 million associated with the writeoff of some marine assets, primarily intangibles, reorganization of the marine operations and disposition of some assets of the Defense Division. The results also reflected severe sales declines in the company's Marine segment.

"The Marine segment sales declines of 26 percent during the fourth quarter and 18 percent for the year are the result of the industrywide decline in domestic retail sales of marine products and our planned programs to reduce dealer inventory levels by curtailing production and shipments," said Reichert.

"These programs have been successful in reducing dealer and company inventory levels, despite the continued fall-off in retail sales activity " he said.

"Although these cutbacks have adversely affected operating results in this

segment throughout the year, we are confident that our efforts to reduce pipeline inventory were prudent," Reichert said. "These actions and the restructuring of our Marine operations will allow Brunswick and its dealers to compete effectively in the coming years."

WASHINGTON (FEB. 12) UPI - British Aerospace Inc. Tuesday announced a major expansion of its aircraft modification and maintenance facility in Little Rock, Ark.

As part of a $16 million development in conjunction with the city of Little Rock, the new installations at the company's wholly owned subsidiary Arkansas Modification Center at Adams Field will include a new administration and technical facility and four hangars, BAE said.

The project is scheduled for completion in April 1991 with new facilities for aircraft completion and painting on a 30-acre site at the airport. Other facilities will cover corporate jet and airliner maintenance, modification, and servicing, the company's North American headquarters said.

The 12-year-old Arkansas Modification Center was purchased by British Aerospace in June 1988.

ATHENS, GREECE (FEB. 12) UPI - Prime Minister Xenophon Zolotas resigned Monday after the three main political parties supporting him withdrew their ministers from his Cabinet, officials said.

The three parties, which pledged support when he formed a national unity

government in early December, said they would continue to support him in Parliament after he formed a caretaker government to take the country through fresh elections April 8.

Officials said Zolotas resigned after the conservative New Democracy party the Pan-Hellenic Socialist Movement (PASOK) and the communist-led Alliance of the Left pulled their ministers out of his government Monday.

Their decision came when they were unable to agree on crucial issues, including a controversial tax bill and annual promotion and retirement lists of military officers.

The state-owned television station ERT-1 said New Democracy leader Constantine Mitsotakis, PASOK chief Andreas Papandreou and communist leader Harilaos Florakis would meet President Christos Sartetakis late Monday to discuss the crisis.

The prime minister headed for the presidential palace earlier in the evening to hand his resignation to Sartzetakis, the private Antenna TV station said.

The Cabinet collapse occurred after a wave of strikes threatened to cripple the economy. Zolotas said there was an acute shortage of funds in the treasury, and to grant more pay to striking workers would have a shattering effect on the economy.

The three parties supporting his government face another showdown Feb. 23 on the choice of a new president, elected by a parliamentary vote. Under the constitution, the leading candidate needs a two-thirds majority to win.

Political analysts said the present makeup of Parliament, in which no party holds even a simple majority, meant no candidate could hope to win because the legislature is almost evenly divided between right- and left-wing deputies.

The constitution provides for fresh general elections if no candidate wins two-thirds in three rounds of voting in the Vouli, or Parliament. In the legislature that comes into being after fresh elections, a simple majority is needed to elect the president.

WASHINGTON (FEB. 12) UPI - Increasing numbers of Americans are serving as school volunteers, but volunteerism tends to help white schools more than minority ones and is no substitute for adequate funding, a federal study said Monday.

Volunteerism has been a cornerstone of President Bush's social policies, and the report found volunteers working as tutors or mentors generally have helped students improve their peformance and ''grow in self-esteem and confidence.''

In releasing the study, Education Secretary Lauro Cavazos said his department is increasing funding for volunteer programs and that the administration would soon propose national-service legislation encouraging school volunteers.

''The main conclusion of the ... report echoes what President Bush has been saying since he first took office: Volunteers can and do play a role in enriching the lives of thousands of Americans,'' Cavazos told reporters.

However, Cavazos said he agreed with the report's finding that volunteer programs can only supplement ''a well-run education program.''

The study said, ''Although there is agreement that volunteer help can make a difference, neither school administrators nor the volunteer coordinators believe that any massive infusion of volunteers could make up the shortcomings of an underfunded, poorly run education system.''

The report financed by the Education Department estimated the number of school volunteers increased in the 1980s to about 1.3 million and that volunteerism constitutes a ''resource of potentially huge dimensions.''

However, much of the growth occurred in private schools. A 1987 study found 1.1 million volunteers in public schools, about the same as in 1985. At the same time, the number of private-school volunteers tripled to nearly 300,000.

Mainly minority public schools also were much less likely to use volunteers than white schools, the report said. The average number of volunteers at schools where minority enrollment was more than 75 percent was 14.9, compared with 31.9 at the average suburban public school school.

''Parents (in poor areas) may be less likely to have either the time or the energy to engage in volunteer activity; there may be fewer intact families and fewer parents overall to participate; and there may be less understanding in such areas of the need for and importance of providing volunteer services,'' the report said.

''It is quite clear that children in such schools have less opportunity to receive any of the benefits that can be obtained from volunteer help. It also can be suggested that the possible benefits of school volunteers to children in such areas, in fact, would be much greater.''

Cavazos said the upcoming service bill contained no specific provisions to address the different volunteer rates in white and minority areas. He added, ''It's certainly another issue that we're looking at.''

The National Research Council report, which called for more research on school volunteers, also found that smaller schools and ones in rural areas were less likely to use volunteers.

Geographically, schools in the West were most likely to use volunteers.

#90043u1280 02/12/1990 ~United Press International

WASHINGTON (FEB. 12) UPI - Declining mortgage rates and lower prices for starter houses gave first-time home buyers greater purchasing power during the fourth quarter of last year, the National Association of Realtors said Monday.

The association's first-time home buyer affordability index measured 74.4 during the three-month period ended in December, an improvement from a rating of 71 in the previous quarter.

That means that typical first-time buyers had 74.4 percent of the income needed to qualify for a starter home. The relief may be short lived, however, as interest rates have pushed upwards during the first quarter.

John Tuccillo, the association's chief economist, said the return of higher interst rates this quarter should make it even more difficult for first-time home buyers to qualify for a loan. First-timers will have to be "more inventive to get into the housing market," Tuccillo said.

"Homeownership is a major goal for many people, and first-time home buyers are stretching their resources to get into housing in any way they can," agreed Norman Flynn, the association's president.

A $245 increase in annual median income and a drop to 10.08 percent from

10.2 percent in the closing interest rate, including fees or points, combined to help first-time buyers in the fourth quarter, the assocation said.

Flynn said the improved purchasing power of first-time buyers is still less than the so-called "move-up" buyers who are seeking to sell their homes for larger accommodations.

The association's overall housing affordability index totaled 106.4 during the quarter, meaning that the typical buyer had more than enough income to qualify for a home loan. First-time buyers "are beginning to see some improvement in areas where there is a plentiful supply of housing at affordable prices," he said.

During the quarter, the median income of a "prime" first-time buyer was $22,878, up $245 from the previous quarter, the association said. Using its affordability index, the typical first-time buyer would need an annual income in excess of $30,746 to qualify for conventional financing covering 90 percent of a home priced at $78,900, the national median price for a starter home.

The median price of a typical starter home dropped $2,100 during the quarter to $78,900 from $81,000 in the previous quarter. A buyer with the median income of $22,878 could qualify for a home priced at $58,700, the association said.

#90043u1306 02/12/1990 ~United Press International

NEW YORK (FEB. 12) UPI - Union chief Don Fehr said Monday he will probably meet later in the day with owners' negotiator Chuck O'Connor in the latest effort to resolve baseball's stalled labor talks.

Fehr said the meeting would take place either at the offices of the Players Association or at the owners' Player Relations Committee. Fehr said the meeting would be on ''staff level'' and would not be a formal negotiating session.

Talks recessed Thursday. Since then, the owners reaffirmed their strategy, which calls for spring-training camps to be shut until the outline of an agreement is reached.

Camps are scheduled to open Thursday and, unless a pact comes almost immediately, some clubs would be unable to deliver equipment to the spring training site by then.

#90043u1350 02/12/1990 ~United Press International

LONDON (FEB. 12) UPI - Stock prices closed broadly lower in light trading Monday on the London International stock exchange.

The Financial Times 100-stock index, which fell 17.4 points Friday, tumbled 26.7 points to 2,286.9. The narrower top 30 industrial average lost 20.1 points to 1,810.6.

Volume amounted to around a light 337 million shares compared with 521.4 million shares changing hands Friday.

Analysts said the retreat followed falls on the West German and British bond markets which served to increase bond yields and redirect investment from stocks into bonds.

On the economic front, the Central Statistical Office reported Britain's producer output prices, or prices of manufactured goods, rose 0.8 percent in January from December.

The government agency said producer input prices, or prices of raw materials and fuels purchased by the manufacturing industry, fell an unadjusted 0.5 percent in January from December.

Economists were forecasting an 0.5 percent drop in input prices and an 0.7 rise in output prices.

In a separate report, the Central Statistical Office said Britain's retail sales fell a provisional 1.3 percent in January from December but rose 2.1 percent from January 1989.

Economists were forecasting a drop of around 1.4 percent from December and a 2.3 percent rise from a year ago.

Among the most widely traded stocks, Sketchley, the rental company, gained 35 cents to $6.17 on news of the rejection of the hostile bid from Godfrey Davis. Godfrey Davis dropped 14 cents to $2.38.

Rosehaugh, the investment and real estate company, surged 70 cents to $5.98 on rumors of an offer from Olympia and York or JMB Realty.

In the pharmaceutical sector, Wellcome PLC fell 18 cents to $10.91 as rival Glaxo reported that it was testing its own AIDS drug.

In the banking sector, Royal Bank of Scotland fell 19 cents to $2.99. The bank announced Friday that the Kuwait Investment Office had sold a large interest in the bank to a friendly investment fund.

Elsewhere in Europe, prices on the Frankfurt Stock Exchange closed broadly lower in moderate trading.

The German Stock Index fell 25.50 points, or 1.4 percent, to 1,860.39.

Traders said weakness in the local bond market, on speculation that West German interest rates will rise, sent prices lower across a broad front.

#90043u1353 02/12/1990 ~United Press International
CHARLOTTE, NC (FEB. 12) UPI - Evangelist Jim Bakker said in a letter Monday that his time in federal prison has left him a brokenhearted, lonely man and being behind bars at Christmas was ''almost more than I could bear.''

Bakker's four-page, handwritten letter to his followers in Charlotte was different from other mass mailings he has done in recent years - it never once asked for money.

Instead, Bakker admitted he is a sinner and said God has forgiven his sins. He insisted, however, he is not guilty of the con artist charges that landed him a 45-year prison term last October.

''I have failed God and made many mistakes in my lifetime,'' Bakker said, ''but I am not guilty of any of the charges the government has made against me. PTL was not bankrupt while Tammy and I were there.''

Bakker did not mention the Rev. Jerry Falwell by name, but his letter made it clear he believes the Baptist fundamentalist preacher is the real criminal in the PTL case.

Falwell took over PTL in March 1987 after Bakker resigned in disgrace over a one-time sexual fling with former church secretary Jessica Hahn. Donations dried up, and three months later Falwell took PTL into bankruptcy court.

''Those who conspired to defraud us and the PTL partners put the ministry into bankruptcy, then lobbied the government to launch a grand jury investigation and instigated a class action suit. They had to destroy me to cover and justify their crime.''

Falwell, meanwhile, said Sunday night he believes Bakker's 45-year sentence is too harsh.

''No doubt a debt to society had to be paid,'' said Falwell. ''But 45 years is unreasonable. I think everybody here - including the court - just got caught up in the spectacular nature of what was going on.

''Nobody ever accused me of being a fan of Jim Bakker,'' Falwell added, ''but I'm doubtful that deposed Panamanian strongman Manuel Noriega, in a U.S. court, will get 45 years for his crimes against humanity.''

Bakker said spending Christmas behind bars was the saddest experience of his life.

''As my son (14-year-old Jamie Charles) hugged and said goodbye to me on

Christmas day, he started to sob,'' said Bakker. ''Then his sister, Tammy Sue started to cry.

''Tammy Faye, with tears streaming down her face, put her arms around us all and right here in the federal prison, with other prisoners looking on, our family had perhaps its saddest experience,'' he said.

''I then watched as my family walked out of the prison building and across the institution grounds,'' Bakker wrote. ''It was snowing and very cold. Only Tammy Sue looked back and waved. Tammy Faye told me later she was crying too hard to look back. I watched as they went into the gatehouse and out beyond the razor wire fence that surrounds the prison.

''I never felt so all alone in all my life, as I stood staring out the window,'' Bakker said. ''The pain was almost more than I could bear.

''When I got back to my bunk, I climbed up and laid down, feeling so helpless. Depression seemed to say, 'Give up, you've lost everything.' But my faith in God leaped up within me and said, 'Oh no, I have not lost God.'''

#90043u1360 02/12/1990 ~United Press International

BANGKOK, THAILAND (FEB. 12) UPI - The Soviet Communist Party will control the eventual establishment of new political parties and will fight to stop the formation of any parties that pit Soviet nationalities against one another, Soviet Prime Minister Nikolai Ryzhkov said Monday.

Ryzhkov, a member of the ruling Communist Party politburo and widely considered an ally of President Mikhail Gorbachev, said last week's decision to give up the party's constitutionally guaranteed dominance did not mean it would allow the immediate formation of any and all other political parties.

''The Communist Party agrees to the existence of other political and social organizations. And some time later, in the future, it also agrees to the establishment of new political parties,'' he said at a news conference concluding a two-day official visit to Thailand.

Ryzhkov said there was no need to rush the establishment of new parties ''because we still believe that today the driving force of political change is the Communist Party, as it has been historically and it will go on being.''

He said new laws had to be passed to provide a legal basis for competing parties ''to regulate the establishment and existence of these parties.''

''If these parties are for the conservation of our society, for the construction of our society, then we think they have a right to live, a right to exist,'' he said.

''But if the parties are for pitting two nationalities against each other, then we think that these kinds of organizations should not be established '' he said.

''We shall fight against such organizations,'' he said.

Ryzhkov gave no further explanation, but he appeared to have in mind groups accused of fanning ethnic tensions between Armenians and Azerbaijanis in the Caucasus region of the Soviet Union.

The central government last month had to order troops into Azerbaijan to halt mob violence against Armenians. There have been ethnic and anti-Soviet tensions in most of the country's 15 republics and a state of emergency was declared Monday in the Central Asian republic of Tadzhikistan.

Ryzhkov, however, said further political and economic reforms were coming and the pace would quicken.

He described elections of local and regional representatives due in February and March as ''a vast political struggle'' with up to 20 candidates fighting for a single seat in some areas.

He also predicted major changes at a Communist Party Congress due in June, but declined to predict what they would be.

Ryzhkov confirmed the Soviet Union was cutting back its presence at Vietnam's Cam Ranh Bay military base and called for arms reduction talks focusing on Asia.

In talks with Prime Minister Chatichai Choonhavan, Ryzhkov said the two sides agreed to work to cut the supply of arms to the battling groups in Cambodia and to encourage all sides to attend planned peace talks in Jakarta this month.

Ryzhkov said Soviet military forces at the former U.S. base at Cam Ranh Bay in Vietnam would be cut back, but that a squadron of ''only five or six planes'' would remain at the request of Vietnam.

Thai and Western intelligence sources recently reported that Soviet forces believed to number under 3,500 men, had been cut back at the base, leaving only part of a squadron of TU-16 bombers and six long-range reconnaissance planes. Ryzhkov did not specify which planes or how many servicemen would remain.

He said he expected to discuss the reduction of military forces in Asia and the Pacific ''in a wider way, not just Cam Ranh'' during his visit to Australia due to begin Tuesday.

#90043u1396 02/12/1990 ~United Press International

OAKLAND, Calif. (FEB. 12) UPI - Safeway Stores Inc. reported a widening loss for the fourth quarter Monday and sharply lower earnings for the year reflecting a large tax charge on its Canadian operations.

The grocery store chain, which went private in a $4.2 billion leveraged buyout in 1986, said its fourth-quarter loss grew to $21 million from a loss of $15 million in the same quarter of 1988.

Sales rose to $4.52 billion from $4.32 billion in the year-earlier quarter.

Operating profits rose 80.5 percent in the quarter, but the company took a one-time $46 million tax expense to cover the repatriation of $460 million from its Canadian subsidiaries.

The fourth-quarter charge also hurt Safeway's yearly earnings, which dropped 90.3 percent to $3 million from $31 million in the prior year.

Sales for the year rose to $14.33 billion from $13.61 billion in the prior year.

The company said it did not expect first-quarter results to match the performance in last year's first quarter because the Easter shopping season falls in the second quarter this year and the company faces stiffer competition in some regions.

#90043u1399 02/12/1990 ~United Press International

SRINAGAR, INDIA (FEB. 12) UPI - India's foreign secretary summoned a Pakistani diplomat Monday to reiterate charges that Islamabad was fueling anti-Indian sentiment over the crisis in the Kashmir Valley, where three people died and two bombs went off in new separatist violence.

Violence has become a near-daily occurrence in Srinagar, summer capital of Jammu and Kashmir state, 400 miles north of New Delhi, and throughout the mainly Moslem Kashmir Valley.

Since an uprising began Jan. 20 against the Hindu-dominated New Delhi government, sources say more than 100 people have died, mostly pro-secession protesters shot by security forces. The official death toll is less than 40.

Pakistani High Commissioner Bashir Khan Babar was called to the Indian Foreign Ministry in New Delhi to hear a charge that Islamabad was fueling anti-Indian sentiment in Pakistan over the situation in Kashmir, a ministry spokesman said.

He said India's Foreign Secretary S.K. Singh summoned the diplomat Monday morning to present updated documentary evidence of Islamabad's support and training of separatists operating in the part of Kashmir controlled by India.

India controls two-thirds of the rugged Himalayan region. It and Pakistan dispute each other's claims to Kashmir and have battled in the region during the three wars they have fought since 1948.

The spokesman made available to reporters copies of a document which lists 46 safe houses in Pakistan where militants allegedly received military training.

The documents also alleged Pakistani links to militants in the neighboring Indian state of Punjab, where Sikh radicals are waging a bloody campaign for an autonomous theocratic state.

''We decided to give updated detailed documentary evidence of Pakistan's interference in both Kashmir and Punjab,'' the Indian official said, adding that New Delhi had earlier given documentary proof to its neighbor.

The documents released Monday contain summaries of alleged confessions by captured Moslem and Sikh separatists, which acknowledge Islamabad training and support to Sikh and Moslem militants.

Pakistan has repeatedly denied Indian allegations it has trained and armed militants operating on Indian soil, but, as recently as Saturday, reaffirmed its moral support for the pro-independence move in the Kashmir Valley.

The high commissioner was first summoned Sunday night, hours after Pakistani supporters of Kashmiri separatists staged a protest along the international border in Uri.

Indian security forces opened fire when about a dozen demonstrators crossed onto the Indian side of the border. Pakistan said at least two persons were killed and six wounded during the encounter. India gave no

casualty figures, but said Pakistan exaggerated the outcome.

''The foreign secretary drew the high commissioner's attention to the seriousness with which we viewed this emerging pattern of incitement, followed by rash and dangerous action on the border,'' the spokesman said.

''The event in Uri sector was yet another example of the ease with which passion could be inflamed and of the difficulties in quenching such passion,'' said the Indian official.

Meanwhile, authorities at 5 a.m. relaxed for 12 hours a curfew throughout the Kashmir Valley.

Violence erupted about 9:30 a.m. in the Zaina Kadal district of Srinagar after armed militants ran into the street shooting into the air, police said.

When a nearby security force patrol opened fire, a bystander - identified as Ghulam Hassan - was shot and killed, police said.

In separate incidents in Srinagar, militants shot dead an intelligence officer identified as T.K. Razdan and a suspected government informer, police said.

Two bombs exploded in Srinagar. One blasted an empty government-owned passenger bus and another damaging a government-owned jeep, police said.

They said at least 10 people were wounded in a spate of minor violence reported from the state capital.

The violence in the Kashmir Valley has persisted despite tens of thousands of security and paramilitary troops deployed throughout the area.

The militants are backed by virtually all the region's 3 million Moslems, who believe their interests have been ignored by India's Hindu-dominated government.

The separatists have received verbal support from neighboring Moslem Pakistan, angering Indian officials and sending relations between the two long-time adversaries to their lowest point since a 1971 war.

#90043u1419 02/12/1990 ~United Press International

SOFIA, BULGARIA (FEB. 12) UPI - King Simeon II, who as a child briefly served as Bulgaria's last emperor, said in his first Bulgarian television appearance he hopes to return from exile in Spain and live as an ordinary citizen in his native country.

The 50-minute interview broadcast over state television Sunday night gave many Bulgarians their first glimpse of the 53-year-old former ruler, who was forced into exile at age 9 in 1946.

Until recently, it was considered taboo in communist Bulgaria even to mention his name. But in the last two weeks, he has given several interviews that ran in Bulgarian newspapers and one that was broadcast over state-run radio.

Interviewed at his home in Madrid, he said he watched with enthusiasm the democratic reforms that have swept his country since the ouster of hard-line leader Todor Zhivkov in November.

The king, balding and impeccably dressed in a dark business suit, said the reforms had raised his hopes that he may some day return to Bulgaria, not to rule but to live.

''I would live as a citizen in a fully democratic and multi-party country '' he said.

When the interviewer gave him documents showing that his Bulgarian citizenship had never been revoked, the king beamed and said, ''This is the greatest news I have ever gotten.''

He offered to use his international business and political connections to help Bulgaria overcome its economic crisis, saying, ''The doors of many an office ... are open to me.''

The former ruler was the son of Boris III, who died in 1943. In September 1946, the 9-year-old king and the queen mother left the country as the monarchy system was replaced by the communists in the wake of World War II.

In the interview, the king said the key for Bulgaria was the development of a market economy.

''One should not go to extremes,'' he said. ''The country needs something like socio-capitalism, which means freedom of the initiative, social justice, prosperity.''

DETROIT (FEB. 12) UPI - Chrysler Corp., in efforts to cut costs further and remain competitive into the early 1990s, confirmed plans Monday to trim again its salaried work force.

The cuts followed a program announced last summer under which the nation's third-largest carmaker cut its white-collar work force by about eight percent, or 2,300 jobs from its 31,000-member total. That program was completed last year.

Although a company spokesman said there is nothing to announce at this time, he did not dispute an Automotive News report that said further cuts of between five and ten percent by April 30 would be achieved primarily through attrition, early retirements and some layoffs.

"We've said before there's a possibility (of job reductions) throughout the year," company spokesman James Kenyon said about the report by the weekly industry publication. "We are always looking at ways of becoming the low cost producer."

The job cuts announced last July were part of Chrysler's effort to trim $1 billion from its fixed costs. Since then, it has raised that target to $1.5 billion. Kenyon acknowledged that further reductions in staff would be part of that accelerated plan.

Chrysler was expected to report Tuesday a fourth-quarter loss of about $500 million, estimated industry analyst Ronald Glantz, of investment firm Dean Witter Reynolds' San Francisco office.

"On an operating basis, they are expected to earn a couple of pennies," Glantz said, noting that Chrysler will take one-time extraordinary losses of about half-a-billion dollars related to cost cuts and plant closings, like its Jefferson Avenue facility in Detroit that closed this month.

"As long as earnings are bad, what difference does it make how bad they are?" Glantz said, adding that Chrysler may earn only $300 million for all of 1990, excluding about $1 billion from the as yet incomplete sale of its technologies unit that includes Gulfstream Aerospace.

Chrysler was bracing for an industry sales downturn to as low as 14.2

million cars and trucks in 1990, from 14.8 million units in 1989, with top executives characterizing the company's cost-cutting plans as "a way of life."

"They are taking actions to ensure survival in this downturn of prosperity " Glantz said, noting that the changed dollar-yen relationship and a lack of new product planning during the mid-1980s is now dogging the automaker.

"The recent strength in the dollar has resulted in imports being able to deliver cars to downtown Detroit for less money than it takes Chrysler to build a car," he said, estimating that Japanese cars built in the United States have a cost advantage of about $700 per vehicle.

"Starvation of any really new product is also a big problem for Chrysler," Glantz said. But he said its redesigned minivan and Jeep models within the next year or two should sustain it until an all-new line of mid-sized cars is introduced shortly thereafter.

All three top U.S. automakers are expected this week to post substantially lower earnings for the fourth quarter of 1989 when compared with the year before.

Industry leader General Motors Corp., to report its financial results Thursday, was expected to post earnings of about $540 million on an operating basis, excluding profits from the sale of some stock in Isuzu Motors Ltd.

Expectations were second-ranked Ford Motor Co. would post profits of about $600 million on an operating basis. However, it might take a charge of up to $500 million because it sold its Rouge Steel Co. subsidiary last December for below value, according to a company filing with the Securities and Exchange Commission.

"Ford will once again earn more than GM despite the long awaited turnaround of GM that has yet to materialize," Glantz said.

#90043u1459 02/12/1990 ~United Press International

BOGOTA, COLOMBIA (FEB. 12) UPI - South American officials say they view President Bush's visit to Colombia as a diplomatic success - a change from U.S. finger-pointing to a willingness to discuss important economic issues.

Bush lands on South American soil Thursday for an unprecedented presidential summit in Cartagena, Colombia, to form a common anti-drug strategy between the world's largest cocaine consuming nation and the producing countries.

The agreement to be signed will include aid to help wean the fragile economies of the producers off the lucrative cocaine trade, as well as recognition that consumption must be reduced.

Controls on chemicals used to make cocaine and arms that come from developed nations also are to be tightened, along with a greater effort against money laundering.

In the past, Colombia has been highly critical of U.S. willingness to send arms for the bloody cocaine war without cracking down on U.S. users, whose hunger for cocaine provides drug cartels with billions of dollars.

Bush's arrival signals a willingness to meet the South Americans on their own soil and discuss what South American nations have repeatedly said was a complicated economic and social situation.

''This is an unprecedented meeting and a great thing that is happening in our area, in Latin America,'' Bolivian President Jaime Paz Zamora told a Bogota radio station Monday. ''There must be concrete results for the welfare of our people and the support of Latin America in conjunction with the United States.''

''I am going to Cartagena with a lot of optimism,'' he said.

Colombia, Peru and Bolivia have been pressing the United States to provide not only military aid but also money for programs for alternative economic development.

Peru and Bolivia, the major producers of the coca leaf, cocaine's main ingredient, want to promote the substitution of other crops among poor farmers. They also are pushing to open U.S. markets to those crops in order to guarantee the farmers an income if they make the switch. Coca can now bring as much as six times the income of a traditional crop.

President Alan Garcia of Peru met last week with coca leaf farmers to discuss alternative programs. The government of President Jaime Paz Zamora of Bolivia also has formed a council with grower representatives.

Colombia seeks not only substantial help for its police and military to fight the powerful producting cartels but also improved prices for coffee and an open market for flowers and textiles.

Colombia also has pushed for the view that the problem of drug trafficking is universal and not the responsibility of any one nation.

The newspaper El Tiempo quoted unnamed government sources Monday as saying the administration of President Virgilio Barco was satisfied it had achieved recognition of that view.

The U.S. attitude of pressing for a military solution over economic concerns ''in our judgment, opens dangerous gates,'' an official said.

A U.S. official, who asked not to be identified, said the enormous differences between the four nations over the drug programs in past years had been largely reconciled.

The summit will ''celebrate the fact that we're beginning to think alike on these problems,'' he said.

#90043u1492 02/12/1990 ~United Press International

WASHINGTON (FEB. 12) UPI - The head of the African National Congress' mission to the United States urged the anti-apartheid movement Monday to press for intensified economic sanctions against South Africa until all aspects of that country's official system of segregation are dismantled.

While welcoming the release from prison of Nelson Mandela - the ANC's most prominent crusader against white-ruled South Africa's aparthied system - Lindiwe Mabuza said normal relations between South Africa and other nations ''must continue to depend on ending the apartheid system.''

''We therefore expect that no country committed to ending white minority domination in South Africa will do anything to lessen the isolation of the apartheid regime,'' she said.

Mabuza noted that South Africa continues to hold an estimated 2,500 political prisoners, and that remaining intact are the major apartheid laws - the Land Act, the Group Areas Act and the Population Registration Act.

In addition, she said, while the ANC and other black political, labor and religious groups are no longer banned, laws such as the Terrorism Act, the Internal Security Act and other measures mean Mandela and other activists still face the possibility of arrest, detention and imprisonment for political activity.

She credited the struggle of the ANC and the mass democratic movement - as well as the economic and financial sanctions imposed by other nations - for forcing the government of President F.W. de Klerk to free Mandela and other ANC leaders and to take some measured steps toward allowing black political activity.

The call for continued sanctions was endorsed by major anti-apartheid groups in the United States.

Del. Walter Fauntroy, D-D.C., said he will hold hearings next week on a bill that would prevent U.S. banks from ''rolling over'' - changing short-term debt into long term debt - billions of dollars owed them by South Africa.

''There seems to be general agreement that the financial sanctions have been the most effective part of the sanctions package,'' he said in a statement. ''The drying up of bank loans to South Africa has put that economy in a bind, one which it hopes to relieve by rolling over several billion dollars of loans by next June.''

Congress also is considering legislation sponsored by Sen. Paul Simon, D-Ill., and Rep. Ron Dellums, D-Calif., that would tighten the current sanctions law, further limit trade with South Africa and demand divestment by U.S. corporations operating in South Africa.

Imani Countess, co-chair of the Nelson Mandela Reception Committee (USA), said that ''while we celebrate, we continue to press for sanctions.'' And she condemned British Prime Minister Margaret Thatcher's announcement that Great Britain would consider dropping sanctions.

''And here in the United States, we say to President Bush and the Congress sanctions can not go until apartheid goes.''

Aubrey McCutcheon of the Washington Office on Africa, a coalition of religious and labor groups instrumental in winning the passage of current economic sanctions, said Mandela's release ''seeks to forestall discussion on new sanctions and divestment by releasing Mandela at this time.

''Mandela's release is clearly an attempt to use highly publicized reform efforts to impress the international financial community and access the funds needed to shore up its staggering economy.''

#90043u1507 02/12/1990 ~United Press International

ERIE, PA (FEB. 12) UPI - Authorities Monday were deciding whether to take a pet tiger away from a man who held police at bay while they were serving an arrest warrant on him resulting from a domestic disturbance.

Police were trying to serve a warrant of arrest on Dennis Schaefer of Fairview Township stemming from a prior domestic complaint filed by his wife when the incident occurred at his home Saturday, said Lt. Jim Ballas. Schaefer was inside his pet tiger Tanya's cage with the door open when police arrived, Ballas said.

State police accompanied Erie police to Schaefer's home because Fairview is outside the Erie police department's jurisdiction, Ballas said.

''He didn't want to talk to the Erie guys, but the state police, he either recognized them or something,'' said Ballas. ''He talked to them from inside the cage for a period of time, and then came out and turned himself over to the state police.''

Initial reports indicated Schaefer talked to the tiger like a guard dog, telling the animal to get police if they tried to touch him, but Ballas said police reports showed no indication that was true.

No injuries were reported, he said.

''I think they were just fearful of that's what would be done,'' Ballas said. ''He's had problems with containing that animal on his property through the county courts because the residents living out there were afraid to have it.''

Schaefer was arrested and taken to the county jail in lieu of $10,000 cash bond, Ballas said. He was charged with aggravated assault, reckless endangerment and terroristic threats resulting from the complaint filed by his wife. Schaefer also was charged with resisting arrest and terroristic threats as a result of the confrontation with police, he said.

He faces a preliminary hearing Friday.

Police said they would talk to the county district attorney's office about whether to attempt to take Schaefer's tiger away from him.

#90043u1517 02/12/1990 ~United Press International

LONDON (FEB. 12) UPI - The first Russian edition of The Guinness Book of Records will be released this week but there's no mention of the country's newest record - the opening in Moscow of the world's largest McDonald's, Guinness said Monday.

The world's best-selling copyright book will be produced by Soviet Russian Publishing and officially sold for about $12. Guinness expected the black-market price to soar to $31.

''I am delighted the book will be available in Russia as it will give us information on Russian records which have not been available in the past '' Guinness editor Donald McFarlan said.

The book now carries 247 references to Soviet records.

Guinness spokeswoman Cathy Brooks said the Soviet Union is not likely to earn a new entry for having the world's biggest McDonald's.

The fast-food restaurant in Moscow doesn't rival the Tump Nak restaurant in Bangkok, Thailand, which is in 65 adjoining houses and covers 10 acres. A thousand waiters are available to serve 3,000 potential customers.

McFarlan and publishing director Mark Cohen were in Moscow to launch the Russian-language version of the international arbiter of records.

McFarlan planned to present a certificate to the eight-page weekly newspaper Argumenty I Fakty of Moscow, which has the largest readership in the world, 64 million.

He and Cohen also will visit the world's largest university building, the M.V. Lomonosov State University on Lenin Hills overlooking Moscow.

It took Guinness 10 years to reach an agreement with the Soviet Union to publish the book.

Soviet Russian Publishing has a license to translate, print and publish 100,000 copies in a single edition. Demand was expected to outstrip supply Brooks said.

A second company, Progress Publishing, described in The Book of Records as the largest publishing house in the Soviet Union with 1,500 employees, is lined up to produce future Russian editions.

Among the records referring to the Soviet Union in the 1990 edition is the largest reservoir, the Kakhovskaya Reservoir, with a volume of 147,550,000 acre feet.

The heaviest bell sits in the Kremlin, according to Guinness. The Czar Kolokol, cast in 1735 in Moscow, weighs 196 tons. A fragment weighing 11 tons is broken from it.

It has the world's largest ballet company, The Bolshoi Ballet, with 2,000 employees including 260 dancers.

Guinness said 672,085,000 copies of Josef Stalin's works have been sold or distributed in 101 languages.

Moscow also has the world's busiest subway system - carrying 6.5 million passengers each weekday.

#90043u1528 02/12/1990 ~United Press International

HOUSTON (FEB. 12) UPI - A jury Monday found Monsanto Co. not liable to 222 homeowners who claimed the firm dumped dangerous chemicals near their

houses with no concern for their health or safety.

The homeowners had sought $355 million from the St. Louis-based chemical maker. But jurors who deliberated the case four days found no liability on Monsanto's behalf and awarded no damages. Mike Waldeck, an attorney for the homeowners, said the verdict will be appealed.

"The decision sends a message to our society that our environment isn't of the premium that we thought it was," Waldeck said, adding the verdict also "raises a basic question whether chemical companies are going to be responsible."

The suit had sought to force Monsanto to pay each homeowner $1.6 million for illnesses and damages they claim resulted from its dumping of toxic chemicals at the now-closed Brio Site.

Monsanto argued during the four-month trial that it was one of several companies using the waste site, and noted the dump existed before the Southbend subsidivision was built. "We're all delighted," Monsanto attorney Robert Hall said of the verdict. "It is truly an answer to a prayer."

Homeowners claimed they have suffered various ills, from upset stomachs to headaches, as a result of living near the dump. Some testified they feared they will develop cancer in the future because they live so close to the site.

"I'm shocked and saddened," said homeowner Herb Bateman, who was a party to the suit. "This is a real disappointment. To me, the evidence was overwhelming that Monsanto was responsible for putting those chemicals out there. Evidently, the jury felt differently.

"This is not the end of our fight. This is one way we chose to try and do something about this situation, to join the lawsuit. But there are many other ways we can still fight this to try and get this cleaned up."

Attorneys for Monsanto also argued the suit was a conspiracy against the company by builders and developers of the subdivision. The developers and builders earlier settled a suit filed against them by the homeowners, then joined forces with them against Monsanto.

#90043u1540 02/12/1990 ~United Press International

PAWTUCKET, RI (FEB. 12) UPI - Hasbro Inc. Monday said its fourth-quarter earnings were a record $24 million, or 40 cents a share, up from $21.1 million, or 36 cents a share, in the same quarter the previous year. Revenues for the quarter were $416.9 million, up from $394.9 million for the corresponding quarter the previous year.

For the full year, Hasbro reported earnings of $92.2 million, or $1.56 a share, up 27 percent from previous year earnings of $72.4 million, or $1.24 a share.

Revenues for the year were $1.41 billion, up from $1.36 billion in fiscal 1988. The weighted average number of common shares outstanding for the year was 59.2 million, up from 58.3 million the previous year.

Alan G. Hassenfeld, chairman and chief executive officer, said the results were consistent with estimates, and that both international and domestic business contributed to company growth.

"International growth continued in most of the major European markets in spite of the negative effect of the strengthened U.S. dollar during much of the year," he said. "Domestically, the Milton Bradley and Playskool lines continued to grow and the addition of the Cabbage Patch Kids helped to better balance our Hasbro Toy line."

#90043u1545 02/12/1990 ~United Press International

BONN, WEST GERMANY (FEB. 12) UPI - Opposition social democrats in East and West Germany called Monday for the convening in spring of a conference with Britain, France, the United States and the Soviet Union to prepare for German reunification.

The proposal was made on the eve of East German Prime Minister Hans Modrow's two-day visit to Bonn, amid increasing calls for a rapid reunification of the two states, which have been divided since Germany lost World War II.

In a joint statement, both the West German Social Democratic Party and the East German SPD said a unified Germany could belong neither to the North Atlantic Treaty Organization nor to the Warsaw Pact.

Officials of NATO, the Western military alliance, had earlier rejected a plan by Modrow which called for the neutrality of both countries as a step toward reunification.

The SPD said a decision on the military strength of the new Germany would have to be made within the framework of the Conference on Security and Cooperation in Europe.

The parties also called for a spring meeting with the four World War II victors - the United States, Britain, France and the Soviet Union.

''This conference of the six states should take place in the second half

of April,'' and ''must agree to a security-political framework for the unified Germany and steps toward it.''

At a later stage, the conference should be enlarged to include Germany's neighbors, the SPD said in the statement.

A member of East Germany's opposition movement New Forum warned Monday in Oslo, Norway, that plans for German reunification were ''going too fast.''

''In East Germany, we are unable to put economic conditions on our negotiations with our big brothers in the West,'' New Forum member Werner Schulz told Norway's news agency, NTB. ''Nonetheless, we of the New Forum are worried that reunification looks as if it will arrive before we've established our own democratic systems.''

On his return from weekend talks with Soviet leader Mikhail Gorbachev in Moscow, Kohl indicated the two German states would have to begin talks on the reunification issue with the World War II victors.

He said he expected that a single German state could be formed before 1992 now that Gorbachev had given ''a green light'' and assured him the details and the timing of the process was a matter for Germans to decide.

Kohl had said earlier the question of reunification would not be a major topic during his talks with Modrow in Bonn and indicated negotiations would only start after the March 18 elections in East Germany.

The East German Communist Party, of which Modrow is a member, has admitted that it does not expect to garner more than about 20 percent of the vote and that it likely will become an opposition party after the elections.

A spokesman for the Bonn government said Monday Kohl would brief Modrow on his trip to the Soviet Union and would discuss his offer to negotiate the creation of a monetary union between East and West Germany.

The proposal entails the rapid introduction of the West German currency in East Germany, which would have to adopt West Germany's economic system and legislation and hand over monetary control to the powerful Bundesbank, the West German central bank.

Officials in Bonn hope such a move would help prevent a total collapse of the East German economy, which has suffered from a massive exodus of workers to West Germany.

In Brussels, Belgium, West German Finance Minister Theo Waigel told his European Community colleagues Monday that a merged German currency would not threaten the EC's plan for monetary integration.

''There is no contradiction between our German political response and European integration,'' Waigel said. ''On the contrary, the reform process in Central and Eastern Europe gives new impulses to the European integration.''

#90043u1550 02/12/1990 ~United Press International

STRATFORD, Conn. (FEB. 12) UPI - About 6,200 blue-collar workers at Sikorsky Aircraft began working Monday under a new three-year contract that provided for a three percent annual wage increase.

The contract was ratified Sunday in two voting sessions by members of Teamsters Local 1150, officers said. The company and the union did not release the voting results or other contract details.

"We have a policy not to discuss the provisions of the contract or the vote," said Sikorsky spokesman Larry Bingaman. "We just don't make that information available." Union officers also would not comment on the details on Monday. Bingaman said just over half of the bargaining unit, or about 3,600 people, were members of the union and had been eligible to vote on the proposal.

The company and the union issued a brief statement last Thursday announcing a tentative agreement. The Teamsters' previous contract with Sikorsky, a division of United Technologies Corp. in Hartford, expired at midnight Sunday, officers said.

Negotiations between the company and the union had been going on for some time, said Sikorsky spokesman Martin Moore said. He would not say if there had been any threat of a strike.

Including salaried personnel, Sikorsky employs about 12,150 people, Moore said. Sikorsky announced in November it was laying off 150 blue-collar workers at four Connecticut facilities because of a decrease in United States military contracts and a slow world market.

The company laid off about 350 salaried employees in July. Sikorsky also laid off 19 Connecticut blue-collar workers in February 1988, its first layoffs in the state since the mid 1970s, officers said.

The helicopter-builder escaped big cuts under Secretary of Defense Dick Cheney's proposed budget for fiscal year 1991, officers said. Under Cheney's plan, Sikorsky would build 123 helicopters worth about $1.5 billion, which is equivalent to about what Sikorsky has received in military contracts in recent years. About 90 percent of Sikorsky's revenues tied to defense spending, officers said.

Sikorsky also is in the running later this year to build the Army's LHX, a $30 billion high-tech lightweight helicopter. Sikorsky is teamed with Boeing Co. against the team of Bell Helicopter and McDonnell Douglas for that contract, officers said.

#90043u1561 02/12/1990 ~United Press International

WASHINGTON (FEB. 12) UPI - Comptroller of the Currency Robert Clarke put bankers on notice Monday that an examination by his agency has found fundamental deficiencies and negative trends in bank real estate lending practices.

In an advisory sent to chief executive officers and directors of all national banks last week and released Monday, Clarke said an OCC examination "has revealed a significant number" of deficiencies in underwriting standards, appraisals and risk identification over the past year.

"Nothing in this advisory or in OCC examination policy is intended to discourage sound real estate lending," Clarke wrote. "Our supervisory activity confirms that the vast majority of national banks have not deviated from traditional high lending standards." A spokesman for the American Bankers Association could not be reached immediately for comment.

The comptroller's examination found that basic lending principles "have been ignored or compromised to increase volume and achieve higher levels of interest and fee income."

Clarke said the main problem in underwriting standards is the lack of borrower equity in real estate projects. Too many banks also have failed to obtain accurate, independent appraisals for real estate projects, the advisory said. The absence of loan documentation has been attributed to the desire by banks to "meet the competition," Clarke said.

As for risk identification, Clarke said lenders have been hampered in their efforts to ascretain the risk involved with certain loans by a number of practices, including continuing to accrue interest on loans where interest is being paid from unadvanced loan amounts. Clarke said directors should instruct bank managers to review their real estate lending activities and "initiate corrective action promptly."

#90043u1566 02/12/1990 ~United Press International

CAPE CANAVERAL, FL (FEB. 12) UPI - Two Trident 2 missiles were successfully launched Monday from a submerged nuclear submarine in a rapid-fire test that clears the way for the Navy's most powerful weapon to

be declared operational in March.

The three-stage, $26.5 million Trident 2 missiles, both carrying dummy warheads, were fired from the USS Tennessee, cruising submerged about 200 miles off Florida's east coast, at 9:20 a.m. EST, ''15 or 20 seconds apart '' according to an Air Force spokeswoman.

''The tests were successful,'' she said. As usual with such launches, no other details were released.

One 44-foot missile launch was considered a test flight, the last such test firing required before the missile is declared operational. The other was considered part of a ''demonstration and shakedown operation,'' a routine test to certify a sub crew's ability to handle a missile system.

With both launches successfully accomplished, the Navy will proceed with plans to load 24 missiles aboard the Tennessee in late March, a move that will mark the operational deployment of the Navy's newest and deadliest weapon system.

''The missile system will be operational in March,'' said Navy spokesman Lt. James Wood, who would not say what submarine will be used. ''That means it's ready to be deployed.''

The launches Monday were the ninth and tenth Trident 2 test firings from the Tennessee, an Ohio-class nuclear submarine, and the 28th and 29th in the Trident 2 test program, which included 19 launchings from a ground pad at the Cape Canaveral Air Force Station.

The tests Monday marked the first time two Trident 2s were launched in such rapid-fire succession. The missile's sea-launch record now stands at eight successes and two failures. Overall, the record is five failures and 24 successes.

The first and third such submarine firings in March and August last year ended in spectacular explosions that delayed operational deployment by three months.

A Navy investigation determined the nozzles of the Trident 2's first-stage motors were being subjected to more water pressure than expected as the 126,000-pound missiles were propelled to the surface by powerful charges of compressed gas.

Rear Adm. Kenneth Malley, the Trident's program manager, said last month that engineers redesigned the nozzle system to make it better able to withstand the rigors of its brief ''flight'' through the water. Since the modifications were implemented, the missile has a perfect record.

''We came up with five separate fixes, all of which worked together to help improve the fault,'' Malley said, adding ''it's almost like you're launching from a ... pad.''

The redesign effort cost the Navy some $130 million and added $25,000 to the cost of each missile.

The Trident 2 is thought to have a maximum range of up to 6,900 miles. Malley disclosed in January the missile can deliver a nuclear warhead to within less than 600 feet of a target, saying ''at 4,000 nautical miles, we have an accuracy that's better than the length of a submarine'' - 560 feet.

The Trident 2 is intended to be the equal of the land-based 10-warhead MX missile but under an agreement with the Soviets, the United States will maintain a maximum of only eight nuclear warheads on each of the 24 missiles put aboard the Tennessee.

The Trident 2 has been a frequent target of protest ever since test flights began in January 1987.

The environmental group Greenpeace, for example, successfully blocked a test flight last summer during a surprise confrontation on the high seas when activists aboard an ocean-going tug refused to leave the launch danger zone.

The Navy got tough the next time around and on Dec. 4, Navy ships ''shouldered'' the Greenpeace vessel out of the way, punching a 3-foot hole in its hull in the process. The environmentalists were not aware of the launches Monday until after they took place.

(FEB. 12) UPI - Nelson Mandela says it's ''too early'' for nations to lift sanctions against South Africa. Mandela, a global symbol of the fight against apartheid, also credits international pressure for helping win his release from prison.

South African police say at least 24 people were killed during the weekend in a coastal province where arson fires continued burning today. Residents in Natal province say the violence is due to inter-communal strife and is NOT related to yesterday's release of Nelson Mandela.

The Brazilian news agency reports a plane carrying 20 passengers crashed today about 80 miles west of the capital. Early reports are sketchy... with NO immediate word on casualties and NO indication what caused the plane to go down. Officials say the crash occurred as the plane was trying

to land at Bauru... and several homes and a supermarket were destroyed.

Law authorities nationwide are being asked to be on the lookout for five of six fugitives who broke out of the maximum-security prison in Joliet, Illinois. The manhunt is focusing on Chicago, where two of the escapees have relatives. One of the fugitives was captured near his Chicago home last night.

The Air Force says it successfully launched two Trident-2 missiles from a submerged nuclear submarine in waters off Florida's east coast. The tests clear the way for the Navy's most powerful weapon to be declared operational in March, when the first load of 24 missiles is scheduled to be deployed.

#90043u1586 02/12/1990 ~United Press International

AIKEN, SC (FEB. 12) UPI - Sen. Strom Thurmond, R-S.C., a living legend in South Carolina and the oldest member of Congress at 87, announced Monday he will be a candidate for a seventh six-year term.

''In all my years of public service, I have never felt a stronger obligation to continue my work for the future of our state and our nation '' said Thurmond, accompanied by his wife and key political supporters at news conferences around the state.

Thurmond, who looks older than his official campaign photograph but still appears hale and hearty for a man of his advanced years, spoke about the issues of education, environment and health care for the elderly in making his re-election bid official.

A heavy favorite for re-election - no Democrat or Republican has stepped forward to challenge him yet - Thurmond would be 94 at the end of another term, making him the oldest member of Congress ever. Sen. Theodore Green of Rhode Island was 93 when he retired in 1961, and Sen. Carl Hayden of Arizona was 91 when he stepped down in 1969.

As usual, Thurmond was asked Monday how long he can continue to serve, and he offered his typical response, saying his daily physical fitness regimen and youthful attitude leave him in better shape than some 50-year-olds.

''The matter of age is relative,'' he said.

If the senator does face a Democratic challenger and the subject of advancing age crops up, Thurmond's campaign is prepared to counter with television advertisements showing Thurmond working out at a health club and running up and down the Capitol steps.

Thurmond's family offers living proof of his vigor. In 1968, at the age of 66 and eight years after the death of his first wife, Thurmond married 22-year-old Nancy Moore, a former Miss South Carolina who served as his secretary. They have four children, the last born when Thurmond was 73.

In one of his most-quoted responses to the frequent questions about his second marriage, Thurmond said, ''In old age, I would rather smell perfume than liniment.''

Thurmond said he's proud of what's been achieved during his 35 years in the Senate, particularly the strides made under the Reagan and Bush administrations.

''I have worked diligently to solve problems, to place the highest possible priority on constituent service, to make government more responsive to the needs of the people and to do everything in my power to keep America free, strong and prosperous,'' said Thurmond, promising more of the same if South Carolinians return him to Congress.

Thurmond, who entered politics after careers in education and law, was elected governor of South Carolina in 1946 and two years later ran as the states' rights candidate for president in a protest against growing Democratic sentiment for the civil rights movement. As a Dixiecrat, he carried four Southern states and picked up 39 delegates, but Harry Truman was elected over Thomas Dewey.

In 1954, Thurmond won election to the Senate as a write-in candidate and has survived all challenges since. In 1964, after growing increasingly dissatisfied with the direction of the Democratic Party, Thurmond became a Republican. It didn't hurt his popularity among the home folks.

Thurmond, who once filbustered for more than 24 hours against civil rights legislation, changed along with the rest of the South in regard to race relations.

By the time he ran for his fifth term in 1978, Thurmond had hired blacks for his staff, pushed appointments of black judges and courted the black vote. He has also promoted women for the federal judiciary and other federal posts.

#90043u1602 02/12/1990 ~United Press International

(FEB. 12) UPI - Israeli Army Radio reports Industry Minister Ariel Sharon resigned from the government today, complaining about Prime Minister Yitzhak Shamir's handling of the economy and the Arab uprising. Sharon announced his resignation while opeing a meeting of the Likud Party's Central Committee today in Tel Aviv.

New York police are stepping up their search for a man who shot a Brooklyn rabbi in the head and stole his car last week. Doctors say Rabbi Haskel Werzberger died today from massive brain injuries caused by the gunshot wound. Police say Werzberger was shot by a man who stole his car to chase a courier believed to have 250-thousand dollars in gems.

New International Boxing Federation heavyweight champion, James ''Buster'' Douglas, left Japan today for a welcome planned in his hometown of Columbus, Ohio. The I-B-F immediately recognized Douglas as the world heavyweight champ... but Boxing's two other governing bodies refuse to recognize his knockout win over Mike Tyson.

The New York Daily News says Donald Trump confirms he plans to divorce his wife Ivana, offering her a 25-Million-dollar settlement. The real estate magnate denies rumors that his wife initiated divorce action because of his alleged womanizing. Trump is quoted as saying that all the women he has been linked with are ''all just friends, and that's as far as it goes.''

#90043u1622 02/12/1990 ~United Press International

(FEB. 12) UPI - TODAY'S PEOPLE:

REPORT FROM THE SLAMMER: Doing time in federal prison has left evangelist Jim Bakker a brokenhearted, lonely man. Bakker says in a letter to supporters that being behind bars at Christmas was ''almost more than I could bear.'' Bakker described a tear-filled Christmas day visit by his family, saying that, after they left, ''I never felt so all alone in all my life as I stood staring out the window,'' Bakker said. ''The pain was almost more than I could bear.'' Bakker's four-page letter to followers in Charlotte, N.C., was different from other mass mailings he has done in recent years. It never once asked for money. Bakker admitted he is a sinner and said God has forgiven his sins. But he insisted he is not guilty of the con artist charges that landed him a 45-year prison term last October.

SOGGY SALLY: Tourism boosters who paid $59,000 to lure the Sally Jessy Raphael television talk fest to Fort Lauderdale for a week didn't count on the torrential rains over the weekend. The background for Sunday's first taping looked more like a tropical rain forest than the tropical playground city fathers hoped to show off. Most of the audience scattered, but the show's guests, the cast of the newly revived members of ''Brady Bunch'' TV show, dutifully stayed on stage and got drenched. ''It turned into a wet T-shirt contest,'' one audience member said. Raphael, under shelter of an umbrella, led a chorus of ''Singing in the Rain,'' then took shelter until the downpour halted. Taping resumed two hours later.

''Adults aren't supposed to like playing in the rain,'' Raphael said. ''I loved it.''

SAMMY ILL: Bad news for legions of fans and admirers of Sammy Davis Jr. The irrepressible 64-year-old has been back in the hospital for about two weeks. Doctors confirmed over the weekend that his throat cancer has recurred. ''His spirits are up,'' says a spokeswoman for Cedars-Sinai Medical Center in Los Angeles, where Davis is undergoing therapy.

HIGHER AUTHORITY: Washington, D.C., Mayor Marion Barry attended church Sunday at a Baptist church in Riviera Beach, Fla., making his first public appearance since checking into a drug and alcohol treatment center in West Palm Beach Jan. 22. He was accompanied by actor and anti-drug crusader Ben Vereen. Barry spoke briefly to the congregation, admitting his dependence on alcohol and asking forgiveness. ''He said he is putting his problems in God's hands,'' said church spokeswoman Stephanie Strong. ''He said he had a friend bigger than the U.S. attorney and that friend is Jesus Christ.'' Barry, 53, checked into the Hanley-Hazelden Center at St. Mary's Hospital four days after his arrest in Washington on a single charge of buying and smoking crack cocaine.

HOLLYWOOD EAST: Kevin Costner's latest film got its debut a long, long way from Tinseltown. The unlikely setting for the first public showing of ''Revenge'' was the 282-seat Bay Theater in Suttons Bay, a small town in northwest Lower Michigan. ''Revenge'' was co-written by Jim Harrison, a novelist and poet who lives a few miles from Suttons Bay. Harrison, 52, helped adapt the film from his 1979 trio of novellas, ''Legends of the Fall.'' It's the story of the competition between a pilot who served in Vietnam and a Mexican crime lord for the latter's wife. ''Revenge'' co-stars Anthony Quinn and Madeleine Stowe.

A ROYAL RETURN?: Now that Bulgaria's hard-line communists are out, King Simeon II, the nation's last emperor, hopes to return from exile in Spain and live as an ordinary citizen. Simeon, 53, said in his first interview with Bulgarian state television that he entertained no desire to return to the throne from which he was evicted by the communists in 1946 at age 9. ''I would live as a citizen in a fully democratic and multi-party country '' said Simeon, the mention of whose name was taboo under the communist regime. When an interviewer showed him documents indicating that his Bulgarian citizenship was never revoked, the king beamed and said, ''This is the greatest news I have ever gotten.''

HAIL, CAESAR: It's been 2,000 years, but a major piece of vandalism perpetrated by Julius Caesar is about to be rectified. Egyptian authorities plan to rebuild the Alexandria Library, the legendary repository of ancient knowledge in mathematics, medicine, philosophy and the arts. The library was sacked in 48 B.C. by Roman legions under Caesar's command, who destroyed many of its priceless manuscripts. Two

Arab royals should have no trouble getting library cards when the rebuilt edifice opens, perhaps in 1995. The president of the United Arab Emirates, Sheikh Zayed ibn Sultan el Nahayan, kicked off a fund raiser Monday with a check for $20 million. A Saudi prince, Turki ibn Abdulaziz, chipped in another $3 million. Also present for the affair were French President Francois Mitterrand, Queen Sofia of Spain, Jordan's Queen Noor and Princess Caroline of Monaco.

#90043u1658 02/12/1990 ~United Press International

SAO PAULO, BRAZIL (FEB. 12) UPI - A Brazilian airliner with 39 people aboard slammed into houses and a supermarket Monday then crashed on top of a truck, setting it afire. A woman and her child in the truck were killed but nobody on the plane was seriously injured.

Police said 14 passengers, two crew members and four people on the ground were injured.

The Marilia Air Transport Fokker 27 plane was attempting a landing in clear weather at Bauru airport on a flight from Sao Paulo the accident occurred, said Marco Vancini, an airport spokesman.

He said the plane, which had not advised the control tower of any emergency, apparently attempted to abort its approach but instead hit three houses, a supermarket and power and telephone lines before its fuselage smashed into the small truck about 550 feet short of the runway.

Police said the two occupants of the truck, Gisela Samir Pinto, 29, and her son Guilherme, 4, were burned to death when the vehicle burst into flames.

All the passengers and one crew member escaped the wreck through emergency doors, but the pilot and co-pilot were trapped in the cockpit until firemen using machetes and saws freed them, police said. The pilot, Carlos Esposito, and copilot Minolo Kawakawa were among the injured.

There was no immediate word on what caused the accident.

The accident was the worst of its type in Brazil since March 21, 1989, when a Boeing 707 of Transbrasil Airlines crashed in the middle of two Sao Paulo slums, killing three crewmembers and 22 people on the ground.

Bauru, a city of about 220,000 people, is a major rail center in the heart of Sao Paulo state's rich farm region. It also is the city where Brazil's most famous soccer star, Edson Arantes de Nascimento - known as Pele - grew up.

#90043u1663 02/12/1990 ~United Press International
CHICAGO (FEB. 12) UPI - The grain market rallied to session highs during the noon hour Monday on the Chicago Board of Trade.

Closing prices were just below those levels except for soybeans which could not hold the gains and were at or near session lows.

The market was firm all day and extended the gains at midday on aggressive professional buying and the lack of selling interest.

Much of the support for corn and wheat was attributed to the supply and demand report which came out Friday afternoon. The Agriculture Department reduced the corn and wheat carryover estimates.

Gains in both corn and wheat were limited by light commercial selling.

Soybeans fell from session highs on profit-taking and reports of widespread rain in the soybean region of Brazil during the weekend.

Country movement was light.

At the close, corn was up 2 1/2 to 3 1/2, soybeans down 1 1/2 to up 2 1/2, wheat up 3 1/4 to off 1/4 and oats up 1 1/2 to 2 3/4.

#90043u1680 02/12/1990 ~United Press International

SELMA, AL (FEB. 12) UPI - Black students abandoned their sit-in at Selma High School Monday, but they took their protest to City Hall with a call for Mayor Joe Smitherman's resignation.

The students, who had staged a sit-in at the school cafeteria since Thursday, left the building at the request of black school Superintendent Norward Roussell, whose firing by the white-controlled school board sparked the demonstration.

Roussell was reinstated last week, but has not been given a contract extension.

''They made the decision to leave based simply on fact that Dr. Roussell had asked them to on a number of occassions,'' said state Sen. Hank Sanders, D-Selma. ''He indicated he would resign. That's one of the reasons they were there.

''I think his indication that he would resign was powerful in their decision. Prior to that time, they had been extremely determined.''

After leaving the cafeteria, the students marched to City Hall, where

about a dozen or more protesters have staged their own sit-in for the past five days. Six student leaders met with Smitherman briefly to discuss the situation. They left after the meeting, which produced no settlement, shouting ''Joe will go, Joe will go.''

The decision to leave the school came as protesters and city officials awaited a ruling on the city's request for an injunction ordering an end to the protests.

U.S. District Judge Charles Butler Jr. of Mobile held a teleconference on the request about noon Monday, but did not immediately issue a ruling.

Black leaders indicated they would defy an order to leave City Hall or the school.

''I don't know what effect that's going to have,'' said attorney J.L. Chestnut. ''It's probably going to escalate everything.''

The protests revolve around the future of Roussell, the city's first black school superintendent. Five black school board members announced their resignations and blacks began picketing City Hall and some banks in Selma after the six white board members voted in December not to renew Roussell's contract, which expires in June.

The protests intensified last week after the board informed Roussell that his services were no longer needed. Roussell was reinstated Tuesday, but the schools have remained closed since then. Blacks staged marches in Selma Saturday and Sunday.

City Councilman Charles Morris, who is white, said the council met informally Saturday in an attempt to calm the situation and proposed that the school board, which is appointed by the council, be allowed to go from a 6-5 white majority to a 5-5 racial split the next time a white member leaves.

Black Councilman Edwin Moss, however, said such a consensus was never reached. The four black council members are proposing that the majority on the school board alternate between blacks and whites each year, starting with a black majority this spring.

#90043u1685 02/12/1990 ~United Press International

MEMPHIS, TN (FEB. 12) UPI - Rep. Harold Ford, the only black congressman in Tennessee history, predicted acquittal Monday as he went on trial on charges he took $1.5 million in fraudulent bank loans in return for backing a candidate for governor.

Ford, 44, an eight-term Democrat who faces 95 years in prison if convicted of all charges, strode smiling past reporters into the federal courthouse for the start of jury selection.

Asked whether he was confident of acquittal, Ford replied: ''Very much so. I feel like the day looks outside. It's beautiful.''

Ford has insisted on his innocence since his 1987 indictment on 19 counts of bank fraud, mail fraud and conspiracy to defraud the government. He has accused the government's chief prosecutor in the case, Assistant U.S. Attorney Dan Clancy, of racial and political motivation.

U.S. District Judge Odell Horton, the only black on the federal bench in Tennessee, summoned a pool of 200 prospective jurors, and attorneys began the painstaking process of selecting the panel Monday. Jury selection is expected to last at least a week.

Ford, who is spending more than $1 million for his defense, is standing trial along with attorneys Douglas Beaty and Karl Schledwitz and accountant David Crabtree, who were indicted along with the congressman.

The indictment alleges that Ford took $1.5 million disguised as loans from banks controlled by brothers Jake and C.H. Butcher Jr. in 18 payments between 1976 and 1983. In return, Ford delivered the votes of his congressional district to Jake Butcher in the banker's unsuccessful race for governor in 1978, the indictment says.

Ford, who controls a Memphis political machine with the power to deliver the votes of Tennessee's most populous city, maintains the loans were for his legitimate business interests, including his family's funeral home.

''You will hear about loans he received from Butcher banks,'' Ford's lawyer, William McDaniel, told prospective jurors. ''They were just that. They were loans and he did not sell his political influence.''

The Butchers controlled a billion-dollar network of 20 banks in Tennessee and Kentucky until the collapse of the flagship United American Bank in Knoxville in 1982, the fourth-largest bank failure in U.S. history at the time.

All their banks eventually were declared insolvent and sold, and the Butchers are serving 20-year federal prison sentences for funneling millions of dollars in fraudulent loans to themselves.

Jake Butcher is an unindicted co-conspirator in Ford's case, and C.H. Butcher Jr. pleaded guilty to two counts of fraud in the indictment. Schledwitz, Beaty and Crabtree are charged with helping the Butchers pay Ford by passing loans through bogus channels.

Ford's brother, James, is a Memphis city councilman. Another brother, John is a state senator. Ford's 285,000-vote 9th Congressional District is 58 percent black. Since his first election victory by 744 votes over incumbent Republican James Kuykendall in 1974, no candidate has seriously challenged his hold on the office.

James King, chairman of the political science department at Memphis State University, said Ford's base of power is so formidable that he could win re-election this year despite the indictment. Ford, who has yet to announce his candidacy, has until June 7 to file for re-election.

''He is well-entrenched,'' King said. ''What the Fords have done is put an effective campaign organization together to get people to the polls. In many respects, it's an old-fashioned 'get-out-the-vote' organization.

''A conviction alone would not hurt Ford politically. The black community is not homogeneous, but a conviction isn't enough to shake their faith.''

-30- 3983

#90043u1687 02/12/1990 ~United Press International

LONDON (FEB. 12) UPI - Jury selection began Monday in the complex trial of four British businessmen on charges stemming from the bitter takeover by international beverages giant Guinness PLC of Distillers Co.

About 100 potential jurors packed the court canteen at Southwark Crown Court as jury selection got underway in the trial of what Britons have called Guinnessgate - Britain's biggest case of alleged financial wrongdoing. The trial was expected to last at least four months, court officials said.

Defendants include former Guinness chairman and chief executive Ernest Saunders, Gerald Ronson, chairman of Heron International and one of Britain's richest men, Ronson's stockbroker Anthony Parnes, and Sir Jack Lyons, an adviser to Guinness. Guinness itself, brewer of the famous black stout beer since the 18th century, has never been charged in the case.

The defendants are on trial in connection with alleged schemes to support Guinness's bid for Distillers, a Scottish drinks producer, against a competing bid from supermarket company Argyll Group PLC.

The success of Guinness's bid for Distillers depended on Guinness's share price, which rose sharply with heavy share-buying as the hotly contested takeover fight with Argyll wore on. Guinness finally won its battle to buy Distillers Co. with a bid worth $4.29 billion in April 1986.

Charges in the case range from alleged theft to conspiracy and false

accounting, plus other technical charges relating to the alleged Guinness share support operation.

The Observer newspaper said Sunday the trial would probably have not taken place without the help of jailed arbitrageur Ivan Boesky, who it said provided the first tip about allegedly illegal activities during the bid battle for Distillers.

The trial is seen as the first test for the Serious Fraud Office and new procedures designed to make fraud investigation and trials simpler and more effective. Because the case is so complex, the court has ordered two separate trials with the second one tentatively set to begin in October.

Saunders also will be a defendant in the second trial, along with former Morgan Grenfell and Co. corporate finance director Roger Seelig, David Mayhew, a partner at stockbrokers Cazenove and Co., and Lord Spens, a former director at Henry Ansbacher and Co. All seven men have pleaded innocent to the charges in the case, which has shaken London's financial district.

#90043u1735 02/12/1990 ~United Press International
SPRINGFIELD, IL (FEB. 12) UPI - Veterans and state leaders laid 20 wreaths at the tomb of Abraham Lincoln Monday in an annual pilgrimage to mark the 181st anniversary of his birth.

About 200 people gathered at the ceremonies at Oak Ridge Cemetery. Sen. Paul Simon, D-Ill., and Rep. Richard Durbin, D-Ill., presented a wreath sent from President Bush made of red, white and blue carnations. Both compared Lincoln's desire for freedom to the democratic movements in Eastern Europe and the release from prison of black activist Nelson Mandela in South Africa.

''There is something special about Abraham Lincoln,'' Simon said. ''He has captured the hearts not just of Americans but of people everywhere around the world.''

Simon said, ''This past year has been a great year for freedom and that's what Abraham Lincoln lived for, what he died for.''

Lincoln owned his only home in Springfield and lived in that downtown residence from 1844-60 while he practiced law and served in the Illinois General Assembly. He is buried with his wife, Mary Todd Lincoln, and some of his children at the tomb.

Durbin said Lincoln ''embodied the greatness of America,'' and the Springfield representative called on Americans to use Lincoln's wisdom when planning for this nation's future.

''It's not enough to only recall the life of Lincoln with speeches and warm admiration,'' Durbin said. ''We must remember it with personal dedication, a dedication to apply Lincoln's values to our world today. Lincoln's devotion to equality and compassion can guide us as we chart a straight and steady course of condemning apartheid in South Africa.''

Presenting a circle of brown leaves with red, blue and white ribbons, Secretary of State Jim Edgar said Illinois and the nation need Lincoln-style leadership in the 1990s.

''We need leaders who are more concerned about the next generation than the last public opinion poll,'' said Edgar, a Republican gubernatorial hopeful. ''As we remember this great man, let us who hold public office rededicate ourselves to providing the strong, decisive leadership he provided as we face important challenges of a new decade.''

Another featured speaker at the 56th annual American Legion pilgrimage was Miles Epling, national commander of the American Legion. Epling stressed the inspiration Lincoln has lent to America's fighting forces.

''It is perhaps most fitting that we gather here in the heart of our great country to honor the man who knew its soul so well,'' Epling said. ''He is considered the champion and savior of the common folk, a compassionate lover of peace and tranquility, a staunch defender of democracy and a firm believer in freedom and justice for all persons regardless of age, color or creed.''

Epling said Lincoln's words ''have influenced countless Americans to seek preserve and defend freedom and democracy.''

#90043u1773 02/12/1990 ~United Press International
ANCHORAGE, AK (FEB. 12) UPI - Two Coast Guard radar watchers testified Monday that they kept track of oil tankers by radar but that the Exxon Valdez had just sailed off their screens before it ran aground last March during a detour to avoid icebergs.

Testifying in the trial of fired Exxon Valdez skipper Joseph Hazelwood, the two Coast Guard tanker watchers said they knew the laden tanker was taking a detour, but neither man notified the skipper that his ship had left their radar screens at the Valdez vessel traffic control center as it sailed on a collision course with Bligh Reef, where it broke open and spilled nearly 11 million gallons of crude into Prince William Sound.

The two men, Gordon Taylor and Bruce Blandford, also revealed that another loaded tanker, the Arco Juneau, had taken a similar detour around ice just four hours earlier - without any problems - and so the men said they thought nothing of the Exxon Valdez leaving its prescribed tanker lane.

In fact, the Exxon Valdez went on its detour because of the ice reports radioed from the Arco tanker, which negotiated an off-course journey around the ice without the disaster that was to follow a few hours later.

Blandford replaced Taylor at the radar controls 20 minutes before the Exxon Valdez hit the rocks just after midnight last Mar. 24, causing the worst spill in U.S. history.

When Hazelwood called at 12:26 a.m. to say he was ''hard aground'' and leaking oil, Blandford said he notified the Valdez Coast Guard port commander, ''This was the Big One - the Exxon Valdez was on the rocks and leaking oil.''

''The Big One'' was the massive oil spill fishermen and environmentalists had long feared and warned against and which the oil industry said couldn't happen here.

''I did a pretty hard swallow and I guess the old flight-or-fight instinct took hold and the adrenalin started pumping,'' Blandford said.

After Hazelwood's ship-to-shore radio report, Blandford again tried to locate the tanker on radar. The ship that had disappeared off Valdez radar screens as it sailed toward the well-known underwater rocks of Bligh Reef suddenly appeared as ''a pretty solid fix'' on radar after the grounding, Blandford said.

Lawyers defending Hazelwood on three misdemeanors and a felony tried to drive home to the jury, through questioning of the two Coast Guard radar

men, that maybe the Coast Guard men were responsible, not Hazelwood.

Hazelwood, 43, of Huntington, N.Y., faces up to seven years, three months in jail and a $61,000 fine if convicted of operating the Exxon Valdez while intoxicated, reckless endangerment, negligent discharge of oil and criminal mischief.

By trying to portray the Coast Guard controllers as lacksadaisacal, even negligent, toward their tanker-monitoring duties, defense lawyers are trying to get Hazelwood off the hook on the charge of recklessness.

Defense lawyer Dick Madson elicited statements by the Coast Guard employees that their operating manual was required on the bridge of all tankers and that it informed ship crews that the Coast Guard vessel traffic control system monitored ship movements by radar and radio through Prince William Sound.

But Taylor and Blandford said the radar was less than reliable, affected by snowstorms and sometimes went on the blink, working off and on near Bligh Reef, 25 miles out, where the Exxon Valdez was picked up only after it was aground.

When Taylor turned over the radar watch to Blandford, he informed his replacement that the Exxon Valdez was taking a detour around ice and was to report in by radio.

When Blandford took over, he made no attempt to contact the Exxon Valdez to check on its progress, but he said he tried to find it on radar but could not - until after the spill.

Blandford said he left the radar controls for 5 minutes, to get coffee and check weather, just before the wreck, but that a radioman who was the only other person on the midnight watch reported no calls from the Exxon tanker.

Blandford also said the Coast Guard was having radio problems when the wreck occurred but reduced communication capabilities affected ships outside Prince William Sound.

He also said the 987-foot Exxon Valdez may have shown up radar after the grounding because then radar had an essentially sideways view of the stuck tanker, which then offered a better radar target.

Both radar men said ice detours posed no inherent hazard and did not trigger a policy requiring notification of superiors in hazardous situations. Both men also testified that they normally did not issue orders to tanker captains because they, the skippers, remained in authority of their vessels.

#90043u1800 02/12/1990 ~United Press International

WASHINGTON (FEB. 12) UPI - Yields for 13-week T-bills and 26-week fell at Monday's weekly auction.

The Treasury Department auctioned $7.6 billion worth of 13-week bills at an average discount of 7.65 percent, a drop from 7.83 percent at last week's auction. It was the lowest rate since Jan. 8, when the auction yielded a rate of 7.57 percent.

The government also sold $7.6 billion worth of 26-week bills at an average discount of 7.65 percent, down slightly from 7.72 percent last week - the lowest rate since Jan. 22, when the rate stood at 7.58 percent.

The discount rate understates the actual yield to investors. The investment, or coupon-equivalent, rate was 7.91 percent on the 13-week bills at an average price of $9,806.60 per $10,000 face value. The investment rate on the 26-week bill was 8.07 percent at an average price of $9,613.30 per $10,000 face value.

DETROIT (FEB. 12) UPI - Chrysler Corp. confirmed Monday it is recalling about 57,000 Renault subcompact cars and Jeeps from the 1985-87 model years to replace catalytic converters that may deteriorate and cause unacceptable emissions levels.

The recall, ordered by the Environmental Protection Agency, affects 1987-model Renault GTAs with 2.0 liter engines, and 1986 Renault Alliance and Encores with 1.7 liter engines. Alliance and Encores from the 1985-model year but with manual transaxles only are also included.

Those Renaults were sold through American Motors Corp., which Chrysler acquired in August 1987. California models have already been recalled, the EPA said.

Chrysler also is recalling 5,000 early 1987-model Jeeps with 2.5 liter engines for the same problem. Those include the Cherokee, Comanche and Wagoneer models with either an automatic or manual transmission. Owners are now being notified by mail to bring their cars in for the free repairs said Chrysler spokesman James Kenyon said.

Last month Chrysler recalled about 30,000 1986-model Jeeps Cherokees, Comanches and Wagoneers for the same problem.

Processor bids: No. 2 yellow corn, up to 15 days, 2.43-2.46 1/2 up 2 1/2.

-30- 602
#90043u1833 02/12/1990 ~United Press International
WASHINGTON (FEB. 12) UPI - President Bush said Monday it was ''absurd'' for Colombians to fear the U.S. Navy was preparing to blockade its coast to stop drug traffickers, and blamed the concern on ''mischievous'' news stories.

''That wasn't whatever had been intended,'' Bush told reporters at a White House news conference three days before he meets the presidents of Colombia, Peru and Bolivia at a drug summit at Cartagena, Colombia.

Bush said he is attending the summit to show American support for the courageous efforts in the three countries to fight the lucrative trade in cocaine and other narcotics that are flowing into the United States and other nations.

But Bush said he will tell the leaders that their problems cannot be solely blamed on the United States, despite its leading consumption in cocaine, and that America is doing its share to educate its young against the use of narcotics and to fight drug traffickers.

''I think we have got to convince them, that we are going out on all fronts. I think I can do that,'' Bush said.

He said one way the United States can help its neighbors is to use its sophisticated technology to detect shipments of narcotics from their countries - but that this does not involve a Yankee naval blockade.

The administration, as part of plans to increase the military's role in the drug war, was going to send the aircraft carrier USS John F. Kennedy and the cruiser USS Virginia to international waters off Colombia to help detect drug traffickers.

News leaks in December forced a postponement of the plans. Colombian officials, reacting to local news reports that the plan amounted to a naval blockade, protested the decision, and the plan was suspended.

''What happened on that plan was some mischievious stories that suggested blockade,'' Bush told reporters. ''There was never any intention of a blockade. Absolutely absurd.

''That threw a panic into, amongst the Colombians - 'We don't want a blockade off our coast,''' he said.

''But in terms of interdiction, what I'd like to convince them is, we can be extraordinarily helpful, particularly to Colombia, in their courageous fight against narco-traffickers, by a sophisticated interdiction effort.''

Bush said he will tell his fellow presidents that the problems of narcotics that is corrupting their governments and causing widespread violence, especially in Colombia, is not the entire fault of the United States.

''It's changed a little bit, because some are beginning to see user problems inside their own countries, or neighboring countries,'' Bush said.

The growing of the cocca leaf by pesant farmers and other illegal crops should not be tolerated, he said.

''That's a moral question. I'll try to put it on that kind of emphasis, and then see what we can do over here in terms of trying to help financially,'' Bush said.

#90043u1838 02/12/1990 ~United Press International

NEW YORK (FEB. 12) UPI - A spurned Ivana Trump vowed Monday to fight her billionaire tycoon husband for a larger part of his fortune than provided by a pre-marital agreement which her lawyer described as "unconscionable and fraudulent."

Donald Trump, through a spokesman, said he planned to give his wife $20 million to $25 million under terms of an agreement signed prior to their marriage in 1975, plus a 45-room mansion in Greenwich, Conn.

He walked out on the 40-year-old former fashion model last Tuesday, saying their marriage was "no longer working out." The cash settlement would constitute less than two percent of Trump's total holdings, estimated at $1.7 billion.

Mrs. Trump's attorney issued a statement that sounded like the opening shot in a court battle for a share in Trump's fortune commensurate with 14 years of marriage and management jobs held by Mrs. Trump at her husband's casinos in Atlantic City, N. J., and at the Plaza Hotel in New York.

"This is an extremely difficult time for Mrs. Trump and her children," said Park Avenue attorney Michael Kennedy. "She is a family woman. Her marriage and her family have always been the most important things in her life.

"Mr. Trump has now left her and her children, and while one hopes for a reconciliation, my mandate at this time is to document the 14 years of marriage and partnership in the Trump holdings.

"We do not consider the so-called pre-nuptial agreement to be serious. It will have no relevance to a court because it is unconscionable and fraudulent," Kennedy said.

Earlier in the day, a spokesman for Trump, Dan Klores, said the 43-year-old tycoon will end his marriage to the former Ivana Winkelmayr, but give her custody of their three children.

Klores said Trump decided to end the marriage nearly a week ago, before leaving for Japan to attend the Mike Tyson-James Douglas fight as one of Tyson's most prominent fans.

"Prior to leaving for Japan last Tuesday, Mr. Trump told his wife that, as painful as it was, the marriage was no longer working out," Klores said. "Mrs. Trump then decided not to go to Tokyo.

"There is a pre-nuptial agreement whereby Mrs. Trump will receive a multimillion-dollar, 45-room mansion in Greenwich, Conn., and somewhere between $20 and $25 million dollars. She also will retain custody of the three children."

Trump denied in another statement, reported in the Daily News, rumors that his wife initiated divorce proceedings because of his womanizing. "As for those other women I have been linked with, I want to say that we are all 'just friends,' and that's as far as it goes. "It is better for Ivana and me to separate at this time. But I am leaving because I want to leave."

Trump, who transformed his father's $40 million Queensboro real estate kingdom into a Manhattan-based empire, met his Vienna-born wife in Montreal when she was a model and married her in 1975. She had been a member of Czechoslovakia's Olympic ski team.

As wife of one of America's richest men, the blond dazzler made a quick trip to the top of the society ladder in the 1980s, chairing charity events and making much-publicized appearances at public events in showy

designer gowns.

She liked to be known as a working wife, helping her husband manage his Atlantic City, N.J., casino hotel properties and then the 400-room Plaza, which he purchased in 1988 for $400 million. She completely redecorated the Plaza in the ostentatiously gilded Edwardian style.

One of her most glamorous roles was mistress of Mar-a-Lago, the palatial former Marjorie Merriweather Post estate in Palm Beach, which the Trumps occasionally used as a winter residence. Klores said Mar-a-Lago was not mentioned in the pre-marital agreement.

Mrs. Trump could not be reached for comment. She reportedly is staying at the luxury penthouse suite in Trump Tower on Fifth Avenue, which the Trumps used as their principal residence. With her are their two sons and a daughter. Trump's fortune was estimated last year by Forbes magazine in its Forbes Four Hundred at $1.7 billion, the nation's 19th largest.

(FEB. 12) UPI - Nelson Mandela says the African National Congress is aware of the fears of South Africa's white minority of five-Million. But the A-N-C leader also says South Africa's 28-Million blacks must continue their struggle for equality, describing it as a ''defensive act against the violence of apartheid.'' Mandela talked to reporters in Cape Town today... his first full day of freedom following more than 27 years of

imprisonment.

Israel's Industry Minister Ariel Sharon resigned today, complaining that Prime Minister Shamir failed to act decisively on economic issues and the Palestinian uprising. Sharon stunned a gathering of the Likud Party Central Committee by saying he's stepping down. Army Radio says Sharon blames Shamir for social and economic problems tied to the Arab uprising in the occupied territories.

The oldest member of Congress plans to run again. Senator Strom Thurmond announced in Aiken, South Carolina, that he'll seek a seventh term. Political observers say the 87-year-old Republican is viewed as a heavy favorite for re-election... particularly since NO Democrat has stepped forward to challenge him yet. Thurmond would be 94 at the end of another term.

Congressman Harold Ford goes on trial in Memphis today... accused of taking one and one-half-Million dollars in fraudulent bank loans in return for backing a gubernatorial candidate. The eight-term Democrat... the only black congressman in Tennessee history... predicts he'll be acquitted, saying the charges against him are racist and politically motivated.

#90043u1855 02/12/1990 ~United Press International

TEL AVIV, ISRAEL (FEB. 12) UPI - Trade and Industry Minister Ariel Sharon resigned from the Cabinet Monday during a chaotic meeting of the Likud's Central Committee that left the right-wing political organization in turmoil.

Both Prime Minister Yitzhak Shamir and his rival Sharon claimed victory

for their factions following the meeting that ended in an uproar.

Leaders of the Labor Party, Likud's partner in the coalition government, immediately called a meeting Monday night to discuss the committee gathering, which veteran Likud activists said was an embarrassment and the most disorganized in memory.

It was not immediately clear what effect the resignation would have on the Likud Party, but without its full support Shamir is likely to have difficulty pursuing the peace process.

''Mr. Prime Minister, I submit to you my resignation from the government in order to continue the struggle for the realization of national goals, the realization of which is in danger as a result of the present government,'' Sharon, the Central Committee chairman, said.

Sharon's surprise announcement at the meeting's start was met with cries of dismay and chants of ''Arik, Arik,'' his nickname. The resignation takes effect 48 hours after the submission of a letter to Shamir, leaving some time for a reconciliation.

The meeting climaxed weeks of inconclusive political infighting between Shamir and the ''constraints ministers'' - Sharon, Housing Minister David Levy, and Economics Minister Yitzhak Moda'i. They were seeking further guarantees that Palestinian deportees and East Jerusalem Arabs would not participate in the peace process.

Shamir's allies argued that detailed positions on the Middle East peace process would hamper progress.

Although the dispute centered on peace process, it was largely a political power battle within the Likud Party between Shamir and the constraints ministers. No compromise was reached by the start of the 3,070-member Central Committee meeting.

''The issue is not a personal one. The issue is one of national principles '' Sharon said. ''Under your (Shamir's) government the Palestinian terror is running amok.''

Shamir said he was surprised by Sharon's announcement and then delivered an hourlong speech that focused on the right-wing platform of the Likud Party. At its conclusion, the prime minister said it was time to put an end to the internal conflict and public criticism and demanded a vote of confidence.

''Enough of this slanderous attack. ... Am I speaking in the name of the (Likud) movement and its opinions or not?'' he asked. ''The public in Israel must know who represents the Likud. Whoever is for me, raise your

hand.''

Sharon immediately stood and began shouting into his microphone, ''I ask the members of the Central Committee, who is for the extermination of terrorism? Who is against the inconclusion of deportees?''

The leaders continued shouting at the same time as the party members with raised hands roared and meeting disintegrated into pandemonium. Shamir closed the meeting and walked off the dias with his Cabinet allies.

Shouting ''coward,'' Sharon's supporters mobbed the prime minister as he left the hall escorted by security guards who tossed chairs out of the way and pushed aside party members.

''I carried out a vote and I got results,'' Shamir said later. ''I got a definite majority to my proposal, a massive majority. Minister Sharon had no authority whatsoever to hold any type of vote.''

Sharon, who continued to preside over the meeting for another 20 minutes, declared his proposals had been approved. At the start of the gathering, Sharon had announced the two factions had agreed to hold a five-hour debate followed by a secret ballot.

''There was no intention to raise any type of vote againt Mr. Shamir,'' he told Army Radio. ''We did not come today to choose a prime minister or a chairman of the movement.''

Deputy Finance Minister Yossi Beilin said the Likud meeting put in doubt Labor's participation in the coalition government.

''After this thing - which is very difficult to define - that happened in the Likud, it will be very difficult to support the continuation of the (coalition) government,'' he said.

#90043u1881 02/12/1990 ~United Press International

WASHINGTON (FEB. 12) UPI - President Bush Monday praised the ''positive leadership'' shown in the release of jailed South African activist Nelson Mandela, but he stressed that U.S. sanctions must remain in place until apartheid ends.

The president has invited Mandela and South African President Frederik de Klerk to Washington, where Bush wants to discuss sanctions imposed in 1988 by Congress over the objections of the Reagan administration.

Bush spoke separately by telephone to Mandela and de Klerk on Sunday. Both men accepted his invitation ''in principle,'' Bush said. No date has been

set for the meetings.

The invitation was unconditional and did not depend on the further liberalization of moves toward racial equality by the South African government, Bush said. The sanctions against South Africa were not discussed during the telephone conversations.

Bush was asked at a news conferece whether he would like to remove the sanctions. ''We can't do that. I'm bound by the law,'' he replied.

In a speech Sunday, Mandela said he does not want the sanctions removed despite his release because he feared it would abort the process of ending South Africa's policy of racial segregation.

Administration officials have said that South Africa must meet several conditions before Congress would be asked to repeal the sanctions. The conditions include lifting of the state of emergency and freeing all political prisoners in South Africa.

''We ought to give Mr. de Klerk certain credit,'' Bush said. ''His coming here evidences a new brand of leadership. ... The freeing of Mandela is more of a sign of positive leadership.

''With these steps he's taking South Africa down the road of equity.''

Bush said de Klerk had taken ''positive steps. We want to see more.''

Senate Democratic leader George Mitchell of Maine called Mandela's release a ''welcome positive step'' and said he hoped it ''represents the beginning of change that will lead to the end of apartheid, an indefensible system.''

But Mitchell made it clear that the release of Mandela was not enough to allow Congress to lift the sanctions.

''The law that imposed economic sanctions on South Africa set forth explicitly the conditions that must be met in order for sanctions to be lifted,'' Mitchell said.

''The essence of these conditions is the dismantling of the South African laws that are the foundation of their system of racial segregation,'' Mitchell said. ''No fundamental change has been made in that direction yet and such change must occur before we can consider lifting sanctions.''

VATICAN CITY (FEB. 12) UPI - The Soviet Union and the Vatican are expected to establish ''permanent working contacts'' - a step toward eventual full diplomatic relations - within the next few days, Vatican sources said Monday.

The sources, quoted by the Italian news agency ANSA, said an official announcement is expected ''in a question of days.''

A Vatican spokesman said he could not confirm the report, but referred reporters to what Vatican Secretary of State Cardinal Agostino Casaroli said in Budapest last Friday when the Vatican and Hungary re-established full relations for the first time since 1945.

Casaroli, 70, said in his Budapest interview with the ANSA agency that the ''permanent working contacts'' agreed in principle during Soviet leader Mikhail Gorbachev's historic audience with Pope John Paul II on Dec. 1 could be established ''in a very short time''.

''With the Soviet Union the time is not yet ripe for formal diplomatic relations,'' Casaroli said. ''But, as was the case with Poland before full diplomatic relations were re-established, a similar type of permanent working relationship is possible.

''A starting formula can be introduced in a very short time,'' he said.

The ''permanent working contacts'' between Poland and the Vatican that existed for several years before full diplomatic relations were established July 17, 1989, consisted of a Polish government official in Poland's embassy in Rome who was responsible for permanent contacts with the Vatican.

The arrangement with the Soviet Union was expected to be the same. The

Vatican sources said that as part of the arrangement Archbishop Francesco Colasuonno, the Vatican's roving ambassador with special responsibility for Eastern Europe, could be the diplomat appointed to maintain contact with the Soviet government in Moscow.

Although Soviet diplomats and some government officials have maintained informal contacts with the Vatican since 1962, including audiences with the pope in the Vatican, the last ''official contact'' at diplomatic level dates back nearly 70 years.

On March 13, 1922, the Vatican and the Soviet government signed an accord permitting a Vatican ''aid mission'' to go to the Soviet Union to provide assistance for Soviet citizens in the aftermath of World War I and the 1917 Soviet revolution.

The Vatican mission was recalled at the end of 1923 and since then there has been no ''permanent'' official contact.

The Vatican sources said the establishment of ''permanent working contacts'' could be related to the current visit to Moscow by Cardinal Johannes Willebrands, who for 20 years was president of the Pontifical Council for the Promotion of Christian Unity.

The sources said Willebrands was continuing long-running negotiations with Russian Orthodox leaders in an attempt to obtain the legalization of some 5 million Ukrainian Catholics who were forced to merge with the Orthodox Church by Stalin in 1946.

#90043u1923 02/12/1990 ~United Press International

NEW YORK (FEB. 12) UPI - The Air Line Pilots Association Monday blamed mechanical and structural problems for the crash of a USAir jet which skidded off a LaGuardia Airport runway last fall, killing two passengers.

In a report issued a day before the National Transportation Safety Board was scheduled to conduct hearings into the Sept. 20, 1989, crash, ALPA exonerated the plane's cockpit crew, whose performance had been the subject of intense scrutiny in the days after the accident.

''We don't think the crew did anything wrong,'' said Don Skiados, an ALPA spokesman. ''We think that any other crew in the same situation would have acted in the same way and done exactly what they did.''

Flight 5050, a Boeing 737-400 bound for Charlotte, N.C. and carrying 63 passengers and crew, slid off a rain-slicked runway at LaGuardia and into the swirling East River. Two passengers died and 45 people were injured.

In the days after the crash, officials speculated that human error might have caused the accident and the flying licenses of both the pilot and the co-pilot were suspended pending the results of the NTSB investigation.

ALPA said it was assisting NTSB officials as an interested party, which is customary in such investigations.

The union has also paid for legal counsel for the pilot, Michael Martin, and the co-pilot, Constantine Kleissas, who were expected to testify Tuesday morning at the NTSB hearings in Manhattan.

Ted Lopatkiewicz, an NTSB spokesman, said he had yet not seen the ALPA report.

The ALPA investigation found that a mechanical function or design flaw in the cockpit instrument that moves the 737-400's rudder caused a ''critical problem'' that forced the jet to veer dangerously to the left as it was speeding down the runway, said Donald McClure, an ALPA official.

McClure said Boeing has acknowledged the problem in the instrument and sent a bulletin to air carriers last month advising them about it and a proposed design change.

The report said a detailed analysis of the actions taken by the cockpit crew - including Martin's decision to take control of the jet from Kleissas midway through the takeoff - revealed that there were no significant performance errors.

In addition, the report stressed that the deaths in the accident might have been avoided if LaGuardia had a 1,000-foot runway overrun required at most airports by FAA regulations. The overrun would have supported the plane after it had slipped off the runway.

Because LaGuardia is an older airport, it was not required to meet the overrun requirement, McClure said.

If any one of the mechanical and structural problems had not existed, the crash would have been prevented, he said, explaining that, ''If you eliminate one of them, you won't have the accident.''

NEW YORK (FEB. 12) UPI - Toy makers, a most optimistic lot even in the face of daunting competition from Nintendo, Monday presented the games and gizmos they hope will become must-haves for Christmas 1990. Among the most ballyhooed introductions at the American International Toy Fair:

- Gorbachev, a board game from Milton Bradley in which players try to "cut through red tape" to track down Western-style luxury items.
- Spy Tech, a line of sleuthing devices for aspiring secret agents from Tyco Toys.
- Oopee, a large plastic Nerf ball filled with air and water that when thrown has more movement than a Hoyt Wilhelm knuckler.
- Dick Tracy action figures, based on the movie starring Warren Beatty set for release in June, from Playmates.

Toy manufacturers, who in general are expanding existing product lines rather than introducing scores of new ones, put on their happiest faces for the introductions of their 1990 lines, despite the lackluster industry performance during the past year.

Toy sales amounted to about $13.4 billion in 1989, according to the Toy Manufacturers of America Inc., up 5 percent from $12.75 billion in 1988. The figure excludes Nintendo video game sales, which totaled $2.7 billion in 1989 and are expected to jump by 50 percent to $4.1 billion in 1990.

"Many of us believe that video is peaking now, with consumer saturation

levels being reached and interest in some segments of the product line beginning to wane," said Jack Stoneman, chairman of the Toy Manufacturers of America, which sponsors the toy fair.

Such talk seemed to be wishful thinking, however. When pressed, Stoneman could offer scant evidence that Nintendo is fizzling out. Meanwhile, analysts have predicted Nintendo's hand-held Game Boy version alone will have sales of close to $2 billion in 1990.

One way to bolster toy sales, Stoneman said, is for the industry to target foreign markets, which raises the interesting possibilities of, say, Teenage Mutant Ninja Turtles invading Romania and Oopsy Daisy dolls settling into Japan.

"In the toy business, no doubt what sells here will also sell (abroad), said Stoneman. "There are countless opportunities for those of us who are prepared to move now."

Ironically, the widespread political unrest that may well fuel badly needed industry growth also hurt the toy makers, who rely on off-shore manufacturing for 80 percent of all toys they produce, Stoneman said.

"The benefits of the low-cost, organized and efficient labor force in China are now at risk because of the political upheaval that took place during the year," said Stoneman. "Many of our manufacturers are cautious and continue to look to establishing new plants in other southeast Asian countries."

#90043u1950 02/12/1990 ~United Press International

WASHINGTON (FEB. 12) UPI - President Bush rejected a Soviet counterproposal on superpower troop cuts Monday, dismissing a call for equal levels in Europe because of the distance separating the United States from its NATO allies.

While claiming ''solid progress in pushing the U.S.-Soviet agenda forward'' toward a planned June summit, Bush held to a Jan. 31 call for asymetric troop limits in Europe in response to a Soviet offer of reductions to equal levels.

During a White House news conference, he opposed that principle of ''exact linkage,'' but said he otherwise was ''very pleased'' with the reaction of Soviet President Mikhail Gorbachev to his earlier call for deeper troop cuts.

''I wouldn't call it an impasse,'' Bush said. ''This is the way it works when you're discussing these arms control things.''

Progress in arms control was only one of several reasons Bush gave for hailing last week as ''extraordinary and positive'' in East-West relations capped by talks in Moscow between Secretary of State James Baker and top Soviet leaders.

''I am confident,'' he said, ''that if we continue this kind of momentum in our bilateral relationship with the Soviet Union, that the June summit will be a major success.''

Satisfied some nagging obstacles had been overcome, Bush expressed hope that accords on chemical, conventional and strategic force cuts can be ''substantially completed'' by the summit, which is to be held in the United States.

At the same time, however, he acknowledged continued differences between East and West not only on troop counts in Europe, but the perhaps thornier issue of German reunification.

Bush applauded Gorbachev for showing ''a real flexibility'' unseen just months ago in declaring last week that reunification, long opposed by the Soviet Union, should be left to the German people. However, Bush refused to yield on the U.S. insistence, shared by West German Chancellor Kohl, that Germany remain a member of NATO.

With the Soviets urging that East and West Germany, once unified, shed their Warsaw Pact and NATO ties, Bush noted postwar fears by ''many Europeans'' that a neutral Germany unencumbered by political alliances would pose a military threat to its neighbors.

''It's a concern that would be allayed by having a unified Germany inside of NATO,'' he said.

Though Baker suggested last week that Germany might retain a looser association with NATO than its current role as the main forward-basing point for Western troops, Bush seemed to insist on full membership in the military alliance.

In a bow to Soviet security concerns, he said there ''might be some flexibility'' on the actual deployment of troops, indicating NATO forces would not be stationed on the soil of what is now East Germany.

Bush asserted that arrangement would be ''the most reassuring and stabilizing'' not only for the United States and its European allies, but also for East European countries looking for a secure environment to move toward democracy.

Bush's proposal that the United States and Soviet Union be limited to 195,000 troops each in Central Europe, which includes East and West Germany, is under negotiation at the East-West talks in Vienna on Conventional Forces in Europe.

His ceiling would apply to all 565,000 Soviet troops in Eastern Europe but not to some additional 30,000 U.S. troops in Britain, Italy and elsewhere in Western Europe, who would remain as a residual force outside the central zone.

Gorbachev told Baker on Friday that the Soviets could accept either 195,000 or 225,000 as a limit for all of Europe, but not the U.S. sub-limit for Central Europe, where the Soviets maintain all their forces.

Baker discussed the proposals with NATO allies Monday at an unprecedented

NATO-Warsaw Pact meeting in Ottawa on a confidence-building proposal to open the skies of Europe and North America to unarmed surveillance flights.

Denying his position threatens efforts to conclude an agreement this year on conventional force reductions, Bush claimed a geographic rationale for his proposal to leave the United States with an edge of 30,000 troops in Europe.

''We've got a big ocean between us and Western Europe,'' he said, ''and so the argument that we should always have a linked reduction (with the Soviets) is one that I want to get away from now.''

Bush suggested the rush of events in Europe could render the Soviet position all but moot. With the new, more independent governments of Czechoslovakia, Hungary and Poland demanding that Soviet troops leave their soil, Bush said the Soviets may face a situation in which ''some Warsaw Pact countries today would see us not as a threatening presence, but as a stabilizing presence.''

OLYMPIA, WA (FEB. 12) UPI - Legislation to allow convicted sex offenders to choose voluntary castration in return for a 75 percent reduction in their prison sentences won a bare Senate majority Monday as opponents argued the politicans were engaging in ''bloodlust.''

The bill was sent on a 25-23 vote to the House, where a similar measure has failed to move this legislative session. In addition, Gov. Booth

Gardner has said on several occasions he is unconvinced that castration would deter predatory sex criminals.

Backers of the Senate castration bill were led by Sen. Ellen Craswell, R-Bremerton, who said studies have shown castration is an effective tool in lowering recividism rates in sex crimes.

She said in some countries where castration has been mandatory for rapists recividism rates of only 2 to 3 percent have been noted.

Under terms of the legislation, a convicted sex offender who requests castration must have a court hearing to ensure he understands the legal, medical, emotional and psychological consequences of castration.

Opponents of the bill included Republican Sen. Mike Patrick, a retired Seattle policeman, who said said violence rather than sexual gratification is often the motivation behind rapes.

He showed the Senate a beer bottle, a large piece of wood, and a screwdriver as examples of items used by some rapists to commit their crimes.

''I could have brought broom handles and other things. It is not sex that drives these people, it is violence,'' Patrick said.

Sen. Brad Owen of Shelton was one of three Democrats to vote for the bill, which he said did not go far enough.

''Mutilation is too good for these people. It should be mandatory for these creeps,'' he said. ''We forget to look at what the criminal has done to the victim.''

However, Sen. Phil Talmadge, D-Seattle, denounced the bill as something ''the Ayatollah Khomeini probably would have liked.''

He said predatory sex offenders also should like the bill because they could be released from prison early to continue a life of crime.

''What is going to be next if mutilation is going to be part of our public policy,'' Talmadge said. ''Do we pluck out somebody's tongue for blasphemy do we chop off somebody's hand for theft. I don't know how far we intend to go with this.''

''Occasionally on this floor we have the bloodlust that pounds in our ears and we want to do something because there is some terrible set of circumstances that we want to get at,'' Talmadge said.

Talmadge and other opponents said they favored a different, more

comprehensive bill to strengthen penalties for sex crimes and allow public notification when a released criminal is released. The bill calls only for a study of castration.

#90043u1979 02/12/1990 ~United Press International

HUNTINGTON BEACH, CA (FEB. 12) UPI - A band of black goo 20 to 30 feet wide and smaller ribbons of oil several inches thick washed onto the Southern California shore Monday as Coast Guard officials monitored a fast-approaching storm front threatening to further foul the coastline.

''There's been some pretty heavy oil floating just off the shoreline for two days so it wasn't really a surprise'' that the grimy licks of oil hit the beaches, Coast Guard spokesman Tim Rowe said.

The heavy concentrations of petroleum began swirling ashore in a brownish foam late Sunday afternoon, a day during which optimism had run high that little more of the area would be contaminated by a 60-square-mile slick that spilled into the ocean from a disabled tanker Wednesday.

Booms protecting several wildlife refuges, including the Bolsa Chica wetlands and Seal Beach preserve, were holding back the oil Monday, but an increasing number of dead and oil-coated birds washed up on Huntington and Newport beaches.

Five days after the spill off the Huntington Beach Pier, the state Department of Fish and Game issued a plea for towels - both cloth and paper - sheets and sturdy boxes to hold the injured birds.

Fish and Game spokesman Kurt Taucher said that 66 dead birds had been

recovered and 175 others were found drenched in oil, adding ''a fairly significant'' number of birds is still expected to be found.

Pushed by overnight winds, a band of oil 20 to 30 feet wide and 2-inches thick hit the shoreline from the center of Bolsa Chica Beach to two miles south.

Bands of the tar-like goo 3 to 4 feet wide and several inches thick were found 500 yards north and south of the Huntington Beach Pier. At Newport Beach, the oil fouled 1.5 miles of shore.

Authorities closed the beaches indefinitely and for a minimum of three weeks.

Newport Bay, Huntington Harbor, Anaheim Bay and the San Gabriel and the Santa Ana rivers remained closed to vessel traffic.

The northeast winds picked up to 10 to 12 knots about 4 p.m. Sunday and continued Monday at about the same speed, blowing in patches of oil that had been hovering several hundred yards offshore since the spill.

Before hitting the shoreline, the oil had spread into a sheen too thin to be picked up by boats skimming the surface for the light Alaskan crude that leaked from the 800-foot tanker American Trader.

More than 300 cleanup crews on land used absorbent ''pompons'' and diaper-like rags to mop up the goo. Early Monday, cleanup activities in the Bolsa Chica area were suspended when about 50 workers became ill because of strong fumes. No one was believed to have been seriously affected.

The slick covered about 60-square miles from the breakwater at the Long Beach port to Newport Beach. Most of that was a light sheen.

''It's primarily a light sheening, with the biggest problems at Huntington Beach,'' Rowe said.

Skimmers working round-the-clock since the spill had recovered 116,004 gallons of oil, or 29 percent, of the estimated 394,000 gallon spill by Monday morning. On Sunday, the Coast Guard reported 43 percent of the oil evaporated or mixed in with seawater.

Officials said Monday they were concerned an Alaskan cold front working its way down the coast could hit bring rough seas that would force a suspension in skimming efforts.

Although oil had fouled up to 13 miles of the shoreline over the four days since the spill, warm temperatures and favorable winds had kept much of

the slick from sloshing ashore.

''As long as the seas don't get too extreme, skimming can keep going on,'' Rowe said.

Scuba divers, meanwhile, finished patching two holes in the hull of the damaged tanker but the Coast Guard ordered its owner, American Trading Transportation Co., to clean the hull further before moving it to Long Beach Harbor.

Coast Guard and company officials believe the gashes were caused by the ship's anchor. The 23-million-gallon tanker, leased by British Petroleum, was maneuvering into a sea berth off Huntington Beach to offload oil into an underwater pipeline.

Alcohol tests on the ship's crew were negative but the results of drug tests were not expected for several more days.

#90043u2013 02/12/1990 ~United Press International

BUCHAREST, ROMANIA (FEB. 12) UPI - Scores of Romanian women, driven by hunger and emboldened by the dismantling of the police state, are turning to prostitution despite increased concerns over the spread of AIDS.

The risk of infection with AIDS and other sexually transmitted diseases is heightened by the virtual non-existence of condoms in the country of 23 million people.

Health Minister Dan Enachescu said Monday there were no plans for manufacturing condoms or importing them, and he said the government does not acknowledge the existence of prostitution in Romania.

The prostitutes themselves, however, said their ranks are growing by as many as 100 a week in Bucharest alone. The numbers could not be independently verified.

''Most of us have decided to work in order just to eat,'' said Kathy, 36, a raven-haired, full-figured prostitute who works a hotel in downtown Bucharest.

''Others are desperate for hard currency, because without dollars we can't travel. We have been prisoners here for 25 years.''

Prostitution remains illegal in Romania as it was throughout the 25-year-rule of communist dictator Nicolae Ceausescu, who was driven from power and executed during the pro-democracy uprsing in December.

Under Ceausescu, a few prostitutes - some of whom were said to have been on the payroll of the secret police - were allowed to work at upscale Bucharest hotels favored by Westerners.

But in the past few weeks they have been joined by scores and perhaps hundreds of others. The lobbies and cocktail lounges of the same hotels are filled nightly with dozens of prostitutes who appear to have taken the new gospel of free enterprise to heart.

They compete openly, sometimes aggressively, for the dollars of Western businessmen who pass through, earning from $20 to $100 for their services.

Others stake out the hotel doorways, soliciting passersby with the same regularity and enthusiasm as the ubiquitous black market money changers who try to buy hard currency from Westerners.

While the more experienced prostitutes of the Ceausescu era are distinguishable by their Western-made clothing and furs, the newcomers generally are casually or even shabbily dressed.

Kathy, who refused to reveal her last name, said she and many other prostitutes were worried about becoming infected with AIDS, but felt they had little choice. She said the government should take steps to regulate prostitution and safeguard the health of those who practice it.

So far only 24 adult cases of acquired immune deficiency syndrome have been reported in Romania, but concerns over the spread of the deadly disease were heightened last week by a World Health Organization report showing about 550 Romanian children were infected with the HIV virus that causes AIDS. The virus reportedly was spread through contaminated needles or blood transfusisions.

SOWETO, SOUTH AFRICA (FEB. 12) UPI - Raising clenched fists and jogging in scattered formation Monday, young South Africans chanted ''ANC will conquer! ANC will govern!'' and waited for their leader Nelson Mandela to return to his home.

The fairly calm atmosphere in front of Mandela's Soweto home contrasted with another scene earlier in the day at the nearby Orlando Stadium, where dozens of school children were trampled during the rush to enter by some of the crowd of about 60,000 people.

A huge golden banner adorned a fence surrounding Mandela's property and proclaimed, ''Education, Houses, Security and Comfort for All.'' The garage next door was painted green, black and gold - the colors of Mandela's once-banned African National Congress.

''Amandla Awethi Mayibuye iAfrica,'' read one banner. ''Powers to the People, May It Come to Africa.'' Another urged, ''Mandela Is Coming. Join ANC. Forward to Victory.''

Giant television floodlights illuminated the area where hundreds of people - blacks from Soweto and neighboring townships as well as journalists - have maintained constant vigilance since Saturday outside the house Mandela last lived in before his capture in 1962.

Despite the crowd's expectation, the 71-year-old, silver-haired Mandela did not arrive by late Monday and was not expected in Soweto until Tuesday. But the hope that came with his freedom remained solid with those congregating along Vilakazi Street.

''I think that South Africa will be built anew where we will have a democratic country,'' said Joyce Ndamase, her 7-year-old daughter and 11-year-old son at her side. ''I hope that their future will be brighter.''

But Ndamase, who has been at the Mandela house often since President Frederik de Klerk announced the black leader's release Saturday, said the ANC's credo of an armed struggle to eradicate apartheid must remain and that South Africa's 28 million blacks will not give up their struggle easily.

''If it comes to a point where we will fight, we will do it because we have been waiting for so long,'' said Ndamase, wearing a ''Welcome Mandela'' T-shirt with the black leader's face atop a green-colored map of Africa.

''The sword will turn around if things are not done,'' chanted young blacks among the crowd of several hundred. ''ANC will conquer! ANC will govern!''

Earlier in the day, tens of thousands of blacks jammed into the nearby Orlando Stadium for a Mandela welcome rally, waving a sea of ANC flags. In the rush to enter, some trampled dozens of school children who fell.

No deaths were reported, but at least four people were hospitalized with fractures and other injuries, while seven other people suffered cuts when a scaffolding fell, witnesses and medical workers said.

Red Cross workers reported that dozens of people also fainted from heat exhaustion, dehydration and hunger after spending hours in the stadium.

In an attempt to forestall more trouble, youths in the black township distributed pamphlets titled ''A Message from Mandela,'' in which the black leader urged people to follow instructions by marshals at Tuesday's rally in Johannesburg.

''I appeal to all my people to act in a disciplined and calm manner,'' the pamphlet read. ''We have won a massive victory in our march for freedom in South Africa. Let us not delay our struggle by acting in an undisciplined manner.''

Outside the Mandela home Monday night, the crowd continued its vigil.

''We've been waiting for this day for years,'' said Cindy Futhane, 32. ''We've been working very hard for this day. You can't just let it pass.''

Lyndrn Horace, raising his right hand in a tight fist, said, ''For 30 years I have been struggling to free South Africa. ... I'll never sleep without seeing Nelson Mandela.''

WASHINGTON (FEB. 12) UPI - President Bush announced Monday he is nominating Oregon Supreme Court Justice Robert E. Jones to be U.S. district judge for the Oregon district.

Jones, 62, would succeed Judge James M. Burns.

Jones was named to the Oregon Supreme Court in 1983, and prior to that served as circuit judge for the Fourth Judicial District of Oregon.

#90043u2037 02/12/1990 ~United Press International

CLEVELAND (FEB. 12) UPI - Americans for Democratic Action proposed Monday replacing the nation's current health care industry with taxpayer-financed system similar to that of Canada.

The group, with about 60,000 members, called for formation of 150 central medical complexes to coordinate care but, at the minimum, the liberal organization is seeking formation of federal health insurance similar to that used in Canada since 1970.

''Liberals have always been the people who have looked at real problems and come up with realistic solutions,'' ADA Director Amy Isaacs said. ''No problem is more real and more in need of realistic solutions than health care.

''The 1989 session of Congress failed miserably to address creatively the dire health needs of our nation too long crippled by sky-rocketing health care costs,'' she said. ''We hope the current session will act more responsibly. We eagerly await the report of the congressional Pepper Commission expected next month.''

Dr. Jerome Liebman, author of the ADA report, predicted that by the year 2000 the United States would have national health insurance similar to Canada's. In Canada, the government acts as the insurance agent and sets rates it will honor for health care.

Leibman claimed Canadians have better care than Americans, but Americans pay 30 percent more per capita for medical care.

BY VERNON SCOTT

HOLLYWOOD (FEB. 12) UPI - If distinctions can be made in horror films, then the creme de la creme currently is the work of newcomer Clive Barker, whose ''Hellraiser'' in 1987 reached new heights of dramatic terror.

Now the 37-year-old English author of such eerie novels as ''Weaveworld'' and ''The Damnation Game'' is poised to unleash a second film version of one of his books, ''Cabal,'' retitled ''Nightbreed'' for the Big Screen.

Unlike Hollywood's more familiar, stomach churning slasher pictures, ''Nightbreed'' is designed to freeze the blood and keep audiences sleepless until 1997.

Barker is a deceptive man. He gives the appearance of a solid English citizen, perhaps a BBC public relations man or a research microbiologist. His charm conceals a curious madness that allows him to invent creatures and events that defy sane analysis.

Novelist Steven King, himself a candidate for celestial banishment, describes Barker as the premiere horror writer of the known universe.

Ensconced briefly in a Sunset Strip hotel on a visit from London, Barker puffed on an enormous cigar and discussed horror in general and ''Nightbreed'' in particular.

''I believe horror movies should be more than simply blood and gore or dismembering teenagers,'' he said. ''Like every other good film, I think horror movies showing the dark side of life should be a forum to say some quite interesting things.

''The only message in slasher movies admonish audiences not to get into the shower, not to visit Crystal Lake, to stay away from Elm Street or don't fall asleep.

'''Nightbreed' proves we have a more ambiguous response to monsters than we sometimes admit. It's difficult to have any compassion for a man in a hockey mask with a machete in his hand or a disfigured criminal with a chainsaw.

''In classic horror films there is always a little tug of sympathy as there was for Frankenstein's monster, a little envy of Dracula and pity for the Wolfman.

''The thing about this picture is that while the monsters may be scary, the real villains are the human beings, who are even scarier - including a cop, a priest and the psychopathic psychiatrist.

''I think I've added a different dimension to horror by casting David Cronenberg in a leading role of 'Nightbreed.' David has a special feeling for this sort of film.''

Cronenberg was the director of ''The Fly'' and ''Dead Ringers,'' among

other occult movies.

''To me David is the preeminent horror director in the world,'' Barker said.

Cronenberg, playing a lunatic psychiatrist, finds himself involved with Midian, a legendary city hidden beneath a cemetery in the wastes of Canada a labyrinthine necropolis inhabited by the most imaginatively gross apparitions ever dreamed up by a demented mind.

The creatures make Michael Meyer, Freddy Kreuger and Jason Voorhees look like beauty contestants.

They are Barker's creations. A former commercial artist, he draws the monsters and then has special effects wizards make them into physical reality.

Barker's creatures are so bizarre that to call them nightmarish is to describe Roseanne Barr as plump.

Asked how his brain conjures up such loathsome, vile emanations, Barker laughed and said, ''It goes back to Grimm's fairytales and into the dark side where the demons and the dragons are.

''As a kid I wasn't interested in what was going on in castles and little villages. I wanted a trip into the wildwoods where I encountered experiences that made my heart jump - as long as there was an escape route. I think that's very theraputic.''

The author of 10 horror novels, Barker was encouraged to convert his books to film and to direct them himself.

''I like making movies,'' he said. ''It's fun working with creative people. Writing books is a very isolating experience. Films are so collaborative that it makes a very nice change for me.

'''Nightbreed' will find a lot of people who really don't like horror films leaving theaters pleased with having an adventure they've never had before.''

#90043u2057 02/12/1990 ~United Press International

NEW YORK (FEB. 12) UPI - Prosecutors, pressing for a single trial for six youths accused of raping and beating a woman jogger in Central Park, have a high-tech plan to put their videotaped confessions into evidence.

The six youths are accused of rape and attempted murder in an attack on a

28-year-old investment banker on April 19, 1989. Her attack came at the end of a two-hour ''wilding'' through a moonlit Central Park, in which a homeless man and two male joggers also were assaulted.

After a ''miraculous'' recovery, the woman has returned to work on Wall Street.

Most of the six youths indicted have confessed to the crime on videotape and in written statements.

However, those confessions are enmeshed in a legal controversy because the youths also point fingers at their co-defendants. Under New York State law a defendant's confession can be used only as evidence against himself and not to implicate others.

Therefore, to use the confessions in their entirety the state would have to go through six separate trials.

But the lead prosecutor, Assistant District Attorney Elizabeth Lederer, has urged Justice Thomas Galligan to try all six defendants at once at state Supreme Court in Manhattan.

She said the state plans to call at least 30 witnesses, including several victims, and a single trial would spare them the trauma of testifying over and over again.

All the confessions could be used at once if they were edited to remove any reference to other defendants, Lederer suggested in court papers.

On the videotapes, names of other defendants could be substituted with ''an audible tone for each codefendant's name on the videotape. At the same time the audible tone is heard the defendant's mouth could be electronically masked to prevent 'lip reading' by the jury,'' the court papers said.

But a defense attorney said the method would reduce the tapes to a series of incomprehensible bleeps and scrambled images.

''It would generate a lot of speculation, which causes more harm than good '' said Howard Diller, who is defending Kevin Richardson, 15.

He said such electronic tinkering ''would deprive my client of a fair trial, because he is saying something that the jury does not get to hear '' he said.

Lederer also suggested using multiple juries at a single trial. And, she said, ''plea negotiations with some of the defendants'' may cut down on the number of cases that go to trial.

Defense lawyers have urged the judge to sever the trials.

But the severance argument may be moot if the judge goes along with defense efforts to have the confessions in their entirety thrown out of court. The defense has argued that the statements were the result of police coercion and threats and therefore are illegal.

Galligan was expected to rule on both the admissibility of the confessions and the severance question on Feb. 23.

#90043u2070 02/12/1990 ~United Press International

WARSAW, POLAND (FEB. 12) UPI - Poles have long depended on the underground ''black market'' for their survival - but rarely has it ever been so visible.

In the last few weeks, sidewalk salesmen have flocked to Warsaw's main

avenue, Marszalkowska, turning the city center into an open-air market.

Pedestrians crowd past tables and benches laid out with an incredible variety of products, from cassette tapes to books to strings of underwear. Poland's first erotic magazine, ''Seksi'', is sold from a car parked on the sidewalk.

Almost everything is sold without permits and without being reported to the taxman, recent interviews with some of the peddlers showed.

It is not rare to see an old peasant selling suspicious-looking meat out of a suitcase. But Warsaw residents haven't been complaining because the prices are much lower than in state-run butcher shops.

The lack of control is becoming a problem, however, and the government will start requiring permits by the end of the month.

Most of the goods being sold on the streets come from the West, usually West Berlin. Trains to Budapest and Berlin are traditionally packed with professional black marketeers. One man, a technician by trade, has traveled to one capital or the other at least three times a month for the last three years.

The profits can be enormous. A man who was selling blank cassette tapes out of a box said he was earning 30 times his factory wage.

But not everyone is into the big time. An electrician in his 40s was selling a cans of deodorant from a gym bag at his feet. He estimated he earned about 20 percent of his family income that way.

Some people have neither the time nor the money to travel abroad.

Danuta, a single mother, has no one to leave her daughter with, so she buys junk jewelery and T-shirts in Warsaw discount stores and sells them on the street for a 100 percent markup - usually to peasants who do not know Warsaw prices.

''You just stick it in their hands and they either take it or leave it,'' she said.

Danuta said she needs the money to survive because she only works part time.

Very few of the street sellers have official permits, which are expensive and time-consuming to obtain.

''It's cheaper and easier to just pay off the police,'' Danuta said. ''You either pay or they kick you out.''

All of the peddlers interviewed said the future of the black market looked doubtful amid Polish economic reforms that, if successful, could spell the demise of the black market as a relic of Poland's communist past.

The new high exchange rate of the zloty to the dollar and higher duties make it expensive to obtain the goods in the West. In West Berlin, Poles now have to compete with East Germans who shop in the same discount stores.

''I see the sense of the new government policy,'' said one seller, ''but I realize that I will suffer because of it.''

#90043u2074 02/12/1990 ~United Press International

CAPE TOWN, SOUTH AFRICA (FEB. 12) UPI - Despite having spent nearly a third of his life in prison, black leader Nelson Mandela showed neither bitterness nor drift from his political ideology Monday on his first full day of freedom.

Mandela emerged from the residence of Anglican Archbishop Desmond Tutu and stepped down the terraced steps, gently holding hands with his wife, Winnie. With a brother, his daughter, Zindzi, and her three children nearby, the couple posed for pictures before a news conference in the garden.

At the beckoning of photographers, he smiled broadly and raised a clenched fist, the symbol of black power.

Mandela, the nation's most powerful symbol of defiance and the honorary leader-for-life of the African National Congress, wore a light gray suit and a blue shirt. He appeared strong for a man of 71 and fielded 31 questions in 45 minutes, his voice firm, his hearing keen, his answers to the point.

''I have lost a great deal over these past 27 years and my wife has been under all sorts of pressures,'' he said, as his wife sat quietly at his side, wearing a white kaftan bearing a colorful tribal pattern and a scarf wrapped around her hair.

''It is not a nice feeling for a man to see his family struggling without security, without the dignity of the head of the family around..., (but) in prison there have been men who are very good in the sense that they understand our point of view and they do everything to try to make you as happy as possible.

''That has wiped out any bitterness which a man could have,'' Mandela said.

Though hoping that power-sharing negotiations may soon begin, Mandela urged the international community to maintain the pressure on Pretoria, including punitive economic and cultural sanctions that have strained the economy and ostracized South Africa from most of the rest of the world.

''Everything that we set out to achieve through sanctions is still the same. Nothing has changed,'' Mandela said. ''You must remember that the demand in this country is for a non-racial society, and we are very far from that.''

Freed unconditionally from life imprisonment on Sunday by President Frederik de Klerk, whose National Party has ruled South Africa since 1948, Mandela took pains to allay the fears of the white minority raised by the ANC's demand for universal franchise on a common voters roll.

''It is one of our most important duties to address this problem,'' the black leader said of the ruling party's demands that any future constitution guarantee the rights of the country's 5 million whites.

''Whites are fellow South Africans, and we want them to feel safe and that we appreciate the contribution they have made toward the development of this country,'' he said.

"There is nothing that worries us, as the ANC, than the fact that we should be involved in politics of confrontation,'' Mandela said. ''We will seize the earliest opportunity of settling our problems through peaceful negotiations.''

Departing occasionally from a rather somber expression and determined demeanor to smile and engage in light banter, Mandela also said he hoped negotiations intended to end the country's racial conflict were near.

"I am confident that if Mr. de Klerk is able to carry the National Party with him in the new line he has taken, that he himself wants to normalize the situ- ation as soon as possible, I think that very soon the obstacles to negoti- ations will be removed and it will be possible for us to sit down and talk.''

Those obstacles, he said, are de Klerk's failure during his racial reform address to Parliament 10 days ago to lift a 43-month-old state of emergency in its entirety and release all political prisoners.

De Klerk lifted only elements of the state of emergency but kept measures that give police sweeping powers to detain without charge, and he ordered the release of only some political prisoners.

''Mr. de Klerk is a man of integrity,'' Mandela said. ''He seems to be fully aware of the dangers to a public figure of making undertakings which

he fails to honor, and I think that is a very promising sign. In my discussion with him he has been very flexible.''

-30- 4458

#90043u2079 02/12/1990 ~United Press International

WASHINGTON (FEB. 12) UPI - An advocacy group Monday praised a government action aimed at making health warnings on alcoholic beverages more prominent and easier to read.

The Bureau of Alcohol, Tobacco and Firearms, a branch of the Treasury Department, Friday issued final regulations for the labels that includes changes designed to make them ''legible, conspicuous and prominent.''

The final rules are similar to the regulations that took effect on Nov. 18 1989, except that they now also require the words ''government warning'' be capitalized in bold type and limit the number of letters per inch in the warnings.

The rules also require the messages appear in a minimum type size of .12 inches on containers larger than 3.2 quarts and requires that ''regardless of the number of characters per inch, the letters and/or words of the health warning statement must not be compressed so that the statement is not readily legible,'' according to a Treasury Department statement.

''These requirements will ensure that the health warning statement on each alcoholic beverage container can be more easily read by the average consumer,'' the statement said. ''In addition, the specification of maximum characters per line gives the industry guidelines to assist them in designing labels.''

The regulations will take effect in about nine months.

Although the final regulations do not contain all the requirements that consumer advocates had sought, Christine Lubinski of the National Council on Alcoholism Inc. in New York said she was happy with the changes.

''I'm very pleased,'' said Lubinski, whose group lobbied for the regulations.''They are sort of sending a message to alcoholic beverage manufacturers that they are going to say 'no' to labels that can't be read and there are labels out there aren't legible.''

The messages must appear on all beer, wine and liquor containers warning pregnant women that they run the risk of birth defects if they drink, and reminding motorists drinking impairs their ability to drive.

The original regulations came under fire because they allowed the messages to be so small that they were often difficult if not impossible to read,

legislators and consumer groups charged.

#90043u2086 02/12/1990 ~United Press International
(FEB. 12) UPI - President Bush joined the president of the Congo today in praising Nelson Mandela's release as a hopeful sign for all of southern Africa. Bush hailed the freeing of the black nationalist while welcoming the Congo leader on a state visit. The Congo leader says he sees improved relations between his nation and South Africa.

In Cape Town, Mandela also had hopeful things to say about the future. Mandela, speaking on his first full day of freedom, says he's optimistic that President Frederik de Klerk will convince his white-minority government that reforms are needed. The black nationalist leader says once the political situation normalizes, his movement will be ready for negotiations.

A cold front dumped snow and rain across the Pacific Northwest as clear skies prevailed across the nation's midsection. In Washington's Cascade mountain range, plummeting temperatures solidified packed snow, creating headaches for police handling traffic accidents at Olympia. Police say hazardous conditions led to numerous accidents. The mercury fell into single digits in northern Wisconsin and to one BELOW zero in Marquette, Michigan.

Flamboyant real estate developer Donald Trump and his former fashion model wife, Ivana, plan to end their marriage. Trump issued a statement in New York saying that according to a pre-nuptial agreement he is giving his wife custody of their three children... the couple's 45-room Connecticut mansion... and 20-Million to 25-Million dollars. The amount is believed to be only a fraction of Trump's estimated one-point-seven BILLION-dollar fortune.

#90043u2090 02/12/1990 ~United Press International
NEW YORK (FEB. 12) UPI - Stocks closed sharply lower Monday in the lightest trading since the day after Christmas, as an early bout of computerized program buying and losses in Treasury bonds dragged prices down.

The Dow Jones industrial average, which rose 3.83 Friday, tumbled 29.06 to close at 2619.14.

Among broader market gauges, the New York Stock Exchange composite index fell 1.84 to 182.55 and Standard & Poor's 500-stock index lost 3.54 to 330.08. The price of an average share dropped 34 cents.

Declines pummeled advances 1,049-467 among the 1,955 issues crossing the NYSE tape. Big Board volume was 118,390,000 shares, the lightest day since 77,610,000 shares changed hands Dec. 26, compared with 146,938,410 shares traded Friday.

Analysts said an early round of computerized selling, used to profit on price spreads between stocks and stock index futures, initially depressed the market.

Some said rumors that Drexel Burnham Lambert might seek Chapter 11 protection sparked the selling while others said Drexel's troubles were no surprise to Wall Street. Drexel later denied the rumors but said it was in talks aimed at finding a big investor or merger partner because of cash flow problems at its parent company.

Weakness in the bond market throughout the day then kept prices in check, they said. "Bonds are getting hit," said Brad Weekes, senior vice president in charge of sales and trading at Donaldson, Lufkin and Jenrette Securities Corp. "There was a realization that maybe the bond auction didn't go as well as people thought it did." In late trading, the 30-year bond had tumbled 1 2/32 to 100 21/32, yielding 8.44 percent.

Weekes said estimates are that Japanese investors only bought 20 to 25 percent of last week's Treasury auction of $10 billion in 30-year bonds which was part of the quarterly refunding, held to finance the budget deficit. Japanese interests normally buy about 40 percent of the bonds sold in the quarterly refundings, keeping demand and prices up and interest rates down.

Analysts said the light volume exaggerated the effects of the program selling.Trading was unusually light because of the Lincoln's Birthday holiday in the United States, for which some banks were closed, and National Foundation Day in Japan, where markets were closed.

But after Monday's decline in stocks, Newton Zinder, analyst at Shearson Lehman Hutton Inc., said there were concerns that the Tokyo market may drop when it reopens tonight. "That accounted for a lot fo the selling late in the day," he said.

On the trading floor, Panhandle Eastern was the most active NYSE issue, down 1/8 to 28 3/8 in dividend-related trading. Chase Manhattan followed, off 1/4 to 27 3/4. Southwestern Public Service was third, off 1/8 to 29 1/8 in trading prior to its quarterly payout.

Among the blue chips, AT&T was off 1/4 to 39 5/8, IBM lost 1 3/8 to 101 1/8, General Motors rose 1/2 to 43 3/8 after saying late Friday last year's worldwide sales were more than $125 billion, and Goodyear gained 3/8 to 35

7/8. The stock paid its dividend Monday.

Elsewhere, Hilton Hotels surged 2 7/8 to 64 5/8 after reports saying a group of former executives of Marriott is trying to get financing for a takeover bid.

But ASA Ltd., which invests in South African gold stocks, plunged 4 1/2 to 64 3/8. South African issues fell sharply after African National Congress Leader Nelson Mandela, freed over the weekend, reaffirmed the group's support for nationalization of industries and backed the organization's guerrilla campaign.

Time Warner tumbled 3 1/4 to 101 1/2 after reporting a $222 million fourth-quarter loss. Airgas fell 1 1/8 to 16 1/4 amid speculation about the parties involved in a big block trade. Nynex lost 1 3/8 to 78 3/4 after a federal regulatory report was said to contradict the company's claim that it did not intentionally overcharge two telephone units to boost profits.

Volume of NYSE-listed issues, including trades in stocks on regional exchanges and in the over-the-counter market, totaled 146,925,830 shares, compared with 179,249,260 shares traded in the previous session.

Prices closed lower in light trading on the American Stock Exchange. The Amex Market Value index lost 1.92 to close at 358.87. Declines led advances 299-226 among the 766 issues traded. The price of an average share fell seven cents. Composite volume totaled 10,937,630 shares, compared with 12,818,980 shares traded Friday. Hillhaven led the Amex issues, off 1/8 at 1 1/4.

The National Association of Securities Dealers composite index lost 2.47 to 426.37.

(FEB. 12) UPI - Voters in Aspen, Colorado, are deciding today whether to ban the sale of fur and cut the size of an 80-Million-dollar convention hotel. City officials say they expect the referendum election to draw 70-percent of the voters. If approved, the fur ban would close Aspen's four fur-clothing shops. And, opponents of a Ritz-Carlton Hotel want the 292-room project cut by one-third.

Valentines, Virginia, is making its mark on the nation, but the town post office is taking the heat of all the publicity. Valentines is so small that the town doesN'T appear on some maps, but it got a mention recently in two nationally syndicated columns. The result- Wright's General Store, which doubles as post office- has been flooded with Valentine cards and letters waiting to be cancelled by hand with the special Valentines

post-mark.

WASHINGTON (FEB. 12) UPI - The administration has refused to attach a cost to its farm policy proposals but it expects the cost of farm subsidies to drop in the coming years, budget officials indicated Monday.

The key theme in the administration package is giving farmers more freedom

to decide which crops to grow. Officials say that will let farmers pursue opportunities to grow profitable crops and earn more money in the marketplace.

Some farm-state congressmen have been wary of the proposal as a ruse to reduce farm income. They have demanded Agriculture Secretary Clayton Yeutter made recommendations for things such as target prices, a key in calculating payments to farmers.

Yeutter, in turn, has offered to negotiate details but has made it clear he wants Congress to put its ideas on the table, too.

In recent speeches, Yeutter has warned farmers that, with pressures to reduce the federal deficit, they should not expect farm support spending to continue at the levels of the 1985 law.

Budget officers at the White House and the Agriculture Department said the administration forecasts farm spending will total about $47 billion to $48.5 billion over the next five fiscal years.

By comparison, the current farm policy law, which expires this year, has been projected to cost $85 billion. Aid to farmers peaked at nearly $26 billion in fiscal 1986 during the farm recession.

The White House budget office said farm programs would cost more than $66 billion over the next five years if there were no major changes in policy. The White House has asked for a $1.5 billion cut in farm programs next year to hold spending to $10.2 billion.

Administration officials have not suggested how to make the reduction. They have pointed to three possible ways: lower target prices, limiting the acreage eligible for payments, and tighter limits on payments to farmers.

Some congressmen already are on record in favor of freezing target prices at this year's level.

The Food and Agriculture Policy Research Institute has estimated farm program spending over the next five years would total $44.2 billion if target prices were frozen and crop loan rates continue to decline. The projection assumed favorable economic conditions and normal weather.

''This track we're on, even if you freeze target prices, is a pretty strong path toward market-oriented agriculture,'' said FAPRI Director Abner Womack.

The FAPRI projections also showed a decline in farm income, which has been running at record-high levels, to about $36 billion a year in the

mid-1990s.

#90043u2111 02/12/1990 ~United Press International

NEW YORK (FEB. 12) UPI - The dollar finished mostly higher in New York trading after a swift morning decline and recovery on rumors, later repudiated, that a major Wall Street firm was shortly to enter bankruptcy proceedings.

The dollar firmed up in day-end trading as players adjusted their holdings of West German marks in expectation of developments in the next few days on the proposed monetary union of the two Germanies.

But the U.S. currency moved down against the yen, whose tone has improved in the final runup to Feb. 18 Japanese parliamentary elections which the ruling Liberal Democratic Party now looks capable of weathering.

Late in the New York trading session the dollar was changing hands at 1.6745 German marks, up from 1.6680 marks on Friday. It was quoted at 144.30 Japanese yen, off from 144.70 the week before.

The main market mover was a rumor that Drexel Burnham Lambert Inc. was about to enter Chapter 11 bankruptcy. But the troubled firm said it was just looking for an investment or merger partner to bring in cash.

Trader Hugh Walsh of the Amsterdam Rotterdam Bank said reports on Drexel set off brisk dollar-selling - but when they were not borne out participants moved quickly to cover short, or selling contracts.

Christiane Mandell, a foreign exchange vice president with Security Pacific International Bank in Los Angeles, said the mark rallied on news East and West German politicians would sketch monetary union guidelines this week.

World financial markets are jittery about the union, which could spark a run of European inflation. But Mandell said the prospect of clarification on the plan gave the deutsche mark a lift. Traders hedged positions later on, though, in case mark-bearish news came out of the Bonn talks. "Market operators are becoming increasingly leery about holding onto marks," said Albert Soria, first vice president with Kansallis Osake Pankki.

In New York the British pound eased to $1.6925 from $1.6950. Other dollar rates: 1.4990 Swiss francs, up from 01.4902; 5.6925 French francs, up from 5.6695; and 1,245.50 Italian lire, 1,241.

In Europe the dollar closed mixed against the key currencies. It was lower in Frankfurt, finishing at 1.6705 German marks against 1.6750 Friday, but rose in Zurich to 1.4980 Swiss francs against 1.4945.

It rose in Paris and Milan to 5.7005 French francs from 5.6810 and 1,245.30 Italian lire from 1,242.60. But it declined in Brussels to 34.94 Belgian francs compared with 35.085. In London the pound advanced to $1.6960 from $1.6905.

Republic National Bank in New York closed cash gold at $419 an ounce, up from $416 Friday. The New York Commodity Exchange settled gold at $419.20 an ounce, up from $416.10. In Zurich gold rose to $419.50 an ounce from $416, while in London gold rose to $419.25 an ounce from $415.75.

Republic closed cash silver at 5.295 an ounce, up from $5.265. Comex spot silver rose to $5.286 an ounce from $5.254. Zurich silver climbed to $5.35 an ounce from $5.30. London silver rose to $5.32 an ounce from $5.27.

#90043u2138 02/12/1990 ~United Press International
BRUSSELS, BELGIUM (FEB. 12) UPI - British Prime Minister Margaret Thatcher's call to ease European Community sanctions against South Africa sparked heated resistance Monday in advance of a key meeting in Ireland.

The Brussels representative of the African National Congress, joined by the largest delegation in the European Parliament, the socialists, said

the release of Nelson Mandela was not enough to merit a lifting of sanctions.

EC Commission Vice President Manuel Marin, who visited southern Africa last week, also said he would urge EC foreign ministers at a Feb. 20 meeting in Dublin to delay easing of sanctions until a dialogue is begun between the South African government and the country's black majority.

Following Mandela's release on Sunday, Thatcher said the 12-nation EC should ''consider lifting some of the sanctions'' imposed in 1986, which included a moratorium on new investments and a ban on imports of iron, steel and gold coins from South Africa.

Socialists, who hold 180 of the European Parliament's 518 seats, called on the Irish presidency of the EC to issue an emergency statement opposing Thatcher's suggestion.

''Mrs. Thatcher is falling over herself in her unseemly haste to remove sanctions,'' said Glyn Ford, vice president of the socialist delegation, who introduced the resolution at the Parliament in Strasbourg, France.

''We welcome the release of Nelson Mandela, but it is only the first step on a very long journey that the apartheid regime in South Africa has to travel before it should be allowed to join the community of civilized nations,'' he said.

Meanwhile, the ANC representative in Brussels, Ted Pekane, said he would seek a meeting in the next week with Irish Prime Minister Charles Haughey to urge that sanctions be retained. Haughey holds the rotating EC presidency through June.

''We hope to meet with Mr. Haughey and convince him before this meeting takes place in Ireland that it is too early to lift sanctions,'' said Pekane, who held a Brussels news conference with other organizations opposed to the lifting of EC sanctions.

A spokesman for the Irish delegation to the EC said no decision had been made on the various pleas to Haughey. He also said a letter from Thatcher, urging reconsideration of the EC sanctions, was received by Haughey a day before Mandela was released.

The EC Commission issued a statement applauding Mandela's release but not addressing the issue of sanctions, which is a matter for EC foreign ministers to deal with.

The flurry of activity precedes the Feb. 20 meeting, which was originally billed as an ''informal'' session of foreign ministers. It is quickly becoming anything but that, owing to recent events in both South Africa

and Eastern Europe.

Mandela was awarded the European Parliament's Andre Sakharov Prize two years ago for his defense of freedom of thought. The Parliament's president, Enrique Baron of Spain, sent a telegram to Mandela on Monday, inviting him to address the Parliament.

West German Chancellor Helmut Kohl also sent an invitation Monday to Mandela, asking him to visit Bonn for ''political talks.'' Kohl refused comment on whether West Germany would consider lifting sanctions against South Africa, saying the issue had not been discussed by his cabinet.

OTTAWA (FEB. 12) UPI - Secretary of State James Baker conducted a series of intensive talks Monday on conventional force cuts in Eastern Europe against the backdrop of a NATO-Warsaw Pact conference focusing on permitting aerial surveillance of military sites.

The conference has brought together the 23 foreign ministers of the two opposing military organizations to discuss President Bush's May 1989 proposal to open the skies of Europe and North America to unarmed surveillance flights.

Baker, who flew to Ottawa Sunday after a weeklong trip to the Soviet Union and Eastern Europe, stressed the political advantages of what he described as ''the most ambitious measure to build confidence ever undertaken.''

''It has revolutionary implications,'' he said, adding that airplane surveillance, in addition to being more effective than spy-satellites, would involve the consent of a country to be inspected.

''A state's decision to open its airspace to another state's surveillance aircraft is a highly significant political act in and of itself.''

His Soviet counterpart, Eduard Shevardnadze, said the Soviet Union favors the plan and wants to expand the surveillance to the oceans and to outer space.

Baker took the occasion of the conference to hold private meetings Monday with Shevardnadze and the foreign ministers of West Germany, Romania, France, Britain, Turkey and Poland.

On the agenda of each of the meetings, according to U.S. officials, was the counter-proposal handed to Baker on Friday in Moscow by Soviet President Mikhail Gorbachev on U.S. and Soviet troop reductions in Central Europe.

President Bush on Jan. 31 had proposed U.S. and Soviet forces in Central Europe be reduced to 195,000 on each side, with the United States having the right to station another 30,000 troops in Britain and Italy.

The extra 30,000 would deal with the geographical problem, or as one senior U.S. official said, ''The Atlantic Ocean is wider than the Bug River.''

That was a whimsical way of suggesting Soviet troops in the western part of the Soviet Union could cross the Bug River along the Polish-Soviet border and arrive at some future flash-point faster than U.S. troops shifted back to the United States.

Gorbachev offered two counter-proposals, both of which would erase the 30,000 U.S. reservoir of troops in Britain and Italy. One would propose a ceiling 225,000, the other a ceiling of 195,000.

Baker, in his opening remarks at the ''Open Skies'' conference said Gorbachev ''moved toward our position ... but his response does not acknowledge that U.S. forces outside this limit would be an ocean away, whereas large numbers of Soviet troops would remain in the European part of the Soviet Union.''

A senior American official, briefing reporters on the basis of no further attribution, said Baker was conferring with his NATO allies but, he said, ''No decision is required within hours.''

The official said the figure given by Gorbachev would only be a ceiling and the actual number of Soviet troops in Eastern Europe might be far lower, since Czechoslovakia, Poland and Hungary have indicated they want the Soviet forces stationed in their countries to leave.

The official added the situation in Eastern Europe is changing rapidly and if the Soviet commander of the Warsaw Pact were to order his Eastern European allies to mobilize to attack the West, ''He would likely get a rude response.''

But Baker and the official said it is important to pin down East-West military reductions and the means to verify them in order to lock in the changes putting an end to the Cold War in Europe.

#90043u2222 02/12/1990 ~United Press International

LONDON (FEB. 12) UPI - Prime Minister Margaret Thatcher said Monday that Polish Prime Minister Tadeusz Mazowiecki's accomplishments were ''a miracle'' and promised her support as he continues to make democratic and economic reforms.

Mazowiecki arrived for a three-day visit focusing on Poland's staggering $40 million foreign debt and the country's concerns about a reunified Germany.

It was the second visit of a Polish prime minister since the end of World War II. Prime Minister Piotr Jaroszewicz was in London in 1976.

Mazowiecki planned to meet Tuesday with opposition Labor Party leader Neil Kinnock, and Foreign Secretary Douglas Hurd and Prince Charles Wednesday.

After 2 1/2 hours of talks at her 10 Downing Street office, Thatcher praised the work of Mazowiecki, who was elected six months ago and is the first non-communist leader of a Warsaw Pact country.

''What has happened since my visit to Gdansk seems a miracle, a miracle for the Polish people who worked so hard,'' a Foreign Office spokesman quoted Thatcher as saying. She visited the Polish shipyard in November.

Thatcher also said Britain would be ''as helpful and as constructive as we can be'' on resolving Poland's debt crisis.

Mazowiecki warned world leaders his government's austerity program is jeopardized by its $40 billion foreign debt. He asked the Paris Club Friday for a virtual freeze on the $30 billion his country owes the group's 17 creditor nations.

The Polish government newspaper Rzeczpospolita said Britain holds more than $2.2 billion of its financial burden, more than 70 percent of it guaranteed by the British government.

Mazowiecki has struggled to introduce a market economy in the face of serious economic problems, including inflation that reached 60 percent in January.

Poland is showing other signs of stress from the reforms. Unemployment jumped from 9,600 in December to 55,800 in January as the measures began to take hold, and industrial output, exports and imports have plummeted.

Despite the painful program he has instituted, Mazowiecki has retained a popular rating of over 70 percent.

Rzeczpospolita said Britain had requested the meeting to discuss with Mazowiecki the shifting politics in the East Bloc.

Of particular concern to Poland, which suffered more material losses than Germany in World War II and the deaths of 6 million citizens, is the possible reunification of the Germanys.

Poland has declared support for German reunification if it begins with confirmation of the Oder-Neisse line, which marks its western boundary with East Germany.

While Poland and East Germany have affirmed the postwar border shift, West Germany has not.

Thatcher, who has urged West German Chancellor Helmut Kohl to move slowly toward reunification, told Mazowiecki the Polish-German border must be agreed before the Germanys reunify, the Foreign Office said.

She also supported Poland's application for membership to the Council of Europe, formed in 1948 to promote the rule of law, human rights and economic and social progress.

#90043u2229 02/12/1990 ~United Press International

MOSCOW (FEB. 12) UPI - Riots and pogroms erupted in the mainly Moslem republic Tadzhikistan in Soviet Central Asia, leaving several people dead and dozens wounded and prompting imposition of a state of emergency Monday in the capital of Dushanbe.

''In connection with a sharp complication of the situation in Dushanbe, the ruining of public order, the appearance of extremism accompanied by mass disorders, pogroms, arson and robberies, the presidium of the

Tadzhikistani Supreme Soviet announced a state of emergency and imposed a curfew from 10 p.m. to 6 a.m. in Dushanbe from Feb. 12,'' the official Tass news agency said.

Soviet television said rioters, most of them youths, rampaged against Armenian refugees from last month's pogroms in Azerbaijan who were living with relatives in Dushanbe, a city of 316,000 people formerly called Stalinabad in western Tadzhikistan near its border with Uzbekistan.

The rioters also looted stores and stoned police who tried to stop them, the television said. ''Several people were killed and several dozen were injured,'' it said.

The reports did not provide the ethnic background of the rioters. Native Tadzhiks are a majority in the largely Moslem republic, which also has a large Uzbek population and significant numbers of Russians and Ukrainians.

''Tadzhikistani Interior Minister M. Nobzhuvanov was given emergency powers on the territory of the city,'' Tass said.

The outbreak of violence in Dushanbe occurred less than a month after Moslem Azerbaijanis carried out pogroms against Christian Armenians in the Azerbaijani capital of Baku, sending tens of thousands fleeing from the republic and prompting Soviet leader Mikhail Gorbachev to order troops to storm the city Dec. 20 to quell the worst ethnic unrest since he took office.

The pogroms in Baku left at least 62 people dead, mainly Armenians, while 159 people, most of them Azerbaijanis, were killed in the Soviet army action.

Unlike the Shiite Moslem Azerbaijanis, the majority Tadzhiks are Sunni Moslems.

Their republic borders on China to the east and Afghanistan to the south, where Moscow last year ended its 10-year involvement in a war against Moslem Afghan rebels.

In pogroms in Central Asia last June, Uzbeks and Kazakhs routed Meskhetian Turks, leaving more than 100 dead and forcing the Soviet military to airlift the Turks into the Russian republic.

Nearly 60 percent of Tadzhikistan's 4.8 million people are native Tadzhiks. Uzbeks make up 23 percent of the population, and ethnic Russians and Ukrainians comprise about 10 percent.

Tadzhikistan belonged to the Persian Empire before it was conquered by Alexander the Great. The Tadzhiks are ethnically related to Iranians, and

their republic is the only one of the Soviet Union's 15 republics where an Iranian language is spoken.

Mt. Communism, a snow-capped, 24,590-foot peak once called Mt. Stalin, is the highest point in Tadzhikistan and in the Soviet Union. Huge mountain glaciers feed numerous rivers in the high-altitude republic, whose lowest valleys are at least 11,500 feet above sea level.

The five republics that make up Soviet Central Asia are home to the ''Moslem Crescent,'' where most of the vast country's 50 million Moslems live, along with Azerbaijan in the Transcaucuses.

The nation's Moslem population is growing rapidly. Soviet Central Asia claims the highest birthrate in the Soviet Union, and Tadzhikistan ranks No. 1 among all the 15 republics.

DES PLAINES, Ill. (FEB. 13) UPI - Sutton Holdings Corp., which has been trying to take over DeSoto Inc., Monday threatened to reduce its $50-a-share tender offer for the suburban Chicago paint manufacturer unless DeSoto acts to enhance shareholder value.

New York-based Sutton indicated it is unhappy with a decision by Sears, Roebuck and Co. to cancel its contract to buy consumer paint from DeSoto.

Sutton urged DeSoto to drop its opposition to the takeover and warned DeSoto's decision to restructure and change its business focus could have an adverse effect on the value of its shares and its employees. If that happens, Sutton said it would lower its $50-a-share tender offer.

The letter, signed by William Spier, asked DeSoto executives to meet with Sutton officers to discuss the company's value and also sought assurances Sutton would be treated fairly by Sears.

''As both DeSoto and Sears have publicly stated that they will cooperate with any purchaser of the consumer paints business, we hope that you will cooperate with us in satisfying this very reasonable objective,'' Spier wrote. ''Absent these actions on your part, we believe you will not be pursuing in good faith efforts to maximize shareholder value.

''Moreover, your failure to promptly cooperate may compel us to reconsider the pricing of our offer shortly.''

Sutton said without a ''clear good faith effort by DeSoto to assure maximization of shareholder value as soon as possible, we will be compelled to initiate a proxy contest.''

Sutton said if DeSoto begins acquisition talks, Sutton will allow the company to solicit offers from other bidders. It also urged DeSoto to abandon plans to sell its consumer paint business.

''This plan (the sale) threatens the viability of this business,'' Spier wrote.

Sutton announced Nov. 9 it would try to acquire DeSoto, a paint and coatings manufacturer. Sutton is a New York-based investor group.

#90043u2250 02/12/1990 ~United Press International

SAN SALVADOR, EL SALVADOR (FEB. 12) UPI - Witnesses Monday blamed the Salvadoran Air Force for bombing a house during a battle with rebels and killing four children and an adult who recently returned to El Salvador from a Honduran refugee camp.

Also Monday, a 15-member Congressional delegation toured the site of the Nov. 16 slaying of six Jesuit priests and two of their employees.

A witness said a group of children had taken refuge in the house before it was bombed Sunday during combat between government soldiers and rebels of the leftist Farabundo Marti National Liberation Front.

''They were bombing the whole area, so we put the children in the brick house,'' a woman who lives in the Corral de Piedra resettlement community said by telephone. ''But it was no use. Four helicopters and two planes flew over and the children were killed, and many wounded also.''

Witnesses said four children and an adult in the house were killed.

The incident occurred 31 miles north of San Salvador in the province of Chalatenango, when units of Military Detachment No. 1 called in air support after a confrontation with about 60 guerrillas, military sources said.

The Armed Forces Press Committee blamed guerrillas for the bombing.

The committee also issued a statement saying that ''as a result of the combat, 15 civilians were wounded, including men, women and children. ... Also, six terrorists were killed.''

The woman who witnessed the incident said 10 children aged four months to 12 years old were among 15 people wounded when the house was hit.

The military prevented seven foreign journalists riding in three vehicles

from traveling to the scene Monday morning.

But Corinne Dufka, a photographer who reached the area Sunday afternoon, confirmed the civilian deaths. ''I didn't see any dead guerrillas,'' she said, adding witnesses said they were sure the house was hit by an Air Force rocket. ''They said they saw the rockets,'' Dufka said.

The dead civilians returned to El Salvador about three months ago during a mass repatriation of refugees who had been living in camps in neighboring Honduras. Most the refugees fled El Salvador's civil war nine years ago and lived within the confines of U.N.-run camps until late last year.

The FMLN has been fighting the Salvadoran government for 10 years and the war has killed more than 72,000 people, most of them civilians.

Separately, a 15-member congressional delegation headed by Rep. Joe Moakley, D-Mass., lay a wreath at the tombs of the six murdered Jesuits, who included some of El Salvador's most respected leftist intellecturals.

Col. Guillermo Alfredo Benavides, three lieutenants and five lower-ranking officers have been charged with murder in the case.

Officials of the Jesuit-run University of Central America, where the killings took place, gave the congressmen a tour of the residence where the priests died.

The university's rector, the Rev. Francisco Estrada, said religious authorities were not totally satisfied with the investigation into the killings.

''The material (actual) authors receive orders. The problem of this country is with those who give orders to kill unarmed civilians,'' Estrada said. ''Right now the investigation is concentrated only on the material authors and on some link to the intellectual authors.''

#90043u2275 02/12/1990 ~United Press International

SANTA BARBARA, CA (FEB. 12) UPI - Financial Corp. of Santa Barbara, parent of troubled Santa Barbara Savings and Loan, said Monday that the Office of Thrift Supervision has turned down the capital plan filed by the thrift.

The decision by the OTS will add further restrictions to the operations at the thrift, which was told by federal regulators Dec. 29 that it could not make any new loans.

The new restrictions will mean that Santa Barbara Savings will need prior

written approval by regulators for a number of moves, including sale of more than $1 million of assets; leases or contracts worth more than $500,000 and increasing the compensation of any employee or director being paid more than $50,000 a year.

The OTS rejected the capital plan by the 44-branch thrift even though the parent company had completed exchange offers last month that will add more than $50 million in capital, said Mary Essary, vice president of public and investor relations.

The company said the OTS gave the the thrift's low capital level as the sole reason for its rejection of the plan, which called for seeking external capital or a buyer and generating improved earnings to meet the new capital requirements.

Many analysts had not expected Financial Corp. of Santa Barbara to be able to complete the offers because of the poor climate for raising thrift capital.

However, even with the exchange, the thrift's capital levels remained under the new requirements that went into effect Dec. 7.

#90043u2294 02/12/1990 ~United Press International

HELSINGBORG, SWEDEN (FEB. 12) UPI - The Social Democratic minority government, under fire for pushing a non-negotiable austerity plan, backed down Monday and cut a proposed strike ban from the package to try to win parliamentary approval and avoid early elections.

''Well, we've had such harsh reactions from grass roots that our ban on strikes is to be removed from our parliamentary proposal,'' Lars Olander, the Social Democratic parliamentary committee negotiator, said Monday night. ''You could call this proposal a misjudgment.''

Olander said the government was cutting the proposal for a two-year ban on all strikes from the package which also calls for an overall wage, price and rent freeze.

''Well, at least this is some progress and shows a bit of realism,'' said Lars Werner, chairman of the Communist Party, which normally supports Social Democratic governments. ''Let's hope they're just as realistic on the other items.''

The Communists have opposed both the strike ban and a wage freeze.

The decision by Prime Minister Ingvar Carlsson to drop the proposed ban from a proposal he had said was not negotiable seemed to ease pressure on

his Social Democratic government, which political analysts said earlier in the day could be forced into early general elections.

Carlsson had said the proposal must be passed this Wednesday in its entirety, adding Sunday night, ''If Parliament turns down any of the suggestions, the government will resign.'' Parliament now is to consider the plan Thursday.

Sweden's government crisis was triggered when Social Democratic Finance Minister Kjell-Olof Feldt proposed the package Thursday to deal with runaway wage demands, inflation and the prospect of rocketing private consumption.

Feldt shocked the placid welfare state by announcing sweeping measures to heal an ailing economy, in what the opposition immediately dubbed the declaration of an economic state of emergency.

The proposal, which would have been in force in 1990 and 1991, called for banning all strikes, a two-year freeze on wages, prices and municipal taxes and mandatory arbitration.

Statistics provided by the Geneva-based International Labor Organization show a law banning strikes would place Sweden in the company of only eight other countries - Nicaragua, Colombia, Chad, Liberia, Syria, Pakistan, Bangladesh and Thailand.

Feldt said Sweden, which several East Bloc states have considered a model for their economic and social policies, was ''rushing at full speed into a cost crisis. It is tough medicine and a deviation from the Swedish model of free wage negotiations, but it is necessary.

''It is impossible to have wage increases of 10 to 20 percent when production only increases by 1 percent. If the merry-go-round continues, the wage market will end up in anarchy,'' Feldt said.

Opposition parties had little sympathy with the Social Democrats, who have ruled Sweden for most of this century and have been the sole architects of an expensive welfare state.

''The government is in panic and is pulling the emergency brake. They should get off the train instead. Resign,'' Liberal Party spokeseman Ingemar Eliasson said.

Monday's about-face was the third time in as many years Carlsson has retreated on policy.

In late 1987 he was forced to dismiss Minister of Justice Anna-Greta Leijon for involvement in a private probe into the 1986 assassination of

Prime Minister Olof Palme. And in 1988 the government dropped a Social Democratic plan to increase value-added tax, also a key part of an austerity package.

Sweden is fighting one of Europe's highest inflations at 6.7 percent and several unions have demanded major wage increases. Inflation for 1990 is forecast at up to 9 percent and latest figures from Sweden's Department of statistics show industrial wages rose 10.5 percent last year.

Monday's crisis came as bank employees entered the 15th day of an all-out strike and lockout with demands for a 20 percent raise. Sweden's Municipal Employees Union, which counts more than 110,000 members has called a strike Tuesday.

#90043u2555 02/12/1990 ~United Press International
(FEB. 12) UPI - President Bush says progress is being made in super power arms control negotiations... Nelson Mandela enjoys his first full day of freedom in more than 27 years... Strom Thurmond goes for a record in announcing he'll run for a seventh term in Congress... and Donald Trump says he wasN'T dumped. These stories and more, up next from U-P-I...

President Bush says ''solid progress'' is being made in three key areas of arms negotiations with the Soviet Union.

But the president is stopping short of promising superpower treaties on conventional arms limits and chemical weapons will be signed at a White House summit in June.

President Bush insists Secretary of State Baker achieved many of the goals set by himself and Soviet President Gorbachev during the summit in Malta. The president adds that important headway was made regarding regional issues such as Central America and Afghanistan.

However, Bush appears to be rejecting Gorbachev's counter-proposal concerning conventional troop levels in Europe. Bush is proposing a cut-back of 195-thousand troops from both sides, but is suggesting the United States retain 30-thousand soldiers in Western Europe.

Gorbachev's plan would leave the two superpowers with the same troop numbers in all of Europe. President Bush says he wants to get away from

the idea of ''linked reduction.''

#90043u2589 02/12/1990 ~United Press International

PORTLAND, Maine (FEB. 12) UPI - Great Northern Nekoosa Corp. requested Monday a preliminary injunction against Georgia-Pacific Corp.'s $4.5 billion takeover bid, accusing the rival papermaker of covering up plans to sell assets.

Georgia-Pacific urged U.S. District Judge Gene Carter to dismiss the complaint and charged Great Northern of attempting to scare Maine residents with arguments it called legally irrelevant.

Georgia-Pacific also said Monday it would sell mills in Vermont and Iowa in a bid to address antitrust charges raised by Great Northern in a seperate lawsuit.

Great Northern has accused Georgia-Pacific of planning to sell GNN's mills in Millinocket and its 2.1 million acres of Maine forest land but then denying the plans in a statements to shareholders and the public.

''They say they made a corporate decision not to sell those assets but there is not a document to support that contention,'' Great Northern's lawyer Bernard Nussbaum told Carter.

Some internal Georgia-Pacific documents released by Great Northern have classified the Maine facilities as ''losers'' and ''dawgs.''

Georgia-Pacific's attorney Stewart Baskin repeated the company's claim that it has no plans to sell the mills and accused Great Northern of releasing ''smidgens'' of documents in an attempt to scare people in Maine.

''That is the only purpose of this motion,'' Baskin said.

Baskin also denied Georgia-Pacific has broken securities law. Information on the future of the Maine assets will be irrelevant to Great Northern shareholders after they have sold their shares, he said.

Nussbaum said releasing the correct information was required by law because some of the shareholders live in Maine and are Great Northern employees.

Carter did not say when he would rule on the motion. Great Northern's stockholders were scheduled to meet March 2, and Georgia-Pacific claims 75 percent have tendered their holdings to the $63-a-share offer.

Georgia-Pacific also said Monday that Nekoosa acceded to unsealing of a

memorandum showing its $63-a share offer fell in a range established by Nekoosa's investment banker, Goldman Sachs and Co., less than six months before Georgia Pacific launched its bid.

Georgia Pacific said the document was kept sealed until Monday because Nekoosa objected to public disclosure.

A Nekoosa statement said the review was prepared one year ago and was not intended as a guide for bidding on the company. Nekoosa said the review did not indicate the company's current value.

Georgia-Pacific said it has agreed to sell its safety paper mills in Gilman, Vt., and Burlington, Iowa, to Simpson Paper Co. of Seattle.

Georgia-Pacific said sale made moot Great Northern's claim in a U.S. District Court in Connecticut that the post-acquisition company would have a production monopoly on the paper used to make checks.

Georgia-Pacific vice president A.D. ''Pete'' Correll denied the mill sales were an admission of potential antitrust problems, but said the sale would speed up those proceedings.

''We still do not feel that there are any antitrust issues in this transaction,'' Correll told reporters.

Georgia-Pacific would not say what it was paid for the mills, but said safety paper production accounted for less than one-half of 1 percent of the company's total sales.

#90043u2593 02/12/1990 ~United Press International

(FEB. 12) UPI - Black nationalist leader Nelson Mandela arrived in Johannesburg today on his first full day of freedom after 27 years in prison.

Mandela was greeted by a small crowd of supporters waiting for him at the airport. It was NOT clear whether he was heading for his old home in the black township of Soweto.

Earlier today... a crowd of 60-thousand people jammed a Soweto stadium hoping to see Mandela... unaware that organizers had cancelled the rally and rescheduled it for another Soweto stadium tomorrow.

Earlier, Mandela told reporters in Cape Town that it's too early to drop economic sanctions against apartheid. He says international economic pressure played a part in his release.

Mandela also said that South Africa's 28-Million blacks must not yet abandon the armed struggle to end white domination... and he justified the struggle as a ''defensive act against the violence of apartheid.''

But, Mandela said he would seize the opportunity to settle disagreements by peaceful means. He says he is optimistic that obstacles to negotiations will be removed soon and both sides can sit down and talk.

In Washington, President Bush says he still would like to see some sanctions against South Africa withdrawn. He says some of the sanctions are ''counterproductive.'' But he says the economic penalties could NOT be lessened until South Africa takes more steps to eliminate apartheid .

Bush says he is inviting both Mandela and South African President F-W de Klerk to Washington and he says he would encourage Mandela to abandon the armed struggle against apartheid.

#90043u2610 02/12/1990 ~United Press International

(FEB. 12) UPI - The opposition Social Democrats in West Germany and the newly formed Social Democratic party of East Germany are calling for a conference of the four World War Two victors this spring to prepare for German re-unification.

The proposal comes on the eve of East German Prime Minister Hans Modrow's two-day visit to West Germany. However, West German Chancellor Helmut Kohl says re-unification will NOT be a major topic during his meeting with Modrow... because the communist leader does NOT expect to be prime minister after the March elections.

Kohl says talks on the re-unification of East and West Germany will begin with the new freely-elected leaders of East Germany after next month's elections.

In a joint statement the West and East German Social Democrats say a unified Germany could belong neither to NATO... nor the Warsaw Pact.

Kohl and President Bush say a re-unified Germany should stay in NATO.

The Social Democrats' plan calls for a meeting this spring to include the United States, France, Britain and the Soviet Union. They say the talks should later be expanded to include Germany's neighbors.

Secretary of State James Baker is caucusing in Ottawa, Canada, with the foreign ministers of the Soviet Union and 23 other NATO and Warsaw Pact countries.

U-S officials say the main topic of conversation is a proposal by Soviet President Gorbachev for massive troop cuts in Europe.

The official reason for the NATO-Warsaw Pact conference is to discuss a so-called ''Open Skies'' proposal that would allow member countries of the rival pacts to fly over each other's military installations and take pictures.

Soviet Foreign Minister Eduard Shevardnadze says the Soviet Union favors the plan and wants to expand the surveillance to the oceans and to outer space.

But Baker... fresh from a series of meetings in Eastern Europe and the Soviet Union... is reportedly taking advantage of so many foreign ministers in one place to talk troop cuts.

#90043u2633 02/12/1990 ~United Press International

(FEB. 12) UPI - South American officials say they view Thursday's anti-drug summit in Colombia as a signal that the United States has changed its attitude toward the drug problem.

President Bush will travel to Cartagena Thursday to participate in the one-day conference. It'll involve the world's largest consumer of cocaine- the United States- and the nations that produce the drug... Colombia, Peru, and Bolivia.

The president's visit to the South American nation for talks with other leaders is being received as a very positive sign. Latin American leaders repeatedly have said the drug problem is a complicated economic and social situation. Colombia has criticized the United States for sending arms to fight the bloody drug war without cracking down on U-S consumers which provide drug cartels with BILLION of dollars.

The four nations are expected to sign an agreement that will include aid to help wean the fragile Latin American economies off the lucrative cocaine trade.

A living legend in South Carolina and the oldest member of Congress says he'll run again. 87-year-old Republican Senator Strom Thurmond says he's ready for a seventh six-year-term.

The South Carolina senator announced his plans today in the town of Aiken with his wife and key political supporters at his side. Thurmond is a heavy favorite for re-election. NO Democrat has stepped up to challenge him.

When asked about his advanced age, the elder statesman points to his daily physical fitness routine. His campaign reportedly will show Thurmond working out at a health club and running up and down the Capitol Hill steps.

The oldest senator ever elected was Democrat Theodore Green from Rhode Island. Green was re-elected in 1960 at the age of 87 years and one month and left office at the age of 93. If Thurmond completes the next term, he would be 94 years and one month old.

Thurmond's family life may offer living proof of his vitality. In 1968, eight years after his first wife died, Thurmond married a 22-year-old former Miss South Carolina. He and his second wife have four children, the last of which was born when Thurmond was 73.

#90043u2785 02/12/1990 ~United Press International

BEVERLY HILLS, Calif. (FEB. 13) UPI - A share of Hilton Hotels Corp. stock jumped nearly $3 Monday following a report that Los Angeles investor Alfred Checchi may be trying to bid for the lodging chain.

Hilton stock, which has declined sharply over disappointment a lack of bids since the company put itself up for sale in August, rose $2.875 a share to $64.625 on the New York Stock Exchange.

The Wall Street Journal reported Monday that Checchi and Fred Malek were trying to secure financing for a Hilton bid. Both are former officers with the Marriott Corp. and believe their experience in operating a hotel chain could help them add value to Hilton, which has more than 270 hotels.

Hilton's board met two weeks ago to review bids, but took no action. The other offers reportedly have come from JMB Realty Corp. of Chicago and Miller-Klutznik-Davis-Gray Co., the real estate investment vehicle for Los Angeles investor Marvin Davis.

#90043u3144 02/12/1990 ~United Press International

(FEB. 12) UPI - President Bush says it's- quote- ''absurd'' for Colombians to fear the U-S Navy will blockade Colombia's coast to stop drug traffickers. Bush made the remarks during a White House news conference today... blaming the concern on ''mischievous'' news stories. Bush adds he's attending the drug summit in Colombia Thursday to show American support for anti-drug effort by Colombia, Peru, and Bolivia.

Black nationalis leader Nelson Mandela has arrived in Johannesburg where he was greeted by a small crowd of supporters at the airport. Security concerns may prevent him from returning to his former home in the nearby black township of Soweto. Tens of thousands of supporters are waiting to greet Mandela in the streets of Soweto.

Israeli Prime Minister Shamir says he got the vote of confidence he wanted during a chaotic meeting of his party's Central Committee today. Shamir's party rival, Trade and Industry Minister Ariel Sharon, disrupted the meeting by announcing his resignation. The effect doesN'T take effect

immediately, leaving time for reconciliation.

Houston homeowners who claim the Monsanto Company dumped toxic chemicals in their neighborhood are expressing outrage at today's ruling that the company is NOT liable for damage to their health or property. A group of 222 homeowners were seeking 355-Million dollars from the St. Louis-based chemical manufacturer.

The Indian government summoned a Pakistani diplomat today to repeat its charge that the Pakistani government is fueling anti-Indian sentiment in the mainly Moslem Kashmir Valley. India's foreign secretary reportedly presented evidence Pakistan is supporting and training the separatists. 400 miles north of New Delhi, in the state capital of Srinagar, new separatist violence has left three people dead.

#90043u3447 02/12/1990 ~United Press International

(FEB. 12) UPI - A crowd of admirers is keeping vigil outside the home of anti-apartheid leader Nelson Mandela in Soweto, South Africa. Mandela is NOT expected home until tomorrow. Youths raising clenched fists are jogging in scattered formation and chanting ''A-N-C will conquer! A-N-C will govern!'' A banner on Mandela's fence proclaims- ''Education, Houses Security and Comfort for All.''

President Bush says some of the economic sanctions against South Africa are ''counterproductive''... but he says he has NO choice but to leave the sanctions in place. U-S law mandates the sanctions against South Africa continue until the state of emergency is lifted and all political prisoners are released. Bush says he will discuss sanctions with South African President de Klerk if de Klerk accepts an invitation to visit the United States.

The Soviet news agency Tass says riots and pogroms erupted in the mainly Moslem republic Tadzhikistan in Soviet Central Asia, leaving several people dead and dozens wounded. The violence prompted imposition of a state of emergency in the Republic' capital city. Soviet television says rioters also looted stores and stoned police who tried to stop them. Tadzhikistan is on the Iranian border.

A band of black goo 20 to 30 feet wide and several inches thick washed ashore in Southern California today as Coast Guard officials monitored a storm that threatens clean-up operations along the coastline. Booms are protecting several wildlife refuges, but an increasing number of dead and oil-coated birds have washed up on Huntington and Newport beaches. A disabled tanker spilled the oil Wednesday.

#90043u3458 02/12/1990 ~United Press International
(FEB. 12) UPI - President Bush says he's NOT ready to accept an equal number of U-S and Soviet troops in Europe... as Soviet President Gorbachev is proposing. But Bush says ''solid progress'' was made on troop cuts during Secretary of State Baker's meeting with Gorbachev last week. Bush says the situation is NOT at an ''impasse.'' He says negotiations are going well.

Two Coast Guard radar watchers testified in the trial of fired Exxon Valdez skipper Joseph Hazelwood today. The two tanker watchers said they saw the huge vessel disappear from their radar screens just before it ran aground. Gordon Taylor and Bruce Blandford testified they did NOT notify the skipper that his ship had left their screens and was on a collision course with Bligh Reef.

In San Francisco, two Shanghai police officers who testified in a major U-S-China heroin smuggling case have been abruptly called back home by the Chinese government. The action occurred after a controversial key witness asked for political asylum. The assistant U-S attorney says the Chinese government called for the return of the two officers to express their unhappiness with the asylum request.

Nominations for the 10th Annual Raspberry Awards were announced today and heading the list is Sylvester Stallone, Jane Fonda, Brigitte Nielsen, and Tony Danza. The tongue-in-cheek Razzies attempt each year to upstage the Academy Awards with ''honors'' for the year's worst pictures, performers, and directors. Stallone was nominated for his performance in ''Lock-Up'' and Fonda for ''The Old Gringo.''

-30- 1731
#90043u3728 02/12/1990 ~United Press International
(FEB. 12) UPI - Soviet television says youths in the Soviet Republic of Tadzhikistan have begun rioting against Christian Armenians. Most of the Armenians are refugees from last month's violence in Azerbaijan. The television reports several people killed and dozens wounded today when the youths began looting stores and stoning police who tried to stop them. The Tass news agency says authorities have imposed a state of emergency in the capital, Dushanbe.

President Bush is praising the ''positive leadership'' shown by the South African government in releasing jailed black nationalist Nelson Mandela. Bush made the remarks during a White House news conference and stressed that sanctions must remain in place until apartheid is abolished. Bush has invited Mandela and South African President de Klerk to Washington to discuss the sanctions.

Also at the news conference, Bush rejected a Soviet counter-offer on superpower troop reductions. The president dismissed a call for equal troop levels in Europe because of the distance separating the United States from its NATO allies. Bush did say that ''solid progress'' was made in the U-S-Soviet agenda in preparation for the June summit. In his words- ''If we continue this kind of momentum... the summit will be a major success.''

In Ottawa today, Secretary of State Baker conducted several intensive talks on conventional force cuts in Eastern Europe. A NATO-Warsaw Pact conference involving 23 foreign ministers provided the backdrop for Baker's meetings. That conference was called to discuss the possibility of a proposal that would open the skies of Europe and North America to unarmed surveillance flights. Baker says the plan has ''revolutionary implications.''

-30- 1906

#90043u3763 02/12/1990 ~United Press International

(FEB. 12) UPI - Classes at Selma, Alabama, High School are set to resume tomorrow after being closed for a week by racial unrest. Black students today ended their sit-in at the school cafeteria and went to City Hall to demand the mayor's resignation. The demonstration was sparked by the white-controlled school board's firing of the black school superintendent. The superintendent was reinstated last week but was NOT given a contract extension. The students ended their sit-in today after the superintendent threatened to resign if they didn't.

Americans for Democratic Action are proposing a new nationwide health care system similar to that of Canada. The group, about 60-thousand members strong, is calling for the formation of 150 central medical complexes to co-ordinate care. The federal health insurance system would be financed by taxpayers. Says the A-D-A director- ''Liberals have always been the people who have looked at real problems and come up with realistic solutions.''

A broadcast news report in Washington, D-C, says Mayor Marion Barry could be indicted as early as Thursday by a federal grand jury. The indictment reportedly could include at least two counts of perjury and five counts of illegal drug use dating back four or five years. Barry already faces a single misdemeanor drug possession charge after his arrest last month. He remains at a Florida substance abuse treatment center.

Another Guinness World Record. The famous book of world records will be sold for the first time in the Soviet Union. However, the world's biggest McDonalds... which just opened in Moscow... did NOT make it into the new Russian version of the book. It took 10 years of negotiations by the publishers of Guinness to crack the Soviet market. By the way, the Soviet

Union boasts the world's largest bell... the world's biggest ballet... and the world's biggest reservior.

-30- 2057

#90043u3946 02/12/1990 ~United Press International

(FEB. 12) UPI - Nelson Mandela is in Johannesburg and today enjoyed his first full day of freedom after 27 years in prison. Tens of thousands of jubilant supporters filled the streets in the black township of Soweto, hoping to welcome the nation's most powerful symbol of opposition to white rule.

But organizers canceled Mandela's appearance at a soccer arena after many children were trampled in the mad rush to enter the stadium. Aides are taking extra precautions with Mandela's safety and are wary about large crowds. Mandela's exact whereabouts are NOT known, but it's expected he'll spend the night in northern Johannesburg.

Mandela greeted reporters in the gardens at the home of Anglican Arhcbishop Tutu for a 45-minute news conference earlier today. He held hands with his wife, Winnie, and was joined by other family members including his daughter and three grandchildren.

The anti-apartheid activist said the African National Congress is- quote- ''ready to make a positive contribution.'' He added- ''We'll seize the earliest opportunity to settle our problems by peaceful means.''

President Bush says he's ''bound by the law'' to continue economic sanctions against South Africa... even though Bush says he considers some of the sanctions ''counter-productive.''

Bush says he'd like to discuss sanctions with South African President de Klerk if de Klerk accepts an invitation to visit the United States. Bush says both de Klerk and anti-apartheid leader Nelson Mandela have accepted invitations ''in principle.''

Bush praised de Klerk for freeing Mandela and said the move evidences a ''new brand of leadership.''

Mandela has thanked de Klerk for the release... but Mandela says he wants the international community to keep up economic pressure on the government until apartheid is completely dismantled.

Sanctions passed by Congress in 1988 would require South Africa to lift the state of emergency and free all political prisoners before they could be lifted.

Also today... Bush rejected the idea proposed by Soviet President

Gorbachev that the United States and the Soviet Union keep equal numbers of troops in Europe. Bush says troops in the European section of the Soviet Union are much closer to Europe than troops on American soil.

-30- 2467

#90043u3961 02/12/1990 ~United Press International

(FEB. 12) UPI - Beaches along California's southern shore were blanketed by heavy bands of black goo up to 30-feet wide today.

Some 400 clean-up workers were busy swabbing the beaches as the damaged tanker that spilled the oil Wednesday weighed anchor and headed to a harbor near Huntington Beach.

An official for British Petroleum- which leased the tanker- spoke of the contamination and said- ''It's the heaviest oiling we've encountered so far.''

The Coast Guard decided, after meeting with shipping company officials and inspecting the tanker, that the damaged vessel was safe enough to move. A three-by-five-foot gash in the ship's hull has been repaired. Officials say they believe the 20-year-old tanker was damaged by its own anchor.

The Coast Guard also reports that drug tests were negative on the ship's captain, the mooring pilot and the ship's second mate, who was on watch at the time of the accident.

The Coast Guard's role in the Exxon Valdez oil spill in Alaska became a bit more clear today after two Coast Guard radar technicians testified at the trial of fired captain Joseph Hazelwood in Anchorage.

The two radar watchers said they did NOT notify Hazelwood when the large tanker sailed off their radar screens. They also testified they did NOT try to track the ship until after it grounded on Bligh Reef.

The Exxon Valdez was the only ship under surveillance by the Coast Guard vessel traffic center for hours before the March 24th wreck.

The Coast Guard watchman, who came on duty 25 minutes before the grounding and 45 minutes before the Valdez radioed it was in trouble, said he never tried to locate the off-course vessel because the earlier watchman told him the tanker had disappeared from radar.

Defense lawyers for Hazelwood are trying to demonstrate that perhaps it was Coast Guard negligence and NOT Hazelwood's drunken recklessness that caused the accident.

-30- 2098
#90043u3972 02/12/1990 ~United Press International
(FEB. 12) UPI - Black students have ended their protest at a Selma, Alabama, High School. Mayor Joe Smitherman later announced that classes would resume tomorrow at 11 schools closed for nearly a week because of racial tensions.

The students were protesting the treatment the city's first black school superintendent has been getting from the school board's white majority.

The board fired norward Roussell earlier this month... saying he lacked the necessary managerial skills for the job. Bowing to pressure from the black community... the board reinstated Roussell last Tuesday... but refused to extend his contract that expires in June.

Students sat in the high school's cafeteria for five days... but left today when Roussell told them their sit-in would lead to him getting fired again.

They marched from the school to City Hall... where another sit-in by angry blacks continued demanding Smitherman's resignation. Six student leaders met with Smitherman... but left after the meeting, shouting ''Joe will go, Joe will go.''

City officials are expecting a record turnout tomorrow in Aspen, Colorado... where a referendum could ban the sale of fur in the ski resort town that caters to the wealthy. Aspen has one fur store for every one-thousand people.

Another referendum issue generating controversey would cut the size of a planned luxury hotel at the foot of Aspen Mountain by one-third.

Several celebrities turned out for a weekend demonstration in favor of the referndum to prohibit sales of wild-animal furs... closing down four fur-clothing stores in Aspen.

A final demonstration is planned tonight by supporters of the 80-Million-dollar Ritz-Carlton Hotel convention hotel.

Deputy City Clerk Kathy Strickland expects a record 70 percent of the town's less than four-thousand registered voters to turn out for the referendum.

-30- 2046
#90043u3979 02/12/1990 ~United Press International
(FEB. 12) UPI - Washington state legislators today voted by a bare majority to allow convicted sex offenders to choose voluntary castration

in return for a 75 percent reduction in their prison sentences.

The bill was approved on a 25-23 vote in the state Senate and now will go to the state House where similar legislation has been defeated. Washington Governor Booth Gardner says he's NOT sure castration would deter predatory sex criminals.

Opponents of the bill point out that rape often is motivated by violence and NOT sexual gratification. Republican Senator Mike Patrick, a retired Seattle police officer, presented a beer bottle, a large piece of wood, and a screwdriver as examples of items some rapists use to commit their crimes. Quoting Patrick- ''It is NOT sex that drives these people. Another opponent of the bill says- ''What's going to be next if mutilation is going to be part of our public policy?''

Supporters of the bill say studies show that castration is an effective way of lowering recidivism rates in sex crimes.

-30- 1211

#90043u4099 02/12/1990 ~United Press International

(FEB. 12) UPI - Unrest in another Soviet republic. Soviet television says several people are dead and dozens wounded as riots and pogroms erupted in the mainly Moslem republic of Tadzhikistan in Soviet Central Asia. The Tass news agency says a state of emergency has been imposed in the capital city.

President Bush says South African President de Klerk has taken his country ''down the road of equity'' with the release yesterday of jailed black leader Nelson Mandela. But he says U-S sanctions must remain in place until apartheid is ended.

Mandela flew today from Cape Town to Johannesburg, where he was whisked away by car. Amid concern for his safety, aides aren't saying where Mandela is staying overnight. The African National Congress leader is scheduled to enter Soweto tomorrow for a welcome home rally.

The tanker responsible for last week's oil spill off Huntington Beach, California, weighed anchor and headed to a nearby harbor after divers repaired its hull. The worst of the oil slick began washing ashore last night and today.

Tehran Radio says the Iranian oil tanker Kharg-5... damaged in an explosion off the Moroccan coast in December... finally unloaded its cargo of crude onto another Iranian vessel at sea and is headed for a European port for repairs.

-30- 1454
#90043u4110 02/12/1990 ~United Press International
(FEB. 12) UPI - Military officials in Twentynine Palms, California, report one person killed and another injured in separate accidents involving Marine Corps aircraft. The pilot of a Harrier attack plane died after ejecting from his plane, which then crashed in a northern area of the base.

At about the same time and in the same area, an aerial observer ejected for unknown reasons from a two-seat Marine observation plane. The pilot did NOT eject and landed the aircraft safely. Authorities say they don't know if the two mishaps are related.

A Brazilian airliner attempting to land in the city of Bauru hit three houses and a supermarket before slamming onto a highway today. Police say a woman and her young son in a truck were killed. 16 people aboard the plane and four on the ground were injured.

The Air Line Pilots Association blames mechanical problems for September's crash of a U-S-Air jet that skidded off a LaGuardia Airport runway in New York. Tomorrow, federal officials will conduct a hearing into the crash, which killed two people.

The search continues for two gunmen who herded seven people into a bowling alley office in Las Cruces, New Mexico, Saturday... shot them... and then set the place on fire. Four victims died. Three others remain hospitalized.

The hunt for three murderers and two other prisoners who escaped from a maximum-security prison in Joliet, Illinois, yesterday is focusing on the Chicago area. A sixth fugitive was nabbed near his home in Chicago last night.

At age 87, Senator Strom Thurmond is the oldest member of Congress. Today, the South Carolina Republican announced he will be a candidate for a seventh six-year term. Says Thurmond- ''The matter of age is relative.''

-30- 1906
#90043u4217 02/12/1990 ~United Press International
(FEB. 12) UPI - Soviet television says riots in the mostly Moslem republic of Tadzhikistan have killed several people and left dozens more wounded. T-V reports say youths carried out so-called ethnic attacks against Christian Armenian refugees from last month's pogroms in Moslems Azerbaijan. The Tass news agency says a state of emergency has been declared in the Tadzhikistan capital of Dushanbe.

The United States and the Soviet Union are expressing confidence they will be able to agree on the basic framework of an ''Open Skies'' aerial

surveillance plan. The plan would allow Warsaw Pact and NATO members to examine each other's military installations. But the United States is rejecting a Soviet proposal that the pact include naval operations and outer space.

Aides to freed black nationalist Nelson Mandela are NOT releasing information regarding his whereabouts tonight because of security concerns. Mandela arrived in Johannesburg late today... but his aides, cautious when it comes to large crowds, canceled Mandela's appearance at a sports arena. Earlier today, the anti-apartheid activist vowed to ''seize the earliest opportunity'' to achieve a peaceful solution to South Africa's racial conflict.

Witnesses blame the Salvadoran Air Force for bombing a house where four children and an adult had taken refuge during yesterday's fighting between government troops and rebel forces in northern El Salvador. All five were killed. Military officials blame guerrillas for the bombing.

#90044b0003 02/13/1990 ~Business Wire

KANSAS CITY, MO (FEB. 13) BUSINESS WIRE - La Petite Academy Inc., the second largest provider of child-care and pre-school education in the nation, reported an acceleration in revenues and earnings in the second half of 1989 which boosted results sharply over the previous year.

In the fourth quarter ended Dec. 31 revenues amounted to $44,962,000, up from $38,861,000 in 1988, a gain of 15.7 percent. Net earnings were $2,044,000, equal to 13 cents a share against $313,000, or 2 cents a share in 1988, when there was a non-recurring charge of $1,775,000 equal to 7 cents a share relating to a litigation settlement.

Revenues in 1989 were $173,123,000 against $152,144,000 in 1988, a gain of 13.8 percent. Net earnings of $7,393,000 were equal to 47 cents a share, compared to $6,501,000, or 41 cents a share, a year earlier.

La Petite owns and operates 727 centers in 29 states serving about 77,000 children. The number of new schools opened was 74, the same as in 1988.

However, in updating and modernization of schools 21 older units were closed against 14 in 1988. The net increase was 53 against 60 in the prior year. There were 16 Montessori schools in operation, an increase of five for the year. The 13 corporate care centers are becoming an important revenue source and plans are to increase the number of these centers in 1990.

The capital expenditures for 1990 will approximate $45 million for the opening of approximately 60 new centers. The company expects sale and

leaseback transactions to continue as the principal method of financing the expansion.

     #90044b0005 02/13/1990 ~Business Wire
HILLIARD, OH (FEB. 13) BUSINESS WIRE - HDR Power Systems Inc. (NASDAQ:HDRP) Tuesday announced second quarter financial results for fiscal 1990.

Sales for the second quarter were $2,597,816, compared to $2,646,813 recorded in the like period a year ago. Sales for the 26 weeks ended Dec. 30, 1989, were $4,589,192, compared to sales last year of $5,502,941.

Net earnings for the second quarter were $145,460, or 7 cents per share, a decrease from the comparative second quarter last year net earnings of $247,023, or 12 cents per share. Net earnings for the 26 weeks ended Dec. 30, 1989, were $121,529, or 6 cents per share, compared to $537,894, or 27 cents per share, for the 26 weeks ended Dec. 31, 1988.

Net earnings for the quarter are lower primarily as a result of lower margins on standard products and higher interest expense. Net earnings are lower for the 26 weeks ended Dec. 30, 1989, as a result of lower margins on standard products, higher interest expense, and lower sales volume.

The lower sales volume is due to the discontinuance by IBM of its System 38 computer and the corresponding decrease in orders for HDR's compatible UPS system, and the fact that the company shipped a large order to Electronic Data Systems Inc. in the previous fiscal year. In response to this lower sales level,the company laid off 11 employees effective Jan. 10 1990. This layoff was anticipated by the company and will not affect the company's ability to make timely shipments of its current orders, nor inhibit the potential for future growth of the company.

HDR Power Systems Inc. manufactures a broad line of uninterruptible power systems used in both industrial and commercial business applications.

-30- 1979
     #90044b0010 02/13/1990 ~Business Wire
AKRON, OH (FEB. 13) BUSINESS WIRE - Goodyear Tuesday reported that higher

taxes on foreign earnings and the first-time inclusion of pipeline expenses were major factors in reduced earnings in the fourth quarter of 1989.

Net income of $14.7 million or 25 cents per share was down from $56.4 million or 98 cents per share in the year-earlier period. Sales of $2.8 billion were 3.2 percent below the 1988 quarter.

"There was improvement in the profitability of tires, engineered and industrial products in the United States compared to the depressed levels of a year earlier," Chairman Tom H. Barrett reported, "but they were more than offset by declines in other operations."

Included in the results of the 1989 quarter were unusual after-tax charges of $10.9 million from the consolidation of U.S. bias-ply truck tire capacity and realignment of Canadian operations. In the 1988 period, unusual after-tax charges totaled $26.8 million from the pension settlement and asset reversion and an employee separation program.

Although an extraordinary gain of $3.7 million or six cents per share was recorded in the three months resulting from the tax benefits of foreign loss carryovers, income taxes increased significantly due primarily to higher taxes on foreign earnings. In 1988, the company benefited from the tax credit associated with the pension asset reversion.

Barrett also pointed out that inclusion of depreciation and operating and interest expenses of the All American Pipeline System for the first time reduced net income in the fourth quarter by $26.4 million, an impact that will continue in future periods. These items had been capitalized prior to Oct. 1, 1989.

For all of 1989, net income amounted to $206.8 million or $3.58 per share comapred to $350.1 million or $6.11 per share a year earlier. Sales increased slightly to $10.9 billion.

Results for the year reflected $105.9 million in unusual after-tax charges including the losses recorded in the second quarter on the sales of the South Africa subsidiary and unused All American pipe as well as the fourth quarter charges. The 1988 net income was reduced by $26.8 million of unusual fourth quarter items.

Also reflected in 1989 results was an extraordinary gain of $17.4 million or 30 cents per share from utilization of foreign loss carryover tax benefits. And the year was affected by higher taxes on foreign earnings as well as the newly recognized pipeline expenses.

CHANDLER, AZ (FEB. 13) BUSINESS WIRE - ShareData Inc. Tuesday announced that it is entering the business of cartridge-based games that can be played on the Nintendo Entertainment System (NES) which is manufactured by Nintendo of America Inc.

The company has acquired the 10-year right to the technology necessary to produce these cartridge-based games from Color Dreams Inc.

ShareData has also acquired various piece parts from CDI which will significantly shorten the company's initial production cycle.

The company expects to start to mass produce and ship its first games in about 30 days. ShareData also acquired from CDI the exclusive U.S. and Canadian rights to ''Captain Comic,'' a fully developed, cartridge-based game, and the company has just completed development of its first game for play on the NES, ''Chiller,'' under its license with Exidy Inc.

''In its own development, the company is emphasizing two niches of cartridge-based games which it believes are under-exploited. These niches are two-player games and games using light guns. 'Chiller' allows two players to play simultaneously with a choice of light gun or joy stick. To our knowledge this is the only simultaneous gun game available,'' said Michael S. Williams, president of ShareData.

The company currently has additional games for use on the NES under development. It has scheduled for release in March ''Deathrace'' and ''Crossbow.'' In addition to inherent play value, the company is targeting its cartridge-based games to retail for approximately $20, a major break in cartridge pricing.

Neither CDI nor ShareData are licensees of Nintendo. Neither ''Captain Comic,'' ''Chiller,''''Deathrace'' nor ''Crossbow'' were designed, manufactured, sponsored or endorsed by Nintendo. Nintendo and the Nintendo Entertainment System are trademarks of Nintendo of America Inc.

The Consumer Products Division of ShareData develops and markets affordable computer software for a number of computers including IBM, Apple and Commodore. The company's Business Systems Division develops and markets easy-to-use office automation software. The company is located at

7400 W. Detroit St., Suite C-170, Chandler, Ariz. 85226. Telephone number: 602/961-7519.

SAN FRANCISCO (FEB. 13) BUSINESS WIRE - BizMart Inc. (NASDAQ:BZMT), one of the nation's leading office products superstore retailers, ''should report its first profit in the third quarter ... about a quarter or so ahead of most people's expectations,'' Ron Stegall, president and chief executive officer of BizMart, told a group of investors during a meeting today in San Francisco.

''BizMart's outstanding sales growth was the key to reporting a small profit in the third quarter of fiscal 1990, which ended Jan. 27,'' said Stegall. ''Sales for the quarter reached almost $39 million, compared with sales of $11.5 million a year ago.''

The company expects to release earnings later this month for the third quarter ended Jan. 27.

''Sales of the 10 comparable stores operating in both third quarters were 55 percent ahead of a year ago,'' Stegall pointed out. ''Nine of the 10 comparable stores operate in markets with competing office supply superstores. These results demonstrate BizMart's ability to maintain continued rapid growth in its established store base while competing head-on with other superstore chains.

''Sales for the nine months totaled about $88 million, which leads us to expect that full-year sales should easily exceed $130 million in just our second year of operation,'' Stegall said. ''That's not bad for a company that in 21 months has grown from its first store to 27 stores today in 12 markets. And we expect to have 31 open by the end of this April, our fiscal year-end.

''During our next fiscal year ending April 1991, we plan to almost double our number of stores by opening another 26 BizMarts -- making 57 stores in all,'' he added. ''The majority of these new stores are being added to strengthen BizMart's dominant position in our existing markets. However, we plan to enter the Houston market with six stores opening in the first quarter of fiscal 1991, followed by at least two more later in the year.''

Stegall told the attendees at the conference, hosted by Robertson Stephens & Company that, ''BizMart is now clearly one of the key players in the fast-emerging retailing segment of office products superstores.

''Looking ahead, we expect BizMart to perform very well even if the recent talk about a coming slowdown in the U.S. economy should materialize,'' Stegall said. ''Based on our excellent experiences in two of the nation's hardest hit markets -- Dallas and Denver -- we believe that BizMart's sales will be very recession-resistant.''

BizMart Inc., operates a chain of high-volume office products superstores in Texas, Missouri, Kansas, Colorado, New Mexico, Arizona, Utah and Nevada. Over 7,000 brand-name, high-quality products are sold to small and large businesses at everyday low prices that are discounted 40 to 60 percent from manufacturers' suggested retail prices.

#90044b0081 02/13/1990 ~Business Wire

SAN FRANCISCO (FEB. 13) BUSINESS WIRE - Western Investment Real Estate Trust (ASE:WIR) Tuesday announced record revenue and earnings for the year ended Dec. 31, 1989.

O.A. Talmage, president and chief executive office, said the record revenues and earnings are due primarily to significant increases in rental income generated from the acquisition of shopping centers located in Northern and Central California.

The Trust declared the 27th consecutive increase in its quarterly dividend to 35 1/2 cents per share payable March 15 to shareholders of record Feb. 23. This is a 1/2 cent increase over the dividend paid the previous quarter and a 2 1/2 cent or a 7.6 percent increase over the 33 cents paid the like quarter last year.

For the year ended Dec. 31, 1989 operating revenues increased 32 percent to $27,637,000 from $20,884,000 for 1988. Net income before gains on sales of real estate investments rose to $14,578,000, or $1.12 per share compared to $13,142,000, or $1.10 per share for 1988.

Net income was affected by the fact that depreciation and amortization expense increased by 48 percent during 1989 due to the addition of new properties to the Trust's portfolio and greater debenture expense amortization.

During the quarter ended Dec. 31, 1989, the Trust purchased three shopping centers which are located in Carson City, Nev., and in Oroville and Ukiah, Calif., for a total of $29,188,000. The Trust also sold properties in Oakland, Calif. and Sparks, Nev.

Western Investment Real Estate Trust is a self-administered equity real estate investment trust based in San Francisco which has invested in properties consisting, for the most part, of community shopping centers and commercial buildings in Northern and Central California and Nevada.

#90044b0084 02/13/1990 ~Business Wire

IRVINE, CA (FEB. 13) BUSINESS WIRE - CORTEX Pharmaceuticals Inc. (NASDAQ:CORXU;CORX;CORXW) Tuesday announced a collaborative research agreement with the National Institutes of Health (NIH) whereby NIH chemists will synthesize analogs of the brain chemical adenosine for development by CORTEX as drugs to limit the brain damage and memory loss associated with stroke, head injury and similar disorders.

CORTEX has rights to acquire an exclusive commercial licence to analogs which appear effective in testing by the company. This announcement follows two recent announcements by CORTEX of programs for development of other classes of potential drugs -- glutamate analogs and enzyme inhibitors -- as brain protective agents.

Dr. Harold R. Hutchings, CORTEX president and chief executive officer, described the new agreement, which calls for collaboration between CORTEX and top scientists at NIH, as ''further evidence of our enthusiasm for and commitment to the neuroprotective area. This is perhaps the most exciting and promising area in brain science today.''

According to Hutchings, ''The brain cell death and memory loss which follow a stroke do not take place immediately. Rather, the damage spreads slowly over a period of many hours, presenting the physician with an opportunity for active intervention with brain protective agents. CORTEX is developing several classes of these protective agents, which are designed to block the biochemical processes which ultimately cause most of the damage.''

According to the National Institute of Neurological and Communicative Disorders and Stroke, over 400,000 people suffer strokes each year. Of these, 150,000 die, making stroke the third leading cause of death in the U.S. Another 500,000 people sustain disabling injuries to the brain each year.

CORTEX, with laboratories in Irvine, Calif., is focused on discovery and development of therapeutics for age-related neurodegenerative disorders.

SANTA CLARA, CA (FEB. 13) BUSINESS WIRE - National Semiconductor Corp. Tuesday appointed Paul Jain as general manager of the company's Compatible Products Group (CPG).

Jain will have day-to-day operating responsibility for CPG, National Semiconductor's desktop-computing enhancement business.

Over the past 15 years, Jain has founded and led a variety of electronics concerns. Most recently, he was president of Headland Technology, the Fremont-based manufacturer of graphics and logic products for the personal computer, formed as a result of the merger between Video Seven and G2.

Previously, he served as president and chief executive officer of Video Seven, the graphics products concern which he founded in 1983. Prior to that, he founded and led Paradise Systems, also a producer of graphics products.

Fred W. Horne, National Semiconductor's vice president for corporate strategic development, said, ''Paul Jain brings CPG a thorough knowledge of p.c. enhancement products. He also brings a solid familiarity with our sales channels: resellers, original equipment manufacturers, and major corporate users. His familiarity with the semiconductor business, combined with his experience in establishing and running new electronics ventures, will offer significant value to CPG.''

Jain, 44, holds both bachelor and master of science degrees in electrical and engineering from the University of California, Berkeley.

#90044b0090 02/13/1990 ~Business Wire

HOUSTON (FEB. 13) BUSINESS WIRE - Wainoco Oil Corp. Tuesday reported revenues for the year ended Dec. 31, 1989, of $39.9 million, 13 percent greater than those of the previous year.

Net income was $1.8 million, or 9 cents per share, compared to earnings of $3.4 million, or 18 cents per share, for 1988. Net income was down largely due to a non-cash additional depreciation, depletion and amortization charge of $2 million for the write-down of U.S. properties in

the fourth quarter.

Net cash provided by operating activities, unaffected by the write-down, increased 39 percent over that provided in the prior year. Record natural gas production of 20.2 bcf was 8 percent above that produced last year, and the weighted average natural gas price improved slightly to $1.30/mcf from $1.26/mcf.

Oil production of 637,000 barrels declined 3 percent in 1989 but its average price of $15.96/bbl improved by 21 percent. Proved BTU equivalent reserve estimates of 268.1 bcf, 86 percent of which were natural gas reserves, were 5 percent below those of the previous year-end. Oil reserves of 6.2 million barrels were up 11 percent.

Natural gas reserves of 230.7 bcf were down 7 percent as the result of production of 20.2 bcf and a revision of the Athens Field reserves of 20.4 bcf. However the pretax discounted future net cash flow from reserves (using constant prices and costs) improved by $6 million, or 4 percent, in 1989.

Shareholders' equity at Dec. 31, 1989, of $80.1 million was 7 percent above the $74.8 million at year-end 1988. Long-term debt was $69.3 million compared to $39.3 million at Dec. 31, 1988, due to the sale of $46 million of 7-3/4 percent convertible subordinated debentures in July 1989.

All outstanding bank debt was retired with 49 percent of the net-sale proceeds, and following property acquisitions the company had year-end working capital of $14 million. For the quarter ended Dec. 31, 1989, the company reported a net loss of $1.1 million, or 6 cents per share, compared to earnings of $1.1 million in the final three months of 1988.

Wainoco Oil Corp. is an oil and gas exploration and production company with operations throughout North America. Wainoco's shares are listed on the New York and Alberta Stock Exchanges.

SALT LAKE CITY (FEB. 13) BUSINESS WIRE - Questar Corp.'s (NYSE:STR) board of directors Tuesday approved payment of a 48 cents-per-share dividend on the company's common stock.

The dividend is the 181st consecutive without a reduction for the diversified energy company. It is the same as the previous quarter's and 1 cent-per-share higher than was paid in the year-ago period.

The dividend will be paid March 19 to shareholders of record on Feb. 23.

The board of directors of Questar subsidiary Mountain Fuel Supply Co. approved payment of dividends on the company's 8 percent and $8.625 series of preferred stock. They are payable April 2 to holders of record March 2.

DENVER (FEB. 13) BUSINESS WIRE - Amtran Inc., the holding company of

American Trans Air Inc., the nation's largest charter airline, announced Tuesday the acquisition of Denver-based Ports of Call Travel Club.

George Mikelsons, chariman and chief executive officer of Amtran Inc., made the announcement Tuesday at the Ports of Call terminal, highlighting the acquistion of the local travel club. Both American Trans Air Inc. and Ambassadair Travel Club Inc. are wholly owned subsidiaries of Amtran Inc.

Ambassadair, the nation's largest private air travel club, has been in operation since 1973 and currently has a membership roster of approximately 24,000 families.

Non-stop and direct service will be provided for Ports of Call members from Denver to worldwide destinations. Members of Ports of Call will be receiving an informational letter concerning the acquisition within the next several days.

The headquarters of Amtran, American Trans Air and Ambassadair are located in Indianapolis. American Trans Air is a certificated domestic and international carrier providing both scheduled and charter service worldwide.

Today the American Trans Air fleet consists of ten Lockheed L-1011s, eight Boeing 727s and four Boeing 757s, with two additional Boeing 757s on order.

#90044b0119 02/13/1990 ~Business Wire

MOUNTAIN VIEW, CA (FEB. 13) BUSINESS WIRE - Adobe Systems Inc. (NASDAQ:ADBE) announced the shipping of Adobe Photoshop software for Macintosh computers.

Adobe Photoshop is a sophisticated, image-enhancement software program designed specifically for artists and desktop publishers.

Adobe Photoshop, which provides a full palette of tools for editing and enhancing images, allows users to create images from scratch as well as to manipulate existing artwork. Photoshop works with images ranging from bitmapped and gray scale to indexed color and true 24-bit color.

The program also easily converts data between many different format and file types, and its virtual memory capabilities allow editing of extremely large images.

Even before its commercial release, Adobe Photoshop has made an impact in the graphic design market. Magazines, newspapers and a variety of publications have already been using Photoshop extensively in their production departments, and Yale University is now teaching a graduate course based on Photoshop.

A Photoshop guide is currently being written by David Biedny and Bert Monroy, for publication in May. Called ''The Official Adobe Photoshop Handbook'' the guide documents the authors' own tips and techniques garnered from working extensively with Photoshop during its development.

Announced in October 1989, Adobe Photoshop has a recommended U.S. retail price of $895. The program is now available from all Adobe authorized dealers or directly from Adobe. For more information, customers should call 1-800-344-8335.

Adobe Systems Inc., founded in 1982 by Dr. John Warnock and Dr. Charles Geschke, has headquarters in Mountain View. Adobe is the developer of PostScript, the industry standard page-description language for the electronic printing and publishing fields, and Display PostScript, a device-independent graphics imaging model that drives screen displays.

In addition, the company develops and markets a complete line of application software programs, including the award-winning Adobe Illustrator 88 and Adobe Type Manager, the Adobe Type Library and Adobe Photoshop. Revenues for fiscal 1989 were over $123 million.

#90044b0137 02/13/1990 ~Business Wire

MOUNTAIN VIEW, CA (FEB. 13) BUSINESS WIRE - Metaphor Computer Systems Tuesday announced a new plan for the marketing and distribution of its Data Interpretation System (DIS) product family.

The company has sold its DIS software since 1984 on a hardware platform developed at Metaphor and based on the Motorola MC68000. In March of 1988, the company began a joint development with IBM to build a DIS software product line for the IBM Personal System/2, which was introduced by IBM in May 1989.

Today, Metaphor announced an agreement to begin joint marketing of DIS products with IBM employing the PS/2 as the hardware base, with software and support services developed by Metaphor.

Since the IBM and Metaphor-based DIS products are interoperable and

compatible, new DIS systems can be combined and interconnected with those purchased previously. Metaphor and IBM are developing a plan for migrating all of Metaphor's present and planned DIS capabilities to the PS/2, including gateways to multivendor hosts and databases.

Although no new hardware products will be developed or introduced, Metaphor's manufacturing organization will produce current products to meet the demand of existing customers.

Metaphor will continue to support current customers with its full range of services. In addition, the company said that its Consulting Group, based in Eden Prairie, Minn., would now be free to join a growing number of third-party application developers serving DIS users.

Metaphor, headquartered in Mountain View, was founded in 1982. The company is privately held.

#90044b0139 02/13/1990 ~Business Wire

CAMBERLEY, SURREY (FEB. 13) BUSINESS WIRE - Sun Microsystems and the Combined Higher Education Software Team Tuesday announced the signing of a licensing agreement that designates Sun's Network File System for personal computers, called PC-NFS, as the standard PC networking solution for higher education institutions. As a result, approximately 100,000 PCs are expected to use PC-NFS at 80 to 100 campuses throughout the United Kingdom.

The agreement calls for a volume PC-NFS site license that gives every university, college, vocational school, and research council in the United Kingdom access to PC-NFS. Thirty-two institutions have already announced their intention to use PC-NFS, and as part of the program, will purchase support services from Sun for a period of five years.

CHEST, the organization responsible for negotiating software licenses on behalf of British higher education institutions, was asked by the Inter-University Networking Committee to establish the agreement with Sun. The IUNC selected PC-NFS after evaluating several PC networking solutions.

Annette Haworth, chairman of the IUNC in the United Kingdom, stated: "PC-NFS gives a terrific boost to integrated distributed computing at both the departmental and campus-wide level, with users able to access and share large and centrally managed files. Having a campus license makes it much easier to administer the network and helps us coordinate all of our

computing resources."

PC-NFS is the DOS implementation of Sun's Network File System, the industry standard for transparent file access among different hardware architectures and operating systems. Since NFS is not limited to a particular vendor or operating system, PC-NFS is an ideal connectivity solution for campuses that wish to link PCs to hardware based on UNIX, VMS VM, MVS or other major operating systems.

"Like many institutions today, colleges are rarely single-vendor environments," said Dave Fowler, Sun's director of PC distributed systems. "Yet, with the exception of PC-NFS, PC LAN solutions provide limited support for connecting to workstations, minicomputers and mainframes. Sun's open systems strategy is ideal for mixed vendor networks like those in universities and our agreement with CHEST further validates this approach."

Campuses that participate in the PC-NFS license program will receive a free training course specifically developed as part of this agreement. In addition to the basic PC-NFS software, campuses have the option to purchase PC-NFS LifeLine, Sun's electronic mail and network backup package for PCs.

A PC-NFS Programmer's Toolkit, which lets users develop and execute their own distributed applications, is also available. The toolkit supports Sun's Open Network Computing platform, including the Remote Procedure Call protocol, which forms the basis of the common platform for distributed applications unveiled last year by Sun, Novell and Netwise.

#90044b0161 02/13/1990 ~Business Wire

HOUSTON (FEB. 13) BUSINESS WIRE - The Enron Corp. (NYSE:ENE) board of directors Tuesday declared a first-quarter dividend of 62 cents per share on the corporation's common stock, payable March 20, 1990, to stockholders of record as of March 12, 1990.

The dividend rate remains unchanged from its previous level, with an indicated annual rate of $2.48.

The board also declared a dividend on the $10.50 cumulative second preferred convertible stock payable April 2, 1990, to stockholders of record as of March 16, 1990. The quarterly dividend rate remains unchanged from its previous level of $2.625 per share.

Enron Corp., America's leading natural gas company with approximately $9 billion in assets, operates the nation's largest natural gas transmission system; markets natural gas, gas liquids, crude oil and refined products nationally and worldwide; owns 84 percent of Enron Oil & Gas Company, one of the country's largest independent (non-integrated) natural gas production companies; and is involved in cogeneration and independent power production.

#90044b0176 02/13/1990 ~Business Wire

SIMI VALLEY, CA (FEB. 13) BUSINESS WIRE - Rexon Inc. (NASDAQ/NMS:REXN), a leading producer of 1/4 inch cartridge tape drives, tape drive subsystems, software for file back-up and archival systems for personal computers and computer related products, Tuesday announced unaudited results of operations for its first fiscal quarter ended Dec. 31.

For the three month period, the company reported revenues of $35.5 million as compared with $42.4 million for the like period a year ago. Net income of $1.5 million, or 15 cents per share was achieved, as compared with $3.5 million, or 30 cents per share reported in the first quarter of fiscal 1989.

The company noted that, first quarter revenues of $35.5 million were up compared with revenues of $32.8 million reported for the fourth fiscal quarter of 1989. First quarter net income of $1.5 million remained unchanged when compared with net income reported for the fourth fiscal quarter of 1989.

Net earnings per share for the first fiscal quarter of 1990 were 15 cents, compared with 17 cents reported for the fourth quarter of fiscal 1989.

In making the announcement, Michael O. Preletz, chairman and chief executive officer, stated that, ''sales for the first quarter of fiscal 1990 were in line with expectations and reflect the phasing out of the more mature 60MB tape drive product line coupled with continued product transition into our 150MB embedded tape drive product.''

As previously announced, the company has completed the acquisition of Sytron, a leading producer of software for file back-up and archival systems for personal computers.

Rexon now operates three independent subsidiaries, one of which is Wangtek which manufactures and markets 1/4-inch cartridge tape drives and tape

drive subsystems through its operations in Simi Valley, Calif. and Ponce, Puerto Rico; the Tecmar subsidiary produces personal computer enhancement products through its operations in Solon, Ohio; and the new Sytron subsidiary develops software for file back-up and archival systems for personal computers through operations in Westboro, Mass.

#90044b0192 02/13/1990 ~Business Wire

FORT WAYNE, IN (FEB. 13) BUSINESS WIRE - The growing public concern that the entire insurance industry faces an imminent crisis because of its ''junk-bond'' holdings is not based on fact, Ian M. Rolland, president and chief executive officer of Lincoln National Corp., said Tuesday.

Rolland pointed to a story in Monday's Wall Street Journal which argued that several large life insurers might face severe losses if forced to sell some of high-yield, high-risk investments at ''fire-sale prices.'' The story measured what it called junk-bond holdings against the statutory equity of the insurers.

''While the numbers in the story may be accurate, they were presented in a light that was inappropriate,'' Rolland said. ''In addition, the story did not distinguish between those securities that are below investment grade and those that are truly 'junk'.''

The story listed Lincoln National Life, which is the corporation's major life insurance subsidiary, as holding $550 million in ''junk bonds'' and stated that it represented 55 percent of its statutory surplus.

As of Jan. 31, Lincoln National Life held $533 million of securities rated lower than BBB, which is normally the lowest category considered investment grade. These investments represented 4.5 percent of Lincoln National Life's total investments.

''A comparison of an investment holdings to equity is not relevant,'' Rolland said. ''What is relevant is a comparison of the market value of these securities to the carrying value, and comparing the difference to equity.''

He said Lincoln National Life's market value of these securities was $470 million, so that the difference between market and book value for these securities is only 8 percent of equity. ''It is even more relevant to consider the total investment portfolio,'' Rolland said. ''The market value of LNC's total fixed income investments at year-end was $203 million greater than the book value. This appreciation is nearly three times the

deterioration that has occurred in our lower grade securities, far offsetting any perceived problem that might otherwise exist.''

The story is pejorative in that it uses the term ''junk'' to refer to all classes of non-investment grade securities, Rolland said. In reality, the problems in the low-grade bond markets have been most significant among the most risky of the non-investment grade securities. There are many classes of lower grade securities -- such as public utility bonds -- that have performed reasonably well.

Rolland said Lincoln National's strategy is to emphasize higher quality investments. He indicated that Lincoln National has not believed that the incremental returns from higher risk investments have been sufficient to compensate for the additional risk, and that it has been concerned over the growing lack of liquidity of issuers of lower-rated securities.

Over the past two years, the corporation has raised its AAA-rated holdings to 37 percent of the portfolio, up from 17 percent. At the same time, it has decreased the percentage of its investments represented by less than investment grade securities from 7 percent at the end of 1987 to 5 percent as of Dec. 31, 1989.

''I am not trying to minimize the problems in the marketplace over quality of investment holdings. There are some companies with serious problems.

''However, to draw conclusions from measures that do not reflect the asset quality of a total portfolio seems to me to be inappropriate. We at Lincoln National think the quality of our investment portfolio is among the highest in the industry,'' Rolland said.

Lincoln National Corp. (NYSE:LNC) is the nation's seventh largest holding company whose subsidiaries are engaged primarily in insurance and investment management. The Fort Wayne-based corporation has assets of more than $25 billion with annual revenues in excess of $8 billion.

COSTA MESA, CA. (FEB. 13) BUSINESS WIRE - Archive Corp. (NASDAQ:ACHV) Tuesday announced it has sent the following letter to the individual members of the board of directors of Cipher Data Products Inc. in connection with Archive's tender offer to purchase the outstanding shares of Cipher:

February 13, 1990 Board of Directors Cipher Data Products Inc.

Gentlemen:

We previously advised you of Archive's willingness to negotiate any and all terms of its tender offer. Having received and completed our review of various materials furnished by Cipher, we again wish to communicate our desire to meet with you promptly to commence negotiations. At such meeting, we are prepared to offer an increased price for all outstanding shares of Cipher Common Stock, conditioned on such transaction receiving the full support of Cipher's Board of Directors.

In evaluating our proposal, we encourage you to consider the following factors:

-- We are confident that all conditions to our tender offer will be satisfied. In this connection, we note that we believe that our credit agreement with Barclays Bank will be finalized in a timely fashion.

-- Our existing tender offer at $7.50 per share has received overwhelming support from Cipher's Stockholders.

-- Our offer has been outstanding for eight weeks and Cipher has not announced any alternative transactions or the commencement of third party negotiations.

We believe that it is important to complete this transaction expenditiously to reduce the likelihood of any further deterioration in Cipher's business or financial condition prior to the acquisition. Such prompt action will permit the maximum consideration to be received by Cipher's shareholders than absorbed by transaction costs.

We are prepared to meet with you and your advisors at any time to negotiate a definitive merger agreement and urge you to contact us promptly to arrange this meeting. If we do not receive a favorable response from you, we currently intend to proceed with our tender offer and take such further steps as we may consider advisable to enable Cipher's shareholders to take advantage of our offer.

Very truly yours, D. Howard Lewis Chairman and President

Founded in 1980, Archive Corp. today is a leading manufacturer and supplier of computer data backup products to original equipment manufacturers and resellers. Archive and Maynard Electronics, an Archive company, offer a complete selection of tape drives and subsystems for economical computer data backup for fixed-disk drives in workstations, multi-user systems and personal computers.

SARASOTA, FL (FEB. 13) BUSINESS WIRE - OMNI Films International Inc. (NASDAQ:OFII) Tuesday announced in conjuction with the annual shareholders meeting, record results for the first quarter ending Dec. 31, 1990.

Revenues were $2,101,434, an increase of 664 percent from $274,976 for the same quarter last year. Net earnings were $374,508 or 17 cents per share up from a net loss of $161,434 or 8 cents per share in the first quarter last year.

The first quarter, in addition to being a record first quarter, is also the best quarter ever, for revenues and earnings, in OMNI's history. The net earnings of $374,508 for the quarter also exceeds net earnings for any entire fiscal year in the company's history.

The record revenues and earnings are attributable to the large increase in contract sales coming in large part from OMNI's award-winning Motion Master system. Motion Master which is a patented large capacity motion simulator, originally introduced in 1988, has seen a substantial increase in awareness and demand over the past several months.

The patented Motion Master system is the only four axis, large capacity (seats from 24 to 144), low cost motion simulator in the world. To date, purchases of the Motion Master system have come from Korea, Japan, Taiwan, England, and the United States.

Motion Master, designed for the amusement and entertainment industry, allows viewers to experience a wide variety of thrill rides from high speed motorcycle and car races to airplane acrobatics and futuristic space fighters.

Omni Films International specializes in the design, sale and installation of five separate and distinct 70mm wide-screen cinema systems, and produces, distributes and licenses 70mm films for these systems. Since inception, Omni has delivered approximately 200 of its cinema systems to locations in 53 countries, incuding every continent except Antarctica. Omni is traded on the NASDAQ system under the symbol OFII.

HUNTINGTON BEACH, CA (FEB. 13) BUSINESS WIRE - Mercury Savings and Loan Association (NYSE/PSE:MSL), an Orange County-based financial institution, Tuesday announced it has elected Michael A. Durkin, its senior executive vice president and chief lending officer, to the post of president and chief executive officer effective immediately.

Durkin, 52, and Jack Klein, 44, chief operating officer of the association were selected by the board of directors to head the management team in the operation of the $2 billion traditional thrift.

Leonard Shane, chairman of the board for over 26 years, also has been serving as president and chief executive officer. Shane will continue as chairman of the board.

Durkin has 28 years of service in the savings and loan industry, including directing Northern California operations for American Savings when the management was led by S. Mark Taper, serving as chief lending officer for American Savings after it was reconstituted into its present form, and in 1981 and 1982 serving as chief deputy savings and loan commissioner for the state of California.

Klein, as chief operating officer, will continue to direct the administrative operations. With over 20 years of diversified senior management experience in the industry, Klein also began his industry service working directly under Taper at American Savings as his administrative assistant.

He served as executive vice president and and chief administrative officer for the California League of Savings Institutions from 1980 to 1988.

Klein served at Mercury Savings from 1973 to 1975, and he returned in 1987 to become the chief operating officer.

Durkin and Klein will manage Mercury Savings from the Huntington Beach executive offices.

In his role as chairman, Shane will oversee several specific aspects of the association's activities, including stockholder relations, liaison with the association's investment bankers, chairing the Senior Executive Personnel and Compensation Committee, community relations and charitable participation.

He has agreed to undertake additional projects at the specific request of top management, and to serve as adviser in connection with litigation

previously initiated.

SALT LAKE CITY (FEB. 13) BUSINESS WIRE - ALPNET (formerly Automated Language Processing Systems Inc.) (NASDAQ:AILP) Tuesday announced that it has signed letters of intent with two of its principal shareholders. The agreements provide for the conversion of $2.7 million of short-term loans and accrued interest to common stock of the company at $2.49 per share, conversion of the remaining $0.8 million of short-term debt and accrued interest to a long-term loan along with $1.3 million of new funds, to enable the company to make the final acquisition payment on its British subsidiary in March 1990, for a total long-term loan of $2.1 million.

The company will issue approximately 1.1 million new common shares for the debt conversion, and as additional consideration for the debt conversion and the new loan, will issue approximately 2.7 million new warrants to purchase common shares of the company at $1.75 per share. In conjunction with this transaction, the company will also cancel 1.7 million existing warrants and will reissue the same at a per share purchase price of $1.75 for an extended five year term. The new loan will be collateralized by substantially all of the assets of the company and will be repaid over the next five years.

In conjunction with the debt conversion and new loan, the chairman of the board of directors has agreed to grant a collateralized ''Put'' to the lendor (coupled with an option to the chairman) for approximately 543,000 common shares and 425,000 warrants for a combined purchase price of $2.49 per share, which price increases with the passage of time.

The company has scheduled a shareholders' meeting for March 16 in Salt Lake City to present this transaction for shareholder approval. Proxy materials containing a full description of the transaction will be mailed on approximately Feb. 23 to shareholders of record on Feb. 12.

ALPNET has 22 offices located in nine countries, worldwide, and is publicly traded on the NASDAQ market system under the symbol AILP and Boston Stock Exchange under the symbol APN.

MIAMI (FEB. 13) BUSINESS WIRE - AmeriFirst Bank (NASDAQ: AMRI) announced Tuesday that the bank and its subsidiary, AmeriFirst Development Corp. (ADCO), have filed a lawsuit for more than $75 million in damages against their former managers, former auditors, and others for unsafe and unsound lending practices, negligent and reckless accounting and auditing practices, and fraud upon the bank and its board of directors.

The lawsuit charges that the former management ''defendants recklessly and negligently caused AmeriFirst to make unsafe, unsound, and grossly imprudent loans that resulted in inflation of current income and loan fees but caused high levels of non-earning assets and loan losses; recklessly and negligently failed and refused to adopt policies or mechanisms adequate to administer those loans; recklessly and negligently adopted the systematic practice of extending and modifying poor loans to book additional loan fee and interest income and preserve the appearance that they were performing loans; knowingly overstated profits and understated the losses from commercial real estate loans; and fraudulently concealed the results of their unsafe, unsound and grossly imprudent policies and practices from the Board of Directors of AmeriFirst, from its shareholders and from federal regulators.''

The lawsuit also charges that certain of the defendants ''adopted and implemented an illegal strategy for using ADCO to overstate the earnings of AmeriFirst and to conceal from the Board of AmeriFirst AmeriFirst's losses caused by defendants' reckless and imprudent lending practices.''

The lawsuit alleges that the accounting firm defendants negligently or recklessly opined without adequate basis that the financial statements of AmeriFirst and AmeriFirst Development Corp. fairly presented their financial condition in accordance with applicable federal regulatory requirements and in acordance with generally accepted accounting principles.

The defendants are: FORMER MANAGERS OF AMERIFIRST Thomas R. Bomar, former chief executive officer and chairman of the board Carlos Garcia-Velez, former president and chief operating officer Robert W. Benner, former executive vice president and chief financial officer Richard M. Hattler, former senior vice president for commercial banking and senior lending officer

FORMER INDEPENDENT AUDITORS FOR AMERIFIRST

Deloitte & Touche (formerly Deloitte, Haskins & Sells), former independent auditors of AmeriFirst

Ernst & Young, former independent auditors of AmeriFirst Development Corp.

The lawsuit is consistent with AmeriFirst's recent settlement (subject to court approval) of certain shareholder class actions against AmeriFirst and some of the same defendants. Under the terms of the settlement, AmeriFirst is obligated to share any recovery from this lawsuit with class members who purchased AmeriFirst common stock during the class period.

BOSTON (FEB. 13) BUSINESS WIRE - Western Digital Corp. (ASE:WDC) Tuesday announced that it is shipping the 10BaseT Ethernet twisted pair local area network (LAN) adapters it introduced last month based on the IEEE 10BaseT Draft 9 specification.

Westinghouse Electric Corp. is among the current customers for these products.

In January, Western Digital introduced the EtherCard PLUS 10T and EtherCard PLUS 10T/A, XT/AT- and Micro Channel-compatible LAN adapters that combine the advantages of 10BaseT twisted pair wiring with the built-in compatibility, performance and value of the company's award-winning EtherCard PLUS family of products.

Along with being software compatible with all leading network operating systems, the adapters are easy to install using Western Digital's software-controlled configuration options and include connectors for twisted pair wire and AUI cable.

Western Digital is the industry's most complete LAN supplier for IEEE standard compatible PC adapters. In addition to Token Ring and StarLAN adapters, Western Digital offers Ethernet products for both thick and thin coaxial cable, and now, 10BaseT twisted pair wire networks.

Interoperability With SynOptics Communications' Concentrator

In keeping with its commitment to industry-wide LAN standards, Western Digital has announced that its EtherCard PLUS 10T adapter is interoperable with SynOptics' new LattisNet 10BaseT product family.

Last month, Western Digital announced that its 10BaseT adapters were successfully tested with a number of other leading suppliers of 10BaseT Draft 9-based concentrators. They have also been successfully tested with unannounced twisted pair Ethernet products from other leading vendors.

Compatibility Demonstrated At NetWorld

The show network at this year's NetWorld in Boston will consist of a

multivendor 10BaseT- and LattisNet-based network. Western Digital is providing both 10BaseT and LattisNet LAN adapters for the network.

Western Digital, with headquarters in Irvine, is a multinational company that designs, develops, manufactures and markets semiconductors, subsystems and intelligent disk drives for original equipment manufacturers and resellers which serve the microcomputer industry.

The company's storage products unit provides a broad range of intelligent drives and controllers, while its microcomputer products group provides communications, imaging, systems logic and integrated systems products.

MENLO PARK, CA (FEB. 13) BUSINESS WIRE - Liposome Technology Inc. (NASDAQ:LTIZ), a pharmaceutical company focused on developing liposome-based delivery systems for therapeutic products, Tuesday announced that the U.S. Food and Drug Administration has authorized the initiation of Phase I clinical trials for the company's amphotericin B colloidal dispersion (ABCD) product.

LTI expects to begin the trials during the latter part of March at the Drug Research Center, University of Utah Medical Center in Salt Lake City.

Amphotericin B is used to treat people with progressive, potentially fatal fungal infections, including cryptococcosis, blastomycosis, the disseminated forms of moniliasis, coccidioidomycosis and histoplasmosis, mucormycocis, and aspergillosis. Such infections are frequently contracted by patients with cancer, acquired immune deficiency syndrome, and weakened immune systems. Adverse reactions to amphotericin B typically include impairment of kidney function, fever, anorexia, nausea and vomiting.

In preclinical tests against the fungal infection apsergillus, LTI's ABCD product was found to be as effective yet considerably less toxic than the amphotericin B product now available. The company has similar data demonstrating ABCD's effectiveness against Candida albicans and cryptococcus infections.

LTI's ABCD product is covered by a composition-of-matter patent (U.S. 4,822,777) issued April 18, 1989. Foreign patents are pending in all major overseas markets.

The product is lyophilized (freeze dried), packaged in vials, and readily reconstituted with water prior to injection. Shelf life is estimated to be at least two years at controlled room temperature.

Located in Menlo Park, LTI is developing liposome-based delivery systems designed to improve the safety, efficacy and convenience of pharmaceutical products.

LAS VEGAS, NEV (FEB. 13) BUSINESS WIRE - United Gaming Inc. (UGAM/NASDAQ) Tuesday announced higher revenues and earnings for the second quarter and six months ended Dec. 31, 1989.

For the second quarter ended Dec. 31, 1989, the company reported revenue of $22,123,000 and net income of $1,312,000 or 16 cents per share as compared with revenue of $15,407,000 and net income of $1,287,000 or 16 cents for the same period in 1988.

For the six month period ended Dec. 31, 1989, the company reported revenue of $41,373,000 and net income of $2,840,000 or 34 cents per share as compared with revenue of $30,288,000 and net income of $2,816,000 or 34 cents for the same period in the prior year.

Chairman of the Board and Chief Executive Officer Alfred H. Wilms commented, ''United Gaming's six months results are right on target with the company's business plan to continue to expand its market share of Nevada's lucrative route business.''

President and Chief Operating Officer David A. Scheinman added, ''We are pleased with the company's revenue performance for this period, which has increased approximately 44 percent during the quarter and 37 percent for the six months. We anticipate further earnings improvement during the third and fourth quarters, which traditionally have been the strongest of the year.''

United Gaming is the largest gaming machine route operator in Nevada. The company also manufactures and sells video and reel-type gaming equipment in many areas of the world. Currently, United Gaming operates more than 5,400 gaming machines in the state of Nevada.

#90044b0621 02/13/1990 ~Business Wire

NEW YORK (FEB. 13) BUSINESS WIRE - ECC Group (NASDAQ: ECLAY) said Tuesday that the sharp slowing in its construction-related businesses will negatively affect the results for the first half and full year for the fiscal year ending Sept. 30, 1990.

Following the announcement at the company's Annual General Meeting of shareholders, Lord Chilver, ECC Group Chairman, said, ''Sales and profitability in our construction- related businesses have been reduced significantly from last year's levels.

''The continuing high levels of interest rates have resulted not only in a continuing decline in house completions by the Group but also in a significant reduction in shipments of the Group's construction materials. Approximately 20 percent of our construction materials are tied directly to the homebuilding market.

''A general decline in economic conditions in the south and southwest regions of the U.K. and delays in the national road building program have had further adverse effect on our overall shipments of construction materials, particularly in concrete products and quarrying activities.''

Lord Chilver said that high interest rates in the U.K., where mortgage rates presently average approximately 15 percent, were the primary cause of low housing activity. He noted that most U.K. analysts expect mortgage rates to moderate in the next eighteen months as the deadline for a U.K. general election approaches.

''The long-term prospects for the U.K. homebuilding sector are strong,'' said Lord Chilver. ''With the continuing severe shortage of adequate housing in the U.K., we would fully expect that a drop in the current high interest rates would provide a substantial boost to the construction business. However, in the current high-interest rate environment, we expect Group profits for the six months to March 31, 1990, to be below the very good result for the period to March 31, 1989.

''The results for the twelve months to Sept. 30, 1990, will be adversely affected by market conditions, especially continuing high interest rates. The achievement of last year's record level of earnings per share will be a challenging target.

DALLAS (FEB. 13) BUSINESS WIRE - Hogan Systems Inc. (NASDAQ:HOGN) announced availability of its new Consumer and Merchant Servicing (CAMS) product, a comprehensive software system designed to support plastic card processing and management.

The system, which was announced in May 1989, was successfully tested at two client sites. To date, five banks have purchased the new system and are in the process of implementation.

CAMS is a fully integrated, online, real time banking system consisting of a set of product modules designed to run on an IBM mainframe. CAMS' modular architecture includes support for consumer applications, cardholder and merchant accounting and servicing, and 24-hour online authorization.

CAMS provides complete management for all types of plastic-based products, both debit and credit, within a single system. This includes internationally accepted products such as Visa and MasterCard, as well as private-label products for the retail merchandise and petroleum industries.

''As banks strive to remain competitive in today's saturated consumer payments market, CAMS can maximize a bank's capability to define and differentiate card-based products and services to increase market share,'' said Pat Jerge, Hogan executive vice president.

CAMS is based on Hogan's Umbrellab architecture, which provides transaction processing power and integration capabilities.

CAMS is integrated with other Hogan-developed Integrated Banking Applications, including Relationships and Profitability -- CIS, Relationships and Profitability Manager (RPM), Integrated Time and Demand Deposit Accounts Systems, Online Delivery System and Online Collections System.

Hogan Systems Inc., of Dallas, designs, markets and supports integrated online application software products for use by financial institutions worldwide. The company maintains major sales and support offices in Woking, England; Melbourne, Australia; New York City and Dallas.

SAN FRANCISCO (FEB. 13) BUSINESS WIRE - Thortec International Inc. (THT/NYSE) announced Tuesday that it has extended the Expiration Date of its previously announced tender offers (''Tender Offers'') for its 6-1/2 percent Convertible Subordinated Debentures due 2012 (''Old Debentures'') and its 8-5/8 percent Senior Subordinated Debentures due 2004 (''New Debentures'') from midnight New York City time on Monday, Feb. 12 to midnight New York City time on Tuesday, Feb. 13.

The tender offers are an integral part of the company's previously announced restructuring plan. The net cash purchase price for the Old Debentures is $180 per $1000 of principal amount and the net cash purchase price for the New Debentures is $230 per $1000 of principal amount. The minimum aggregate principal amount of Debentures the company will accept in the Tender offers is $30,300,000.

Through close of business New York City time, Feb. 12, the Depository reported receiving tenders of $27.7 million, or 82.5 percent, of the New Debentures and $2.5 million, or 57.5 percent, of the Old Debentures constituting an aggregate of $30.2 million or 79.6 percent of all Debentures outstanding.

Thortec, through its subsidiary URS Consultants, is a multi-disciplinary engineering, architecture, planning and consulting firm providing services to governmental, commercial, industrial, educational and health care clients across the United States.

URS Consultants provides a diverse range of professional services to solve complex hazardous material, environmental, seismic, transportation and water treatment problems.

Thortec's subsidiary Mitchell Management Systems develops and implements computerized project management control systems for governmental agencies, major industrial corporations and the architecture, engineering and consulting community.

FORT WORTH, TX (FEB. 13) BUSINESS WIRE - Paul I. Stevens, chairman and chief executive officer, Stevens Graphics Corp. (AMEX:SVGA & SVGB) announced Tuesday that the company reported record sales and earnings for both the fourth quarter and year ended Dec. 31, 1989.

This is the twelfth consecutive quarter increase and third consecutive annual earnings record for the company since its founding in December 1986.

Net income for the fourth quarter ended Dec. 31, 1989, increased 144 percent to $3,701,000 from $1,519,000 in the fourth quarter of 1988. Sales were $37,577,000, an increase of 37 percent from $27,510,000 in the same quarter of 1988. Earnings per share increased to $0.46, up 119 percent from $0.21 in the fourth quarter of 1988.

For the full year ended Dec. 31, 1989, net income increased 82 percent to $9,188,000, an earnings per share increased 44 percent to $1.15, while sales increased 37 percent to $125,978,000. In 1988, the company earned $5,050,000 or $0.80 per share on sales of $91,787,000.

Stevens commented, ''1989 was a landmark year for us. We significantly surpassed the $100 million sales level, achieved record earnings per share with a thirty percent increase in shares outstanding, and penetrated the Soviet Union marketplace. These accomplishments were all internally generated and were the direct result of management's execution of our competitive strategy. I am optimistic about achieving our domestic and international growth plans, and that we will accomplish each of our sales, earnings and acquisition goals planned for 1990.''

Stevens Graphics Corp., headquartered in Fort Worth, designs, manufactures markets, and services web-fed printing presses, collators, packaging, and related graphic arts equipment on a world-wide basis.

The company serves the packaging, commercial, business forms, and currency/securities segments of the printing and packaging industries, providing customers with a a ''complete systems solution'' for printing, pre-press and post-press equipment.

#90044b0633 02/13/1990 ~Business Wire

SANTA CLARA, CA (FEB. 13) BUSINESS WIRE - National Semiconductor and Phoenix Technologies Ltd. Tuesday announced that the PhoenixPage PostScript-compatible Printer Language Interpreter (PS/PLI) has been ported to the National Semiconductor 32CG16 and 32GX32 imaging processors.

PhoenixPage is a software printing architecture that enables manufacturers to offer products that are fully compatible with major imaging and font standards. The PhoenixPage PS/PLI is one of several page description language and printer emulations available from Phoenix Technologies'

Peripherals Business Unit.

''National Semiconductor's 32CG16 and 32GX32 provide a high-performance and cost-efficient platform for page-printer manufacturers,'' stated Bob Downs, vice president of Phoenix Peripherals Business Unit.

''The modular architecture of PhoenixPage will allow it to be easily and quickly upgraded to support future page-printer standards. Our performance measurements of PhoenixPage on the 32CG16 platform demonstrate an excellent stability and competitive speed to the LaserWriter NTX,'' said Les Wilson, manager worldwide applications for National Semiconductor's Imaging Group.

National's 32CG16 is a 32-bit microprocessor optimized for page printers, terminals and other imaging peripheral applications, while the 32GX32 is designed specifically for the requirements of high-performance embedded systems such as powerful desktop page printers and terminals.

In addition to the processor, National Semiconductor offers a complete system solution for customers in the imaging peripheral market. This solution incorporates National's VLSI products to provide all the hardware building blocks required. According to National, this approach reduces cost and overall time to market.

Phoenix Technologies designs, develops and markets system software products for manufacturers of personal computers, workstations and printers. Its products enable OEMs to offer to their customers products that are fully compatible with industry standards.

National Semiconductor, with headquarters in Santa Clara, and offices worldwide is a major supplier of semiconductors. The company's product portfolio includes high performance analog, mixed analog/digital and VLSI products.

#90044b0639 02/13/1990 ~Business Wire

CAMARILLO, CA (FEB. 13) BUSINESS WIRE - Alpharel Inc. (NASDAQ/NMS:AREL), a leading supplier of software-based systems solutions for document management applications at both the departmental and enterprise levels, Tuesday introduced an entry-level VM-based solution specifically tailored to run on the newly announced IBM Enterprise System/9370 (Model 10, 12 and

14).

The entry-level solution consists of Alpharel's proprietary software core, Image Utility, which controls the scanning, indexing, retrieval and storage of documents and information, and special applications software geared toward the user's specific needs. By combining the IBM Enterprise System/9370 and Alpharel's modular open architecture application, the user obtains an affordable departmental image solution today which allows for future expansion within the IBM S/370 environment.

Alpharel's entry-level solution is designed for users in a variety of markets including aerospace, manufacturing, defense, government and utilities. Within these areas, specific departments, such as procurement, product design and engineering, manufacturing, accounting records and quality assurance can utilize the entry-level system with applications tailored to their special requirements.

The IBM Enterprise System/9370, combined with Alpharel's FileFolder software provides an ideal solution for commercial applications such as human resources, insurance or financial transactions.

For technical document management systems, Alpharel's DDTMS software provides the answer for engineering and technical drawing applications (A- to E-size drawings) within manufacturing, quality assurance or design engineering departments in a variety of industries. Acting as the DDTMS system host, the newly announced IBM Enterprise System/9370 provides on-board, high-capacity storage for up to 40,000 documents.

The basic system will be distributed by Alpharel and is available 90 days after receipt of order. Prices for the basic entry-level system, which includes the IBM Enterprise System/9370, the Image Utility software, PC-based image workstations, and applications software, range from $150,000 to $300,000 depending on configuration.

For further information on this new product, contact Jack Belton, vice president, marketing.

DENTON, TX (FEB. 13) BUSINESS WIRE - Scott Instruments Corp. announced Tuesday that it's SIR Model 20 Speech Recognition and Digital Audio System was successfully bid by American Telephone & Telegraph Co. to the U.S. Department of Transportation, in a contract for office automation equipment for the Federal Aviation Administration.

The award to Scott Instruments is potentially worth $3 million over the life of the contract.

AT&T is the prime contractor for the U.S. Department of Transportation's Office Automation Technology and Services (OATS) program. The OATS program contract awarded to AT&T covers a base period of three years, and could be worth up to several hundred million dollars to AT&T if the government exercises five one year contract renewals. The value of the contract to Scott is based on planning data from AT&T.

The award to AT&T capped a three year effort by the Department of Transportation to select a contractor to bring uniformity to its microcomputer system. Currently, the agency has 56 brands of computers. If all options are exercised, purchases of microcomputers by the FAA for the next eight years will be through this contract.

Scott Instruments was founded in 1978 and is a pioneer in the research, development and commercialization of speech recognition technology and products for telecommunications and computer-based applications. Scott's common stock is traded on the over-the-counter market under the NASDAQ symbol ''SCTI''.

BOSTON (FEB. 13) BUSINESS WIRE - NETWORLD '90. In response to market demand for 10BASE-T-compatible networking products, SynOptics Communications Inc. (NASDAQ/NMS:SNPX) Tuesday unveiled LattisNet 10BASE-T, based on the Institute of Electrical and Electronic Engineers' (IEEE) 10BASE-T Draft 10.

The company also announced the completion of interoperability testing with four major Ethernet network interface card vendors, a key part of its 10BASE-T strategy.

10BASE-T, which is expected to become an IEEE standard, governs the transmission of 10 Megabit per second (Mb/s) Ethernet over unshielded twisted pair wire. LattisNet 10BASE-T is designed to meet specifications outlined in 10BASE-T Draft 10, which has been scheduled for distribution to the IEEE Technical Committee on Computer Communications (TCCC) for ballot.

Further, interoperability testing activity among the leading manufacturers assures customers that their 10BASE-T networks will truly be multivendor

solutions.''

SynOptics has completed interoperability testing with four leading Ethernet adapter card manufacturers: 3Com Corp. of Santa Clara, Calif., Tiara Computer Systems of Mountain View, Calif., Racal-InterLan of BoxBorough, Mass. and Western Digital Corp. of Irvine, Calif.

SynOptics' LattisNet 10BASE-T products, including the LattisNet Model 3308 Host Module, LattisNet Model 408 Host Module and LattisNet Model 508 Transceiver, are available now through SynOptics as well as its authorized resellers. In a typical network configuration, the LattisNet 10BASE-T solution costs about $325 per node.

SynOptics Communications Inc. designs, manufactures and markets local area networking products based on its Network Utility Architecture, a value-added product strategy which incorporates network connectivity, internetworking and network management solutions into an integrated networking system.

Preliminary revenue of approximately $77 million was reported for the fiscal year ended Dec. 31, 1989. Preliminary earnings per share for the same period was reported as approximately $1.20. The company has headquarters at 501 E. Middlefield Road, Mountain View, Calif., 94043. Telephone 415/960-1100.

PORTSMOUTH, RI (FEB. 13) BUSINESS WIRE - Quadrax Corp. (NASDAQ:QDRX) Tuesday announced the signing of a definitive agreement with Hexcel Corp. (NASDAQ:HXLD) confirming a previously announced letter of intent for the two companies to develop, manufacture and market cored structural composite panels for aerospace, naval and rail markets.

The panels, to be made by combining a core of Hexcel metallic or non-metallic honeycomb with a facing of Quadrax's advanced composite thermoplastic prepreg fabrics, will be manufactured and marketed by Hexcel when commercialized. As part of the agreement, the two companies will work jointly to develop new, suitable bonding technology.

According to Andrew MacGowan, Quadrax senior vice president: ''Quadrax Biaxial Tape (QBT) fabric combines the labor-saving benefits of woven

fabric with the high strength of unidirectional tape.

''The combination of honeycomb with Quadrax fabric offers the potential for low-cost panel fabrication as well as the superior mechanical strength and flame, smoke and toxicity characteristics needed in these demanding markets.''

Hexcel Corp., with headquarters in Dublin, Calif., is the world leader in the development and manufacture of metallic and non-metallic honeycombs. Quadrax, with headquarters in Portsmouth, is a supplier of advanced composite materials, equipment and services.

SANTA ANA, CA (FEB. 13) BUSINESS WIRE - Amplicon Inc. (NASDAQ:AMPI), Tuesday announced second quarter earnings of $1,400,000, or 22 cents per share, as compared with $1,340,000, or 20 cents per share, for the second quarter a year ago.

Earnings for the six-month period ended Dec. 31, 1989 were $2,376,000, or 38 per share, for the same period in the prior year. Weighted average number of common shares outstanding were 6,177,000 and 6,494,000 for the quarters ending Dec. 31, 1989 and 1988, respectively, and 6,189,000 and 6,516,000 for the six-month periods ending Dec. 31, 1989 and 1988, respectively.

The company also announced second quarter revenues of $40,129,000, this year compared with $42,229,000, for the second quarter a year ago. Revenues for the six-month period ended Dec. 31, 1989 were $68,932,000, as compared with $71,155,000, for the same period in the prior year.

Patrick E. Paddon, president and chief executive officer, said: ''The company's second quarter results were in line with our goals. Revenues declined slightly as a result of some market disruption in the mid-range computer industry due to recent IBM announcements impacting their alternative distribution channels (Industry Remarketers).''

''Since Amplicon has no formal program with IBM, our basic marketing and business strategies remain unchanged. However, IBM's announcements severely cut back equipment price discounts and in the short-term, end-users may adopt a wait-and-see attitude. I believe this is quite positive for Amplicon as we would expect that the value of our residual

portfolio would be favorably enhanced. Other areas of the company's business are continuing to perform along expectations.''

Paddon added: ''In 1990 we are striving to make operational improvements which will generate benefits in future periods. We remain committed to expanding our telemarketing salesforce, increasing productivity from our existing salesforce and seeking new marketing opportunities.''

Amplicon is an innovative marketing and finance organization dedicated to meeting the demands of the nation's leading companies for high technology equipment.

SAN JOSE, CA (FEB. 13) BUSINESS WIRE - The Coast Distribution System (AMEX:CRV) Tuesday reported sales and net earnings for the fourth quarter and year ended Dec. 31, 1989.

Sales for the fourth quarter were $30,906,000 in 1989, which represents an increase of 10 percent over sales of $28,067,000 in 1988. Net earnings increased to $123,000 or 3 cents per share, as compared to $91,000 or 2 cents per share in 1988. The increase in earnings for the fourth quarter is particularly impressive given that the 1989 results include significant costs incurred in consolidating the activities of Griffin Marine, which was acquired in September.

The company had anticipated that such costs were going to be significantly higher, and previously forecast a loss for the quarter. Coast's experience in integrating prior acquisitions made the Griffin consolidation more efficient.

Net earnings for the year ended Dec. 31, 1989 increased 11 percent to $3,854,000 or 85 cents per share, while sales increased 4 percent to $139,482,000. Although the company's sales have been adversely affected by an overall decline in sales of new recreational vehicles and boats in 1989, Coast has been able to minimize the impact of these declines through increased sales of high-margin repair and service parts.

The resulting improvement in gross margin contributed to the substantial increase in income, which offset a decrease in other income of $2 million.

The Coast Distribution System is the nation's largest after-market distributor of recreational vehicle and marine parts and accessories.

NEEDHAM, MA (FEB. 13) BUSINESS WIRE - Cognex Corp. (NASDAQ:CGNX) Tuesday announced that net income for the fourth quarter ended Dec. 31, 1989, increased 31 percent to $1,132,826, or 27 cents per share, compared with net income of $863,569, or 26 cents per share, for the fourth quarter of 1988.

Fourth-quarter revenues increased 44 percent to $4,628,682 from $3,205,411 for the same period a year ago.

For the year ended Dec. 31, 1989, Cognex reported net income of $3,714,794 or 95 cents per share (on a fully diluted basis), a 56 percent increase from $2,376,368, or 72 cents per share, for fiscal 1988. Revenues grew 50 percent to $15,910,295 for 1989, up from 1988's $10,629,801.

The company's effective tax rate for fiscal 1989 was 28 percent, compared with 11 percent in 1988, due primarily to the reduced availability of operating loss carryforwards. In the fourth quarter, the company's effective tax rate was 41 percent versus 11 percent for the similar period in 1988.

This was due to the payment of income taxes resulting from customer prepayments for R&D and software, which will be recognized as revenues at a later date. Assuming a fully taxed basis of 38 percent, Cognex would report net income of 28 cents per share for the fourth quarter and 82 cents for the year ended Dec. 31, 1989.

''Nineteen eighty-nine was an exceptional year for the company,'' said Robert J. Shillman, chairman, chief executive officer and president. ''Demand for our unique technology and products allowed us to achieve another year of record profits, and we were able to maintain consistently high gross margins. Revenues increased due to acceptance of both our new 3000 product and all of our other products in the U.S. and overseas.

Cognex Corp. designs, develops, manufactures and markets a family of machine-vision systems -- sophisticated software and high-speed, special-purpose computers -- which are used to replace human vision in a wide range of manufacturing processes in the semiconductor, electronics, pharmaceutical and aerospace industries.

BALTIMORE (FEB. 13) BUSINESS WIRE - Allied Research Corp. (NASDAQ: ARAI) said Tuesday that preliminary results for 1989 indicate that Allied will report a loss for both the fourth quarter and fiscal year ended Dec. 31, 1989.

Losses at the company's Belgian subsidiary during the year and the fourth quarter were primarily caused by the timing and reduced levels of procurement, increased interest charges, under-utilization of its new manufacturing facilities in the United States.

M.B. Ruffin, chairman, said the company was optimistic about 1990, based on recent orders from the Belgian government and other major customers. He also reported that the company was beginning to realize the benefits of recent organizational and operational changes.

The company said that the order backlog remained strong and that operations at its United States subsidiary continued to improve.

Allied Research Corp. is a designer and producer of high technology products and weapons systems for conventional defense needs.

LOS ANGELES (FEB. 13) BUSINESS WIRE - L.A. Gear, Inc. (NYSE:LA), the Los Angeles-based footwear and apparel company, announced the signing of a multiyear agreement with Super Bowl MVP Joe Montana to represent the company in its $50 million ''Unstoppable'' advertsising campaign.

Montana, who has been called the greatest quarterback in the history of professional football, will star in a full cross-training media campaign starting this spring, including television, print advertisements and other media.

''When you think of unstoppable, you think of Joe Montana,'' says Executive Vice President Sandy Saemann. ''In the initial commercials, he will be wearing L.A. Gear's Star Player cross-trainers.''

According to Montana: ''L.A. Gear is the athletic footwear company of the

90s. Unstoppable is a great name for a campaign and I'm proud to be the newest member of the team.''

Montana joins the company's distinguished group of sports and entertainment celebrities targeted to specific merkets. So far, the L.A. Gear ''Unstoppables'' include Michael Jackson, whose signature line of shoes and apparel will be in stores late this spring; actress/businesswoman Priscilla Presley, who promotes women's fashion and performance footwear; and televsion star Heather Locklear, who appears in the company's jeanswear ads.

For the men's performance market, the line-up includes Houston Rocket center Akeem Olajuwon, basketball legend Kareem Abdul-Jabbar and Karl Malone of the Utah Jazz, when his current contract expires later this summer.

Montana, who played college football at Notre Dame, has set records in pro football since his entry into the sport 10 years ago. The San Francisco 49er quarterback threw a record-setting five touchdowns in Super Bowl XXIV and collected his third Super Bowl MVP, making him the only player in football history to have accomplished this.

L.A. Gear markets and distributes fashion performance footwear, apparel and accessories. Sales for 1989 exceeded the $600 million mark, making L.A. Gear the third largest athletic footwear company in the nation.

#90044b0675 02/13/1990 ~Business Wire

ANAHEIM, CA (FEB. 13) BUSINESS WIRE - Distributed Logic Corp. (NASDAQ:DLOG) Tuesday reported profitable results from operations for the fiscal year ended October 31, 1989.

Worldwide revenues for the year totaled $51,455,017, up slightly from the $51,231,407 reported for fiscal 1988. Net income totaled $18,641 in 1989, as compared to the net loss of $2,239,265 reported in fiscal 1988. On a per share basis, this amounted to net income of 1 cent per share for fiscal 1989, versus a net loss of 89 cents per share for the prior year.

For the fourth quarter of fiscal 1989, the company reported consolidated revenues of $13,531,636, as compared to total sales of $11,384,545 in the final quarter of 1988. Operating income for the quarter amounted to $475,329, versus an operating loss of $1,735,455 in the previous year. Net loss for the quarter was $15,675, as compared to a net loss of $1,918,321 in fiscal 1988.

Net loss per share amounted to 1 cent in the final quarter of fiscal 1989, versus a loss of 76 cents in the prior year. Glenn C. Salley, chairman and chief executive officer, said, "Net income for the year was adversely affected by below-the-line items, including interest expense, foreign currency translation losses and unfavorable international tax charges. Although this resulted in a net loss for the fourth quarter, we were profitable for the full year, which is a significant improvement over the prior two fiscal years.

"We are continuing to make organizational changes designed to streamline our worldwide operations by providing more responsive management control on a localized basis," Salley added. "We have a broad base of distribution channels on which to grow. We will use these channels to serve the workstation segment of the overall computer industry with products derived from our own R&D efforts as well as those developed in partnership with other companies."

Salley disclosed that the company has completed negotiations to reschedule its subordinated debt resulting from its 1987 acquisition of three Plessey Peripheral Systems subsidiaries.

Principal payments on that debt have now been deferred until February of 1991. "This rescheduling of debt payment has freed up working capital that can now be used to fund product development and strategic marketing efforts," Salley explained.

Due to order rescheduling from OEM customers, softness in large disk subsystem demand and a reorganization of the U.S. sales force, the company experienced soft domestic revenues for the quarter ending January 31, 1990 which it anticipates will result in a consolidated net loss for the period. During the same period, the company has streamlined operations and changed market segment emphasis. Management is cautiously optimistic that these measures, in conjunction with current order rates, should yield improved results for the remainder of the 1990 fiscal year, he indicated.

#90044b0676 02/13/1990 ~Business Wire
FORT WAYNE, IN (FEB. 13) BUSINESS WIRE - Lincoln National Corp. Tuesday reported fourth quarter net income of $97.1 million, or $2.23 per share.

Excluding $36.7 million in realized gains, income for the quarter was $60.4 million. For the previous year, quarterly net income was $62.2 million, or $73.2 million when realized gains and losses are excluded.

Ian M. Rolland, president and chief executive officer, indicated that ''the quarter includes losses of $12 million, after taxes, related to the record cold weather in December in the Midwest and South. In spite of this, earnings before investment gains were the strongest of the year.'' Rolland also cited continued profitability in employee life-health operations and strong performances from individual life, reinsurance and investment products as all contributing to the favorable earnings.

For the full year, net income rose to $268.8 million, or $6.06 per share, which included realized capital gains of $1.45 per share. Net income in 1988 was $150.9 million, or $3.30 per share.

Income in 1988 included a $1.47 per share charge which resulted from a restructuring of certain of the company's health maintenance organizations and 92 cents per share in realized capital losses for the year.

Rolland said Lincoln National has raised the quality of its investment portfolio over the last two years to one of the highest in the industry.

For the second consecutive quarter, employee life-health operations were profitable, with fourth quarter earnings of $7.7 million compared with a $10.8 million loss a year ago.

For the first time since 1986, full-year earnings were profitable in this segment, totaling $4.6 million. In 1988, there was a loss of $129.0 million which included the $61.7 million restructuring charge. Earnings from health maintenance organizations were $1.2 million for the quarter as compared with a loss of $5.3 million for the same period last year. For the full year, there was a $5.3 million loss, vs. a $97.5 million loss in 1988.

The group life and health indemnity business was profitable in the quarter with earnings of $6.5 million, compared with a loss of $5.5 million for the same period last year. For all of 1989, earnings were $9.9 million as compared with a loss of $31.5 million in 1988.

Lincoln National Corp. (NYSE:LNC) is the nation's seventh largest holding company whose subsidiaries are engaged primarily in insurance and investment management. The Fort Wayne-based corporation's assets exceed $25 billion with annual revenues of more than $8 billion. Through its subsidiaries, the corporation markets property-casualty, employee benefits individual life insurance, life-health reinsurance, corporate pensions, annuities and investment-related services.

#90044b0677 02/13/1990 ~Business Wire
INDIANAPOLIS (FEB. 13) BUSINESS WIRE - For the first quarter of its fiscal 1990, ended Dec. 31, 1989, Anacomp Inc. recorded net income of $4,626,000, or 11 cents per share on revenues of $147,183,000.

That compares to a net loss of $508,000, or 3 cents per share, in the first quarter of fiscal 1988, on revenues of $155,104,000. Both year's results reflect the inclusion of the Sunflex and magnetic tape businesses which Anacomp had formerly held as discontinued operations.

Anacomp said the quarter reflected a particularly strong performance from its Computer Output to Microfilm (COM) service bureaus, which recorded a revenue increase of more than 9 percent from the prior year's first quarter. That increase was offset by a decline in COM recorder sales, after a record year and fourth quarter in fiscal 1989. Anacomp said it expects recorder sales to recover the shortfall with a strong second quarter and added that another record year is expected in fiscal 1990.

Louis P. Ferrero, Anacomp chairman and chief executive officer, said, ''These results once again demonstrate the strength of Anacomp's core businesses, which we expect to demonstrate strong growth throughout fiscal '90. During the first quarter, Anacomp added to its customer list more than 100 clients completely new to COM technology...a tangible example of the continuing strength of micrographics. As our business expands, we will continue to use its strong cash flow, along with the proceeds of our divestiture of the flexible disk division, to further reduce our debt and enhance our earnings.''

Anacomp is an information management company with leading market positions in micrographics services, systems and supplies. Anacomp's customers include banks and other financial institutions, large government and industrial users, and a variety of other businesses around the world. Anacomp common stock is listed on the New York Stock Exchange.

#90044b0679 02/13/1990 ~Business Wire
CLEVELAND (FEB. 13) BUSINESS WIRE - JRM Holdings Inc (NASDAQ:JRMX) announced its results for the second quarter ended Dec. 31, 1989 as

follows:

	Three months ended Dec. 31		Six months ended Dec. 31	
	1989	1988	1989	1988
Net revenues	$ 1,909,751	$ 482,293	$2,765,984	$ 989,050
Income (loss) continuing ops	956,216	(142,148)	1,166,165	(175,207)
Income (loss) discontinued ops	(177,928)	(302,680)	(264,980)	(488,510)
Net income (loss)	778,288	(444,828)	901,485	(663,717)
Net income (loss) per share continuing ops	56 cents	(10 cents)	68 cents	(10 cents)
Net income (loss) per share discontinued ops	(11 cents)	(21 cents)	(16 cents)	(29 cents)
Net income (loss) per share	45 cents	(31 cents)	52 cents	(39 cents)

The company reported a 400 percent increase in net revenues during the quarter due to the settlement of a lawsuit. Costs and expenses increased 14 percent from the like quarter in 1988 as a result of legal fees incurred in the lawsuit.

The company further reports that it is continuing to reduce costs and refocus operations and is optimistic that the current fiscal year will show substantial improvement over the prior year.

MILPITAS, CA (FEB. 13) BUSINESS WIRE - Octel Communications Corp. (NASDAQ/NMS:OCTL) announced Tuesday the immediate availability of four new telephone switch integrations for the company's line of Aspen voice-processing systems as well as an enhancement to its Multiple SMDI Link Unit (MSLU).

Octel's Aspen voice-processing systems, including the VPC 100 will now integrate with AT&T's Definity Generic I and II; the AT&T System 25; and the Ericsson AXE 10, a cellular telephone switch.

Octel's complete line of voice-processing systems now integrates with more than 60 different telephone switches, confirming its position as an industry leader in integrations.

Full integration of a voice-processing system with a telephone switch

occurs only if these criteria are met: external and internal callers are forwarded directly to a personal greeting if the line is busy or if there is a ring/no-answer; subscribers receive message- waiting notification when messages are received through a message-waiting light or other message-waiting feature; and callers may choose to return to a designated extension for assistance when forwarded to the system.

The AT&T Definity Generic I and II are integrated with Octel Aspen systems using Octel's proprietary PBX Integration Device (PID). The PID used for the Generic I integration costs between $2,000 and $9,000, depending on the type of Octel system. The PID used for the Generic II integration ranges between $5,000 and $9,000, depending on the type of Octel system.

Octel Aspen systems will also now integrate with AT&T's System 25, which serves smaller sites. Integration with the AT&T System 25 will cost $2,000.

Release 2.0 is Octel's enhancement to its Multiple SMDI Link Unit (MSLU), originally introduced in February 1988. The MSLU provides full integration between one Octel system and up to seven Central Office (CO) switches. MSLU Release 2.0 now supports up to 18 prefixes (10 more than the previous release), an important feature because most COs support more than one prefix. The prefix is the first three digits of a standard seven-digit phone number.

Octel Communications Corp. designs, manufactures, and markets a full line of high performance voice processing systems. These specialized computers which integrate with a large number of telephone systems, help companies and individuals solve a range of communications problems.

NEW YORK (FEB. 13) BUSINESS WIRE - Enzo Biochem Inc. (AMEX:ENZ) announced Tuesday that it has received a U.S. patent covering nucleic acid probe compositions and methods for diagnostic tests to detect Neisseria gonorrhoeae bacteria, the causative agent of gonorrhea.

In the United States, the sales of gonorrhea diagnostics are currently about $50 million annually.

U.S. Patent No. 4,900,659 covers any nucleic acid probe that detects, with sufficient specificity, gonorrhea-causing bacteria. Dr. Norman Kelker, Enzo's senior vice president and director of Research & Development for the company's diagnostic product subsidiary, Enzo Diagnostics Inc. stated ''A DNA probe test for the direct diagnosis of gonorrhea could capture a substantial portion of this market which is expected to grow at a rate of about 7 percent per year. With this patent and other proprietary technologies we have developed for direct test aplications, Enzo is in a commanding position to dominate this market.''

Enzo Biochem Inc. is an established New York City based biotechnology company engaged both in the research, development and manufacture of innovative health care products based on molecular biology and generic engineering techniques and in providing diagnostic services to the medical community.

NEW YORK (FEB. 13) BUSINESS WIRE - Kuno Laren, chairman of Micron Products Inc. (ASE:PMR) announced Tuesday financial results for the fiscal quarter and six month periods ended Dec. 31, 1989.

Management is instituting steps to counteract intensifying competition which contributed to losses for these periods, after consideration of interest charges. Improved product supply sourcing and the introduction of new alternate care marketing activities are expected to affect profitability in future months.

At its Feb. 1, 1990, meeting the board of directors appointed James J. Caruso as vice president and chief financial officer of the company. Caruso comes to Micron highly recommended from Touche Ross. Other appointments were James P. Feeney to the position of president of the company's Numedco subsidiary, and Joann Shenk as Numedco's secretary and treasurer.

The directors took note, with deep regret, of the death of James E. Burgess -- a fellow board member, friend and valued counselor.

On Feb. 5, 1990, two former owners of Numedco instituted legal action against the company alleging default under certain consulting agreements

and seeking damages in excess of $200,000 each. The company will vigorously defend this action.

BERKELEY, CA (FEB. 13) BUSINESS WIRE - General Parametrics Corp. (NASDAQ:GPAR), a leading manufacturer of desktop presentation products, Tuesday announced sales and earnings results for its first quarter ended Jan. 31, 1990.

First quarter sales were $3,637,000, a decrease from sales of $6,469,000 for the first quarter of fiscal 1989. Net income during the first quarter of fiscal 1990 was $252,000 compared to net income of $876,000 for the first quarter of fiscal 1989. First quarter net income per share was 3 cents compared to 11 cents per share one year ago.

The company stated that the decreased net sales and the resultant reduction in earnings was primarily the result of reduced dealer sales in November and December 1989.

The decreased sales appear to parallel the softness currently being experienced in the personal computer marketplace. In addition, the company's sales force was significantly below-strength during the quarter.

The company also announced that the board of directors has declared a cash dividend of 6 cents per share to shareholders of record as of March 6, 1990, payable March 20, 1990. The company's cash, cash equivalents and short-term investments were $19,707,000 at Jan. 31, 1990 compared to $19,657,000 at Oct. 31, 1989.

General Parametrics, founded in 1981, is a leading producer of desktop

presentation hardware and software products for the corporate and government marketplaces. Its complete line of desktop presentation solutions work with IBM and Apple Macintosh systems.

The company pioneered the electronic presentation marketplace in 1984 and now has a full line of VideoShow (R) models covering a wide range of cost/performance.

MONTGOMERY, AL (FEB. 13) BUSINESS WIRE - The Enstar Group Inc. (OTC

NASDAQ SYMBOL:ENST) (''Enstar'') announced Tuesday that it plans to distribute and sell all of the common shares of its American Savings & Loan Association of Florida (''American Savings'') subsidiary.

Enstar will distribute to a trust established for the benefit of the Enstar shareholders, 50 percent of the issued and outstanding shares of American Savings. For each issued and outstanding Enstar share, a shareholder will receive .5 shares of American Savings.

Enstar will pay the dividend to the trust on March 12, 1990 for the benefit of the Enstar shareholders. The trust will distribute the American Savings shares, or the proceeds from any sale of the American Savings shares, to the Enstar shareholders on a record date to be set following the effectiveness of a registration statement to be filed with the Office of Thrift Supervision, Department of the Treasury or confirmation that registration is not required, but not later than August 31, 1990.

Pending distribution from the trust, Enstar common stock will trade coupled with the dividend held in the trust for the benefit of Enstar shareholders. In light of the foregoing, Enstar will not pay this year's annual cash dividend.

It is anticipated that Enstar, American Savings and the Trust (''Sellers'') will engage The First Boston Corp., The Blackstone Group and Kaplan, Smith & Associates Inc. (''Advisors'') in an effort to sell all of the common stock of American Savings. To consummate the sale, the Advisors will assist the Sellers in locating suitable prospective purchasers who will be able to consummate the transaction at an acceptable price and on a timely basis.

There can be no assurance that such a sale can be consummated. The distribution by the Turst of the American Savings' shares held for the beneift of the Enstar shareholders is not dependent on a sale of American Savings.

LAGRANGE, GA (FEB. 13) BUSINESS WIRE - Tuesday First Federal Savings Bank of LaGrange (NASDAQ:FLAG) announced earnings for the year ended Dec. 31, 1989.

Net income for the fiscal year 1989 was $1,197,125, or $1.48 per share, as compared to $1,833,321, or $2.27 per share, for year ended Dec. 31, 1988.

Earnings in 1988 exceeded earnings in 1989 primarily due to the one-time gain of $264,844 on the sale of investment securities in 1988. The vigorous funding of loan loss reserves also contributed to the decrease. In 1989 $179,311 was added to loan loss reserves as compared to $33,213 in 1988.

Increased operating costs during progress of both physical and product growth influenced the 1989 earnings. This past year two branches have opened and construction began at the headquarters office to build a Mortgage Lending Addition. The completion of this facility will provide space to promote and service retail products currently offered and planned.

First Federal is required by the Office of Thrift Supervision to maintain minimum capital level of $4,285,000. Current net worth stands at $15,713,226.

At Dec. 31, 1989, total assets reached $157,956,018, an 8 percent increase from a year ago. Stockholders' equity was $15,713,226 or $19.52 per share as compared to the same period in 1988 of $14,976,089, or $18.60 per share.

First Federal Savings Bank of LaGrange currently has 805,000 shares of common stock outstanding.

#90044b0698 02/13/1990 ~Business Wire

BOSTON (FEB. 13) BUSINESS WIRE - Lotus Development Corp. Tuesday announced Freelance Plus 3.01 network editions, providing PC users with an efficient and cost-effective means of installing, managing, and running Freelance Plus 3.01 on a local area network.

Introduced at the NetWorld 90 Boston trade show, Freelance Plus 3.01 network editions offer Freelance Plus' comprehensive business graphics functionality - full-featured charting, drawing and presentation capabilities - in a shared network environment. Freelance Plus 3.01 network editions will be available in the second quarter of 1990.

''Freelance Plus 3.01 network editions deliver all of Freelance Plus' award-winning functionality in a shared computing environment, making Freelance Plus the best business graphics solution for networked users,'' said June Rokoff, vice president of Lotus' Graphics and Information Management Divisions.

''In addition, the products follow the Lotus networking specifications

which include network-optimization features and functionality, distinguishing Freelance Plus 3.01 network editions from those of other business graphics products.''

Freelance Plus 3.01 is available in three editions: Standard, Server and Node. The Standard Edition, which shipped in September 1989, is intended for a single user in a stand-alone or networked environment and contains complete documentation and software.

The Server Edition is licensed for shared use from a central file server and includes one user license, software (both 5.25-inch and 3.5-inch media), LAN administration tools, a network user guide, complete documentation and the Freelance Plus LAN Administrator's Guide. The Node Edition provides a single license for network use, complete documentation and a network user guide. Key Features of Freelance Plus 3.01 Network Editions

Freelance Plus 3.01 network editions offer LAN users new features and enhancements to better control and manage their business graphics applications in a shared network environment. These include: file-sharing capabilities, support for the 1-2-3 file reservation scheme and LAN administration tools. Additional capabilities that benefit end users in a networked environment are also included.

Freelance Plus 3.01 network editions' file-sharing capabilities help prevent users from unintended file modification in a multiple-user environment. When Freelance Plus data files are saved, a warning message will be displayed if the file has been modified by anyone on the network since it was last accessed.

Support for the 1-2-3 file reservation scheme prevents Freelance Plus network editions users from having 1-2-3 data unknowingly changed while viewing or importing shared spreadsheet files. For example, while viewing a 1-2-3 spreadsheet from within Freelance Plus, a read-only attribute will be placed on that 1-2-3 spreadsheet file until the user is finished importing the data. This prevents any modification of that 1-2-3 file until the Freelance Plus user has finished viewing or importing data from that file.

The LAN administration tools provided in the Server Edition allow network administrators to install, control and manage all Lotus products on the network from one menu screen. For example, the Count Utility lets network administrators set the number of network licenses available to the number of licenses purchased. It also helps them determine when additional licenses must be added to the network in order to satisfy workgroup requirements.

Additional capabilities provided by Freelance Plus 3.01 network editions

help end users work more efficiently in a networked environment. These include the ability to access shared peripheral devices more easily, store symbol libraries (clip art) on the network for shared use by a workgroup, and the ability to conserve hard-disk space on individual PCs connected to a network. System Requirements, Pricing, and Upgrades

Freelance Plus 3.01 network editions are certified for use with DOS 3.1 compatible network operating systems, including IBM PC LAN Program 1.2 and 1.3 (requires DOS 3.3), 3Com 3+ Share 1.3, Novell SFT Netware 2.15 and Banyan Vines 3.0.

All three Freelance Plus versions require a minimum of 438 kilobytes available after DOS and the network software are loaded. That requirement can be reduced to 415K by using a DOS command-line switch that decreases the amount of memory allocated for charts and drawings.

Server and Node Editions of Freelance Plus 3.01 will be available at a suggested retail price of $695 and $395, respectively. The Standard Edition is currently available through Lotus Authorized Resellers for a suggested retail price of $495.

Freelance 1.0 and Freelance Plus 2.0/2.01 users may upgrade to either the standard or node editions for $100. Freelance Plus 3.0/3.01 standard edition users may transfer their Standard Edition licenses to Node Edition licenses if they elect to run Freelance Plus from the network, rather than from their hard disks.

Other Lotus products available in network editions include 1-2-3 Release 2.2, 1-2-3 Release 3, Symphony 2.0 and Manuscript 2.0.

Lotus Development Corp. is the leading developer of applications software for personal computers and the leading provider of information services delivered on compact disk.

All prices and terms are for the U.S.A. only.

MIAMI LAKES, FL (FEB. 13) BUSINESS WIRE - Preferred Homecare of America Inc. (NASDAQ: PFRD), has completed the acquisition of Palliative Home Care Services (PHCS) of Hollywood, Fla., a physician owned home infusion therapy company. The purchase price at closing was $1 million consisting of cash, stock, and notes. The letter of intent was signed in October 1989.

Carlos M. Herrera, president and chief executive officer of Preferred Homecare of America, remarked "This acquisition will enhance our current solid base of business in the South Florida region, and is consistent with our strategy of expansion through the acquisitions of physician owned home infusion therapy companies."

Preferred Homecare of America is a hi-tech home infusion company and provider of pharmaceuticals to subacute care facilities. Preferred Homecare of America currently has offices servicing patients in Miami/Fort Lauderdale, Pasco County, Fort Myers, Fla., the New York/New Jersey metropolitan area and the Washington/Maryland/Virginia region.

#90044b0718 02/13/1990 ~Business Wire

ARMONK, NY (FEB. 13) BUSINESS WIRE - IBM announced Tuesday that it has fabricated a 16-million-bit computer memory chip on an existing semiconductor production line.

The 16-million-bit dynamic random access memory (DRAM) chip has four times the storage capacity of today's most advanced memory chips. Fabricated at IBM's semiconductor facility in Essex Junction, Vermont, the chip will be described by company engineers at a technical conference in San Francisco this week.

Also described will be a new family of application-specific integrated circuit (ASIC) logic chips capable of holding up to 300,000 circuits, some of the densest logic chips of their type yet announced.

The 16-million-bit chip is the latest achievement in IBM's continuing development of denser and faster computer memory chips. The company has also led the way with early introduction of one-million-bit and four-million-bit DRAMs.

"This represents another milestone for IBM, and I am enormously proud of our technology team," said Jack D. Kuehler, IBM president. "To demonstrate manufacturing feasibility of the 16-million-bit memory chip so quickly will enhance our competitiveness in a global semiconductor market."

The 16-million-bit dynamic random access memory (DRAM) chip can store the equivalent of about 1,600 pages of double-spaced typewritten text and operates at very high speed, accessing the first bit of data from one of its storage cells in 50 nanoseconds (billionths of a second) and subsequent bits at a sustained data serial rate of only ten nanoseconds.

At this speed, nearly all of the chip's 16,777,216 bits could be "read" in only 1/25 of a second, or several times faster than the blink of an eye.

Measuring 7.8 millimeters by 18.06 millimeters (about 1/3 inch by 3/4 inch), the chip is fabricated in an advanced version of a technology known as Complementary Metal Oxide Semiconductor (CMOS) that allows for circuit patterns on the chip with dimensions as small as 0.5 microns (millionths of a meter) wide, or nearly 200 times thinner than a sheet of ordinary typing paper. CMOS technology produces chips that are denser and use less power than those made using the other types of technology.

The chip achieves its greater density through the use of a memory cell (the area of the chip that stores one bit of data) that is only four microns square, approximately one-third the size of the memory cell in IBM's four-million-bit chip. Some 250,000 of these cells would fit in an area one millimeter square - about the size of the hole in the typewritten letter "o."

#90044b0722 02/13/1990 ~Business Wire

HOUSTON (FEB. 13) BUSINESS WIRE - Union Texas Petroleum Holdings Inc. (NYSE: UTH) Tuesday announced that its Union Texas Petroleum Corp. subsidiary has discovered natural gas and crude oil in a well drilled on Vermilion Block 404 in the Gulf of Mexico.

Located approximately 140 miles south of Lafayette, La., the Vermilion Block 404 No. 1 well found 156 feet of gas pay and 67 feet of oil pay (true vertical depth) in two zones below 7,500 feet.

The well flowed 1,668 barrels of oil on a 32/64-inch choke with 1,503 pounds-per-square-inch flowing tubing pressure during a test of the oil pay between 8,195 feet and 8,290 feet. Union Texas said that additional drilling is planned for Vermilion 404.

Vermilion 404 is adjacent to Vermilion 412, where Union Texas discovered 142 feet of natural gas pay in two zones below 4,300 feet in mid-1989. Gas and oil reserves from both Vermilion 404 and 412 will be produced from a platform to be installed on Vermilion 412. Production is expected to be initiated in 1991.

Union Texas serves as operator of both Vermilion 404 and 412 and has a 50 percent interest in each. AGIP Petroleum Co., Inc., a subsidiary of AGIP S.p.A., ENI Group, has the remaining 50 percent interest in the tracts. Vermilion 404 was purchased at the April 1987 federal offshore lease sale.

One of the nation's largest independent producers, Houston-based Union Texas Petroleum Holdings Inc. (NYSE: UTH) explores for and produces oil and gas in the United States and overseas, and has petrochemicals and natural gas procesing interests.

LEVITTOWN, NY (FEB. 13) BUSINESS WIRE - Quantech Electronics Corp. (OTC) Tuesday reported results for its third quarter and nine months ended Dec. 31, 1989.

Revenues in the first nine months were $1,923,752 compared with $2,093,852 in the first nine months of the prior year. There was net income of $275,863, or 6 cents per share, vs. net income of $147,915, or 6 cents per share, for the nine months ended Dec. 31, 1988. There are significantly more shares outstanding during the current period.

Revenues in the third quarter ended Dec. 31, 1989 were $662,887 compared with $700,293 in the third quarter of the prior year. There was net income of $36,775, or 1 cent per share, vs. net income of $35,491 or 2 cents per share, for the quarter ended Dec. 31, 1989.

Quantech Electronics Corp., is the largest independent consumer service organization in the greater New York metropolitan area.

Micronetics Inc. (NASDAQ:NOIZ), which is 49 percent owned by Quantech, is a leader in the design and manufacture of solid state noise sources and noise generators, and also manufactures microwave components and switches used in electronic control devices, communication systems and sophisticated defense systems.

#90044b0728 02/13/1990 ~Business Wire

NORTH SPRINGFIELD, VT (FEB. 13) BUSINESS WIRE - Vermont Research Corp. announced that net product sales for the first fiscal quarter of 1990 ended Dec. 30, 1989 were substantially down from the first quarter of fiscal 1989.

Net product sales were $675,000, down $765,000 from $1,440,000 one year ago. There was a net loss for the quarter amounting to $125,000, or 6 cents per share as compared to net income for the first quarter of 1989 of $1,371,000, or 68 cents per share. Profits for the first quarter last year included a one-time gain of $1,365,000 from the sale of assets.

Although the cost of sales and services increased from 50 percent of net sales and services last year to 60 percent this year, selling, general and administrative expenses have decreased by $368,000 from the comparable quarter one year ago as a result of the company's cost reduction programs. Research and product development expenses increased by $37,000 as the company has focused more effort on developing new products. The balance sheet remains strong with $1,826,000 in working capital and no long-term debt.

Marketing of the company's solid-state memory product in the past has been directed toward the replacement of drum memory products sold by the company in earlier years. As the quantity of drum memories needing replacement has decreased, sales of the solid-state products have fallen.

However, the company has identified several large market opportunities for sales of the company's solid-state memories as replacements for mechanical disk drives, and the company is hopeful that sales in this new market will supplant drum memory replacement sales during this fiscal year.

In addition, the company has obtained the right to assemble and sell a new solid-state memory product, DRAMfile, which will broaden the company's product base. This product is smaller in size than the company's current Model 4256 Solid-State Memory and has a very fast computer interface. These advantages should open additional markets to the company.

#90044b0743 02/13/1990 ~Business Wire

NEW YORK (FEB. 13) BUSINESS WIRE - The Continental Corporation (NYSE:CIC) Tuesday reported 1989 net income of $153.1 million, or $2.74 per share, compared with income of $0.9 million, or a loss of $.09 per share, after deducting dividends to preferred shareholders, for 1988.

Revenues for 1989 were $6.1 billion, compared with $5.9 billion in 1988. Consolidated net investment income for the year was $746.6 million, up from $631.8 million a year ago.

The company realized pretax capital gains in 1989 of $193.4 million, versus pretax capital losses of $0.2 million for the previous year. After tax, 1989 realized capital gains were $2.34 per share, against $0.00 per share in 1988.

Book value per share at December 31, 1989 was $42.24 compared with $41.28 at year-end 1988. Book value with all investments valued at market prices was $43.22, against $40.95 a year ago.

The 1989 results do not include any income or loss from discontinued life insurance operations. In 1988 discontinued operations reported a loss, after realized capital gains and losses on disposal of subsidiaries, of $121.6 million, or $2.15 per share.

Net income for the fourth quarter of 1989 was $71.4 million, or $1.30 per share, against a net loss of $113.1 million, or $2.01 per share, for the 1988 fourth quarter. The 1989 result includes a previously announced $19.0 million pretax charge for net losses resulting from the California earthquake and a $16.9 million pretax charge for losses inflicted by December's severe cold snap. The 1988 result includes a $76.0 million pretax charge to strengthen prior years' loss reserves in the company's international, reinsurance and excess lines businesses.

Revenues for the fourth quarter were $1.6 billion, compared with $1.6 billion in 1988. Consolidated net investment income for the quarter was $199.8 million, up from $173.2 million a year ago. The company realized pretax capital gains in the 1989 fourth quarter of $102.6 million as it traded bonds to enhance returns and locked in further gains on common stock investments. For the same period last year the company realized pretax capital losses of $1.0 million. After tax, fourth quarter 1989 realized capital gains were $1.22 per share, versus $.01 per share in 1988.

The Continental Corporation, headquartered in New York City, has over $6 billion in annual revenues and $13 billion in assets. Its insurance subsidiaries write property/casualty coverages through independent agents and major brokers, with an emphasis on commercial package policies and select specialized insurance products and services.

SHREWSBURY, NJ (FEB. 13) BUSINESS WIRE - Wellman Inc. (NYSE: WLM) announced Tuesday that its Wellstar joint venture, which is 40 percent owned by Wellman, has signed an agreement to acquire the assets of Lin Pac Plastic Moldings Ltd., located in Sherburn, England.

The acquisition is expected to close within 30 days. The purchase price was not disclosed.

Lin Pac, with sales of approximately $30 million, is the second-largest polyethylene terephthalate (''PET'') bottle manufacturer in the United Kingdom and Wellstar's second bottle manufacturing operation in that country.

Other Wellstar facilities are located in the Netherlands (two) and France. With combined sales of over $120 million, Wellstar is believed to be the largest ''PET'' plastic container manufacturer in Europe.

Wellman Inc. is constructing a bottle recycling facility in Holland, which will provide recycled ''PET'' to some of Wellstar's operations and to Wellman International Ltd., Wellman's Man-Made Fibres subsidiary in Ireland.

Wellman, Inc. is the largest recycler of plastic and fibre wastes in the United States and utilizes these wastes to produce polyester and nylon fibres and plastic resins for specialty markets. The company is also one of the largest manufacturers and distributors of polyester textile fibres in the United States.

FORT WORTH, TX (FEB. 13) BUSINESS WIRE - Normandy Oil and Gas Co. Inc. (NASDAQ:NMDY) Tuesday announced the completion of two Frio Sand oil wells on two of its leases in the Hankamer Field, Liberty and Chambers Counties, Texas, about 40 miles east of Houston.

Harris No. 7, in which the company has a 42 percent net revenue interest, flowed 160 barrels of oil per day on a one-eighth inch choke. Kahn No. 5-B in which the company owns a 32 percent net revenue interest, flowed 140 barrels of oil per day, also on a one-eighth inch choke. The oil will be sold to Chevron at the posted price, which is currently $21 per barrel.

As a result of completing these developmental wells, Normandy's independent engineers and geologists have increased the company's total proved oil reserves by 147,677 barrels, or about 24 percent. Its proved gas reserves increased by 791,710 MCF, or 11 percent.

Roy T. Rimmer Jr., president of Normandy, said that because of logging, testing and completing these new wells, the field size has been extended and the company plans to drill at least three additional wells in this field within the next few months. The company will have a net revenue interest of 64 percent in any additional wells on the Kahn lease.

Rimmer notes that both wells have several additional productive Frio Sand reservoirs behind the pipe, which can be opened for production at later dates.

Normandy, a Fort Worth based oil and gas company, operates primarily in Colorado and Texas, and has recently expanded into natural gas gathering and processing operations in Oklahoma and Utah.

BOCA RATON, FL (FEB. 13) BUSINESS WIRE - Gary O. Marino, president and chief executive officer of Boca Raton Capital Corp., announced Tuesday that its wholly-owned subsidiary, Continental Business Forms Inc. acquired 100 percent of the common stock of Snapedge Inc., for a purchase price in excess of $2 million.

Boca Raton Capital is a publicly-owned closed-end investment company headquartered in Boca Raton.

Snapedge, founded more than 20 years ago, is a wholesale business forms manufacturer specializing in customized continuous computer and snap-apart business forms, its principal market is in Southern California where it sells its products through distributors and dealers.

The company's gross revenues for the fiscal year ended June 30, 1989, were in excess of $5 million. It has 40 employees.

''The acquisition of Snapedge provides an excellent opportunity for Boca Raton Capital to enter a niche in the highly profitable technology industry through a well-established company.

''The addition of Snapedge to our corporate portfolio is consistent with our objective of investing in profitable, well-managed middle-market manufacturing and distribution companies located in North America,'' stated Boca Raton Capital's President Gary Marino.

Boca Raton Capital Corp.'s shares are traded on NASDAQ under the symbol BOCA. Its investment portfolio includes equity investments in railroads, manufacturing companies and The Racquet Club of Boca Raton, as well as income-producing commercial real estate.

It recently formed Mariner Venture Capital Corp., a small business investment company (SBIC) licensed by the Small Business Administration under the SBIA Act of 1958.

NEW YORK (FEB. 13) BUSINESS WIRE - Grey Advertising Inc. (OTC) Tuesday reported 1989 gross billings of $2,741,924,000 compared with $2,489,867,000 in 1988.

Commissions and fees increased to $411,083,000 from $373,293,000. Operating net income was $13,920,000 compared to $11,713,000, while primary earnings per common share from 1989 was $10.44 vs. $8.88, in 1988. On a fully diluted basis, earnings per common share amounted to $10.05 vs. $8.63.

In the fourth quarter, gross billings increased to $754,844,000 compared with $752,952,000 for the same period in 1988. Income from commissions and fees was $113,170,000 vs. $112,886,000.

Operating net income was $4,067,000 compared with $3,115,000, in fourth quarter 1988, and primary earnings per common share were $3.00 vs. $2.31, in fourth quarter 1988. On a fully diluted basis, earnings per common share was $2.91 vs. $2.24 in 1988.

In 1988, the company sold certain foreign and domestic subsidiaries which resulted in a non-operating gain of $3,730,000 of which $1,780,000 was recognized in the fourth quarter and which results are not included in the foregoing.

Those sales had a $2.79 per share effect on primary earnings, and a $2.68 per share effect on fully diluted earnings, for the year; of which $1.34 per share of primary earnings and $1.28 per share on a fully diluted earnings fell in the fourth quarter.

PALO ALTO, CA (FEB. 13) BUSINESS WIRE - Robert J. Morrey has been named vice president of sales for CF Motor Freight, the long-haul trucking subsidiary of Consolidated Freightways Inc. (NYSE:CNF).

Morrey, who has held several key management positions in his 20-year career with CF Motor Freight, will direct the company's national sales and account services activities, and oversee pricing policies.

Prior to his appointment, he was vice president of national sales for CF Motor Freight's Central Area, a region encompassing eight Midwestern and mid-Atlantic states.

Morrey succeeds Peter D. Boulais, who recently was appointed vice president of sales for Emery Worldwide.

''Robert Morrey brings extensive sales experience in the trucking industry to his new position,'' said Robert H. Lawrence, president of CF Motor Freight. ''His proven leadership abilities, coupled with his knowledge of sales and operations, will strengthen our sales organization and enhance our service to customers.''

Morrey, 46, joined CF Motor Freight in 1970 as a management trainee in Chicago. He later gained extensive experience in both operations and sales management, serving as assistant manager at the company's Homewood, Ill., terminal and Aurora, Ill., consolidation center, Central Area sales manager and a national account executive in Chicago.

In 1978, Morrey became Indianapolis terminal manager, a position he held until 1980 when he was appointed Indianapolis division manager. He eventually was promoted to vice president of national sales, Central Area in 1987.

CF Motor Freight is the largest subsidiary of Consolidated Freightways Inc. of Menlo Park, Calif., a $4 billion transportation services company, which, in addition to long-haul trucking, has businesses in regional overnight trucking, worldwide air freight, intermodal truckload and ocean freight services.

DALLAS (FEB. 13) BUSINESS WIRE - Rosewood Financial, Inc. which controls 9.95 percent of the common stock of First Executive Corporation (NASDAQ:FEXC), said Tuesady that it expanded its advisory team with the engagement of J.P. Morgan as financial advisor with respect to a potential merger or acquisition of First Executive.

While continuing to evaluate alternatives regarding any new proposal, Rosewood said that any resolution of First Executive's problems must extend beyond a mere change of control. ''We are determined to see First Executive restore public confidence with a renewed commitment to all constituencies. Any rehabilitation of the company must begin with the assurance that the company will meet its responsibilities to pensioners, policyholders, creditors, stockholders and agents,'' Rosewood Financial president Mark W. Hobbs said.

On January 31, Rosewood engaged The Chase Manhattan Bank, N.A. to act as its financial advisor in connection with the structuring of a senior bank debt facility. Rosewood has said that it contemplates such a facility would provide financing of up to $575 million for Executive Life Insurance Company following a merger.

Rosewood Financial, Inc. is the investment arm of The Rosewood Corporation, the principal holding company for the Caroline Hunt Trust Estate. Caroline Hunt, the primary beneficiary of the trust estate, plays no role in the management of Rosewood Financial or The Rosewood Corporation.

LOS ANGELES (FEB. 13) BUSINESS WIRE - Sterling Bancorporation (OTC) (not to be confused with the NYSE company of the same name), Tuesday announced preliminary and unaudited earnings of $1,508,337, or $1.14 per share, for

the year ended Dec. 31, 1989.

The earnings represented a 49.5 percent increase over the $1,008,667, or 78 cents per share, recorded in 1988. All per share numbers are adjusted where appropriate for the 5 percent stock dividend paid Nov. 16, 1989 to shareholders of record as of Oct. 26, 1989.

Net income for the fourth quarter was $539,895, or 41 cents per share, compared to $396,874, or 31 cents per share, for the same period in 1988.

The increase in net income was primarily attributable to improvement in the financial results of Sterling's mortgage and finance company subsidiaries. BSC Mortgage Corp. recorded mortgage originations of $287 million as compared to $133 million in 1988.

The mortgage company's improvement was partially offset by a decrease in net income for the bank. The bank experienced a substantial reduction in gains from real estate development activity and also suffered a decline in net interest margin as a result of higher deposit costs.

Sterling's finance company subsidiary, Sterling Business Credit Inc., recorded a substantial improvement in net income as a result of higher volume and continued good loss experience.

SUNNYVALE, CA (FEB. 13) BUSINESS WIRE - Sunrise Technologies Inc. (NASDAQ:SNRS), Tuesday reported revenues for the year ended Dec. 31, 1989 of $2,103,573, a 382 percent increase over the $436,773 for the same period a year ago.

Net income for the 1989 calendar year was $71,250, or 1 cent per share, compared to a net loss of $41,970 the previous year.

Revenues for three months ended Dec. 31, 1989 were $680,532, or an increase of 587 percent over the $115,773 reported for the same quarter a year ago. Net income for the quarter was $30,146, which compares to a loss of $42,277 for the fourth quarter last year.

Vassiliadis also said that Sunrise's two new ophthalmic laser products were introduced recently during a meeting of the American Academy of Opthalmology and that the technological breakthrough represented by these new products, which will be used to treat glaucoma patients in a physician's office, was well received.

Since then, Sunrise has filed for Investigational Device Exemptions for both systems with the Food and Drug Administration.

CHICAGO (FEB. 13) BUSINESS WIRE - United Airlines announced Tuesday that Chicago Mayor Richard M. Daley and Illinois Gov. James R. Thompson have joined with United Airlines in seeking authority from the U.S. Department of Transportation (DOT) for United to operate non-stop air service between Chicago and Tokyo.

''The support of Gov. Thompson and Mayor Daley is invaluable in the most significant international route opportunity available to Chicago and United Airlines,'' said Stephen M. Wolf, chairman and president of United Airlines.

''The more than 70,000 employees of United, including more than 17,000 based in Illinois, deeply appreciate their support and confidence in United.

While the U.S. Mainland-Japan market for U.S. flag carriers grew 38 percent from 1984 to 1987, the U.S. flag carrier traffic in the Chicago Tokyo market actually declined by 13 percent, according to the DOT. Meanwhile, other U.S. gateways have experienced a substantial increase in their service to Japan.

The Illinois congressional delegation, made up of U.S. Sens. Alan J. Dixon and Paul Simon and 22 U.S. representatives, wrote recently to DOT Secretary Samuel K. Skinner, arguing that U.S. national interest would be well served by placing an additional U.S. flag carrier on the Chicago-Tokyo route -- particularly since the only U.S. carrier presently on the route does not operate a hub at Chicago and cannot offer the level of connecting service United provides as Chicago's major carrier.

Under the 1990 U.S.-Japan Gateways Proceeding, the DOT will grant six routes between U.S. gateways and Japan, with three of these routes involving air transport to Tokyo's Narita International Airport. Seven cities: Atlanta, Kona/Maui, Honolulu, Houston, Los Angeles, San Jose and St. Louis, are competing with Chicago for the three Tokyo routes. The DOT said it will decide this year which cities and which carriers will be granted new service between the United States and Japan.

United Airlines became the the first carrier to file for the Chicago Tokyo route in January 1989. The carrier said that it is prepared to begin service as soon as the authority is granted and will operate the flights using its state-of-the-art Boeing 747-400 aircraft.

#90044b0806 02/13/1990 ~Business Wire

HOUSTON (FEB. 13) BUSINESS WIRE - Panhandle Eastern Corp. is reviewing a recent U.S. Court of Appeals decision that overturned the method used by its subsidiaries to flow through to its customers approximately $276

million in producer-generated costs.

The court remanded the case to the Federal Energy Regulatory Commission (FERC).

George L. Mazanec, group vice president of Panhandle Eastern Corp., said, ''The costs were lawfully incurred and are fully recoverable under the 'guaranteed passthrough' provision of the Natural Gas Policy Act of 1978, but because of the court decision, we must wait for FERC to sort out the appropriate collection method.'' Under the FERC's Order No. 94, issued in 1980, gas producers were allowed to pass certain field compression and gathering costs through to their pipeline customers.

The FERC deferred action on the pipelines' passing through of these amounts until 1983 when, to equitably allocate costs, it authorized Panhandle Eastern Pipe Line Co., Trunkline Gas Co. and Texas Eastern Transmission Corp., along with other interstate pipelines, to direct bill their customers who had purchased the gas.

The court considered this method to be unlawful ''retroactive ratemaking'' and remanded the case for further consideration by the FERC. Panhandle Eastern's three pipeline subsidiaries collected $276 million from its customers through direct billings from 1985 - 1989 for costs incurred from 1980 - 1984.

Panhandle Eastern Corp. operates one of the nation's largest interstate natural gas pipeline systems, providing natural gas to the Midwest and Northeast markets.

CINCINNATI (FEB. 13) BUSINESS WIRE - Federal Judge David D. Dowd of Akron filed an order Tuesday dismissing Cincinnati Bell Telephone (NYSE: CSN) from a federal suit filed by three former policemen and a former Hamilton County commissioner in 1988 which accused Cincinnati Bell of illegal wiretapping.

Gene Mesh, attorney for the plaintiffs made an oral motion on Jan. 31, requesting the dismissal saying, ''It does not make good sense to proceed with this litigation.'' Mesh also said, ''Dowd told us there was nothing to tie the Bell defendants into this wiretapping activity.''

Cincinnati Bell agreed to drop its counter suit against the plaintiffs.

Ray Clark, President of Cincinnati Bell Telephone said, ''The plaintiffs have recognized what we have said all along - Cincinnati Bell and its managers have not authorized, directed or condoned illegal wiretaps.''

On Jan. 23, a Hamilton County Common Pleas Court jury found chief accusers Leonard Gates and Robert Draise guilty of defaming Cincinnati Bell and Cincinnati Bell managers Peter Gabor and James West. The jury also found Gates and Draise to be guilty of causing emotional distress to Gabor and West.

#90044b0820 02/13/1990 ~Business Wire

CLEVELAND (FEB. 13) BUSINESS WIRE - TRW Inc. Tuesday reported record sales and earnings per share for the year ended Dec. 31, 1989.

Sales for the year totaled $7.34 billion, up 5 percent from $6.98 billion in 1988. Earnings per share were up slightly to $4.25, compared with $4.23 in the year earlier. Operating profit from the company's three core businesses was up 30 percent to $578 million compared with $444 million in 1988. Net earnings increased to $263 million in 1989, compared with $261 million in 1988 which included a large divestiture gain principally from the sale of TRW's Reda Pump and Oilwell Cable businesses.

For the fourth quarter, sales rose 12 percent to $1.9 billion, from $1.7 billion in the year-ago period. Profit before taxes for the 1989 period climbed 52 percent to $92 million from $61 million in the like period of 1988, with each operating segment contributing to the increase. Net earnings were $64 million, up 15 percent from $56 million for the comparable 1988 period that benefitted from a lower effective tax rate. Earnings per share were $1.03, 14 percent over the 90 cents reported in 1988.

In the automotive segment, sales for the quarter rose 13 percent to $909 million, compared with $805 million a year ago. The sales increase was due primarily to continued rapid growth in occupant restraints and strong European and Brazilian markets. Operating profit for the segment was $69 million, up 3 percent over $67 million in 1988's fourth quarter, despite higher start-up expenses and lower domestic volume. For the full year, segment sales were up 12 percent and operating profit increased 35 percent. Excluding the charge for the steering gear recall in 1988, and related income in 1989, operating profit was down 4 percent.

In the space and defense segment, sales for the quarter were up 7 percent to $819 million vs. $763 million in the year-earlier period. Operating profit increased sharply to $51 million, up 48 percent from $35 million in the 1988 period. New contract awards and improved program performance accounted for most of the increase in the quarterly sales and operating profit. For the full year of 1989, sales were about equal to the prior year in a much tougher environment, while operating profit rose 11 percent.

TRW provides high technology products and services primarily for the automotive, space and defense, and information markets.

WASHINGTON (FEB. 13) BUSINESS WIRE - The United States can prosper and assert global leadership in the coming golden age of societal achievement and economic strength only if it has a coherent national telecommunications policy and a fully competitive information industry, a top industry leader said Tuesday.

''The ultimate target for policymakers should be a U.S. information industry that is fully competitive in all of its parts so that the power of the marketplace can bring this nation the most fully developed information infrastructure in the world,'' said William L. Weiss, Ameritech (NYSE:AIT) chairman and chief executive officer. His comments

were made to members of the Federal Communications Bar Association.

Weiss said delivering the full benefits of the information age to all segments of society and positioning the United States to perform as a leader in global markets will require policies that:

- Expedite the entry of new information technologies to market and allow the marketplace to decide how to apply them to society's needs;

- Encourage development of the public information infrastructure;

- Define the information infrastructure as broadly as possible; and,

- Allow equal and fair competition in the local exchange.

''It becomes critical to keep the public information infrastructure up to date with the best information technologies so those technologies will be available to all sectors of the economy,'' he said.

Weiss cited small businesses, in particular, as beneficiaries of an up-to-date public infrastructure. They account for half the gross national product and two out of three new jobs and depend upon the public network infrastructure for their information capabilities.

All customers will have expanded choices when there is ''rational, economically sound'' competition in the local exchange network, Weiss said.

He said the transition to a ''productively competitive'' local exchange marketplace would require important freedoms:

- Freedom for local exchange carriers to price closer to relevant costs;

- Freedom from coercion to price services below cost;

- Freedom from rate subsidies; and,

- Freedom to operate in a policy environment where restrictions and regulations do not favor or hamper service providers.

Where there is to be regulation, Weiss said, there should be as little as possible and it should apply equally to all competitors.

Opening the local exchange to competition under these conditions would offer the local exchange company no competitive advantage and would make a fully competitive local exchange ''an economically sensible and productive reality,'' he said.

Weiss said that if policymakers at all levels of government ''will look

clearly at the possibilities, and seize them, this nation can be preeminent in the world economy'' for the next decade and throughout the duration of the information age.

Ameritech is the Chicago-based parent of the Bell companies serving Illinois, Indiana, Michigan, Ohio and Wisconsin, and of other information-related companies providing cellular communications, directories, lease financing, voice messaging and audiotex services.

Its 1989 revenues were $10.2 billion.

#90044b0830 02/13/1990 ~Business Wire

BOSTON (FEB. 13) BUSINESS WIRE - Cabletron Systems Inc. (NYSE:CS) Tuesday announced availability of its IEEE 802.3 10BASE-T chip for OEM customers to integrate into their 10BASE-T product designs.

The new product, based on Draft 10 of the emerging 10BASE-T standard, is the first of its kind available to OEM markets.

''We orginally designed the 10BASE-T chip as a cost-effective, reliable solution for Cableston's 10BASE-T product line. We are now making it available to OEM customers because we recognize the time and cost factors that went into developing th chip technology.

''Instead of duplicating an existing technology, OEMs now have a source for 10BASE-T chips to integrate networking connections. It will literally save them hundreds of thousands of dollars in R & D, tooling, and manufacturing costs,'' stated Craig Benson, chief operating officer at Cabletron.

Cabletron's development of the 10BASE-T chip began in November, 1988 as the company recognized the need for an on-board chip to service the upcoming 10BASE-T market. The decision was made then to build the chip as part of an intregrated solution across all product lines.

By developing the chip technology internally, the company was able to produce a cost-effective and reliable solution for its product, allowing pricing to remain competitive while simultaneously setting the stage for a natural product migration into the new decade and beyond.

In November of 1989, Cabletron announced shipment of products which used its 10BASE-T chip, including a 12-port Media Interface Module for the

Multi Media Access Center hub, the TPT-T Twisted Pair transceiver, and DNI PC interface cards utilizing twisted pair wiring for IBM's PC AT, XT and Microchannel bus and for Apple's SE, SE-30 and NuBus (MAC-II) personal computers.

With that announcement, Cabletron became the computer industry's first company to ship 10BASE-T draft-compatible products based on the emerging 10BASE-T interconnection standard for twisted pair wiring. At that time, and until recently, industry insiders saw tremendous risk in announcing a 10BASE-T product before the standard is officially accepted by the IEEE committee.

''When we first delivered 10BASE-T draft-compatible products in November, our competitors thought it was premature and risky. Since that time, however, we have noticed many companies announcing a 10BASE-T solution. We have experienced a tremendous demand for the products based on the emerging standard, and we believe many more companies will join the market as the ratification date draws closer,'' said Michael Welts, director of marketing at Cabletron.

''Our so-called 'risk' was actually a very calculated move. We witnessed a marketwhere everyone was looking for an immediate interoperability standard. We responded to that demand by delivering a draft-compatible product along with a guarantee of future upgrades if the technical specifications of the standard should change. To date there has been no change to the standard. Meanwhile, we have shipped over 3,000 nodes and have without question established ourselves as the early leader in 10BASE-T technology, Welts added.

Headquartered in Rochester, N.H., Cabletron is a leading independent manufacturer of network management solutions including software, hardware and connectivity products for integrated networking systems. The company currently has a worldwide installed base exceeding 700,000 nodes. The publicity held New York Stock Exchange company has reported 157.8 percent revenue growth and 310.1 percent earnings growth annually since 1986.

POMONA, NY (FEB. 13) BUSINESS WIRE - Barr Laboratories Inc. (AMEX:BRL) has released financial results for the second quarter ended Dec. 31, 1989.

Net sales in the second fiscal quarter of 1990 were $19,215,000, as compared to $16,713,000 for the comparable quarter last year, which represents a 15 percent increase.

Net earnings for the three months ended Dec. 31, 1989 were $711,000, or 9 cents per share as compared to a net (loss) of ($2,353,000), or (31 cents) per share for the comparable quarter last year. The major reason for the return to profitability in the current quarter is the company's product mix which has improved the gross margins, as well as the effects of certain cost reduction programs.

Net sales for the six months ended Dec. 31, 1989, aggregated to $34,381,000, as compared to $31,534,000 for the comparable quarter last year which represents a 9 percent increase.

Net (loss) for the six months ended Dec. 31, 1989, was ($81,000), or (1 cent) per share, as compared to a net (loss) of ($2,610,000), or (34 cents) per share, for comparable period last year.

Barr Laboratories is a prime manufacturer of a broad range of multi-source pharmaceutical products with manufacturing facilities located in both Northvale, N.J. and Pomona, N.Y.

#90044b0871 02/13/1990 ~Business Wire
FRAMINGHAM, MA (FEB. 13) BUSINESS WIRE - Framingham Savings Bank Tuesday announced a loss for the year ended Dec. 31, 1989, of $25.6 million, or $6.27 per share, as compared to a loss of $3.1 million, or 75 cents per share, for the year ended Dec. 31, 1988.

The loss for the fourth quarter 1989 was $16.8 million, or $4.10 per share as compared to the loss of $7.2 million, or $1.77 per share, for the fourth quarter 1988. Total assets were $559 million at Dec. 31, 1989, compared to $582 million at Dec. 31, 1988.

The loss for the year is attributable to charges of $33.1 million to the provision for loan losses, comprised of $20.4 million of specific writedowns and $12.7 million of increases to general reserves. For the fourth quarter the bank charged $18.3 million to the provision for loan losses, comprised of $8.8 million of specific writedowns and $9.5 million of increases to general reserves.

Donald R. Hughes, president and chief executive officer, stated ''In booking these losses we are recognizing the continuing deterioration in the real estate market and the Massachusetts economy generally by taking an aggressive stance in marking the collateral value of real estate loans to market.

At Dec. 31, 1989, nonperforming assets stood at $49.1 million and general reserves at $18.2 million providing a 37 percent coverage ratio of general reserves to nonperforming assets and a ratio of general reserves to net loans of 3.94 percent.

The majority of the nonperforming assets represent loans made to local area developers for the construction of single family homes. Nonperforming assets include loans 90 days past due and other real estate owned.

Net interest income for the year ended Dec. 31, 1989, was $13.9 million as compared to $20 million in 1988. The decrease in net interest margin primarily reflects the loss of interest income from nonperforming assets.

Total non-interest income was $2.4 million compared to $1.9 million, due primarily to gains taken from the sale of securities of $310,000 during 1989. Operating expenses in 1989 were $14.4 million compared to $11.9 million in 1988.

Increases in operating expenses primarily reflect the addition of the Milford branch and the commercial banking division in the fourth quarter 1988, the expenses incurred in connection with the contested proxy election earlier in 1989 and a one-time charge in the third quarter of $398,000 due to the expensing of development costs when the bank terminated its plans to develop a main office site.

Framingham Savings Bank is insured by the Federal Deposit Insurance Corporation (FDIC). Framingham Savings Bank is traded on the NASDAQ National Market System under the symbol FSBX.

SCHEDULE 13D

SEC - AMENDMENT NUMBER: 2

ANNOUNCEMENT:

On Jan. 3, 1990 by letter to MSI and Richard R. Crowell of Rosecliff, Michaels Stores terminated the merger agreement which would have made Michaels Stores a wholly owned subsidiary of MSI.

In August 1989 three class action suits were commenced by stockholders of Michaels, its directors, and in one lawsuit, MSI.

The consolidated complaint alleged that the defendants pursued a plan to deprive the plaintiffs in the class of their investments in Michaels at a grossly inadequate price without regard to its future profitability and growth.

The complaint also alleged breach of fiduciary duty and that the merger was actually a plan by the directors to take Michaels private.

MSI has made a motion to dismiss on Oct. 10, 1989 for failure to state a claim upon which relief cannot be granted, but no briefing schedule has been established for this motion.

On Jan. 3, 1990, MSI ceased to hold more than 5 percent due to the cancellation of options for 4,030,138 shares.

WASHINGTON (FEB. 13) COMTEX - The 10-Q report filed at the NASD shows Imark Industries has net assets in liquidation of $1.95 million as of Dec. 31, 1989.

A plan of complete liquidation and dissolution was approved by the

company's board of directors on Oct. 14, 1987. As a result of the plan, the consolidated financial statements for the period from April 30, 1989 through Dec. 31, 1989 have been prepared on a liquidation basis. Under the liquidation basis of accounting, assets are stated at their estimated net realized values and liabilities are stated at their settlement amounts.

As of April 1, 1989, the company had approximately $3.17 million in net assets in liquidation.. On July 15, 1989, the company paid a liquidating dividend of $1.00 per common share, or $1.28 million. The balance of net assets in liquidation of approximately $1.95 million are primarily real estate held for sale of $1.47 million, taxes receivable of approximately $100,000 and investments or cash of approximately $343,000.

GROUP LED BY GENEVE CORPORATION OF STAMFORD, CT OWNS 682,100 SHARES (6.23%) OF FIRST CONSTITUTION FINANCIAL CORP (TICKER: FCON)

ANNOUNCEMENT:

On Dec. 22, 1989 Southern entered into an agreement of purchase and sale of stock with Private Capital Partners Inc. pursuant to which Southern agreed to sell 536,566 common shares of First Constitution to Private Capital in consideration of $9,482,905 in cash.

Private Capital breached the agreement by its failure to pay the purchase price at the closing date.

Private Capital remains obligated to pay Southern the difference between the purchase price and the net proceeds realized by Southern from any sale of the shares to a third party, selling costs incurred in such a sale, and interest from Jan. 10, 1990 to the closing date of such a sale.

Effective Dec. 22, 1989 Edward Netter resigned as a director of First Constitution Financial Corp. and First Constitution Bank.

On Feb. 5, 1990 First Constitutuion cited deteriorating real estate markets for a $27.6 million loss for the fourth quarter of 1989 and the addition of $33.5 million to its provision for loan losses.

In addition, First Constitution announced that the investment partnership which had entered into a merger agreement First Constitution on Oct. 4, 1989 has sought to renegotiate the $25 per share transaction.

#90044k0076 02/13/1990 ~Japanese News Agency
TOKYO (FEB. 13) KYODO - THE MINISTRY OF INTERNATIONAL TRADE AND INDUSTRY (MITI) SAID TUESDAY IT WILL ASK TOYOTA MOTOR CORP. TO EXPLAIN A PLANNED PRODUCTION EXPANSION IN JAPAN WHICH COULD DRAW FIRE FROM THE UNITED STATES AND LEAD TO FURTHER TRADE FRICTION.

TOYOTA HAS UNVEILED A PLAN TO INCREASE ITS PRODUCTION CAPACITY THROUGH BUILDING THREE NEW PLANTS OUTSIDE ITS BASE IN TOYOTA, AICHI PREFECTURE.

THE MOVE, UNUSUAL FOR TOYOTA, WHICH HAS RARELY GONE BEYOND ITS HOMEBASE, IS AIMED AT RECOVERING THE COMPANY'S LOST SHARE IN DOMESTIC SALES.

JAPAN'S NO. 1 AUTOMAKER HAS SET A PRODUCTION TARGET FOR 1994 OF 4.5 MILLION VEHICLES, 500,000 MORE THAN THE ACTUAL OUTPUT IN 1989.

THE REQUEST BY THE MINISTRY REFLECTS ITS WORRIES THAT A FORTIFIED TOYOTA COULD HEIGHTEN U.S. CONCERN OVER A POSSIBLE INCREASE IN JAPAN'S AUTO EXPORTS TO THE U.S.

A MINISTRY OFFICIAL SAID THE U.S. MAY RAISE THE PROBLEM AT UPCOMING STRUCTURAL IMPEDIMENTS INITIATIVE (SII) TALKS, DUE TO BE HELD IN TOKYO BEGINNING FEBRUARY 22.

#90044p0057 02/13/1990 ~PR Newswire

PORT HURON, MI (FEB. 13) PR NEWSWIRE - Robert J. Thomson, chairman, president and chief executive officer of Southeastern Michigan Gas Enterprises, Inc. (NASDAQ: SMGS), reported the 1989 results were the best in the company's history.

Thomson stated that net income available for common stockholders rose to $7,631,000, a 9-percent increase over 1988 net income of $6,971,000. Earnings per share amounted to $1.07 in 1989 compared to $1.06 for 1988.

The increase is primarily due to exceptional fourth-quarter earnings resulting from the extremely cold weather in December. The increase is also due to the result of strong gas sales and transportation to industrial customers throughout the year.

The following is a summary of the results for the quarter and year ended Dec. 31:

Quarter Ended Dec. 31	1989	1988
Operating revenue	$73,801,000	$66,688,000
Net income (loss) for common	3,791,000	3,320,000
Earnings per share(A)	$.53	$.52
Dividends per share(A)	$.20	$.19
Average common shares outstanding	7,167,000	6,699,000

Year Ended Dec. 31	1989	1988
Operating revenue	$226,753,000	$213,883,000
Net income for common	7,631,000	6,971,000
Earnings per share(A)	$1.07	$1.06
Dividends per share(A)	$.78	$.72
Average common shares outstanding	7,107,000	6,596,000

(A) -- Adjusted to give retroactive effect to 5 percent stock dividends in May 1989 and May 1988 and a 4-for-3 stock split in January 1989.

Enterprises is the parent company of six wholly owned subsidiaries: Southeastern Michigan Gas Company (Port Huron); Battle Creek Gas Company (Battle Creek, Mich.); Michigan Gas Company (Three Rivers, Mich.); Southeastern Development Company (Port Huron); Southeastern Financial Services, Inc., f/k/a Southeastern Michigan Engine Specialists, Inc. (Port

Huron); and SEMCO Energy Services, Inc. (Port Huron).

Enterprises serves natural gas to approximately 194,000 customers in 20 counties in the Lower and Upper Peninsulas of Michigan through its subsidiaries Southeastern Michigan Gas Company, Battle Creek Gas Company, and Michigan Gas Company.

#90044p0058 02/13/1990 ~PR Newswire

SMITHFIELD, VA (FEB. 13) PR NEWSWIRE - Smithfield Foods Inc. (NASDAQ: SFDS) today announced that net income in the quarter ended Jan. 28, 1990 fell to $4,654,000 from $5,064,000 in the same quarter of fiscal 1989.

However, because the net income per share figure for the fiscal 1990 third quarter was computed on 9 percent fewer shares outstanding, fiscal 1990 third quarter net income per share was $.63, slightly ahead of the $.62 per share in the same year earlier quarter.

The company's net income in the first nine months of fiscal 1990 fell to $4,227,000, or $.57 per share, from $9,887,000, or $1.20 per share, in the corresponding nine-month period a year ago. The net income per share figure for the first nine months of fiscal 1990 was computed on 9 percent fewer shares outstanding.

Dollar sales in this year's third quarter rose to $242,025,000 from $208,345,000 in the same quarter of fiscal 1989. Dollar sales in the first nine months of fiscal 1990 were $628,293,000, up from $593,631,000 in the same period a year ago. The increases in dollar sales in both the third quarter and first nine months of the current fiscal year were attributable to higher unit selling prices for the company's products resulting from higher raw material costs, and slightly higher sales tonnage.

"Despite a strong holiday ham business, profitability in the third quarter of our current fiscal year was again adversely affected by lower fresh meat margins, a trend which has continued for six successive quarters," Joseph W. Luter III, chairman, president and chief executive officer, stated. "The Smithfield-Carroll's Hog Farms Joint Venture made a positive contribution to fiscal 1990 third quarter results compared to a loss in the same quarter a year ago," Luter said.

#90044p0059 02/13/1990 ~PR Newswire

NEW YORK (FEB. 13) PR NEWSWIRE - ITT Corporation (NYSE: ITT) announced today that net income for the full year 1989 rose 13 percent over 1988 and that earnings for the fourth quarter were 43 percent better than the same period in 1988.

For the full year ended Dec. 31, 1989, net income was $922 million, or $6.30 per share on a fully diluted basis, a 13 percent increase over the $817 million, or $5.68 per share, registered in 1988. On a primary basis net income per share was $6.52 in 1989, compared to $5.70 per share in 1988.

Net income for 1989 included "Fresh Start" tax benefits at ITT Hartford of $35 million, or 24 cents per share, compared to $52 million, or 36 cents per share, in 1988.

Income for 1989 included in the second quarter a gain of $18 million, or 12 cents per share, on the sale of the company's former European headquarters facility and a loss of $28 million, or 19 cents per share, on the write-down of the company's investment in Thomson McKinnon.

Income for 1988 was negatively affected by a $41 million, or 29 cents per share, charge for discontinued operations recorded in the fourth quarter of that year.

Sales and revenues for 1989 reached $20.1 billion, a 4 percent increase over the $19.4 billion in 1988.

During the year ITT repurchased 11.9 million common shares at an average price of $59.24, principally in connection with its newly formed Employee Stock Ownership Plan.

Net income for the fourth quarter was $257 million, or $1.79 per common share on a fully diluted basis, as compared to $180 million, or $1.26, reported for the 1988 fourth quarter. On a primary basis, net income per share for the 1989 quarter was $1.87, compared to $1.26 in the 1988 quarter.

Net income for the 1989 fourth quarter included "Fresh Start" tax benefits of $10 million, or 7 cents per share, compared to $17 million, or 12 cents per share, in the same period of 1988.

Sales and revenues for the quarter totaled $5.1 billion, compared to $5.2 billion in the 1988 fourth quarter. The comparisons for the quarter and the year were negatively impacted by the divestiture of Communications Services Inc. in the third quarter of 1989, flat property and casualty premiums, and the strength of the U.S. dollar.

#90044p0065 02/13/1990 ~PR Newswire

WEST CHESTER, PA (FEB. 13) PR NEWSWIRE - QVC Network Inc. (NASDAQ: QVCN) announced today an agreement providing for QVC to carry the JCPenney Television Shopping Channel as one of QVC's two cable programs on those cable television systems where QVC provides two shopping programs simultaneously on two channels.

The agreement also calls for QVC to sublease a satellite transponder to JCPenney and to further assist JCPenney in broadening the coverage of its

televised shopping program.

QVC recently acquired the cable television distribution contracts for the CVN Shopping Channel and The Fashion Channel. By March 30, QVC plans to complete merging the other programs into the QVC Cable Shopping Program, shifting all single-channel carriage to the QVC program and thus more than doubling its national coverage to more than 32 million cable subscribers.

A number of cable systems have been carrying both the QVC program and CVN or The Fashion Channel. As a result, on March 30, QVC will have a second channel available in approximately 7 million homes. QVC had been considering creating a new shopping program for that second channel, but the agreement announced today means that QVC will begin carrying the JCPenney Television Shopping Channel instead.

QVC will continue to produce and expand its own televised shopping program which is broadcast live 24 hours a day, seven days a week. The agreement with JCPenney does not provide for QVC to be involved in the production of the JCPenney Televised Shopping Channel, nor does it provide for JCPenney to have an equity interest in QVC or be otherwise involved in QVC's activities.

Joseph M. Segel, chairman of QVC Network, said, "This is a 'win-win' solution for QVC, JCPenney, cable system operators and cable subscribers. By carrying the JCPenney program on our second channel, QVC will eliminate the costs of producing a second shopping program while generating new sources of income. JCPenney will gain distribution to enhance the viability of its television shopping operations. Cable television systems will be able to provide their subscribers with a more differentiated pair of shopping programs. And cable subscribers will benefit by having access to a broader range of products and more credit plans.

"The agreement with JCPenney will not alter our relationship with Sears, Roebuck & Co.," Segel said. "Sears has been with QVC since we first started, and we plan to continue featuring special Sears hours and offering selected values from Sears on our primary program. By establishing this additional affiliation with JCPenney on a separate channel, we will be able to further spur the rapid growth of cable shopping. It will become even more like shopping at a mall, but without the need to leave home.

In essence, we bring the store right into the living room, with live presentations and demonstrations of interesting products around the clock."

"Sears offerings take up only about 10 percent of the time on our primary channel, so we can also provide cable shopping exposure to other prestigious national retailers on that channel," Segel added.

QVC Network has been in the televised shopping business for less than four years, but is rapidly approaching $1 billion in annual sales. It currently serves more than 4 million customers and new customers are being added at the rate of approximately 30,000 per week. Its televised shopping programs are broadcast live by satellite, 24 hours a day, seven days a week, and are carried by cable television systems to more than 32 million homes throughout the country. Its programs are also received by 2 million U.S. households that have their own satellite dishes.

CONTACT: Joseph M. Segel, chairman, 215-430-1020, or Michael C. Boyd, 215-430-8910, both of QVC Network

#90044p0066 02/13/1990 ~PR Newswire

COEUR D'ALENE, IDAHO (FEB. 13) PR NEWSWIRE - Coeur d'Alene Mines Corp. (AMEX, PSE: CDE) today reported a 25.5 percent increase in gold mined in 1989 over 1988's production, and 1989 audited net income of $9.4 million, or 94 cents per share, on revenues of $77.4 million, compared to net income of $15.4 million, or $1.45 per share, on revenues of $85.2 million for 1988.

Financial results for 1989's fourth quarter were stronger compared to the same quarter of 1988. For 1989's fourth quarter Coeur d'Alene Mines posted net income of $4.4 million, or 42 cents per share, on revenues of $20.8 million, compared to net income of $3.8 million, or 34 cents per share, on revenues of $21.4 million for the same quarter in 1988.

The company's 1989 results are due in part to the largest gold production year ever experienced in Coeur d'Alene Mines' 61-year history. In addition substantial silver output continued to place the company among the United States leading silver companies.

Gold production in 1989 was 96,325 ounces, up 25.5 percent over the 76,763 ounces mined in 1988. Silver production was 5,529,078 ounces in 1989, compared to 1988's record 5,885,896 ounces.

Gold is becoming a more important part of Coeur d'Alene Mines' operations. In 1989 gold production accounted for 55 percent of the company's total revenues from mining operations. To further this objective, the company is proceeding aggressively with the Kensington, Alaska, gold project in which Coeur d'Alene Mines has a 50 percent interest. The final feasibility study is expected to be completed in June of this year.

#90044p0067 02/13/1990 ~PR Newswire

IRVINE, CA (FEB. 13) PR NEWSWIRE - Gateway Communications Inc. (NASDAQ: GWAY), recipient of the PC Magazine "Editors' Choice Award" for its G/Ethernet LAN, has introduced a new family of unshielded twisted-pair (UTP) IEEE 802.3 Ethernet LAN adapters for IBM PC, XT, AT, PS/2-30, and 80386-based machines. The new G/EtherTwist PC, G/EtherTwist PC-WS (Work Station), G/EtherTwist AT, and G/EtherTwist AT-WS adapters are compatible with the IEEE 802.3 10BASE-T Draft Nine proposal for Ethernet LANs.

G/EtherTwist provides network users with the same superior network performance as its G/Ethernet product line, but adds the flexible, low-cost cabling alternative inherent in the UTP environment.

David S. McMaster, Gateway's president and chief executive officer said that "G/EtherTwist networks can be used in most buildings with existing telephone wiring that meets the IEEE 802.3 10BASE-T specifications, including AT&T's Premises Distribution System (PDS), so users avoid the expense of installing coaxial cable for an Ethernet network.

"When used in conjunction with the recently introduced G/EtherTwist Hub, these adapters provide built-in network management and control. G/EtherTwist nodes are also very easy to physically relocate and reconfigure from one UTP outlet to another on the network," McMaster said.

Gateway's G/EtherTwist adapters feature special communications and queuing software and extended on-board memory for enhanced network performance under heavy workloads like database and spreadsheet applications.

G/EtherTwist node-to-wall connections are simplified by an on-board UTP filter, allowing direct RJ-45 connections from the LAN node to the UTP wall outlet. Existing Ethernet installations can also be integrated into a G/EtherTwist network by using an external UTP- Medium Attachment Unit (MAU) attached to the AUI port of an Ethernet adapter.

The new G/EtherTwist adapters come standard with operating system drivers for NetWare 286 and 386, 3+Share, and Microsoft OS/2 LAN Manager and compatibles, as well as support for the TCP/IP protocol.

The G/EtherTwist 16-bit AT adapter features 64k RAM, and is designed for high-performance LAN file servers and workstations, including 80386-based machines, which require greater on-board buffering and throughput performance.

The G/EtherTwist 8-bit PC adapter features 40k of on-board RAM, and is designed for use in workstations with heavy workloads or file servers in smaller LAN configurations.

The G/EtherTwist 8-bit PC-WS adapter and G/EtherTwist 16-bit AT-WS adapter

respectively feature 8k RAM and 16k RAM and are intended for use in workstations only. Special software drivers enable these adapters to optimize the use of a minimum amount of on-board RAM while retaining high performance and throughput.

G/EtherTwist networks are centrally wired in a star configuration using ordinary unshielded twisted-pair telephone wiring. The "cheapernet" (RG-58 coaxial) limitation of 30 nodes per segment is overcome with G/EtherTwist and a large variety of network configurations are possible, connecting over 1,000 nodes.

Suggested U.S. retail pricing is $370 for G/EtherTwist 8-bit PC, $345 for G/EtherTwist 8-bit PC-WS, $445 for G/EtherTwist 16-bit AT, and $425 for G/EtherTwist 16-bit AT-WS. G/EtherTwist adapters will be available in 30 days.

In another announcement made today, the company introduced the new G/EtherTwist Hub for use with its G/EtherTwist networks or other compatible 10BASE-T UTP adapters from other vendors (see "Gateway Communications Announces New Hub for 10BASE-T LANs," Feb. 13, 1990).

As a service to its customers and end users, Gateway Communications provides toll-free telephone support (outside California) Monday through Friday, from 6 a.m. PST to 5:30 p.m. PST. Authorized users can also access the Gateway electronic bulletin board service for up-to-date technical and support information.

Gateway Communications Inc. designs, manufactures and markets a full range of networking and communications products for IBM and compatible personal computers. Gateway products are sold in 62 countries worldwide.

Publicly held, the company is traded on the OTC market under the NASDAQ symbol "GWAY." Corporate and international headquarters are located at 2941 Alton Avenue, Irvine, Calif., 92714; telephone, 714-553-1555; fax, 714-553-1616.

IRVINE, CA (FEB. 13) PR NEWSWIRE - Gateway Communications Inc. (NASDAQ: GWAY), an award-winning supplier of networking and communications products for the IBM PC market, has introduced G/EtherTwist Hub, a universal hub for use with unshielded twisted- pair (UTP) Ethernet LANs.

The G/EtherTwist Hub is compatible with the IEEE 802.3 10BASE-T Draft Nine

proposal, and as such, supports multi-vendor UTP Ethernet environments, including Gateway's own recently introduced G/EtherTwist family of UTP LAN adapters (see "Gateway Communications Intros New G/EtherTwist Family of 10BASE-T Adapters", Feb. 13, 1990).

"Users who already have a coaxial Ethernet installation, including Gateway's award-winning G/Ethernet LAN, can easily integrate their existing LAN with Gateway's UTP offering," said David S. McMaster, Gateway's president and chief executive officer. "By using their Ethernet adapter's built-in AUI connector and an external UTP filter, users can connect to the UTP backbone to take advantage of G/EtherTwist Hub's cost-saving flexibility."

The new G/EtherTwist Hub has built-in network management intelligence within the controller chip and line modules. This intelligence provides line checking, automatic disabling of faulty lines and automatic re-insertion of restored links. These functions insure smooth, error-free network operation natively within the hardware. Automatic re-insertion of disconnected lines occurs when the network is briefly idle, so that no packets are corrupted.

G/EtherTwist Hub can convienently house up to two Hub modules, each supporting one AUI and 11 RJ-45 connections, for a total of two AUI and 22 RJ-45 connections. The optional expansion module slides into the G/EtherTwist Hub chassis, allowing users to expand their network and conserve space at the same time.

In addition, up to four levels of Hub modules may be "cascaded", or interconnected, through their RJ-45 ports.

The new G/EtherTwist Hub is the central component in a 10BASE-T LAN where the adapters are wired to the Hub in a star configuration. Powered by an external power supply, the Hub amplifies each connected node's signal and retransmits to other connected nodes on the LAN.

The Hub can be used with any vendor's Ethernet LAN adapters that are compatible with the 10BASE-T Draft Nine proposal. McMaster said, "Our commitment to standards guarantees strict adherence to the IEEE 802.3 10BASE-T proposal, even if the standard may be modified before final approval."

"G/EtherTwist Hub users are assured the same award-winning quality, performance, and reliability they've come to know in the G/Ether product family," he said.

The G/EtherTwist Hub, priced at $1,995, includes a Hub module that supports one AUI and 11 RJ-45 connections, a Hub power supply unit that supports both 110/220 VAC, 50/60Hz, and hardware for desktop and wall

mount installation. The optional Hub expansion module is available for $1,595.

The G/EtherTwist Hub including two AUI and 22 RJ-45 connections is priced at $3,195. G/EtherTwist Hubs will be available in 30 days.

As a service to its customers, Gateway Communications provides free technical support on a toll-free 800 line (outside California, 1-800-367-6555) Monday through Friday, from 6:00 a.m. PST to 5:30 p.m. PST. Authorized users can also access the Gateway electronic bulletin board service for up-to-date technical and support information.

Gateway Communications Inc., designs, manufactures, amd markets a full range of networking and communications products for IBM and compatible personal computers. Gateway products are sold in 62 countries worldwide.

Publicity held, the Company is traded on the OTC market under the NASDAQ symbol "GWAY". Corporate and international headquaters are located at 2941 Alton Avenue, Irvine, Calif. 92714; telephone 714-553-1555; fax 714-553-1616.

PLAINVIEW, NY (FEB. 13) PR NEWSWIRE - Professional Care, Inc. (AMEX: PCE) today announced the results of operations for the first quarter ended Dec. 31, 1989.

Martin Weissman, president, stated that the company has continued to maintain its profitability for the eighth consecutive quarter.

Revenues for the three-month period ended Dec. 31, 1989, decreased by approximately $1,471,000 from the corresponding period of 1988. This decrease is primarily attributed to a lower than normal patient census in hospitals. Included in revenues is $300,000 collected from Visiting Nurse Service of New York (VNS) for accounts receivable which had previously been written off.

Net income for the first quarter decreased to $296,000 compared to $349,000 for the corresponding period of 1988.

PROFESSIONAL CARE, INC.

Three months ended Dec. 31:	1989	1988
Revenues	$5,237,000	$6,708,000
Net income	296,000	349,000

Net income per share	$.09	$.11
Weighted average number of shares outstanding	3,312,000	3,306,000

Professional Care, Inc. provides supplemental nursing personnel to hospitals and nursing homes and also provides home health care services to chronically and acutely ill patients.

MALVERN, PA (FEB. 13) PR NEWSWIRE - Aloette Cosmetics Inc. (NASDAQ-NMS: ALET), a franchisor and direct marketer of skin care products and cosmetics, announced today that a subsidiary entered into an agreement to purchase Superior Products Inc., a Dallas-based company.

Superior Products, a manufacturer and distributor of competitively priced health and beauty aid products, had 1989 revenues of approximately $2.6 million. The acquisition will also enable Aloette to manufacture and supply skin care products to the Aloette Franchise System. Skin care product sales represent approximately 60 percent of Aloette's total net product sales.

As of Dec. 31, the company had more than 100 franchises worldwide. Aloette Cosmetics, headquartered in Malvern, trades on the NASDAQ National Market System under the symbol ALET.

ARLEE, MT (FEB. 13) PR NEWSWIRE - Earl Morgenroth was named the new chairman of the board of Montana Naturals Intl. Inc., (NASDAQ: MTNA) (MNI) replacing Bruce Vorhauer who resigned to run for the U.S. Senate. Morgenroth is former president and chairman of the board of Western Broadcasting Co., a nationwide broadcasting and diversified company headquartered in Missoula, Mont. for 22 years.

MNI is a Montana corporation engaged in the marketing and manufacturing of nutritional supplements for domestic and international distribution. The company became a public corporation through a successful public offering in September 1987 and was approved for listing on the NASDAQ system on Aug. 31, 1988 under "MTNA."

Morgenroth is currently chairman of the board of Western Financial Inc. and chairman of the board of Morgenroth Music Centers Inc., both Montana corporations. He is also president/chairman of the board of Western Communications Inc., a Nevada corporation and is owner of Western Investments, a private investment company based in Reno, Nev.

Morgenroth is a former president of the Missoula Chamber of Commerce, the Rocky Mountain Broadcasters Association and the Century Club of the

University of Montana. He has also been an officer and board member of many other public service and trade organizations. He was a member of the Montana State Bank Board for six years and is currently on the Board of Trustees of the University of Montana Foundation where he is chairman of the Planning Committee. He is a member of the Advisory Board of Building A Scholastic Heritage (BASH), a Missoula, Mont. based organization.

Morgenroth announced that Montana Naturals has reached a stage where continuing reorganization is necessary, and that he and the board of directors will be actively involved. The results of last year's reorganization will be reflected in the Dec. 31, 1989, financial statements so that the company can move forward in 1990.

At the board meeting which was held on Feb. 5, the board of directors formally elected to the board, Dr. Paul Larson, professor of management at the University of Montana. The board also formed a committee, chaired by Ron Hauge with Larson and John Datsopoulos to recruit a person, strong in finance, with extensive experience in corporate finance and manufacturing. Morgenroth stated that Datsopoulos was appointed an advisor to the board because of his extensive background in international business.

According to company President and founder, Ron Hauge, "We're very pleased to have a man with Morgenroth's extensive business background chairing our board and look forward to his active involvement in our future growth."

PORTLAND, OR (FEB. 13) PR NEWSWIRE - NERCO Inc. (NYSE: NER) today announced the appointment of Roger A. Markle as president of the mining and resource development company's oil and gas subsidiary.

Markle, 56, was appointed president of NERCO Oil & Gas Inc., Vancouver, Wash. He was formerly vice chairman and director for Quaker State Corp. of Oil City, Penn. He joined Quaker State in 1979 and held several senior executive positions prior to being named vice chairman in 1988.

Prior to joining Quaker Sate, Markle was director of the U.S. Bureau of Mines. In addition, Markle has also held senior executive positions with Valley Camp Coal Company and subsidiaries of AMOCO Corp.

According to NERCO Inc. President Lawrence E. Heiner, "Mr. Markle brings his 25 years of experience to our growing oil and gas business. His extensive background and management expertise will help us as we further develop this unit." NERCO has invested more than $550 million since 1986

to acquire gas and oil assets most of which are located in the Gulf Coast region.

Markle earned a bachelor of science degree from the University of Alaska, added a master of science degree from Stanford University, and received a master of business administration from the University of Chicago.

NERCO is a North American mining and resource development company, and has interests in coal, natural gas, oil, gold and silver. Approximately 82 percent of NERCO's common stock is owned by PacifiCorp, a diversified electric utility also headquartered in Portland.

CONTACT: Robert S. Hess of NERCO Inc., 503-796-6678; or John C. Cummings of NERCO Oil and Gas Inc., 206-253-3359; or Richard T. O'Brien of NERCO Inc., 503-796-6208.

#90044p0080 02/13/1990 ~PR Newswire

BRENTWOOD, N.Y. (FEB. 13) PR NEWSWIRE - Allou Health & Beauty Care Inc. ("Allou")(AMEX: ALU), the premier distributor of nationally advertised health and beauty aids, prestige fragrances and cosmetics in the Northeast today announced record revenues and net income for the three months ended Dec. 31, 1989.

For this latest three- month period, Allou recorded revenues of $17,515,873, which represents an increase of 22 percent over the revenues reported for the comparable quarter last year of $14,391,364.

Net income reported for the three months ended Dec. 31, 1989, was $248,454 or $0.10 per share. For the comparable three-month period last year, the company recorded net income of $215,317, or $0.08 per share (restated stated to reflect comparable dilution). This represents an increase of 15.3 percent in net income.

Allou reported revenues for the nine months ended Dec. 31, 1989 of $52,881,364, a 21 percent increase over revenues of $43,857,178 for the nine months ended Dec. 31, 1988.

Net income for the nine months ended Dec. 31, 1989 was $712,336, or $0.35 per share which represents an increase of 13.4 percent over the net income of $627,503, or a restated $0.31 per share reported for the nine months ended Dec. 31, 1988.

In other news, Allou renegotiated its bank lines of credit from $18,000,000 to $23,000,000 and obtained a more favorable interest rate of 1 percent above prime, versus the company's former rate of 1-1/4 percent over prime.

Allou attributes these dramatic results to the aggressive expansion of its national account base and its increased product mix.

Herman Jacobs, president and chief executive officer of Allou, said, "We are extremely pleased that the results of our third quarter is in keeping with our growth objectives and given our expanded national account base and added product lines, we have every reason to expect continued growth in our fourth quarter."

Allou distributes nationally advertised brand name health and beauty aids, fragrances and cosmetics to more than 3,500 retail outlets including discount chain stores, individual health and beauty aid stores, independent pharmacies and non-chain supermarkets in Metro-New York, Philadelphia and Miami.

Through its mail order program, the company distributes prestige fragrances and cosmetics to 2,500 independent pharmacies and to such national chains as Sears and Wal-Mart. Allou also distributes and markets (but does not manufacturer) its own private lable health and beauty aid products under the name Allou Brands.

NEW YORK (FEB. 13) PR NEWSWIRE - American Claims Evaluation, Inc. (NASDAQ: AMCE) today announced revenues for the three months ended Dec. 31 1989 of approximately $1,150,000 and net earnings of $.16 per share as compared to revenues of approximately $665,000 and net earnings of $.07 per share for the comparable three month period in the prior fiscal year. This brings the results for the nine month period then ended to revenues of approximately $3,019,000 and net earnings per share of $.38 as compared to revenues of approximately $1,900,000 and net earnings per share of approximately $.09 for the comparable nine month period ended Dec. 31, 1988.

AMERICAN CLAIMS EVALUATION, INC.

Periods Ended:	Three months		Nine Months	
Dec. 31:	1989	1988	1089	1988
Revenues	$1,149,331	$ 665,348	$3,018,821	$1,900,136
Oper. earns. (loss)	139,024	64,375	432,174	12,639
Earns. bef. prov. for inc. taxes	249,629	107,912	601,318	138,127
Net earnings	151,129	69,012	360,818	87,227
Net earns. per share of common stock	$.16	.07	.38	.09

Gary Gelman, chairman of the board and chief executive officer, stated that this marks the second consecutive quarter of the company's history in which its revenues equalled or exceeded one million dollars. He added that the sales increase of nearly 60 percent from the comparable nine month period of the company's prior fiscal year and the significant growth in earnings is most gratifying.

#90044p0087 02/13/1990 ~PR Newswire

WEST LONG BRANCH, NJ (FEB. 13) PR NEWSWIRE - Electronic Associates, Inc. (NYSE: EA) reported that its previously announced sale of a subsidiary, EAI-Electronic Associates (Japan), Inc., has been completed.

The unit was sold for $2.5 million in cash to Nippon Mining Co., Ltd. A pretax gain of $1.37 million will result from the transaction for Electronic Associates, Inc., adding $.46 per common share to book value and $.32 per share to net income in the first quarter of 1990. The

increase in book value per share is more than the earnings per share effect for the transaction as a result of the company's application of its net operating loss carryforwards from prior years. The proceeds of the sale have been applied to reduce EAI's term bank debt.

Nippon Mining is a Tokyo-based company with $6.64 billion sales in the fiscal year ended March 31, 1989. A leading company in businesses ranging from metal smelting and petroleum refining to production of high-tech materials, Nippon Mining is a master distributor in Japan of the computers of Encore Computer Corporation through a joint venture called Japan Encore Computer, Inc.

Electronic Associates (Japan), Inc. distributes EAI and Encore computers in Japan. Encore equipment is supplied by Japan Encore Computer, Inc. EAI-Japan will continue to sell both EAI and Encore computers under its new ownership by Nippon Mining.

EAI also reported that Raymond G. Perelman, a shareholder of EAI, had filed a lawsuit against EAI's directors in connection with the sale of EAI-Japan. Perelman has alleged that the directors breached their duties in authorizing the sale.

Robert G. Finney, president and chief executive officer, said "We are extremely pleased to have completed the sale of EAI-Japan to Nippon Mining for $2.5 million. This is an excellent deal for EAI for many reasons, not the least of which are the profit and cash we gain. There is no basis for Mr. Perelman's complaint that the directors did not act responsibly in authorizing the sale."

Electronic Associates, Inc. sells services of two principal types: manufacturing for products designed and marketed by customers (contract manufacturing), and third-party maintenance of electronic equipment (field service). It also designs, manufactures and sells specialized computers for complex simulation applications and real-time data handling products.

EDISON, NJ (FEB. 13) PR NEWSWIRE - Pentech International Inc. (NASDAQ: PNTK), a designer and marketer of writing and drawing instruments, said today that for the first quarter ended Dec. 31, 1989 earnings rose to a record $442,637, or $.04 per share, a 38 percent increase from the $321,084, or $.03 per share, for the comparable period a year ago.

The company also announced that revenues for fiscal first quarter

increased 31 percent to a record $3,994,650 vs. $3,053,032 in the prior year.

Norman Melnick, president and chief executive officer, said the increases were attributable primarily to "greater penetration of the company's customer base of national discount retail chains, as well as an accelerated introduction of new products. We also benefitted by maintaining low cost, high quality production and a low corporate overhead."

Melnick added that Pentech's first quarter growth continued to result from increased demand for some of the company's newer products. "Many of these items, which have been introduced in the past one-to-two years, are just now beginning to have an impact on our revenues," said Melnick. The Pentech founder and chief executive also noted that the company's export business continued to increase in the quarter.

Pentech designs and markets a broad selection of colorful consumer-oriented writing and drawing instruments, including pens, markers pencils and crayons, as well as a variety of products for the commercial marketplace. These modestly priced items are widely distributed in most of the prominent mass market retail outlets, primarily throughout the United States and Canada under Pentech trade names.

PENTECH INTERNATIONAL INC.
STATEMENT OF OPERATIONS
FIRST QUARTER ENDED DEC. 31

	1989	1988

FAIRFAX, VA (FEB. 13) PR NEWSWIRE - ERC Environmental and Energy Services Co., Inc. (NASDAQ: ERCE) today announced the re-organization of its board of directors following the Jan. 19 acquisition of its majority shareholder ERC International, by Ogden Corporation.

R. Richard Ablon, president and chief executive officer of Ogden Allied Services, an Ogden Corporation subsidiary, has been named chairman and chief executive officer of ERCE, replacing John E. Gray, who was also

formerly vice chairman and president of ERC International.

Constantine G. Caras, executive vice president of Ogden Allied Services, has also been named to the ERCE board.

ERCE Executive Vice Presidents Charles S. Higgins, Jr. and Dr. Douglas C. Bauer have been elevated to the board, joining Dr. J. Mark Elliott, president and chief operating officer of ERCE, and Michael W. Wright, ERCE executive vice president, on the board. Higgins replaces L. Edward Wilson former central region executive vice president, who departed ERCE's management team last year.

Remaining as ERCE's outside directors are William R. Gould, chairman emeritus of Southern California Edison; Alan S. Boyd, chairman of Airbus Industrie of North America; and Hilliard W. Paige, former president of General Dynamics and senior vice president of General Electric.

In addition to Gray and Wilson, Jack E. Aalseth, former chairman and chief executive officer of ERC International, and David C. Acheson, noted Washington attorney, have retired from ERCE's board.

ERC Environmental and Energy Services Co. is a professional and technical services firm providing a comprehensive range of environmental, infrastructure, and energy consulting, engineering, and analytical services to industrial companies and governmental agencies. The company has additional principal operating offices in Nashville, Tenn. and San Diego.

#90044p0100 02/13/1990 ~PR Newswire

SOUTHFIELD, MI (FEB. 13) PR NEWSWIRE - Independence One Mortgage Corporation has signed a contract to acquire six offices of Associates National Mortgage Corporation, an affiliate of Dallas-based Associates Corporation of North America. The offices are located in Dallas, Los Angeles, San Francisco and San Antonio, Texas.

In making the announcement, Independence One President Richard A. Bondie said, "The acquisition of The Associates retail mortgage offices furthers Independence One's goal of becoming an industry leader in providing low-cost, world-class service to the residential mortgage community. This transaction allows us not only to expand into new, attractive markets but also to strengthen our presence in existing markets."

Terms of the transaction were not disclosed. The transaction is expected

to close by Feb. 28.

Independence One is the nation's 23rd-largest mortgage company and was the fastest-growing mortgage servicer during 1986 and 1988. In 1989, Independence One originated over $1.3 billion in residential loans and serviced a $9.25 billion portfolio of over 165,000 loans. Independence One Mortgage originates residential mortgage loans through 20 offices in 11 states.

Associates National Mortgage will maintain its centralized mortgage origination activities in Dallas and California and its 68,000-accounts servicing operation.

Independence One is a subsidiary of Michigan National Corporation (OTC: MNCO), a bank and savings and loan holding company with total assets of about $11.5 billion. Michigan National's principal subsidiary, Michigan National Bank, has 200 branches throughout Michigan and operates the state's largest automated teller network. Other affiliates include: Beverly Hills Federal Savings Bank; Independence One Investment Services Corporation; Morison Asset Management, Inc.; Pattern Recognition Investment Management (PRIMA) Corporation; Independence One Brokerage Services, Inc., and Independence One Financial Services Incorporated. Michigan National Corporation has its headquarters in Farmington Hills, Mich.

Associates Corporation of North America, with assets of more than $14 billion, provides consumer finance, specialized commercial finance and leasing, and insurance through a network of 800 offices in the United States. The Associates is a part of the Financial Services Group of Ford Motor Company.

Frontier is an underwriter and creator of specialty insurance products which serve the needs of insureds in niche markets.

(A) -- Realized investment gains and losses reported in the 1988 financial statements have been reclassified to conform to the 1989 presentation. The reclassifications result from adopting FASB Statement 97, "Accounting and Reporting by Insurance Enterprises for Certain Long- Durations Contracts and for Realized Gains and Losses from the Sale of Investments," which requires that realized investment gains and losses be reported on a pre-tax basis as a component of income. The reclassifications have no effect on net income.

(B) -- On Aug. 15, 1989, the company paid a 10 percent stock dividend declared by its board of directors in June 1989. Weighted average shares outstanding presented and used in the calculations of per-share amounts presented above have been adjusted retroactively to reflect this stock dividend.

SUNNYVALE, CA (FEB. 13) PR NEWSWIRE - Han Bruggeling, president of Boole & Babbage Inc. (NASDAQ: BOOL) has announced that Boole & Babbage has completed its acquisition of Avant-Garde Computing, a company specializing in network management systems.

"This merger furthers our strategy of offering products that integrate and automate the monitoring and management of host and network systems, consistent with our MainView systems management architecture," stated Bruggeling. "During the past year Boole & Babbage has made investments that have positioned it to be able to support the information systems infrastructure of the '90s. Our network-related investments were made in recognition of the fact that performance measurement and automation products will not satisfy customer needs into the 1990s if they stop with host solutions only," Bruggeling continued. "By combining the expertise of Boole & Babbage in host system management with the expertise of Avant-Garde in network management, we are now the only independent company offering end-to-end monitoring and control of the multi-vendor enterprise information system."

Bill Ahlstrom, formerly senior vice president-international for Avant-Garde, will become senior vice president-corporate marketing for Boole & Babbage and president of Avant-Garde, responsible for managing the integration of Avant-Garde and Boole & Babbage operations. In commenting on the merger, Ahlstrom said, "Our acquisition by Boole & Babbage enables us to continue to support our customers and current products, to focus on marketing our new Net/Command release, and to continue product development and operations in a partnership that makes sense for our customers and our staff. Boole knows host operations as few others do. Avant-Garde knows networks as few others do. Together, we have a truly unique perspective on monitoring, managing and automating complex information systems. Our products provide exceptional capabilities for end-to-end monitoring and management -- from end user to application. And that's what our customers are asking for," he added. Avant-Garde will continue its operations in Mt. Laurel, N.J.

Boole & Babbage is a leading developer and worldwide distributor of software products for information systems management and automation. The company markets its products through its subsidiary companies, which in the United States include Boole & Babbage/North America, Empact Software, and Mission Computer Services, and internationally include The European Software Co. (TESC) and distributors in Australia, the Pacific Rim and Latin America.

ST. PAUL, MN (FEB. 13) PR NEWSWIRE - Country Lake Foods Inc. (NASDAQ: CLFI) today reported net earnings of $798,000, equal to 18 cents per share for the fourth quarter ended Dec. 31, 1989, compared with earnings of $819,000, also 18 cents per share, in the fourth quarter a year ago.

Net sales for the quarter were $40,561,000, compared with $36,982,000 in the previous year. The company said record high prices for milk were principally responsible both for the sales gain and for continued pressure on margins. Sales volume increased for ice cream and novelty products, but volume declined in milk, cottage cheese, cultured products and juices because of changes in customer ownership and store closings.

Thomas N. Packard, president of Country Lake, said the company continued to make good progress in value-added products. Packard said sales of holiday dairy drinks increased 75 percent in 1989 as the result of the introduction of a light egg nog and three new flavored milk drinks and the expansion of this line into the Chicago market.

"The timely introduction of our Tasty Light & Creamy(TM) brand of low-fat products continued to fuel growth. Sales of TLC(TM) ice milk are up 80 percent this year, and the new 1 percent milk and the cottage cheese entries each represent about 15 percent of these categories," Packard said.

For the year, Country Lake reported earnings of $3,453,000, equal to 78 cents per share after the one-time pre-tax write-off of $900,000 in accounts receivable in the first quarter. In 1988, Country Lake earned $3,890,000, or 98 cents per share. Nehx6Ms afor 1989 were $154,611,000, compared with $146,545,000 in the previous year.

Headquartered in St. Paul, Minn., Country Lake produces and distributes fresh packaged milk, ice cream, other dairy products and fruit juices in a six-state Midwest region.

BUDAPEST (FEB. 13) PR NEWSWIRE - Digital Equipment Corporation (NYSE: DEC) today announced the formation of a joint venture company to sell and service computer systems and solutions in Hungary. Joining Digital in the venture are KFKI (Central Research Institute for Physics of the Hungarian Academy of Sciences) and Szamalk (Computer Technology Applications Enterprise), two of Hungary's leading engineering organizations.

The new company, Digital Equipment (Hungary) Ltd., will commence operations on April 2, 1990. Its strategy will be based on marketing Digital's highly successful MicroVAX family of computers under the applicable laws of COCOM and the U.S. government regarding the export of computer products to Hungary. Initial users will be those in non-sensitive commercial and infrastructure development areas.

"History has shown that information technology can often be a lubricant of change," said Alberto Fresco, Vice President and Country Group Manager of Digital Equipment Corporation Europe. "As Hungary moves forward with its plans to restructure its economy, computers will play an important role, facilitating and complementing the open exchange of ideas and information.

"Digital is enthusiastic about the opportunity to participate in this process and, with many of our major customers who are establishing a local presence, to assist in the modernization of Hungary's infrastructures and industries."

In addition to selling Digital products which have been authorized within the export regulations established by the U.S. and COCOM governments, Digital Equipment (Hungary) Ltd. will provide a range of customer services

including hardware maintenance, training, and software support.

KFKI and Szamalk both have extensive engineering-based expertise and knowledge of Hungarian industry and commerce. Digital will hold a 51 percent share of ownership and KFKI and Szamalk will each hold 24.5 percent. Digital also has the option of acquiring 100 percent of the joint venture company and forming a wholly owned subsidiary in the future.

Said Alberto Fresco, "Digital believes in investing for the long term. We have always treated the entry into a new market as a significant responsibility and commitment to that country. We also support our customers on a global basis. Our major customers, especially in Europe, are making aggressive plans for participating in the emerging markets of Eastern Europe. Digital aims to provide support for those needs, within the established export rules and regulations."

Digital Equipment Corporation, headquartered in Maynard, Mass., is the world's leading supplier of networked computers systems and a leader in systems integration. Digital employs over 125,000 people in 72 countries worldwide, and has annual revenues of $12.7 billion.

FAIRFAX, VA (FEB. 13) PR NEWSWIRE - Shareholders of Rangaire Corporation (NASDAQ: RANG), a lime and limestone producer based in Fairfax, have approved a proposal to change the company's name to Scottish Heritable, Inc. (NASDAQ: SHER), effective Feb. 7.

In addition, the company's board of directors approved a motion to change the company's fiscal year to coincide with the calendar year. Both changes were announced at the company's annual meeting last week.

"We've decided our name should reflect the commitment of The Scottish Heritable Trust PLC, which effectively owns 50.02 percent of our company's stock," said Neville C. Platt, president and chief executive officer of Scottish Heritable, Inc. "The Rangaire Corporation name is identified primarily with the products of the company's manufacturing division, which we sold in 1989. Under the terms of the sale agreement, we were obligated to seek shareholder approval to change our name," said Platt.

The Scottish Heritable Trust PLC is a York, England-based holding company with a broad range of international business interests, including Oriental carpets, property, homebuilding and engineering.

For the fiscal year ended July 31, 1989, Scottish Heritable, Inc.

(formerly Rangaire Corporation) posted revenues of $38,034,000.

SHREVEPORT, LA (FEB. 13) PR NEWSWIRE - Carl S. Quinn, chairman and chief executive officer of Arkla Exploration Company (NYSE: ARK), announced today the election of three new officers.

Thomas H. Crout was named vice president of human resources, R. Elvis Thornton has become assistant vice president and treasurer, and Louis J. Resweber was promoted to assistant vice president of corporate communications.

Tom Crout has more than 20 years' experience in the professional administration and personnel fields. He is a native of Baton Rouge, La., and a graduate of Northwestern State University, with a master's degree from Louisiana Tech University. Crout most recently served as vice president of employee relations and administration for Arkla, Inc. in Shreveport. He and his wife, Patricia, are the parents of two daughters.

Elvis Thornton, who will also be responsible for investor relations, is a native of Hattiesburg, Miss. He has nearly 25 years' experience in business finance, marketing and administration, primarily in the oil and gas industry. He joins Arkla Exploration from Arkla Energy Marketing Company. Thornton is a graduate of the University of Southern Mississippi, and he and his wife, Ina, are the parents of a son and a daughter.

Lou Resweber, a native of St. Martinville, La., served as business editor of the Daily Advertiser in Lafayette, La., before going on to direct the public information functions of a number of oil and gas concerns. Resweber most recently headed the corporate communications activities of Entex, a division of Arkla, Inc. based in Houston. A graduate of the University of Southwestern Louisiana, he and his wife, Michelle, are expecting their first child.

In addition, Gifford Smith, senior vice president of production and engineering, has decided to pursue personal and professional interests as an independent consultant. A native of Camden, Ark., and a graduate of Tulsa University, Smith had served with Arkla Exploration since 1965. As part of his new endeavor, Smith will dedicate a portion of his time to consulting agreements with Arkla and Arkla Exploration. William Chaney, vice president of production, drilling and engineering, will assume Smith's responsibilities at Arkla Exploartion.

Arkla Exploration underwent an initial public offering in December 1989. The company is one of the nation's largest independent operators, with more than 800 billion cubic feet of natural gas reserves in 1,500 producing wells in Arkansas, Louisiana, Oklahoma, Texas and Mississippi.

MINNEAPOLIS (FEB. 13) PR NEWSWIRE - Datakey, Inc. (NASDAQ: DKEY), today reported net sales and other operating revenues for the year ended Dec. 31 1989, of $9,833,000, up 14 percent from the $8,644,000 reported in 1988. Net income for the year was $3,217,000, or 90 cents per share, compared with net income of $3,334,000, or 94 cents per share, the prior year. Net income includes extraordinary gains reflecting utilization of net operating loss carryforwards totaling $328,000, or 9 cents per share, in 1989 and $1,224,000, or 35 cents per share, in 1988.

Net revenue for the 1989 fourth quarter totaled $2,450,000, a 5 percent increase from the $2,337,000 for the same period in 1988. Net income for the quarter was $682,000, or 19 cents per share, compared to 1988 net income of $1,041,000, or 29 cents per share, which included the above-mentioned extraordinary gain of 9 cents per share.

John H. Underwood, president and chief executive officer, said "we are very pleased with Datakey's financial performance in 1989. Our revenue growth in 1989 was fueled predominantly by our government business. Commercial business was lower than expected due to a reduction of orders from a significant domestic account and lower than forecasted business in Europe. During 1989 we exhausted all remaining tax loss carryforwards and are now in a fully taxed position.

"In preparation of a planned launch of a number of new products in 1990, we incurred certain marketing expenses during the fourth quarter of 1989. These products, which we plan to introduce throughout the first half of 1990, are designed to meet the needs of a diverse and rapidly changing commercial marketplace.

Underwood added, "As we move into 1990, we expect our first half results to be comparable to the first half of 1989. However, we believe that, in the last half, our new products and current marketing strategies should begin to reflect growth in the commercial marketplace."

Datakey, Inc., designs, produces and markets special microelectronic portable data carriers in the form of keys and other shaped devices for the high-end electronic security and process control systems marketplaces.

These small portable data carriers are designed to carry electronic information while withstanding the adverse elements found in human environments. The company also designs, produces and markets supporting peripheral equipment for these portable data carriers.

PITTSBURGH (FEB. 13) PR NEWSWIRE -- Landmark Savings Association (AMEX: LSA) and Port Authority Transit (PAT) today announced the opening of the area's third $1 dispensing ATM.

Located at the South Hills Village "T" station, the MAC will dispense $1

bills in $5 denominations for the convenience of PAT riders. In 1988, Landmark and PAT installed two other $1 dispensing machines at the Steel Plaza and Wood Street "T" stations in downtown Pittsburgh.

"The ATM provides a major convenience for MAC-users and 'T' riders," said George R. Harris, vice president of Landmark. "Installation of the machines directly at 'T' stations has enabled Landmark to provide a service that no other financial institution offers," he noted.

Landmark Savings is responsible for all aspects of machine installation and operation.

"We're very pleased to be able to offer our South Hills transit riders this service," said William W. Millar, executive director of Port Authority. "It is one more effort by PAT to make transit more convenient," he added.

The new ATM is in operation today for PAT riders. Landmark Savings Association is a publicly owned savings association with assets of approximately $1.6 billion. It is the 148th largest thrift institution in the United States. Landmark common stock is listed on the American Stock Exchange (AMEX), trades under the symbol "LSA" and is reported in the financial press as "LdmkSv."

BEAVERTON, OR (FEB. 13) PR NEWSWIRE - Planar Systems Inc., the largest U.S. manufacturer of flat panel displays, announced today that Digital Equipment Corp. is incorporating Planar's model EL751214MS flat panel electroluminescent display in the Digital VRE01 workstation monitor. The new monitor is the first flat panel workstation monitor to be offered by a major vendor.

The EL751214MS display has a 12 by 14 inch (31 by 36 cm) viewing area and is equivalent to a 19 inch (49 cm) conventional CRT display. Like a CRT, the EL flat panel display is bright and clearly readable over a wide viewing angle. Unlike a CRT, which may weigh 40 pounds or more and require over 200 square inches of desk space, the EL751214MS weighs less than 15 pounds and uses less than 50 square inches of work area. The graphics-quality display has a vertical refresh of 60Hz and resolution of 1024 by 864 pixels (75DPI). EL technology is completely solid-state and extremely rugged, making the new monitor suitable for conditions too harsh for a CRT.

The EL751214MS display is available now. A variety of interfaces to the

display are supported, including IBM XT/AT and Digital VAX. An infra-red touch bezel is available, as are all components necessary to create complete systems. Planar also offers technical support and custom design work to meet the needs of its OEM customers.

Planar Systems, founded in 1983, designs, manufactures, and markets a complete line of AC thin film electroluminescent displays and systems components from its headquarters at 1400 N.W. Compton Drive, Beaverton, Oregon 97006. Four direct sales offices and applications engineering in the U.S. support customers in display design and specification, while domestic manufacturing prevents delays in shipping from off-shore sources. The company's unique in-line vacuum deposition manufacturing process allows high-quality, high-volume production and consequent lower unit costs. This has permitted the company to achieve a leading position in the EL marketplace. For more information on Planar's state-of-the-art products, contact the company at 503-690-1100.

#90044p0124 02/13/1990 ~PR Newswire

MINNEAPOLIS (FEB. 13) PR NEWSWIRE - Diversified Energies, Inc. (NYSE:DEI) (DEI), said today that excluding the effect of an accounting change, it had income after taxes of $26.1 million, or $1.63 per share, for the year ended Dec. 31, 1989. That compares to $27 million, or $1.69 per share in 1988 before the effect of an accounting change was adopted in 1988.

The change in method of accounting for income taxes, which stemmed from the adoption of Statement of Financial Accounting Standards (SFAS) 96 in last year's first quarter, had the effect of reducing 1989 net income by $827,000 to $25.3 million, or $1.58 per share. Net income for 1989 reflects a $10 million aftertax charge against the third quarter results that stemmed from a lawsuit settlement related to DEI's exploration and production operations. Net income also includes $19.2 million from the settlements of take-or-pay disputes received largely in the first quarter.

By comparison, 1988 net income was increased by $6.3 million to $33.3 million, or $2.09 per share, due to the effect of a change in method of accounting for unbilled revenues in the company's natural gas distribution unit.

Results for 1989 and all prior years have been restated to reflect a fourth quarter decision to change from the full-cost to the successful efforts method of accounting for oil and gas properties in DEI's exploration and production unit.

For the fourth quarter of 1989, DEI had net income of $2.5 million, or 15

cents per share, on revenues of $265.5 million. That compares to fourth quarter 1988 net income of $11.2 million, or 70 cents per share, on revenues of $243.2 million.

DEI had revenues of $843.5 million in 1989 compared to revenues of $770.2 million in 1988.

Albert D. Etchelecu, chairman and chief executive officer of DEI, said improved revenues were principally the result of increased income from settlements of take-or-pay disputes -- $30 million in 1989 compared to $9.4 million in 1988 -- strong operating results by its radio communications unit, and increased volumes of gas sold by its natural gas distribution unit.

Etchelecu said the company's radio communications unit had 1989 operating income of $14.4 million -- an increase of nearly 50 percent over 1988 -- reflecting, in part, increased income from sale of branch operations. Revenues were up 28 percent.

NEW YORK (FEB. 13) PR NEWSWIRE - Gordon E. Crosby, Jr., chairman of the board, president and chief executive officer of USLIFE Corporation (NYSE: USH), stated today, in response to the current widespread publicity concerning insurance industry holdings of junk bonds, that as of year-end 1989 non-investment grade bonds held by all USLIFE subsidiaries were less than 6 percent of invested assets.

Crosby noted that this figure is very different from much of the speculation concerning property casualty and other life insurance companies which currently pervades Wall Street. He said that he has been advised by the corporation's chief investment officer that he is very confident in the quality of USLIFE's investment portfolio.

USLIFE Corporation is a life insurance-based holding company whose principal subsidiaries engage in the life insurance business. With nationwide operations, USLIFE has four ordinary life insurance companies and a credit insurance group with approximately $93 billion of life insurance in force as of Sept. 30, 1989. Additionally, there are five other subsidiaries that furnish the life insurance companies with investment advisory, broker-dealer, real estate data processing and administrative services

SOUTHFIELD, MI (FEB. 13) PR NEWSWIRE - Chrysler Financial Corporation today reported that its 1989 net earnings of $284 million were the highest in company history. This was the company's sixth consecutive year of record net earnings.

John P. Tierney, chairman of Chrysler Financial, said the record results were 10 percent higher than the previous all-time high net earnings of $259 million set in 1988.

"Higher earning assets and the continuing growth of Chrysler Financial's insurance company were the primary reasons for the record year," Tierney said.

The company's 1989 pre-tax earnings of $440 million also established a new record, surpassing the previous high of $399 million set in 1988.

For the fourth quarter of 1989, CFC had net earnings of $86 million, the highest ever posted for any quarter. The previous all-time net earnings record quarter was $76 million set in the third quarter of 1989. The previous record fourth quarter was $74 million set in 1988.

The company's gross receivables serviced at the end of 1989 reached $40.7 billion, up from $38.5 billion a year ago. Total assets at the end of 1989 were $30.1 billion.

Chrysler Credit, CFC's automotive finance subsidiary, had record year-end gross receivables serviced of $27.1 billion, up from $25.7 billion at the end of 1988.

During 1989, Chrysler Credit financed or leased nearly 572,000 new passenger cars and light duty trucks, representing 29 percent of Chrysler Motors U.S. retail deliveries. This compares with 607,000 vehicles or 28 percent of Chrysler Motors 1988 U.S. retail deliveries.

Chrysler First, the CFC unit involved in direct consumer and commercial real estate lending, and inventory financing of consumer goods, had gross receivables serviced of $7.1 billion at the end of 1989, compared to $7.4 billion serviced at year end 1988.

Chrysler Capital, CFC's commercial and industrial leasing and lending subsidiary, had a gross portfolio of $7.3 billion at year-end 1989, up from $5.9 billion at the end of 1988. The company's portfolio includes gross receivables outstanding and operating leases.

Chrysler Insurance, CFC's provider of various insurance programs to dealers and their customers, had record direct insurance premiums written of $199 million during 1989, compared to the previous high of $188 million

written a year ago.

#90044p0129 02/13/1990 ~PR Newswire

BOSTON (FEB. 13) PR NEWSWIRE - AT&T Computer Systems today announced a new version of its UNIX(R) system-based StarGROUP(TM) Software network operating system that incorporates Microsoft's LAN Manager technology.

The company said integrating LAN Manager technology into its already broad set of local and wide-area connectivity capabilities will make its new product, StarGROUP Software LAN Manager Server, unmatched in providing customers the ability to take advantage of client/server computing.

"LAN Manager Server illustrates a keystone of our strategy: networked computing solutions based on open systems and industry standards," said Bill O'Shea, AT&T Computer Systems vice president of product management and development.

AT&T also announced several other products in its StarGROUP software family, including support for the Network Driver Interface Standard (NDIS) an enhanced X.25 Router and new centralized network, router and computer management capabilities.

"With LAN Manager Server, we've combined the benefits of an emerging standard -- LAN Manager -- and the inherent communications facilities of the UNIX system, including its scalability across many different platforms " he said. "The result is customers have many more connectivity options -- to hosts and other networks, and more computer to computer connections, than they can obtain from any similar product."

StarGROUP Software LAN Manager Server, the third generation of AT&T's UNIX system-based server software, is a complete rewrite by AT&T Bell Laboratories of Microsoft's LAN Manager technology for UNIX System V. The new capability of AT&T's LAN Manager server reaffirms the preeminence of UNIX system-based servers, AT&T said.

LAN Manager Server offers full support for MS-DOS, OS/2 and UNIX system clients, and Structured Query Language (SQL) servers, AT&T said, as well as support for nearly all LAN Manager application program interfaces (APIs). This full LAN Manager API support, including 'Named Pipes' and 'Mailslots,' means LAN Manager applications can run in both UNIX system and OS/2 environments.

"Our LAN Manager server is not simply a port of OS/2 LAN Manager to the UNIX system," he said. "Instead, we've used our experience building UNIX

system-based servers to build a robust LAN Manager server running under the best operating system for networking -- the UNIX system."

HUNTINGDON, ENGLAND (FEB. 13) PR NEWSWIRE - Huntingdon International Holdings plc ("HIH") (ADRs - NYSE: HTD) today reported the results for the quarter ending Dec. 31, 1989. Revenues continued last year's strong growth during this, the first quarter of the company's financial year.

Group revenues for the quarter increased by 36 percent as compared with the same quarter last year. Gross profit showed a 28 percent improvement on the same period last year despite the fact that productivity in HIH's field engineering and drilling services was severely impacted by record low temperature and heavy snowfall from late November through December. Other expense has increased due to the interest charge on U.S. dollar loans which funded the acquisitions made late in the last financial year. Income before taxes rose 27 percent and net income improved 24 percent compared with the same period last year. The effective tax rate has risen from last year due to the increasing proportion of U.S. based business which in the quarter contributed some 65 percent of Group sales revenues.

HUNTINGDON INTERNATIONAL HOLDINGS PLC
Summary of Consolidated Earnings
(In thousands of pounds sterling)

Quarter ended Dec. 31	1989	1988
Revenues	23,756	17,424

Earnings per share - pounds	0.031	0.025
Earnings per ADR - dollars	0.251	0.205

Notes:

1. Earnings per share is based on an average of 88,787,553 (1988: 88,145,554) shares, outstanding during the period.

To ensure consistency of reporting, adjustments have been made to previous periods' earnings per share to reflect the capitalization issue of shares which took place as of May 4, 1989.

2. Earnings per ADR is calculated using an exchange rate of 1.6125 U.S. dollars equals 1.00 pound sterling. Each ADR represents five shares.

3. These results have been prepared in accordance with UK GAAP and are unaudited. The company has also prepared a quarterly report on Form 10-Q in which the results have been prepared in accordance with US GAAP, which has been filed with the Securities and Exchange Commission (SEC). Copies of this report are available from the SEC, the New York Stock Exchange and the company's Registered Office.

NEW YORK (FEB. 13) PR NEWSWIRE - BFS Bankorp, Inc. (NASDAQ: BFSI), today announced that it has commenced an action in the U.S. District Court for the District of Delaware against First Capital Group, Inc., James B. Rosenwald III and other members of the First Capital Group, alleging violations of the federal securities laws, including violations of the federal proxy solicitation rules. The company also alleges that the First Capital Group violated federal banking laws.

According to the company, the lawsuit was prompted by certain actions recently disclosed by First Capital Group in an amended Schedule 13D. As to federal banking regulations, the company indicated that it has become aware that the matter is currently under review by the Office of Thrift Supervision (OTS).

James A. Randall, president and chief executive officer of BFS Bankorp, stated "that although the company regretted having to take this step, it was believed necessary to protect stockholder interests in light of First Capital's actions as recently disclosed in its Schedule 13D."

BFS Bankorp, Inc. is the parent holding company of Bankers Federal Savings FSB, a SAIF-insured savings bank headquartered in New York City.

PITTSBURGH (FEB. 13) PR NEWSWIRE - Landmark Savings Association (AMEX:

LSA) and Port Authority Transit (PAT) today announced the opening of the area's third $1 dispensing ATM.

Located at the South Hills Village "T" station, the MAC will dispense $1 bills in $5 denominations for the convenience of PAT riders. In 1988, Landmark and PAT installed two other $1 dispensing machines at the Steel Plaza and Wood Street "T" stations in downtown Pittsburgh.

"The ATM provides a major convenience for MAC-users and 'T' riders," said George R. Harris, vice president of Landmark. "Installation of the machines directly at 'T' stations has enabled Landmark to provide a service that no other financial institution offers," he noted.

Landmark Savings is responsible for all aspects of machine installation and operation.

"We're very pleased to be able to offer our South Hills transit riders this service," said William W. Millar, executive director of Port Authority. "It is one more effort by PAT to make transit more convenient," he added.

The new ATM is in operation today for PAT riders.

Landmark Savings Association is a publicly owned savings association with assets of approximately $1.6 billion. It is the 148th largest thrift institution in the United States. Landmark common stock is listed on the American Stock Exchange (AMEX), trades under the symbol "LSA" and is reported in the financial press as "LdmkSv."

RALEIGH, NC (FEB. 13) PR NEWSWIRE - The following letter has been issued by Athey Products Corporation's (NASDAQ-NMS: ATPC) President James D. Cloonan:

TO SHAREHOLDERS:

Athey Products Corporation finished the fourth quarter of 1989 with net Earnings of $1,340,968, or $0.35 per share, up 23 percent, as compared to $1,090,415, or $0.28 per share, for the same period in 1988. Net Sales of $9,848,210 for the fourth quarter are up 4 percent over the $9,454,973 in 1988.

Athey Products had its sixth consecutive year of increased profits, ending

1989 with $3,945,139, or earnings of $1.02 per share, against $3,911,583, or $1.01 per share in 1988. Sales for the year of 1989 are $41,416,305, up 4 percent, as against sales of $39,847,063 in 1988.

Athey continues to reinvest into our operation through improved manufacturing equipment and facilities, and continues with the development of products that will keep us on top of our industry.

	1989		1988	
	4th Quarter	12 Months	4th Quarter	12 Months
Net Sales	$9,848,210	$41,416,305	$9,454,973	$39,847,063

LAWRENCEVILLE, N.J. (FEB. 13) PR NEWSWIRE - American Reliance Group, Inc. (NASDAQ: ARIG), today announced revenues increased 15 percent and net income increased 12 percent for the year ended Dec. 31, 1989.

Total revenues were $72,597,000 for the year, compared with $62,894,000 in 1988. Net income for 1989 was $6,304,000 or $2.47 per share, compared with $5,642,000 or $2.21 per share in 1988. Net income for 1988 included $1,395,000 or $.55 per share from the cumulative effect of a change in accounting for income taxes. Exclusive of this accounting change, 1989 income increased 48 percent over 1988.

Fourth quarter total revenues were $20,061,000, compared with $17,850,000

for the same period a year earlier. Fourth quarter net income was $1,723,000 or $.68 per share, compared with $2,414,000 or $.95 per share in the fourth quarter of 1988.

Bruce Herrick, chairman and chief executive officer of American Reliance Group, said the introduction of new products, favorable loss experience for most of the year, and higher yield on investments all contributed to the record revenue and earnings for 1989.

Herrick said the decline in 1989 fourth quarter net income reflected losses due to adverse weather conditions in the fourth quarter of 1989 compared to very favorable loss experience for the 1988 final quarter.

The combined ratio for the 1989 fiscal year was 101.5 percent, compared with 103.3 percent for 1988. The fourth quarter combined ratio was 103.8 percent, compared with 93.2 percent for the final quarter of 1988. The combined ratio reflects combined results of the pooling arrangement between the company and its parent, American Reliance Insurance Company.

American Reliance Group is a regional property and casualty insurance holding company which specializes in providing coverage for small to medium size businesses and individuals in rural and suburban locations.

EL MONTE, CA (FEB. 13) PR NEWSWIRE - The Vons Companies Inc. (NYSE: VON) today announced that Dennis K. Eck has joined the company as vice chairman and chief operating officer.

Eck also will fill the vacant seat on Vons board of directors. Eck's appointments will be effective Feb. 14, 1990. Previously, Eck was vice chairman at American Stores.

The company also announced that its president, Bill Davila, has revealed his plans to seek early retirement in April 1992. Davila will continue to serve as a member of the Vons board of directors and as the company's media spokesman indefinitely.

"The addition of Eck to the Vons management team is indicative of the explosive growth we have seen at Vons over the past few years. His vast experience in retailing will support our plans for the future," said Roger E. Stangeland, chairman and CEO. "While I regret Bill Davila's plan to seek early retirement, we are grateful that he will remain as president

through April 1992 and continue to be available on a part time basis as needed," Stangeland continued.

The company also announced that it is reorganizing and forming a three-member office of the CEO, whereby both Eck and Davila will report directly to Stangeland. Davila will continue as president with responsibility for the company's internal growth and retail development, as well as all marketing and advertising functions. Eck will assume the role of chief operating officer with retail operations, merchandising/procurement and retail support services reporting directly to him.

Eck previously served as vice chairman of American Stores, as a director on its board of directors and as chairman and CEO of its American Food and Drug subsidiary.

Vons, headquartered in El Monte, is one of the largest retail supermarket chains in Southern California. The company currently operates 328 stores under the names Vons, Pavilions, Pavilions Place and Tianguis and operates the Jerseymaid dairies and ice cream plants. The Von Companies is traded on the New York Stock Exchange under the symbol VON.

GREAT NECK, N.Y. (FEB. 13) PR NEWSWIRE - Gould Investors L.P. (AMEX: GLP) today announced operating results for the first quarter of fiscal 1990.

Revenues for the three months ended Dec. 31, 1989 were $7,823,000 compared with $6,234,000 for the prior year's first quarter. The operating loss for the current first quarter was $1,105,000 compared with an operating loss of $2,189,000 for the three months ended Dec. 31, 1988. The net loss for first quarter of fiscal 1990 was $1,149,000. This compares with a net income of $105,000 or 10 cents a share, after a gain of $2,294,000 or $2.07 a share from disposition of properties, mortgages and investments, for the first three months of the prior year. Since Gould Investors' equity interest in the common stock of One Liberty Properties, Inc. is approximately 66 percent, One Liberty's results are included on a consolidated basis for the current first quarter.

"Quality real estate with high current yields remains difficult to acquire " stated Fredric H. Gould, a general partner in Gould Investors. "Therefore, the partnership has continued to focus on investments which we believe have substantial prospects for long-term growth in income and appreciation. This program has resulted in the acquisition of some properties which have an adverse impact on current income, but are

expected to be of substantial benefit over the long term."

#90044p0146 02/13/1990 ~PR Newswire

WASHINGTON, D.C. (FEB. 13) PR NEWSWIRE - A Rockwell International Corporation (NYSE: ROK) executive today said the company's Plastic Products Businesses is moving on several fronts to become a world leader in the supply of automotive composite components and assemblies.

William J. Laule, vice president and general manager of Rockwell's Plastic Products Businesses, said Rockwell:

1. Has become the world's leading supplier of large, plastic composite body panels to the medium- and heavy-duty truck industry;

2. Has brought on line a new $11 million, state-of-the-art prime paint facility;

3. Is moving ahead with plans to establish its plastics capabilities on a global basis; and

4. Has consolidated its newly acquired process capabilities in vinyl ester sheet molding compound (VESMC), structural reaction injection molding (SRIM), glass mat thermoplastics (GMT), and resin transfer molding (RTM), with its well-established capability in sheet molding compound (SMC).

Laule spoke to newsmen at a Rockwell news conference held in conjunction with the Society of Plastic Industries Composites Institute Conference and Expo '90 being held in Washington Feb. 12-15.

He said Rockwell currently is supplying eight plastic hood-and- fender assembly models to five leading North American truck manufacturers: Ford, Volvo/GM, GM Truck and Bus, Freightliner, and Mack. The company is working on at least three other advanced hood-and- fender assemblies which it expects to be in production by the end of 1990.

These programs involve not only development of the product per se, but also the processes that will provide the highest quality, most cost-effective results.

"We've grown to become the world's largest supplier of SMC hood-and-fender assemblies for medium-duty and heavy-duty trucks," Laule said, "and we're still growing strongly in that specialty market."

"In many cases, Rockwell is assigned as program manager for these specialized products, and does 'black box' design and engineering of the entire hood-and-fender assembly."

Laule said the new paint facility was put in place at the Centralia, Ill., plastic molding facility primarily to prime-paint the truck hood-and-fender assemblies. However, the computerized controls give the system the flexibility to accommodate any sized or shaped product that fits within the envelope.

Rockwell's Plastic Products Businesses operates six plants in North America, and produces a wide range of products using several plastics technologies. These technologies include SMC, vinyl ester SMC, structural reaction injection molding (SRIM), glass mat thermoplastics (GMT), resin transfer molding (RTM) and others.

Rockwell International is a $12 billion multi-industry company, applying advanced technology to a wide range of products in its aerospace, electronics, automotive and graphics businesses.

#90044p0148 02/13/1990 ~PR Newswire

CINCINNATI (FEB. 13) PR NEWSWIRE - Gibson Greetings, Inc. (NASDAQ: GIBG) announced record revenues, net income and net income per share for the year and fourth quarter ended Dec. 31, 1989.

Revenues for the year ended Dec. 31, 1989, compared to 1988, increased 15.1 percent to $465.3 million, while income before taxes increased 15.8 percent to $65.7 million. Net income increased 21.0 percent to $42.4 million, while net income per share increased 19.1 percent to $2.68 versus $2.25 in 1988. Net income for 1989 included $4.5 million or $.28 per share attributable to the reversal, principally in the third quarter, of a previously accrued tax penalty and related interest. Excluding this reversal, net income for 1989 would have been $37.9 million or $2.40 per share, up 6.7 percent from 1988. The effective tax rate for 1989 was 35.5 percent versus 38.3 percent for 1988.

Revenues for the fourth quarter of 1989, compared to the like period in 1988, increased 18.2 percent to $197.4 million, while income before taxes increased 24.8 percent to $29.2 million. Net income increased 28.3 percent to $18.4 million, while net income per share increased 26.1 percent to $1.16 versus $.92 for the comparable 1988 quarter. The effective tax rate for the fourth quarter of 1989 was 36.9 percent versus 38.6 percent for the like period of 1988.

Net income for the year ended Dec. 31, 1989 reflected several factors including revenue gains, increases in the cost of products sold ratio, decreases in certain operating expense ratios and interest expense, and a lower effective income tax rate. These factors contributed to the improvement of .1 percentage points in the pretax profit margin and .4 percentage points in net profit margin.

In the fourth quarter, strong sales gains in everyday greeting cards and certain seasonal products, partially offset by lower profit margins for seasonal gift wrap products, were the principal factors contributing to the improvement in profit margins.

Benjamin J. Sottile, chairman, president and chief executive officer, stated that record revenues for 1989 resulted from both greeting cards and Cleo brand gift wrap products, with the latter experiencing strong third and fourth quarters. The acquisition of New Peck Corporation in October, 1989, also contributed incremental revenues for Christmas tags and paper decorations. These gains continued to reflect the company's emphasis on increasing the productivity of its existing account base through broader product offerings, improved merchandising programs and emphasis on customer service. Although the industry continues to reflect competitive conditions, which were manifested in several lost accounts throughout the year, Gibson's sales gains reflected the desire of its well financed retail customers to maximize their sales over the long term.

Sottile emphasized that he was pleased to report that, at year-end, stockholders' equity was $226.0 million, up 21.5 percent from 1988. This represents an increase of 3.5 times the amount of stockholders' equity at the end of Gibson's first year of public ownership in 1983. Long-term debt including debt assumed in connection with the acquisition of New Peck, was reduced by $10.5 million during the year; however, new long-term debt totalling $16.9 million was issued in December to finance the construction of a new manufacturing/distribution facility in Memphis, Tenn. for Cleo brand products. This facility is expected to be completed by early 1991.

Receivables and inventories as a percent of sales were somewhat higher than previous year levels, while short-term debt, excluding the current portion of long-term debt, was $86.5 million, up $27.8 million from last year-end. This increase reflected higher capital expenditures, the acquisition of New Peck, increased costs of raw materials, higher inventories to support expected sales increases next year and other asset additions. During January all short-term borrowings outstanding at year-end were repaid.

Capital expenditures for 1989 were $32.0 million, before asset retirements of $7.0 million, reflecting production and sales requirements and the construction of the manufacturing/distribution facility in Memphis, Tenn.

This new facility utilized $5.1 million of capital with an additional $14.7 million projected for 1990.

Sottile commented that financial results for 1990 would show improvements over 1989, assuming that the extremely competitive industry conditions of early 1987 do not recur, and that price increases for Cleo brand gift wrap and related products are realized. Costs of paper, the company's principal raw material, are expected to increase less in 1990 than in 1989. On a quarterly basis, these potential improvements are expected to be concentrated in the third and fourth quarters, which are traditionally the company's most important shipping periods.

#90044p0150 02/13/1990 ~PR Newswire

ARMONK, N.Y. (FEB. 13) PR NEWSWIRE - MBIA Inc., (NYSE: MBI) holding company for Municipal Bond Investors Assurance Corporation (MBIA Corporation), today reported that fourth quarter 1989 net income increased 10 percent to $25.8 million or $.69 per share, compared with $23.5 million or $.63 per share in the fourth quarter of 1988.

The company's 1989 net income rose 11 percent to $102.3 million from $92.0 million in 1988. Earnings per share rose 12 percent in 1989 to $2.74 from $2.45 in 1988. Book value per share at the end of 1989 was $21.08, an increase of $2.28 or 12 percent for the year.

In addition to achieving these financial results, the company completed its purchase of Bond Investors Group, Inc., parent company of Bond Investors Guaranty Insurance Company (BIG), effective at year-end. With this acquisition, BIG's net insured municipal bond insurance portfolio was reinsured by MBIA Corporation which is now responsible for its administration. The BIG acquisition did not contribute any earnings to MBIA's 1989 results because of its Dec. 31 effective date, but it is fully reflected in MBIA's year-end balance sheet.

Commenting on the year's results, William O. Bailey, chairman and chief executive officer said, "Once again, MBIA's 1989 financial performance continues to demonstrate the company's ability to generate predictable and growing earnings. The acquisition of BIG's invested assets and unearned premium reserve has created a larger revenue stream for future earnings growth."

Bailey added, "Prospects for the municipal bond insurance market are very promising in view of the predicted growth in municipal financings and the demonstrated value of insured bonds to investors."

MBIA was the leading municipal bond insurer for 1990, insuring $11.8 billion par value of new municipal issues. Based on data from The Bond Buyer, MBIA's business represented 39 percent of the municipal bond industry total for the year. New issue municipal volume increased to $120.4 billion in 1989 from $116.9 billion in 1988. The insured portion

of the new issue municipal market also increased from 23 percent in 1988 to 25 percent last year.

Fourth quarter 1989 gross premiums written were $52.2 million compared with $36.7 million in 1988. For 1989, gross premiums written were $159.3 million, a 2 percent increase from the comparable 1988 period. However, excluding the effects of certain non-recurring portfolio transactions and installment premiums from policies issued in prior years, gross premiums written in 1989 increased by 35 percent over 1988.

Premiums earned during the last quarter of 1989 were $23.3 million, about the same as a year ago, due to a somewhat lower level of earnings from refundings in the 1989 fourth quarter. For the year, premiums earned were $91.2 million, up 11 percent from a year ago. Premiums earned from refundings were $22.0 million compared with $15.5 million in 1988, and included amounts related to refunded issues of prior years.

Net investment income for the quarter rose 10 percent to $20.5 million compared with $18.6 million a year ago. For 1989, net investment income increased 18 percent to $79.8 million compared with $67.6 million in 1988, reflecting primarily the growth of the investment portfolio's assets from operating cash flow. As of Dec. 31, 1989 MBIA's investment portfolio, including investments gained as a result of the BIG acquisition, stood at $1.5 billion. The portfolio continues to be mainly in intermediate-term bonds.

Revenues for the fourth quarter of 1989 were $44.0 million compared with $42.6 million in 1988. For 1989, revenues rose 14 percent to $171.7 million compared with $150.7 million a year ago. Total revenues are the sum of premiums earned and investment and other income.

WYOMISSING, PN (FEB. 13) PR NEWSWIRE - Lawrence R. Pugh, chairman and chief executive officer of VF Corporation (NYSE: VFC), today announced that net income for the fourth quarter of 1989 was $40.3 million, an increase of 5 percent from $38.2 million in 1988. Earnings per share were $.69, an increase of 23 percent compared with $.56 in 1988. Sales for the quarter increased 10 percent to $663 million from $605 million in the prior year.

Net income for the year 1989 increased to $176.0 million from $173.7 million in 1988. Sales were $2,533 million in 1989, compared with $2,516 million in 1988. Earnings per share increased 7 percent to $2.72, compared with $2.55 in 1988. Pugh stated, "VF performed well in 1989 despite general softness in the retail apparel environment." Continuing, he said, "We believe VF's earnings per share will increase in excess of 10 percent for 1990 despite a weak first quarter projection due to uncertainties at retail."

Pugh reported that the repurchase of 10 million shares of common stock in August and the additional debt used to finance the repurchase resulted in a debt-to-capital ratio of 47 percent at the end of 1989. "VF continues to have strong cash flow to service the increased debt, as evidenced by the $173 million provided by operations in 1989."

At its meeting today, the board of directors declared a first quarter dividend of $.25 per share payable March 19, 1990, to shareholders of record on March 9, 1990.

VF Corporation is the world's largest publicly owned apparel company and is a leader in the jeanswear, sportswear/activewear, intimate apparel and occupational apparel markets. Its principal brands are Lee, Wrangler, Rustler, Girbaud, Bassett-Walker, Jantzen, JanSport, Vanity Fair, Vassarette, Modern Globe, Red Kap and Big Ben. In 1988, VF ranked 170th in Fortune's 500 Largest U.S. Industrial Corporations.

#90044p0170 02/13/1990 ~PR Newswire

AZUSA, CA (FEB. 13) PR NEWSWIRE - Optical Radiation Corporation (NASDAQ: ORCO) today reported continued increases in sales and earnings for the second fiscal quarter ended Jan. 31, 1990.

Income from continuing operations for the three-month period advanced 24 percent to $2,324,000, equal to $.35 per share, from $1,869,000, or $.28 per share, for the comparable prior year period. Sales for the second quarter advanced 15 percent to $29,104,000 from $25,270,000 a year earlier.

For the first half of the current fiscal year, income from continuing operations rose 35 percent to $5,051,000, equal to $.77 per share, from $3,735,000, or $.54 per share, a year ago. Sales for the year-to-date period rose 14 percent to $58,609,000 from $51,305,000 for the first six months of the prior fiscal year.

Richard D. Wood, president and chief executive officer, attributed the positive second quarter results to contributions from both the vision care and scientific/industrial product areas. He said the company's consumer optical products continued to show the most appreciable gains.

Wood said the company recently received pre-market approval from the U.S. Food and Drug Administration for its Flexeon line of intraocular lenses and has filed an application with the FDA for pre-market approval of Orcolon, a preparation used to protect the tissue and maintain the shape of the eye during various types of ophthalmic surgery.

"We fully anticipate a continuation of the favorable operating trends in the second half of our fiscal year," Wood added.

Optical Radiation designs and manufactures a wide variety of precision optical components and systems for medical, industrial and scientific applications.

HOUSTON (FEB. 13) PR NEWSWIRE - Union Texas Petroleum Holdings, Inc. (NYSE: UTH) today announced that its Union Texas Petroleum Corporation subsidiary has discovered natural gas and crude oil in a well drilled on Vermilion Block 404 in the Gulf of Mexico.

Located approximately 140 miles south of Lafayette, La., the Vermilion Block 404 No. 1 well found 156 feet of gas pay and 67 feet of oil pay (true vertical depth) in two zones below 7,500 feet. The well flowed 1,668 barrels of oil on a 32/64-inch choke with 1,503 pounds-per-square-inch flowing tubing pressure during a test of the oil pay between 8,195 feet and 8,290 feet. Union Texas said that additional drilling is planned for Vermilion 404.

Vermilion 404 is adjacent to Vermilion 412, where Union Texas discovered 142 feet of natural gas pay in two zones below 4,300 feet in mid-1989. Gas and oil reserves from both Vermilion 404 and 412 will be produced from a platform to be installed on Vermilion 412. Production is expected to be initiated in 1991.

One of the nation's largest independent producers, Houston-based Union Texas Petroleum Holdings, Inc. explores for and produces oil and gas in the United States and overseas and has petrochemical and natural gas processing interests.

#90044p0186 02/13/1990 ~PR Newswire

BAYONNE, NJ (FEB. 13) PR NEWSWIRE - Cambrex Corporation (NASDAQ: CBAM), a manufacturer of specialty chemicals, today reported earnings for the fourth quarter and year ended Dec. 31, 1989.

For the year, Cambrex reported net income of $3.1 million, compared with $7.0 million in 1988.

On a per share basis (fully diluted), 1989 net income was $0.54 on 5,900,000 average shares outstanding, compared with 1988 earnings of $1.24 on 5,877,000 average shares outstanding.

Net revenues for 1989 were $131.0 million, 9 percent over the $120.3 million reported for 1988. Operating profit was $6.5 million, down 49 percent from $12.7 million last year.

Net revenues for the 1989 fourth quarter were $31.6 million, a 12 percent increase over the $28.2 million reported in the 1988 fourth quarter. The fourth quarter operating loss was $1.0 million, compared with a $2.2 million profit in the same quarter last year.

The fourth quarter net loss was $1.1 million, or 19 cents per share (fully diluted) on 5,879,000 average shares outstanding compared with net income of $910,000, or 17 cents per share (fully diluted) on 5,872,000 average shares outstanding, reported for the fourth quarter of 1988.

Results previously reported for the nine month period were principally and significantly affected by the increase in prices for ethylene based raw materials which could not be recovered in selling prices. The fourth quarter was only modestly affected by the end of these price increases ($.02 per share) but severely impacted by several one-time operating problems including start-up costs on two major projects.

An expansion of the company's vitamin plant was completed during the fourth quarter but start-up difficulties temporarily increased operating costs and reduced the volume available for sale. In addition, the company had a quality problem involving product shipped to a major vitamin customer which temporarily reduced sales and profits. Both of these problems have now been resolved; however, they had a negative effect on earnings of 12 cents per share in the quarter. The vitamin units are now running at capacity.

Delays in achieving expected production levels in the manufacture of a major new product at the company's Heico subsidiary resulted in an operating loss for the unit. This loss and the interest expense associated with the Heico purchase reduced earnings by 8 cents per share in the quarter.

Earnings were also depressed due to lower sales volume in the company's Coatings, Custom Manufacturing and Agricultural businesses, increased operating expenses, higher environmental expenses and costs associated with implementing a new company wide information system.

Earnings in 1990 are expected to be significantly improved over 1989. Key to these improved results will be the continued reduction in ethylene based raw material prices, increased sales of pyridine derivatives internationally, continuation of favorable currency rates, growth in Hydrogel applications for medical uses, expected strong sales of the company's agricultural intermediates, and continuing satisfactory operation of its new herbicide intermediate unit at Heico.

During the past six months through consolidations and internal reorganizations the company has reduced costs which will contribute to an improvement in earnings in 1990.

The company also announced today that its Cosan Chemical Corporation subsidiary had completed the sale of the intellectual property and commercial rights to its organic biocides, driers and flocculants business to Huls America, Inc. The transaction is valued at nearly $12 million. Cambrex will continue to manufacture these products at its Carlstadt, N.J. plant for Huls under a multi-year agreement. The company is expecting to record a net profit on the transaction of about $1.8 million or $0.32 per share in the first quarter, and further indicated that as a result of this transaction earnings for the company in 1990 will be improved through higher operating profits and lower interest expense.

The company is also considering a repurchase of a portion of its common stock and at a board of directors meeting this week will act on this program.

Cambrex Corporation manufactures and markets a broad line of specialty chemicals and commodity chemical intermediates. The chemical families of castor oil, pyridine and organometallics and ammonia reaction chemistry are used by the company to produce compounds for its five product categories: Urethane Systems and Additives, Coatings- Intermediates and Additives, Health and Beauty Aids and Other Specialty Chemicals, Agricultural Chemical Intermediates, and Commodity Chemicals and Custom Manufacturing.

VANCOUVER, BRITISH COLUMBIA (FEB. 13) PR NEWSWIRE - Quadra Logic Technologies Inc. (QLT) (NASDAQ/NMS: QLTIF) and Baxter Healthcare Corporation (Baxter) announced today that they have signed an agreement for the development, manufacturing, and marketing of systems using light-activated drugs to inactivate viruses, bacteria, and parasites in whole human blood and its components.

Under the terms of this strategic alliance, Baxter and QLT will share equally all development costs and profits. These costs include the development of systems using QLT's proprietary drugs and Baxter's instrumentation and materials. QLT will be responsible for the manufacturing of the drug and Baxter will be responsible for the manufacturing and world-wide distribution of the systems.

"This agreement unites the expertise and considerable technological strengths of both companies," says Dr. James J. Miller, president and CEO of QLT. "Among our primary objectives is the development of a commercial blood treatment program that would give blood banks, hospitals and medical clinics, a new measure of safety when transfusing whole blood and blood products."

Baxter Healthcare Corporation is the principal U.S. operating subsidiary of Baxter International Inc. (NYSE: BAX), the leading international manufacturer and marketer of health-care products, systems and services. Baxter offers 120,000 products to health-care providers in more than 100

countries. In 1989, the company had revenue of US$7.4 billion.

QLT is a biopharmaceutical company engaged in the development and commercialization of photosensitive drugs that are activated by light. QLT is the world leader in Photodynamic Technology (PDT), an emerging medical technology that uses light-activated drugs for the diagnosis and treatment of disease. QLT's product development program is focused on the treatment of cancer, sexually transmitted diseases, atherosclerosis, and on the viral inactivation (or destruction of virus particles) in human blood.

#90044p0192 02/13/1990 ~PR Newswire

TACOMA, WA (FEB. 13) PR NEWSWIRE - Hughes Homes Inc. (NASDAQ-NMS: HUHO), a Tacoma-based retailer of mobile homes, announced today various developments following an October 1989 report of large unexpected operating losses for its fiscal year ended June 30, 1989.

Following the October announcement, actions taken by various of the company's manufacturers, suppliers and financing sources have resulted in severely curtailed operations. The company has sold, closed or liquidated most of its 45 sales centers and hopes to base future operations on approximately eight locations in California, New Mexico, Oregon and Idaho.

The company's ability to execute this plan is subject to its continued status as a going concern. Critical factors will include the availability of wholesale and retail financing sources, retention of key personnel and

maintenance of adequate cash flow. Operating losses have continued in an undetermined amount.

At present, most of the company's retail and wholesale financing arrangements have been suspended or canceled by lenders. In addition, the company is in default on real estate loans and working capital lines of credit extended by a major bank. It is unlikely that interest payments on the company's 10 percent subordinated convertible debentures will be paid when due in April 1990. Various of the company's subsidiaries are in default on lease agreements relating to many sales centers. In the opinion of management, liquidated asset values are far insufficient to satisfy secured creditors.

The company has not yet filed its annual report of Form 10-K for the year ended June 30, 1989 nor any subsequent quarterly reports on Form 10-Q, principally because of difficulties associated with the company's accounting systems, departure of personnel and rapidly changing business conditions. Management does not believe that necessary internal controls exist to permit preparation of reliable financial statements for at least the remainder of fiscal 1990.

The company's independent auditors have indicated that any report on the company's 1989 financial statements would likely include either a disclaimer of opinion because of material uncertainties (including the company's ability to continue as a going concern) and limitations on the scope of their audit or, possibly, an adverse opinion. The limitations on the scope of their audit including a lack of supproting documentation to explain significant year-end adjustments, result from deficiencies in the company's internal control and accounting systems as described above. The form of their report will ultimately depend on the company's ability to complete preparation of its 1989 financial statements and related disclosures in accordance with generally accepted accounting principles and completion by our auditors of their audit procedures.

On Nov. 6, 1989, the Washington State Attorney General's office filed a petition to enforce a consent decree previously entered about July 1, 1987. The Attorney General is requesting consumer relief, damages, civil penalties and attorney fees in Pierce County Superior Court, State of Washington.

Concurrent with this announcement, the company is making a proposal to unsecured creditors involving a distribution of any ultimate proceeds from litigation to be commenced against Fleetwood Industries, Inc., formerly the company's largest supplier. Beginning in October 1989, Fleetwood, the nation's largest manufacturer of mobile homes, commenced a series of actions which, in the opinion of management and counsel, have subjected the company to heretofore unascertained damages exceeding $10 million. Upon the advice of counsel, the company intends to vigorously pursue this

action. Accordingly, management has allocated resources to insure the pursuit of this action to conclusion.

Management believes this course of action offers the best prospect for full recovery of equity value for the benefit of creditors and shareholders, and may allow the company to resume its former positon as a principal mobile home retailer on a national scale, or to pursue other business opportunities.

PITTSBURGH (FEB. 13) PR NEWSWIRE - United Steelworkers of America (USW) Negotiations Co-Chairmen Lou Thomas, District 4 director of New York state and William J. Foley, director of the New England States, today announced that local union members of Allegheny Ludlum Corp. (NYSE: ALS) ratified a four-year agreement by a vote of 1,816 to 1,232.

The vote was taken Monday by six USW Allegheny Ludlum local unions in four states.

The new agreement, negotiated well in advance of the March 31 contract expiration date, features yearly increases in wages, improved pensions and other benefits and provides an early agreement bonus, plus a series of annual bonuses. The highlights include:

-- A total of $2.00 an hour in across-the-board wage increases -- 50 cents in each of the four years of the contract;

-- A profit-sharing plan equal to 5 percent of each active employee's average standard hourly wage rate times the hours worked in 1989. The maximum payout is for 2,080 hours;

-- A $600 cash bonus to be paid as soon as possible;
-- Another $600 cash bonus on April 1, 1992;
-- A new profit-sharing plan that can pay up to $3.25 an hour for each hour. If the plan had been in effect last year, the payout would have been $3.18 per hour;

-- Major improvements in pensions, calling for inclusion of $2.36 per hour cost of living allowance (COLA) in calculating earnings for the percent pension, plus a $4.00 per month increase in the minimum pension;

-- A new form of protection from runaway inflation called the Inflation Recognition Program (IRP);

-- A new Longevity Incentive Payment Plan (LIPP), under which hourly workers with 30 or more years of service, after age 60, will be paid an incentive award;

-- A personal retirement account, wherein the company shall increase its contributions to 50 cents an hour after April 1, 1993.

For the first time, after the effective date, all retirees under a prior pension agreement, or future retirees shall receive Workers' Compensation payments and pension payments with no offset for Workers' Compensation payments;

-- Periodic cash payments to surviving spouses; and
-- Substantial health care improvements for both active and retired members.

VALLEY FORGE, PA (FEB. 13) PR NEWSWIRE - UGI Corp. (NYSE: UGI) reported that its net income for the fourth quarter and full year 1989 increased by 22 percent and 9 percent, respectively.

UGI attributed the fourth quarter earnings increase to extremely cold December weather in the East and higher income contributions from propane operations.

The improvement for the year reflects the higher propane contributions, along with a gain and interest income on proceeds from divestiture of its industrial gases subsidiary, UGI said.

For the quarter ended Dec. 31, the Pennsylvania utility and national distributor of propane posted net income of $14,229,000, vs. $11,683,000 in the same period a year ago. Earnings per share increased 20 percent to $1.31 from $1.09. Revenues rose 11 percent to $106,046,000 from $95,756,000.

Net income for the year increased to $36,368,000 from $33,270,000 in 1988. Earnings per share rose 8 percent to $3.31 from $3.06 in the previous year and revenues were up 4 percent to $323,702,000 from $311,537,000.

#90044p0198 02/13/1990 ~PR Newswire

COSTA MESA, CA (FEB. 13) PR NEWSWIRE - Ceradyne Inc. (NASDAQ: CRDN) announced results for the year and fourth quarter 1989.

For the quarter ended Dec. 31, 1989, the company reported a net income of $451,000 or $.07 per share, compared to a net loss of $3,449,000 or $.58 per share in the period ended Dec. 31, 1988. Sales for the fourth quarter 1989 were $5,571,000 compared to $6,420,000 a year ago.

For the year ended Dec. 31, 1989, the company incurred a loss of $2,647,000 or $.44 per share, compared to a loss of $6,038,000 or $1.02 per share in the prior year. Sales for 1989 were $23,108,000 compared to 1988's $25,557,000.

The company stated that the profit in the fourth quarter was due to a $1.250 million gain on the sale of its small subsidiary, Ceradyne Specialty Products Inc., and a reduced loss from continuing operations. Whereas, the fourth quarter 1988 net loss included significant asset writedowns relating to the reduced level of defense-related business and the establishment of reserves relating to product and facility consolidations.

The company continues to believe that its recovery plan emphasizing lower operating costs, a reduced reliance on defense products and new product introductions including modified orthodontic brackets, cathodes for HDTV and high power magnets will show operating improvements in 1990.

Ceradyne Inc. is an advanced technical ceramic company manufacturing and marketing its ceramics for electronic, aerospace, industrial, defense and medical applications.

CASS CITY, MI/HOUSTON (FEB. 13) PR NEWSWIRE - Walbro Corporation (NASDAQ: WALB) and Cooper Industries, Inc. (NYSE: CBE) today announced that they have signed a letter of intent for Walbro to acquire Sharon Manufacturing Corporation of Lambertville, Mich., a subsidiary of Cooper's Champion Spark Plug Company.

The agreement is subject to the execution of a definitive agreement. Closing is expected to take place on or about May 1, 1990. The purchase price was not disclosed.

Sharon Manufacturing is a supplier of fuel rails for automotive fuel injection systems. It employs approximately 170 people in two facilities, one in Lambertville, and the other in Ligonier, Ind.

Walbro Corporation is a designer and manufacturer of fuel system components for automotive and small-engine applications. Major product lines include electric fuel pumps and reservoirs for automotive fuel injection applications and carburetors for lawn-and-garden, marine and outdoor power equipment applications.

Walbro is headquartered in Cass City and employs approximately 1,800 people at facilities in the United States, Japan, Singapore, Mexico and West Germany.

In announcing the acquisition, Walbro Chairman, President and Chief Executive Officer L.E. Althaver said, "We are pleased to add Sharon Manufacturing to the Walbro family. Sharon's line of fuel rails will complement Walbro's fuel systems offerings to automotive original equipment customers in the U.S. and overseas. In addition, the purchase offers Walbro the potential of vertically integrating the production of many sub-assemblies now purchased for outside sources."

Champion Spark Plug Company is a wholly owned subsidiary of Houston- based Cooper Industries. With 1989 revenues of $5.1 billion, Cooper Industries is a diversified, worldwide manufacturer of electrical products, electrical power equipment, tools and hardware, automotive products, and petroleum and industrial equipment.

BOISE, ID (FEB. 13) PR NEWSWIRE - Boise Cascade Corp. (NYSE: BCC) announced today that John C. Bender has been elected a vice president. Bender continues his current responsibilities as general sales manager for the Timber and Wood Products Division.

Bender joined Boise Cascade in 1969 as an industrial engineer with the company's Timber and Wood Products Division in Yakima, Wash. From June 1975 to October 1976 he served as plant superintendent of the company's sawmill in Aberdeen, Wash. He then served as production manager for the Timber and Wood Products Division's Western Washington Region until 1979, when he was promoted to director of Planning and Development for the division. In 1983, he was named region manager for the division's Southern Idaho Region, and in 1988, he also assumed responsibility for managing the Louisiana Region. In 1989, he became general sales manager for the Timber and Wood Products Division.

Bender holds a B.S. degree in general engineering from the U.S. Naval Academy at Annapolis, Md., and an M.S.A. in management engineering from George Washington University in Washington, D.C.

Boise Cascade Corp. is an integrated forest products company headquartered in Boise, Idaho, with operations located primarily in the United States and Canada. The company manufactures and distributes paper and paper products, office products, and building products and owns and manages timberland to support these operations.

#90044p0225 02/13/1990 ~PR Newswire

NEW YORK (FEB. 13) PR NEWSWIRE - Reliance Group Holdings, Inc. (NYSE: REL) today reported fourth quarter net income of $62.3 million, or $.83 per share, compared with a net loss of $15.1 million, or $.20 per share, in the fourth quarter of 1988. Revenues totaled $1.20 billion, versus $859.5 million in the year-ago period.

Included in the results for the 1989 fourth quarter were pre-tax capital gains of $60.9 million from the sale of the company's investment in UAL Corporation and $20.0 million from the sale of Days Corp. Results for the year-ago fourth quarter included a pre-tax loss of $54.0 million from the write-down of a subordinated note in a Texas savings and loan association.

For the full year 1989, Reliance reported net income of $21.7 million, or $.29 per share, versus net income of $23.6 million, or $.32 per share, in 1988. Revenues in 1989 totaled $4.01 billion, compared with revenues of $3.10 billion in 1988.

Included in the full year 1989 results are pre-tax capital gains of $151.5 million from the sale of the company's investment in UAL Corp. and $60.0 million from the sale of Tiger International, which were partially offset by losses on the disposition of other investments.

"While we are pleased with the bottom line results for the fourth quarter, full year profits were disappointing due to the write-down and sale of certain investments earlier in the year," commented Saul P. Steinberg, chairman and chief executive officer of Reliance Group.

"Nonetheless, 1989 was a year of significant accomplishments," Steinberg said. "UAL and Tiger were highly successful investments and we made excellent progress in the turnaround of Frank B. Hall & Co. Our property and casualty and title and mortgage subsidiaries continued to outperform the industry, and our life insurance unit posted another year of excellent operating results," he said.

"We are optimistic that market conditions will improve somewhat in 1990 and we are well positioned to capitalize on new opportunities as they arise," Steinberg added.

SAN DIEGO (FEB. 13) PR NEWSWIRE - Mail Boxes Etc. (NASDAQ: MAIL) (MBE) President Anthony W. (Tony) DeSio announced today the resignation of Senior Vice President of Operations Roy Ruppert who has directed franchise development and franchise support for the company. MBE also announced the appointment of Ken Sully as vice president of franchise development.

Ruppert has accepted a position as Chief Operating Officer with AmeriMac, a mortgage brokerage franchise in Santa Clara, Calif. Joining the company in May 1988 as vice president of marketing, Ruppert was promoted to the newly created position of senior vice president of operations in May 1989.

As the newly appointed vice president of franchise development, Sully will be in charge of expanding the MBE network from its current base of 1,100 franchises to 2,500 by 1995. Mail Boxes Etc. offers franchises for sale throughout the United States and internationally.

Sully brings 10 years of experience in the franchising industry to MBE, ranging from start-up franchise companies to regional training manager for Southland Corp.'s 10,000 7-Eleven(R) franchises. He was also instrumental in building CelluLand(R) into the first national franchise network of retail cellular phone stores.

Mail Boxes Etc. is the nation's largest franchisor of postal, business and communications services with Centers in 43 states, Puerto Rico, Canada, Mexico and Japan. MBE has been rated No. 10 of the 40 fastest growing franchises by Entrepreneur magazine and No. 42 by Forbes magazine in its annual ranking of "America's 200 Best Small Companies."

FORT LAUDERDALE, FL. (FEB. 13) PR NEWSWIRE - CarePlus, Inc. (NASDAQ: CPLS) announced today that, for the year ended Dec. 31, 1989, it had earnings of $2.2 million on revenues of $35.7 million. In 1988 the company had earnings (before extraordinary item) of $1.4 million on revenues of $29.6 million.

Earnings per share for 1989 were $0.40 versus $0.29 (before extraordinary item) for 1988. Earnings from operations increased over 100 percent from $2.1 million in 1988 to $4.2 million in 1989.

For the quarter ended Dec. 31, 1989, earnings were $777,000 on revenues of $9.7 million, compared to earnings of $599,000 (before extraordinary item) on revenues of $8.0 million for the same period in 1988.

"While we are obviously pleased with these results, they are even more impressive when you consider that our 1988 earnings included a $.03 per share non-recurring income item in the fourth quarter," remarked Bob L. Wood, chairman and CEO of CarePlus. "We are continuing to make dramatic improvements in our operating efficiency, as evidenced by a 15 percent operating margin in the fourth quarter."

Wood further stated that revenues from home infusion therapies, now the company's only business, increased 57 percent for the year and 70 percent for the fourth quarter as compared to the same periods in 1988.

CarePlus is a high-tech home infusion therapy provider treating patients requiring chemotherapy, nutritional feeding through either a vein or a tube, intravenous (I.V.) antibiotic therapy, pain treatment, fluid administration, and other high-tech home infusion therapies.

The company offers its services through 18 regional centers located in or near the metropolitan areas of Miami, Tampa, Orlando, Jacksonville, Atlanta, Norfolk, Baltimore/Washington, Philadelphia, New York, Boston, Pittsburgh, Cleveland, Chicago, Kansas City, Houston, Los Angeles, San Francisco, and Seattle, and through two service centers located in Raleigh/Durham and Milwaukee.

CarePlus, Inc. securities are traded on the National Market System under the symbols: Common Stock/CPLS; and Class "A" Redeemable Warrents/CPLSZ.

#90044p0235 02/13/1990 ~PR Newswire

BALTIMORE (FEB. 13) PR NEWSWIRE - Eastern Stainless Corp. today announced net income for the fourth quarter of 1989 of $1.4 million on sales of $47.9 million.

This compares with $3.8 million on sales of $52.8 million for the fourth quarter of 1988.

For the year ended Dec. 31, 1989, Eastern Stainless reported net income of $14.1 million on sales of $215.6 million. Eastern Stainless, a subsidiary of Cyclops Industries Inc. (NYSE: CYC), began operations in July 1988. As a result, the prior year includes only five months of operations.

Don Jamie, president of Eastern Stainless, said that Eastern made much progress in its first full year of operations by making a profit while, at the same time bringing the facilities into good working condition. In addition to its earnings, the company also increased market share in stainless plate, reintroduced its coil plate products, and prepared to reenter the stainless sheet market, he said.

According to Jamie, plate demand declined during the last half of 1989. "In the fourth quarter," said Jamie, "a rapid decline in the price of nickel forced a downward valuation of our inventory, lowering profit for the period. Eastern also experienced an unscheduled outage due to an energy curtailment caused by cold weather.

"We expect the plate market to experience an increase in demand during the

first half of 1990," said Jamie, "and we anticipate a further strengthening in the second half of the year."

Jamie said that Eastern's stainless steel sheet facilities are now state-of-the-art, and expects to begin shipping this product later in the first quarter. "With the modernization of our sheet facilities and our investments in equipment, programs and people during 1989, we face 1990 a much improved company," said Jamie.

CHATTANOOGA, TN (FEB. 13) PR NEWSWIRE - Constar International Inc. (NYSE: CTR), the nation's largest plastic container manufacturer announced today that its Wellstar joint venture in Europe, which is 40 percent-owned by Constar, has signed an agreement to acquire the assets of Lin Pac Plastics Ltd. located in Sherburn, England. Lin Pac, with sales of approximately $30 million, is the second largest manufacturer of PET (polyethylene terephthalate) plastic bottles in the United Kingdom.

On Feb. 1, Constar announced that Wellstar completed the acquisition of two additional PET plastic bottle plants, one in The Netherlands and the second in England. The joint venture now operates four PET plastic bottle operations in Europe. The other two plants are located in The Netherlands and France. Lin Pac will be the fifth plant and the second located in the United Kingdom. With combined sales of more than $120 million, Wellstar is believed to be the largest PET container manufacturer in Europe.

Constar International Inc. is the largest manufacturer of plastic containers in the United States. Through its wholly owned subsidiary, Sewell Plastics, Inc., manufacturing is carried on in 23 facilities coast to coast in 16 states.

SMITHTOWN, NY (FEB. 13) PR NEWSWIRE - Quantronix Corporation (NASDAQ: QUAN) today reported results for the quarter ended Dec. 31, 1989.

Revenues for this third fiscal 1990 quarter were $7,921,000, down 6 percent from the prior quarter but 6 percent higher than the corresponding

prior-year quarter. Net earnings for the quarter were $80,000 compared to $469,000 in the prior quarter and $391,000 in the third fiscal 1989 quarter.

Commenting on the results, Donald Mitchell, president and chief executive officer of Quantronix, said, "The disappointing third-quarter results came from two factors. First, our semiconductor equipment segment saw lower sales than prior quarter and the comparable quarter last year. An increasing portion of this business is to export customers, where it is somewhat more difficult to control the timing of shipments.

"Second, our medical segment was off from the prior quarter due to some delays in the clinical testing program for the laser balloon angioplasty system that Quantronix is pursuing with C.R. Bard. Continued growth in our laser and industrial systems segments, some recovery in the semiconductor segment, and steps taken to reduce operating expenses are expected to improve results in subsequent quarters."

HOUSTON (FEB. 13) PR NEWSWIRE - Kern River Gas Transmission Co. today announced it has signed 150 million cubic feet per day (MMcfd) in new firm contracts for transportation of natural gas on its proposed pipeline from Wyoming to California. Kern River's firm, long-term contracts now total 520 MMcfd.

The contracts announced today are for 120 MMcfd. with Petro-Canada Inc.

and 30 MMcfd with Salmon Resources, a U.S. subsidiary of Shell Canada Limited. These volumes will be transported on Northwest Pipeline Corporation's existing facilities from Huntington, British Columbia, to an interconnection with Kern River at Opal, Wyoming.

"These contracts boost us above the minimum volumes we had set for building the line," said R.C. Thomas, president and chief executive officer of Tenneco Gas. "This is what we need to arrange our financing."

Kern River is a joint venture of units of Tenneco Inc. and The Williams Companies Inc.

Tenneco Inc. (NYSE: TGT) is a Houston-based, diversified company with major business interests in natural-gas pipelines, farm and construction equipment, shipbuilding, automotive parts, packaging, chemicals, and minerals.

The Williams Companies Inc. (NYSE: WMB) is a Tulsa-based corporation that operates a nationwide fiber-optic telecommunications network and more than 25,000 miles of pipelines, which separately transport natural gas and petroleum products.

CAMBRIDGE, MA (FEB. 13) PR NEWSWIRE - T Cell Sciences, Inc., (NASDAQ: TCEL) announced today that it has executed a standby underwriting agreement with Allen & Company Incorporated.

This agreement supplements the company's recently completed call for redemption on Feb. 6, 1990, of its publicly held common stock purchase warrants and provides that Allen & Company Incorporated will purchase all shares remaining unissued with respect to warrants which were not exercised by that time.

Approximately 93 percent of the warrants were exercised prior to redemption, resulting in receipt by the company of approximately $3.0 million. Publicly held warrants for 54,875 shares were not exercised, resulting in the obligation of Allen & Company Incorporated to purchase 54,875 shares of the company's common stock. These shares will be sold by Allen & Company Incorporated from time to time in the public market.

Utilizing proprietary T cell receptor and soluble receptor technology, T Cell Sciences, Inc. is developing pharmaceutical products to treat heart disease and autoimmune diseases as well as products for diagnosing and

monitoring immune system disorders and cancer. Located in Cambridge, the company currently markets products to the scientific community and an FDA-approved test kit to the diagnostic market.

#90044p0247 02/13/1990 ~PR Newswire

LOS ANGELES (FEB. 13) PR NEWSWIRE - CF Income Partners L.P. (NYSE: CFI), a Los Angeles-based master limited partnership, today reported a net loss of $1,765,000, or $.13 per unit, for the fourth quarter ended Dec. 31, q989, compared to a net loss of $1,186,000, or $.10 per unit, for the fourth quarter of 1988. For the 12 months ended Dec. 31, 1989, the partnership reported a net loss of $6,841,000, or $.52 per unit, compared to a net loss of $2,650,000, or $.21 per unit, for 1988.

With its portfolio solely invested in real estate, the partnership reported higher depreciation and interest expense on property debt during the fourth quarter of 1989 compared to the same period in 1988. Non-cash expenses consisting of depreciation, amortization of organization costs and deferred interest expense, which do not affect available cash flow, totaled $3,857,000 in the fourth quarter of 1989. In addition, the general partner will receive payment of its 1989 fourth quarter performance incentive fee of $507,000 in units in lieu of cash.

The partnership is able to pay distributions to unitholders on a tax-deferred basis because it has no reportable earnings for tax purposes.

Fourth quarter of 1989 operating income, exclusive of $342,000 of rental income guarantees, and before interest expense on property debt, depreciation and ground rent, was $4,875,000 compared to $3,673,000 for the same 1988 period. For the year ended Dec. 31, 1989, operating income exclusive of $1,296,000 of rental income guarantees, and before interest expense on property debt, depreciation and ground rent was $18,879,000 compared to $11,848,000 for 1988.

The partnership's increased investment in real estate and the consequent reduction in its mortgage loan portfolio resulted in decreases in interest income to $78,000 and $222,000 in the fourth quarter and 12 months ended Dec. 31, 1989, respectively, from $771,000 and $6,054,000, respectively, for the fourth quarter and 12 months ended Dec. 31, 1988.

CF Income Partners L.P. is a publicly traded master limited partnership that has invested in income-producing multi-family residential, commercial and industrial properties.

#90044p0249 02/13/1990 ~PR Newswire

CALGARY, ALBERTA (FEB. 13) PR NEWSWIRE - Petro-Canada announced today that it has signed a 15 year firm transportation agreement with Kern River Gas Transmission Co. to transport 120 MMcf/d of natural gas to Kern County Calif.

Petro-Canada will transport natural gas from British Columbia through existing arrangements on the Northwest Pipeline system as soon as Kern River goes into service, currently scheduled for the fourth quarter of 1991. Although British Columbia currently supplies a small amount of gas to Northern California, the development of its ultimate reserve and deliverability potential requires access to new long-term firm markets in the United States. Petro-Canada is continuing its marketing activities in Nevada and California and will apply for Canadian and U.S. regulatory authorizations as soon as sales arrangements are completed.

With increasing demand for natural gas in California in the latter half of the 1990's, new interstate pipeline capacity will be required. The Altamont Project, of which Petro-Canada is a sponsor, represents the most logical, cost effective means of supplying additional Canadian gas to California.

Petro-Canada is the largest producer of British Columbia gas and is the third largest producer of natural gas in Canada.

DANVERS, MA (FEB. 13) PR NEWSWIRE - Wheelabrator Technologies Inc. (NYSE: WTI), the nation's leading developer and operator of trash-to-energy facilities, achieved sharply higher net income, earnings per share and revenues in 1989.

Wheelabrator's net income last year increased 64 percent to $58.5 million, or $1.50 per share, on revenues of $1.5 billion, compared with net income of $35.7 million, or $1.09 per share, on revenues of $1.2 billion in 1988.

Net income in the three months ended Dec. 31, 1989 increased 52 percent to $16.3 million, or 42 cents per share, on revenues of $366.3 million, compared with net income of $10.7 million, or 28 cents per share, on

revenues of $400.1 million in the corresponding period of 1988. The revenue decline reflected the timing of contract completions.

Paul M. Montrone, chairman and chief executive officer, said, "Wheelabrator's gains resulted from excellent performances by all of our principal operations and the continuing expansion of our trash-to-energy and cogeneration capacity."

Results of both years reflect the Aug. 24, 1989 merger of the company's Wheelabrator Technologies Inc. predecessor and the Wheelabrator Group Inc. to form the present Wheelabrator Technologies.

Wheelabrator's 14 trash-to-energy facilities in operation or under construction have total disposal capacity of approximately 8 million tons of trash per year. Electrical generating capacity of these facilities and other Wheelabrator power plants is approximately 750 megawatts.

LOS ANGELES (FEB. 13) PR NEWSWIRE - Mattel Inc. (NYSE: MAT) today reported record income of $79.6 million or $1.60 per share for 1989, before a charge related to debt reduction. The l989 income is more than double the $35.9 million or $.75 per share reported for 1988. Full-year net sales were $1.237 billion, up 25 percent from $990 million in 1988.

In December the company called for redemption of its 11-5/8 percent subordinated debentures. That action resulted in a one-time net after-tax charge to 1989 earnings of $11 million or $.22 per share, for a total net income of $68.7 million or $1.38 per share. The redemption will result in annual interest savings in 1990 of $8.8 million.

EAST BRUNSWICK, NJ (FEB. 13) PR NEWSWIRE - Specialty Retail Services, Inc. (NASDAQ: SRSI), a distributor of professional beauty products, today announced that sales for the quarter ended Dec. 31, 1989, had declined

from the previous quarter due to normal seasonal fluctuations exacerbated by the overall sluggishness in retail sales. Consequently, the company may incur a net loss in income for this quarter and the fiscal year ended 1989. Murray Steinfink, chief executive officer, added that he is optimistic about the company's prospects for the first quarter of 1990 and the fiscal year 1990 with January's incoming orders being the highest monthly level in the company's history.

Steinfink also stated that the company's wholly owned subsidiary Salon Mart, Inc., which is an upscale store-based professional distribution company, recently opened its first stores in Piscataway and East Brunswick N.J. Also, Special Markets Services, Inc., a newly established ethnic distribution company which is wholly owned by the company, started up operations in January.

Specialty Retail Services, Inc., is a distributor of a broad range of professional beauty products, including hair care, nail care, cosmetics, skin care and other beauty accessories to independent and chain store drug stores, supermarkets, mass merchandisers, warehouse clubs, and other retail establishments and retail distributors. The company believes it is one of the largest independent distributors of professional beauty products in the 13 Mid-Atlantic and Northeastern states.

#90044p0261 02/13/1990 ~PR Newswire

HOUSTON (FEB. 13) PR NEWSWIRE - The Coastal Corporation (NYSE: CGP) today announced that its subsidiary, ANR Pipeline Company, and Natural Gas Pipeline Company of America, a subsidiary of Midcon Corp., have signed an agreement to utilize their respective pipeline systems to transport Canadian gas from Northern Border Pipeline Company to pipelines serving Eastern and Northeastern U.S. markets.

Under the agreement, gas will move through facilities of both ANR and Natural, including Natural's planned interconnection with the Northern Border Pipeline Company near Ventura, Iowa, announced last week.

Plans call for Natural to transport up to 450 million cubic feet (mmcf) per day of gas from Ventura to an interconnection with ANR near Joliet, Ill. ANR will then move the gas through its existing system to various points at which ANR connects with other pipelines serving the East Coast.

One of those connections is through a new line, now under construction, terminating at Lebanon, Ohio, where it links ANR with Consolidated Natural Gas Company and Texas Eastern Transmission Corporation, as well as Columbia Gas Transmission Corporation. Another connection is with Columbia

at Paulding, Ohio.

As part of the agreement, Natural will charge 35 cents per million British thermal units (MMBtu) for its transportation service from Ventura to Joliet, and ANR will charge 30 cents per MMBtu to move the gas from there to Lebanon, Paulding and other connections through which ANR can deliver gas to customers in the Northeast. This includes routes which connect to the proposed Empire Pipeline Project in New York state which will be operated by a Coastal subsidiary.

Company officials described the new plan as very competitive and a highly effective way of moving Canadian gas to consumers in the Eastern United States at the lowest possible cost and on a timely basis.

ANR and Natural have agreed to expand the throughput capacity of their pipelines, if additional capacity is needed to transport the new volumes.

Transportation services will begin when Natural's interconnect with Northern Border is completed later this year. That project includes construction of 150 miles of 30-inch pipeline from Ventura, the terminus of the Northern Border pipeline, to Natural's Amarillo Line mainline system near Harper, Iowa.

Midcon Corp., based in Lombard, Ill., is a unit of Occidental Petroleum Corporation (NYSE: OXY), Los Angeles. Natural operates some 12,800 miles of natural gas transmission lines in 12 mid-continent states. Other Midcon subsidiaries are engaged in intrastate gas transmission in Texas and in gas marketing.

The Coastal Corporation is a Houston-based energy holding company. It has consolidated assets of more than $8 billion and subsidiary operations in natural gas transmission and storage, oil and gas exploration and production, refining and marketing, coal and chemicals, and independent power production.

LOS ANGELES (FEB. 13) PR NEWSWIRE - IDB Communications Group Inc. (NASDAQ: IDBX) today announced the details of a joint venture with Teleglobe International (U.S.) Inc. for marketing worldwide aeronautical satellite communication services to the airline and general aviation industries. The agreement calls for the creation of a new corporation, IDB Aeronautical Communications Inc., a 50-50 joint venture between IDB Communications and Teleglobe International, which will tap a market with expected revenues in excess of $1 billion per year by the year 2000. The joint venture is a direct result of Teleglobe's purchase of a 20 percent equity interest in IDB (IDB press release: Jan. 5, 1990).

IDB Aeronautical Communications will join Teleglobe Canada Inc. in providing satellite aeronautical communication services jointly developed by a consortium consisting of telecommunications carriers in North America (Teleglobe Canada), Europe (France Telecom), the Pacific (OTC-Australia) and the Societe Internationale de Telecommunications Aeronautiques (SITA), a Paris-based nonprofit cooperative organization of over 350 commercial airlines. Jeffrey Sudikoff, chairman and CEO of IDB, explained, "Initial services will include passenger communications, such as advanced in-flight telephone, computer and facsimile services, as well as airline operations and cockpit data communications."

Expected to be on-line by late 1990, the digital services will be available worldwide through the consortium, which expects revenues to exceed $1 billion (U.S.) per year by the end of the decade. IDB Aeronautical Communications will handle sales of the services to non- SITA member airlines and the general aviation industry while SITA will handle all sales to its own member airlines.

The service enables air-to-ground communications using the INMARSAT satellite system. Teleglobe Canada and IDB Aeronautical are each constructing one earth station to carry the service. IDB's earth station

will be in California serving the Pacific Ocean region and Teleglobe's in Canada serving the Atlantic Ocean region. These earth stations will connect with four others, two built by France Telecom and two built by OTC in their respective regions, to form the worldwide network. Signals will be sent and received via satellite from terminals on the aircraft to and from the six earth stations worldwide. The earth stations will then access private and public terrestrial telecommunications networks, including the SITA network which connects thousands of airline operations locations in over 160 countries.

IDB Aeronautical Communications Inc. will be headed by Sudikoff as chief executive officer. Atherton Wallace, president of Teleglobe International will be chairman of the board.

#90044p0267 02/13/1990 ~PR Newswire

HARTFORD, CT. (FEB. 13) PR NEWSWIRE - Magellan Petroleum Corporation (NASDAQ: MPET) today announced a consolidated net loss of $42,000 (less than 1 cent a share) on gross revenues of $2.95 million in its fiscal second quarter ended Dec. 31, as compared to a loss of $122,000 (also less than 1 cent a share) on revenues of $2.44 million in the same period last year.

For the six-month period ended Dec. 31, this year's net loss of $2,000 on gross revenues of $5.74 million compares to a loss of $106,000 on $4.71 million in the prior-year period, the company said.

Magellan, which reports on a consolidated basis with its 51 percent- owned subsidiary, Magellan Petroleum Australia Limited, said this year's improved results are attributable largely to a 21 percent increase in gas sales revenues from the Mereenie and Palm Valley fields in the first half of fiscal 1990. Also cited were increased oil sales revenues -- notwithstanding lesser production -- resulting from significantly higher oil prices in Australia.

Benjamin W. Heath, president, reported that a new development well (EM-29) is being drilled at the Mereenie field to increase oil output, and that a seismic survey is being conducted on a newly acquired exploration permit in South Australia's Otway Basin.

In the southwestern United States, the Navajo venture has drilled two development wells in the Black Rock gas field, which are now being readied for testing, Heath said. He also noted that the venture's two oil

discoveries in Utah's Paradox Basin -- Sahgzie No. 1 and Anasazi No. 1 -- are now in production at a combined rate of about 900 barrels per day.

CHICAGO (FEB. 13) PR NEWSWIRE - United Airlines announced today that Larry D. DeShon has been named general manager-France effective immediately.

DeShon will be based in Paris, where he will be responsible for airport operations, passenger sales and ticketing, reservations and cargo sales.

"We are delighted to announce that Larry is joining the Atlantic Division team as general manager for France," said Stephen M. Wolf, chairman and president. "His firsthand experience in sales and operations, together with his wide knowledge of how the airline works, is a unique asset to us and will benefit our customers."

DeShon is a 12-year United employee with a wide range of experience in customer service, training and cargo sales.

A native of Kansas City, Mo., he graduated from the University of Missouri with a degree in communications and sociology.

His first position with the airline was as a customer service representative in Kansas City. He handled various assignments in cargo sales in San Francisco and Kansas City before moving to Chicago in 1985 as a training development specialist, developing programs and teaching in the customer service area.

In 1986, he transferred to the customer service planning staff, handling cargo services planning and support. The next year he became senior staff representative on the passenger services side for the same department at United's executive offices near Chicago.

In 1988, he was promoted to central baggage service manager at O'Hare International Airport, United's largest hub serving Chicago, where he has been responsible for systemwide baggage service.

DeShon and his wife, Gail, have twin boys who are four years old. United previously announced it plans to inaugurate nonstop service between Chicago and Paris in August of this year with one daily flight in each direction in Boeing 767 equipment.

WEST CALDWELL, NJ (FEB. 13) PR NEWSWIRE - Improved sales and earnings in the fourth quarter ended Dec. 31, 1989, helped offset less-positive results reported earlier in the year by Merrimac Industries, Inc. (AMEX: MRM)

The company today reported net sales of $4.0 million for the fourth quarter ended December 31, 1989, up 6.52 percent over the 1988 fourth period. Net income for the 1989 fourth quarter was $584,459 or $.26 per share, up 27.78 percent over 1988's fourth- quarter net income of $457,396 or $.21 per share.

Despite the improved fourth quarter, net sales for the fiscal year ended December 31, 1989, were $14.8 million, a 14.39 percent decline from sales of $17.3 million in fiscal 1988. Net income for the year just ended of $1.0 million or $.45 per share was down 36.34 percent from the year-earlier figure of $1.6 million or $.71 per share. The company earlier reported declines in sales and net income in each of the first three quarters of 1989 compared to the comparable 1988 periods.

Chairman Paul Terranova said the anticipated decline in overall defense spending is not expected to adversely affect Merrimac. He said the "military electronics requirement will increase, not decrease." He added that the "company is getting stronger, not weaker. . .," noting that Merrimac had just been selected "Vendor of the Year" by a major defense contractor.

Mr. Terranova said Merrimac in 1989 expanded its technology base and improved the "efficiency of the existing product line" to operate in a more competitive environment. Strengthened management, upgraded facilities more-intensive marketing and employee training have also helped prepare Merrimac for the increased competition, he added.

Merrimac designs, manufactures and sells electronic equipment to the U.S. Department of Defense and other government agencies and to U.S. and foreign defense and space contractors.

#90044p0273 02/13/1990 ~PR Newswire

HOUSTON (FEB. 13) PR NEWSWIRE - Wainoco Oil Corp. (NYSE: WOL) today reported revenues for the year ended Dec. 31, 1989 of $39.9 million, 13 percent greater than those of the previous year. Net income was $1.8 million, or 9 cents per share, compared to earnings of $3.4 million, or 18 cents per share, for 1988. Net income was down largely due to a noncash additional depreciation, depletion and amortization charge of $2 million

for the write-down of U.S. properties in the fourth quarter. Net cash provided by operating activities, unaffected by the write-down, increased 39 percent over that provided in the prior year.

Record natural gas production of 20.2 bcf was eight percent above that produced last year, and the weighted average natural gas price improved slightly to $1.30/mcf from $1.26/mcf. Oil production of 637,000 barrels declined three percent in 1989 but its average price of $15.96/bbl improved by 21 percent.

Proved BTU equivalent reserve estimates of 268.1 bcf, 86 percent of which were natural gas reserves, were five percent below those of the previous year-end. Oil reserves of 6.2 million barrels were up 11 percent. Natural gas reserves of 230.7 bcf were down seven percent as the result of production of 20.2 bcf and a revision of the Athens Field reserves of 20.4 bcf. However, the pretax discounted future net cash flow from reserves (using constant prices and costs) improved by $6 million, or four percent, in 1989.

Shareholders' equity at Dec. 31, 1989 of $80.1 million was 7 percent above the $74.8 million at year- end 1988. Long-term debt was $69.3 million compared to $39.3 million at Dec. 31, 1988 due to the sale of $46 million of 7-3/4 percent convertible subordinated debentures in July 1989. All outstanding bank debt was retired with 49 percent of the net sale proceeds and, following property acquisitions, the company had year-end working capital of $14 million.

For the quarter ended December 31, 1989, the company reported a net loss of $1.1 million, or $.06 per share, compared to earnings of $1.1 million in the final three months of 1988. The loss was primarily due to the $2 million noncash write-down of U.S. oil and gas properties. Revenues of $10.7 million were 15 percent above the $9.3 million in last year's quarter.

Wainoco Oil Corp. is an oil and gas exploration and production company with operations throughout North America. Wainoco's shares are listed on the New York and Alberta Stock Exchanges.

#90044p0276 02/13/1990 ~PR Newswire

CAMBRIDGE, MA. (FEB. 13) PR NEWSWIRE - Genetics Institute, Inc. (NASDAQ: GENI) announced today that its European partner, Boehringer Mannheim GmbH, has received a favorable recommendation for national approval from the EEC's Committee for Proprietary Medicinal Products (CPMP) for marketing recombinant erythropoietin (EPO).

This is the first step in an approval process for Genetics Institute's recombinant EPO product in Europe. The recommendation for approval pertains to the use of the companies' recombinant EPO for treatment of anemia associated with end-stage renal failure.

Over 100,000 European patients suffering from end-stage renal failure, who are unable to produce sufficient levels of natural EPO and suffer from anemia, are expected to benefit from the availability of this recombinant EPO product. EPO is a protein which stimulates the body's production of oxygen-carrying red blood cells; extensive clinical trials in the U.S. and Europe have demonstrated that recombinant EPO is safe and effective in the treatment of anemia secondary to renal failure.

Genetics Institute developed purified recombinant EPO as well as the DNA technology and manufacturing technology needed to produce recombinant EPO. Boehringer carried out the formulation and preclinical as well as clinical development.

Boehringer will sell the recombinant EPO under the trade name Recormon. Genetics Institute will receive royalties on Boehringer's sales of Recormon and manufacturing revenue for the supply of bulk EPO. Genetics Institute is responsible for 100 percent of EPO supply over the first three years of commercial sale and 50 percent thereafter.

"This positive recommendation for our recombinant EPO should allow product introduction over the next few months," said Gabriel Schmergel, chief executive officer of Genetics Institute. "Given Boehringer Mannheim's excellent marketing experience and distribution capabilities in Europe, we expect Recormon to be a successful product for both companies and to provide thousands of Europeans suffering from anemia with a new treatment option."

Anemia in chronic renal failure patients is frequently characterized by severe chronic fatigue and other symptoms. The CPMP is responsible for the evaluation of applications to market pharmaceutical products, and was set up to allow for review by multiple countries via a common application. Once the CPMP approves an application, it issues a recommendation to its member countries for national approval. Final decisions regarding approval in each member country are up to the regulatory authorities in each country. The timing of marketing approval for individual countries varies, but for the first countries is usually within months of receipt of a CPMP recommendation.

Genetics Institute's Japanese licensing partner, Chugai Pharmaceutical Co. Ltd., received approval in Japan to market its recombinant EPO product, EPOGIN, for end-stage renal failure last month. The company's U.S. marketing partner, Chugai-Upjohn has applied for marketing approval of its

recombinant EPO product, Marogen Sterile Powder, in the U.S.

Genetics Institute is a leading biotechnology firm engaged in the discovery and development of human pharmaceuticals through recombinant DNA technology. The company has a diversified portfolio of licensed and proprietary pharmaceutical products.

DALLAS (FEB. 13) PR NEWSWIRE - Rosewood Financial, Inc., which controls 9.95 percent of the common stock of First Executive Corporation (NASDAQ: FEXC), said today that it expanded its advisory team with the engagement of J.P. Morgan as financial advisor with respect to a potential merger or acquisition of First Executive.

While continuing to evaluate alternatives regarding any new proposal, Rosewood said that any resolution of First Executive's problems must extend beyond a mere change of control. "We are determined to see First Executive restore public confidence with a renewed commitment to all constituencies. Any rehabilitation of the company must begin with the assurance that the company will meet its responsibilities to pensioners, policyholders, creditors, stockholders and agents," Rosewood Financial President Mark W. Hobbs said.

On Jan. 31, Rosewood engaged the Chase Manhattan Bank, N.A., to act as its financial advisor in connection with the structuring of a senior bank debt facility. Rosewood has said that it contemplates such a facility would provide financing of up to $575 million for Executive Life Insurance Company following a merger.

SAGINAW, MI (FEB. 12) PR NEWSWIRE - Michigan-based Polar Molecular Corporation (OTC: PMCX) is banking on increased international sales of a private-label product following the launching of Amway's Freedom Fuel Additive in Canada. Amway also plans to introduce the product in a minimum of eight other international markets.

Polar Molecular President Mark L. Nelson announced today that Amway's Freedom Fuel Additive, a PMC product, will receive greatly enhanced promotional support through Amway's involvement with videos, sampling, direct mail, and some print offerings.

"Amway's international presence can only help our private-label agreement " Nelson said. "We anticipate a major partnership in the future and look to extending the fuel-additive marketing program in many of Amway's international markets."

The new agreement includes an investment by Amway in Polar.

NEW CASTLE, PA. (FEB. 12) PR NEWSWIRE -- John W. Sant, chairman and chief executive officer of First Western Bancorp (NASDAQ: FWBI), stated that the board of directors, at its Feb. 12, 1990, meeting, elected Thomas J. O'Shane as president and chief operating officer, effective immediately.

O'Shane will continue to serve as president and CEO of First National Bank of Western Pennsylvania, a First Western subsidiary bank.

Sant stated, "In anticipation of our continued growth, including our potential merger with First Federal of Western Pennsylvania in Sharon, Pa. announced on Nov. 14, 1989, we need a stong operating officer at the holding company level to direct our banking operations and to consolidate bank back office functions while permitting our banks to concentrate on their main business of attracting and retaining customers. Tom O'Shane is the ideal executive for this position."

First Western Bancorp Inc., headquartered in New Castle, Pa., is the parent of First National Bank of Western Pennsylvania and Beaver Trust Co. with 18 offices in Lawrence, Butler, Beaver and Allegheny counties.

Biography: O'Shane, a native of New Wilmington, Pa., is a graduate of Westminster College, with a B.A. degree in business administration. He served in the U.S. Army in Alaska and Japan.

O'Shane joined First National Bank of Western Pennsylvania in 1971 holding a variety of executive positions. Jan. 11, 1988, he was elected president and chief executive officer of First National Bank.

O'Shane has studied banking extensively, attending the Pennsylvania Bankers' Association Trust Training School at Bucknell University, the National Graduate Trust School at Northwestern University, and the Executive Program for Management Development at the Harvard University Graduate School of Business Administration.

SEATTLE, (FEB. 12) PR NEWSWIRE - Westmark International Inc. (NASDAQ-NMS: WMRK) today reported that its net income for 1989 increased by 83 percent to $19.7 million, or $1.91 per share, compared with $10.8 million, or $1.08 in 1988.

The results for 1989 include a charge in the fourth quarter of $1.7 million for the planned discontinuation in 1990 of the company's ultrasound manufacturing operations in Solingen, West Germany, and the consolidation of the manufacturing of all ultrasound systems at Advanced Technology Laboratories' (ATL) facility in Bothell, Wash. The charge reduced earnings per share by 16 cents.

Net income for the fourth quarter of 1989 increased by 56 percent to $6.4 million, or 60 cents per share, as compared with $4.1 million, or 40 cents per share, for the fourth quarter of 1988.

"Our strong financial results for 1989 set new records for Westmark," said Dennis C. Fill, chairman and chief executive officer of Westmark. "Both Advanced Technology Laboratories and SpaceLabs achieved new levels of profitability and record pre-tax margins.

"We are particularly encouraged by the substantial improvement in ATL's financial performance. ATL's income in the second half of 1989 alone exceeded its income in any full year since we became a public company.

"ATL made substantial gains in the worldwide ultrasound market with its all-digital Ultramark(R) 9 system which was first delivered to customers in late 1988 and is now ATL's principal product. Over 85 percent of our Ultramark 9 system shipments in 1989 included color Doppler. The system provides the clinician with image quality and clinical versatility that is unparalled in the industry. We are pleased with its competitive success and its differentiation in the marketplace based on its clinical utility.

"SpaceLabs continued to advance its competitive position as a leading supplier of clinical and patient information systems with a series of innovative product introductions which expand the clinical utility and the integration network of its highly successful Patient Care Management System (PCMS).

"Our accomplishments in 1989 reaffirm we are solidly on the path towards achieving our longer-term financial objectives. We are confident Westmark's results in 1990 will improve further and set new records."

The improvement in the company's net income in 1989, relative to 1988, resulted from a 20 percent growth in revenues, improved gross margins particularly in the company's patient monitoring business and international ultrasound operations, lower marketing and administrative expenses as a percent of revenues, and a lower effective tax rate.

Ultrasound and patient monitoring revenues for the full year grew by 23 percent and 16 percent, respectively. The growth in revenues was led by ATL's all-digital Ultramark 9 system and SpaceLabs' PCMS system. Booking for the full year grew by 18 percent and all the major geographic segments of the company's business evidenced strength in bookings growth.

The improvement in the company's net income in the fourth quarter resulted from a 19 percent increase in revenues, improved gross margins, lower operating expenses as a percent of revenues, and a lower effective tax rate. The company's ultrasound and patient monitoring revenues in the fourth quarter rose 25 percent and 10 percent, respectively. Bookings for the quarter grew by 21 percent. Backlog at the end of the year totaled $121.3 million, equivalent to last year's levels. Year-end backlog reflects not only the strong bookings in the fourth quarter, but also the substantially improved manufacturing efficiences at ATL which have resulted in improved customer delivery terms.

Westmark, with headquarters in Seattle, is a worldwide developer, manufacturer and distributor of diagnostic imaging systems and electronic

patient monitoring systems through its subsidiaries: Advanced Technology Laboratories Inc. in Bothell, and SpaceLabs Inc. in Redmond, Wash.

Westmark's common stock is quoted on the NASDAQ National Market System under the symbol WMRK.

SAN DIEGO (FEB. 13) PR NEWSWIRE - The Price Co. (NASDAQ: PCLB) announced today that it has acquired, over the past four weeks, an aggregate of 500,000 shares of its common stock, or approximately 1.0 percent of the 49,910,000 shares outstanding at Dec. 24, 1989, the close of the company's first quarter of the current fiscal year.

The shares were purchased in market transactions at an average of approximately $39 per share.

The company had previously announced on Feb. 27, 1989, that its board had authorized the purchase of up to an aggregate of $50 million of any of its outstanding securities, but until the recent purchases that authority had not been exercised.

#90044p0315 02/13/1990 ~PR Newswire

COLUMBUS, OH, (FEB. 12) PR NEWSIRE - Lancaster Colony Corporation (NASDAQ: LANC) today reported record sales and net income for both the second fiscal quarter and six months ended December 31, 1989.

Second quarter net income was up 9 percent to $5,366,000 or 45 cents per share over the $4,909,000 or 40 cents per share earned in the second quarter a year ago. Net sales were $134.3 million versus $126.4 million.

For the six months, net income amounted to $11,290,000 or 95 cents per share, up 9 percent from year ago net income of $10,328,000 or 84 cents per share. Six-month sales were $261.5 million compared with sales of $246.2 million last year.

John B. Gerlach, president of Lancaster Colony, said, "We are pleased to accomplish sales and earnings increases for both the quarter and six months during what we perceive as a slowing economy." He added that second-quarter earnings were again adversely affected by the company's Canadian automotive manufacturing operation. "The production of that facility," he added, "has recently been moved entirely into our U.S. plants."

Looking ahead, Gerlach said he expects the balance of fiscal 1990 will continue to show improvement over the previous year.

HAMMOND, IN (FEB. 13) PR NEWSWIRE - Northern Indiana Public Service Company (NYSE: NI) today announced that 164 non-union employees have elected to take early retirement packages and that the employment of an additional 130 non-union employees is being terminated effective today as part of a companywide reorganization.

The early retirements were offered to employees age 55 or older, who with one point for each year of service and one point for age, attained 85 points. The early retirements will be effective March 1.

Those employees whose jobs were eliminated received a severance package and outplacement counseling.

The reorganization will reduce the company's non-union workforce from 1,824 to 1,530, a reduction of about 16 percent.

The reorganization, announced Jan. 24, is designed to streamline the company's operations, by consolidating and eliminating a number of departments and functions. Areas affected include energy distribution, corporate marketing, electric supply, gas operations and the corporate support group, which includes financial and administrative functions.

The company said the changes were necessary to become more responsive to customer needs in a cost-effective manner and adapt to a more competitive energy environment in the 1990s.

#90044p0322 02/13/1990 ~PR Newswire

NEW YORK, (FEB. 13) PR NEWSWIRE - NYMAGIC, Inc. (NASDAQ/NMS: NYMG) today announced the results of operations for the three months and year ended Dec. 31, 1989. John N. Blackman, Jr., chairman, reported that total revenues for the fourth quarter of 1989 were $21,934,621, an increase of approximately 3 percent over 1988 fourth-quarter total revenues of $21,303,628. For the 12 months ended Dec. 31, 1989, total revenues were $91,721,086, a gain of approximately 10 percent over 1988 total revenues of $83,560,637.

Net premiums earned for the 1989 fourth quarter were $17,448,273 compared with $17,689,799 for the similar 1988 period, a decrease of approximately 1 percent. For the year 1989, net premiums earned were $71,390,380 compared with $70,988,185 for 1988, an increase of approximately 1 percent.

Net investment income for the Dec. 31, 1989, quarter was $4,164,058, an increase of approximately 20 percent over the fourth quarter 1988 net investment income of $3,465,931. Net investment income for the year 1989 increased to $15,553,990 from $12,604,734 for the previous year, a gain of approximately 23 percent. Realized investment gains in the fourth quarter of 1989 were $211,356 compared with $81,945 in the fourth quarter of 1988. Realized investment gains for the year ended Dec. 31, 1989, were $4,419,709 compared with $310,112 of realized investment losses for 1988.

Net income for the quarter ended Dec. 31, 1989, was $4,303,775 compared with $4,401,478 for the fourth quarter of 1988, a decrease of approximately 2 percent. Net income for the 12 months ended Dec. 31, 1989 rose to $19,580,696, an increase of approximately 25 percent over net income of $15,664,771 for the previous year. Earnings per share for the fourth quarter of 1989 decreased to 49 cents per share from 51 cents for the fourth quarter of 1988 and increased to $2.23 per share for the 12 months ended Dec. 31, 1989, from $1.80 for the same period of 1988.

Net income for the 12 months ended 1989 and 1988 includes a tax benefit of $348,447 and $539,480, respectively, as a result of the "Fresh Start" provision under the Tax Reform Act of 1986.

The 1989 fourth-quarter earnings reflect the company's exposure arising from the San Francisco earthquake and the Phillips' Petroleum Plant explosions of $.08 and $.05 per share, respectively.

NYMAGIC, Inc. and its subsidiary insurance companies specialize in ocean marine, inland marine, aircraft and other liability insurance.

PROVIDENCE, RI (FEB. 13) PR NEWSWIRE - GTECH Corporation (NASDAQ: GTCH), the leading supplier worldwide of on-line computerized lottery networks, today announced that it has been selected to negotiate a contract to provide equipment and services for the Hoosier Lottery in Indiana.

The selection of GTECH is the result of a competitive procurement procedure under which GTECH proposed to design, install, implement and maintain the Hoosier Lottery's first on-line network that is expected to

commence operations by late Spring under a five-year contract. The value of the contract to GTECH was estimated by the Lottery to be $88.9 million.

GTECH Corporation design, produces, and implements computerized on-line networks, principally for government-sponsored or licensed lottery jurisdictions. Typically, GTECH operates, supplies and/or otherwise services these networks after installation. At present GTECH has been selected to serve 37 on-line lottery and wagering customers worldwide on five continents.

ATLANTA (FEB. 13) PR NEWSWIRE - Robert Strickland, chairman of the board and chief executive officer of SunTrust Banks Inc. (NYSE: STI) has outlined a plan for the orderly succession of senior management of the regional banking company.

Under the corporate bylaws, Strickland will retire as an executive officer and director of the company on June 1, 1992, following his 65th birthday.

Strickland, who will be 63 in May, said that he will recommend to the board of directors following the SunTrust annual meeting on April 17 that James B. Williams, 56, currently vice chairman, be elected president of the company and assume the position of chief executive officer at that time.

He will also recommend that Joel R. Wells Jr., 61, currently president of SunTrust, be elected chairman of the board. Strickland plans to remain chairman of the executive committee and continue as an active member of the senior management group until his retirement.

Stickland, Wells and Williams have held their respective positions in SunTrust management since the company was established in the second half of 1984, becoming operational on July 1, 1985 under the reciprocal interstate banking laws of Florida and Georgia.

Strickland joined Trust Company of Georgia, now one of SunTrust's three state bank holding company subsidiaries, in 1948 shortly after graduating from Davidson College. He was elected chairman of the board of Trust Company in 1978, continuing in that capacity until 1989. He remains a director of Trust Company and its Atlanta bank. He also serves on the boards of Equifax Inc., Georgia Power Co., Life Insurance Co. of Georgia, GeorgiaUS Corp., The Investment Centre and Oxford Industries Inc.

After graduation from Emory University in 1955 and two years of service in the U.S. Air Force, Williams joined Trust Company in 1957 as a member of the management training program. From 1964 to 1971, he was president and later chairman of Trust Company Bank of Augusta, returning to Atlanta in 1973 with responsibilities for Trust Company banks throughout the state. He has served as president of both the Florida and Georgia holding company subsidiaries of SunTrust, relinquishing those positions in 1989 while continuing on the boards. His corporate boards include The Coca-Cola Co. Genuine Parts Co., Georgia-Pacific Corp., Rollins Inc., RPC Energy Services Inc. and Sonat Inc.

Wells, a graduate of the University of Florida with B.S. and law degrees, was a practicing attorney in Orlando, Fla. for several years. His association with the Sun Bank system began in 1959. In 1967, he was one of the organizers of what is now Sun Banks Inc., serving as a director and general counsel. He was elected executive vice president in 1975, becoming president and chief executive officer in 1982. A former director of the Jacksonville, Fla. branch of the Federal Reserve Bank of Atlanta, his current corporate directorships include Columbian Mutual Life Insurance Co. and Coca-Cola Enterprises Inc.

WESTLAKE VILLAGE, CA (FEB. 13) PR NEWSWIRE - Always Technology Corp. said that their IN-2000 SCSI Host Adapter for AT-bus computers had been certified by Novell Laboratories for use in Advanced NetWare Version 2.15 dedicated and nondedicated 286/386-based file servers.

As part of the testing, the IN-2000 also qualified for use in duplexed windowing disk drive configurations permitted under Advanced NetWare SFT. These duplexed configurations, intended for high reliability file server designs, allow for installation of two or more host adapters, each with up to seven attached SCSI disk drives, on the same PC bus without contention.

Always Technology Corp., headquartered in Westlake Village, was founded in 1989 to address the needs for high performance products in the Small Computer System Interface (SCSI) marketplace. The company currently designs, manufactures and markets a range of high performance SCSI host adapters that simplify integration of peripherals such as disks and tape drives, CD-ROMs and optical storage devices with advanced personal computers.

RESTON, VA. (FEB. 13) PR NEWSWIRE - The board of directors of Lafarge Corporation (NYSE: LAF) today declared a cash dividend of 10 cents ($0.10) per share on the company's common stock. The common dividend is payable on March 1, 1990, to shareholders of record on Feb. 23, 1990.

Lafarge, one of the largest manufacturers of cement and construction materials in North America, recently reported net income of $100 million and earnings per share of $1.98 for the year ending Dec. 31, 1989. Fourth quarter earnings were 40 cents ($0.40) per share.

Larfarge Corporation and its Canadian subsidiary, Lafarge Canada Inc., operate 14 full-production cement plants with a combined annual rated capacity of 11 million tons, supplemented by six grinding plants and four deep water ocean import terminals. The company's principal markets are located throughout Canada and in a major portion of the United States. Lafarge is also a significant supplier of concrete-based construction materials, particularly in Canada, where Lafarge Canada Inc. is the largest producer of ready-mix concrete and aggregates. In addition, Lafarge's subsidiary, Systech Environmental Corporation of Xenia, Ohio, is involved in the conversion of waste into fuel for use in cement kilns.

LOS ANGELES (FEB. 13) PR NEWSWIRE - Jon Landau has been named Senior Vice President, Feature Production, of Twentieth Century Fox, it was announced today by Roger Birbaum, president, Worldwide Production.

In his new position, Landau will oversee the production of theatrical motion pictures for Fox, reporting directly to Birnbaum.

In commenting on the appointment, Birnbaum stated: "With our increased production of films now scheduled, we felt the need to add to our staff an experienced production executive to oversee and insure the proper management of these films. Jon Landau is just the person for our team."

Landau commented: "The interesting thing about the job is coming in to create something new and different. Joe Roth and Roger Birnbaum are filmmakers, and that's something we want to carry on in our work together at Fox. Production should enhance the creativity of a film, and not inhibit it."

Landau comes to Fox from co-producing the 1989 summer blockbuster "Honey, I Shrunk the Kids" and Warren Beatty's upcoming "Dick Tracy," both for Walt Disney Productions. Prior to that, he produced "Campus Man" for Paramount and RKO, afer serving as production manager on "Key Exchange," "F/X," "Manhunter" and "Making Mr. Right." A graduate of the USC Film School, he is the son of Edie and Ely Landau, one of Hollywood's most distinguished producing teams, whose company produced such films as "The Pawnbroker," "Long Day's Journey into Night" and the Academy Award-nominated documentary "King: A Filmed Record ... Montgomery to Memphis."

Twentieth Century Fox is primarily engaged in the financing, development, production, distribution and marketing of motion pictures throughout the world and is a unit of Fox Inc.

CARLSBAD, CA (FEB. 13) PR NEWSWIRE - Specialized Systems Inc. (NASDAQ: SSII) (SSI) today announced several changes in its board of directors and other matters in connection with shareholder approval of its reverse acquisition of Kentana Development Inc. of Corsicana, Texas.

The board accepted the resignations of Marianne DeWaard and Robert Zimmerman who had earlier resigned as directors of the company. Chairman Stephen J. Nemergut and the board appointed Donald L. Apostolo, to the board of directors of the company and Garrett R. Quintana Jr. to the board of directors of the company. The board of directors currently consists of Garrett R. Quintana, Kenneth Folmar, Nemergut, Thomas Martinez, Quintana Jr., Apostolo and Russell W. Colgate. Nemergut resigned as chairman of the board and chief executive officer of the company and the board elected Garrett R. Quintana as chairman of the board and chief executive officer of the company. The board elected Folmar as co-chairman and chief operating officer of the company, Apostolo as executive vice president for real estate development of the company and Nemergut as president of the company. The officers of the company are currently Quintana, chairman of the board and chief executive officer, Folmar, co-chairman and chief operating officer, Nemergut, president, Apostolo, executive vice president of marketing and Martinez, secretary-treasurer.

The company announced the formation of a new subsidiary, Richland Chambers Development Corp., which will serve as the operating entity for the company's Laguna Point project which is currently under development. The company further announced the acquisition of an additional 230 acres to be developed adjacent to the Laguna Point property as a development to be known as "Laguna Hills." The company purchased such property for a note in the amount of $575,000; the note bears interest at 9 percent per annum. For a two-year period from the date of the closing, the buyer shall not be required to make regular interest or principal payments but as lots are sold the company shall pay the seller $3,750 per surveyed acre to be released and such payments shall be first applied to interest earned and then to principal. The balance of interest accrued during the first two-year period of the note shall be due at the beginning of the third year of the note. During the third, fourth and fifth years of the note, buyer shall reduce the principal by 10 percent per annum and pay annual

interest payments. Funds generated from the sale of lots during each 12-month period prior to an annual principal payment shall be credited to the principal of said annual payment, after interest is paid.

SANTA ANA, CA (FEB. 13) PR NEWSWIRE - Signaling the beginning of dealership facility construction, Saturn today dedicated the first of 108 dealer sites scheduled to be built in the next 16 months across the United States.

Saturn Dealer John Campbell joined Donald W. Hudler, Saturn vice president of Sales, Service and Marketing, and John Michaud, Saturn UAW Local 1853 financial secretary, in dedicating the location for the future home for Saturn of Santa Ana.

"Today's event signals the start of construction for Saturn dealer facilities coast to coast," Hudler said. "John Campbell typifies our Saturn dealers. They are highly successful retail automotive experts with organizations committed to providing superior customer satisfaction and exceptional sales and service experience."

Saturn expects approximately 20 facilities to be under construction within the next 30 to 90 days, and some 45 facilities under way by mid-year, Hudler added.

A key element of Saturn's philosophy is to provide an exceptional sales, service and ownership experience. To achieve this goal, Saturn dealers have established a unique employee selection process, a comprehensive training program and an employee performance measurement system for each dealership activity, according to Michaud. The process has been designed to help dealers assess, select and hire qualified personnel.

The selection process will be initiated this summer when dealers begin their individual hiring. Training starts at the dealership level and is followed by an intensive two-week series of courses at Saturn's Northfield Training and Development Center in Spring Hill, Tenn. An estimated 1,900 dealership personnel will rotate through this facility beginning in late August to receive training.

The stand-alone, uniform Saturn facilities will feature new concepts in merchandising and servicing cars including side-by-side sales and service entrance to focus on delivering a superior shopping, buying and owning experience. Saturn currently has commitments from 92 dealers in 59 markets to build 108 dealership facilities across the United States. The

automaker plans to introduce its vehicles first on the West Coast, Tennessee and the Southeast this fall, followed by a roll-out across the United States.

Saturn Corporation, an independent subsidiary of General Motors, is based in Spring Hill, Tenn., and Troy, Mich. The company's mission is to develop, manufacture and market a family of high-quality, affordable cars to compete in the subcompact and compact segments of the market. Saturn products will be built at a 4 million-square-foot manufacturing and assembly complex in Spring Hill. The first cars, two-door and four- door models, will be introduced in the fall of 1990.

NEW YORK (FEB. 12) PR NEWSWIRE - Time Warner Inc. (NYSE: TWX) annnounced today that all its operating divisions -- excluding the $175 million loss from the Book division's sale of Scott, Foresman and Company -- reported record fourth-quarter and full-year earnings before interest, taxes, depreciation and amortization (EBITDA) of $587 million and $1.554 billion, respectively.

However, the company reported a fourth-quarter net loss of $222 million, or $3.69 per share, on revenues of $3.1 billion, primarily due to interest expense and the amortization of the purchase cost related to the acquisition of Warner Communications Inc. (WCI). For 1989, Time Warner reported a net loss of $256 million, or $4.34 per share, on revenues of $7.6 billion.

The 1989 results reflect Time Warner's 59.3 percent ownership of WCI as of Aug. 1, 1989, a significant increase in interest expense due to the purchase of 100 million shares of WCI common stock, and the use of purchase accounting. Time Warner's acquisition of WCI was completed on Jan. 10, 1990.

Fourth-quarter results in 1989 included the $175 million pretax loss on the sale of Scott, Foresman, Time Warner's textbook publisher, and a $63 million pretax gain primarily on the sale of Columbia Pictures Entertainment, Inc. common stock. In the 1988 fourth quarter, the company took a $35 million pretax charge to reduce the carrying value of a satellite investment and related costs.

On a pro-forma basis, Time Warner's fourth-quarter EBITDA was $412 million compared with $351 million for the same period last year. For 1989, EBITDA was $1.917 billion, up 44 percent from $1.331 billion the year earlier.

Time Warner's pro-forma net loss was $175 million for the fourth quarter of 1989 and $432 million for the full year, compared with a net loss of $178 million for the year-earlier quarter and a net loss of $582 million for the full year in 1988.

Time Warner Inc. is the world's largest media and entertainment company, with operations in magazines (including Time, Sports Illustrated, People, Entertainment Weekly, Fortune, Money, Life, the magazines of the Southern Progress Corporation, and 50-percent-owned Whittle Communications); filmed entertainment (Warner Bros., Warner Bros. Television, Lorimar Television, Warner Home Video, and Licensing Company of America); recorded music and music publishing (Warner Bros. Records, Elektra Entertainment, Atlantic Records, WEA Corp. WEA International, WEA Manufacturing, Ivy Hill Corp., and Warner/Chappell Music); cable television (82-percent-owned American Television and Communications Corporation, and Warner Cable); programming-HBO (HBO, Cinemax, The Comedy Channel and HBO Video), and books (Time-Life Books; Book-of-the-Month Club; Little, Brown; Warner Books, and Oxmoor House).

ATLANTA (FEB. 13) PR NEWSWIRE - Contel Corporation (NYSE: CTC) today announced that its subsidiary, Contel Customer Support, has acquired Texas-based Communications Corporation of America (CCA) for an undisclosed amount.

CCA maintains Private Branch Exchange telephone systems, and supports approximately 930 customers that represent more than 240,000 ports.

H. David Fanning, president of Contel Customer Support, said: "The acquisition is in line with our product focus, and allows us to enter markets that have a heavy concentration of the equipment we specialize in servicing. We intend to be a national provider of service for telecommunications networks."

Contel Customer Support has entered the following markets through the acquisition: Houston, Waco, Dallas, El Paso, and Midland, Texas; Memphis, Tenn.; Chicago; Little Rock, Ark.; Oklahoma City and Tulsa, Okla.; and Kansas City, Kan.

Contel Customer Support, part of Contel Corporation's Information Systems Sector, provides total systems support for complex telecommunications networks, including moves, additions, changes, upgrades, and enhancements. Contel Customer Support also sells and services large local area networks and data management systems.

Contel, a company with more than $3 billion in annual revenues and sales, provides a broad range of telecommunications products and services.

MONTREAL (FEB. 13) PR NEWSWIRE - Bombardier Inc. today announced its decision to become the promoter of the high-speed rail passenger-transportation system based on the French TGV technology in the Quebec City - Windsor corridor.

The announcement was made by the president of the Transportation Equipment Group, Jean-Yves Leblanc. "The decision to go ahead with the TGV project," he explained, "was made in light of the results of a pre- feasibility study conducted over the past 18 months, which confirm the economic viability of such a railway link."

Leblanc also announced the appointment of Pierre MacDonald to the position of vice president, Transportation Equipment Group. MacDonald will be responsible for the promotion and marketing of the TGV project, as well as for putting together a group of companies and institutions likely to participate in implementing or operating the service.

According to the study, the station-to-station travel time, based on a maximal operating speed of 300 Km/H, would be approximately 1 hour 35 minutes between Quebec City and Montreal, 1 hour 5 minutes between

Montreal and Ottawa-Hull, 1 hour 55 minutes between Ottawa-Hull and Toronto, and 2 hour 45 minutes between Montreal and Toronto. The study shows that the fares would remain competitive with those of competing modes of transportation and would always be lower than regular airfare.

The preliminary estimates set total construction costs at $5.3 billion for a Quebec City/Montreal/Ottawa-Hull/Toronto network. This amount takes into account the costs related to infrastructure, such as rights-of-way, roadbeds, structures, bridges, stations and tracks, as well as equipment, such as power distribution, signalling, communications and rolling stock. Rolling stock would represent approximately $650 million.

The results of the financial analysis, conducted as part of the pre-feasibility study, show that a private operation may be profitable, given the standards of return demanded by investors, as long as the investment from the private sector in the implementation of the system does not exceed $3.7 billion.

On that subject, Leblanc said that a comprehensive feasibility study would be carried out in order to verify all the data and assumptions of the pre-feasibility study, as well as to define more precisely the participation of the various partners. The study will be conducted on the entire Quebec City-Windsor corridor.

Bombardier holds the marketing and manufacturing rights for TGV projects in North America by virtue of an agreement signed in December 1987 with the Franco-British group Gec-Alsthom.

DETROIT (FEB. 13) PR NEWSWIRE - UAW President Owen Bieber and Vice President Stan Marshall, who directs the union's Chrysler Department, said Chrysler's low 1989 earnings "are a continuing source of concern, pointing to the seriousness of the crisis facing the U.S. auto industry as a whole."

While the union leaders expressed regret that Chrysler earnings were insufficient to trigger profit-sharing payouts for UAW-represented workers they also noted that "thanks to the agreement reached during the last negotiations, at least there will be some equality of sacrifice and Chrysler executives will have to go without bonuses as well."

During the 1988 UAW-Chrysler contract negotiations, Chrysler agreed that cash bonuses will not be paid to executives in years when profits are too low to generate profit-sharing payouts, nor will stock grants be awarded from the Long-Term Incentive Plan for executives.

Bieber and Marshall credited Chrysler with recognizing the principle of equitable treatment for workers and executives ahead of the other U.S. auto firms, and Bieber said he hopes Ford and General Motors executives will "show some restraint at the trough as well this year in keeping with their anticipated reduced earnings for 1989."

Bieber also renewed the UAW's commitment to winning the same kind of agreement during forthcoming negotiations with GM and Ford Motor.

CLEVELAND (FEB. 13) PR NEWSWIRE - AT&T today announced that Picker International has selected its Software Defined Network service to meet its domestic and international communication needs through 1992.

AT&T's SDN service will enable Picker International to use the AT&T Worldwide Intelligent Network as part of its dedicated internal communications system. Special software enhancements in AT&T's network will give Picker International the flexibility to customize and manage its own inbound and outbound call routing patterns quickly and cost-effectively.

The new network is expected to deliver enhanced features not previously available to Picker employees at drastically reduced costs.

Ron Stocum, director of telecommunications for Picker, explained that several vendors of network services were thoroughly considered before the final decision was made. "In the final analysis," said Stocum, "the reliability of AT&T's netowork, coupled with a very competitive pricing plan, won our confidence.

"Our business is global in scope and rapidly changing," said Stocum. We have important locations from Wembley, England to Munich, West Germany to Tokyo. We needed a 'world class' virtual network for foreign and domestic compatibility. We also recently established our MED-TEL group to telemarket medical supplies, services, and equipment to our established customer base. The challenge of generating nearly $35 million of new business revenue requires highly skilled and dedicated employees using telecommunication services of uncompromising quality. We decided to trust our customer and supplier relationships to AT&T."

Cleveland-based Picker International, is a $700 million a year world leader in the design, manufacture, and marketing of diagnostic imaging systems. Picker's current product line includes offerings in the areas of magnetic resonance, computer tomography, x-ray, digital imaging, ultrasound, nuclear medicine and a wide range of other health care products. The company employs 5,800 people and is a subsidiary of the General Electric Company (GEC), p.i.c. of the United Kingdom, a diversified multinational corporation with annual sales approaching $10 billion.

DENVER (FEB. 13) PR NEWSWIRE - Presidio Oil Company (AMEX: PRSA) today announced the appointment of Lon McCain as vice president-finance and chief financial officer, effective immediately.

"Lon McCain is a welcome and significant addition to Presidio Oil. His transaction experience and successful track record in managing the financial concerns of an energy company will be extremely beneficial as we continue to build Presidio's net asset value and growth prospects through acquisitions and development activity," said George P. Giard Jr., chairman and chief executive officer.

Prior to joining Presidio Oil, McCain was a principal in the Denver- based investment banking and consulting firm of Ceres Capital where he was responsible for providing financial advice to firms engaged in a wide variety of industries. McCain began his finance career at Petro- Lewis

Corporation in January 1978. During his nine-year tenure at Petro-Lewis, McCain held a variety of positions including chief financial officer.

Presidio is an independent oil and gas company engaged in onshore oil and gas exploration, development and production in the continental United States, primarily in Texas, Louisiana, Wyoming and West Virginia.

#90044p0407 02/13/1990 ~PR Newswire

SHELTON, CT (FEB. 12) PR NEWSWIRE - Data Switch Corporation (NASDAQ: DASW) announced today that it has modified its exchange offer for the company's 8-1/4 percent convertible subordinated debentures due June 1, 2002, and further extended the deadline for tendering. The expiration date of the exchange offer is now 5 p.m. EST on Wednesday, Feb. 28, 1990.

Under the amended terms of the exchange offer, for each $1,000 principal amount of existing debentures, a holder will receive a new $700 principal amount of 15 percent senior subordinated notes due Feb. 1, 2000, plus 56 warrants, each to purchase a share of the company's common stock at $5.00 per share, exercisable until Dec. 31, 1995. It is anticipated that the warrants will not be exercisable during the first year after issuance. Under the prior offer, a debenture-holder would have received only 40 warrants, exercisable at $6.25 per share, in addition to $700 of the new notes.

Rudolph G. Morin, executive vice president, stated, "We believe these modifications significantly improve the equity portion of the exchange offer, and they are accompanied by related changes in the terms of the new notes and warrants."

Existing debentures should not be tendered prior to receipt of the revised offering circular, and those tendered prematurely will be returned to debenture-holders. Any debentures previously tendered under the terms of the original offer need not be withdrawn to participate in the amended offer. However, they may be withdrawn, and all withdrawal rights remain in place.

A supplemental offering circular explaining revised terms will be provided to debenture-holders promptly. If this is not mailed by Tuesday, Feb. 13 1990, the expiration date of the offer will be further extended for ten business days from the actual mailing date. Exchanging debenture-holders will receive senior subordinated notes dated as of Feb. 1, 1990, bearing interest from that date. Brokers and other qualified fiduciaries who cannot physically deliver the debentures by the extended expiration date

can tender by notice of guaranteed delivery.

The company is also soliciting consents to certain amendments to the indenture with respect to the existing debentures. The amendments require the consent of a majority of unaffiliated holders of existing debentures. The exchange offer has been made conditional upon the company's receipt of more than half of the existing debentures. However, Morin said that this condition and others may be waived by the company.

There are $33,085,000 principal amount of existing debentures currently outstanding. Of that amount, $5,777,000 have been tendered to date, and holders of an additional $2,000,000 have provided their written consents to the amendments.

FORT WORTH, TX (FEB. 13) PR NEWSWIRE - The board of directors of TNP Enterprises Inc. (TNPE) (NYSE: TNP) announced today a 5.2 percent increase in indicated annual dividends from $1.55 to $1.63.

TNPE is the Fort Worth-based holding company of Texas-New Mexico Power Co.

Quarterly dividends of $0.4075 will be paid on March 15 to shareholders of record on Feb. 27, 1990.

This will be the 217th consecutive dividend paid by TNPE or its predecessor companies.

TNPE announced consolidated earnings available for common stock for 1989 of $15,407,543, compared to $40,982,769 for the year ended Dec. 31, 1988. Consolidated earnings available for common stock for the quarter just ended decreased to $1,865,240, down from $6,771,975 in 1988.

Utility operations provided approximately 90 percent of consolidated earnings available for common stock during the most recent quarter and 12-month periods.

Earnings per share of common stock decreased to $1.90 in 1989, compared to $5.19 in 1988. For the quarter just ended, earnings per share were 23 cents, compared to 84 cents in 1988. The decrease in earnings for the current year and quarter compared to the like periods last year was primarily because the prior periods reflected the gain from the sale of Capitol Cogeneration Co. Ltd., through another TNPE subsidiary, Bayport Cogeneration Inc.

A summary of consolidated earnings for the quarter and 12 months ended Dec. 31, 1989, and for the like periods in 1988 is shown below.

TNP ENTERPRISES INC.

ATLANTA, (FEB. 12) PR NEWSWIRE - Zenox Inc. (NASDAQ: ZENO) announced today that it has concluded its previously announced agreement to acquire all of the assets of Consolidated Gemstones, Ltd. In addition, Zenox acquired all of the assets of Reginald Miller Designs Ltd., a private

gemstone dealer with substantial inventories of precious stones, in the same transaction.

The assets include pink, yellow and blue sapphires, star sapphires, rubies emeralds and diamonds. The gems are the main inventory of a mutual fund established by Consolidated Gemstones in 1980.

Zenox's President and CEO Richard English confirmed that the acquisition was completed entirely with the agreement to issue Zenox, Inc. restricted/unregistered common stock. Other terms and conditions were not disclosed, but management stated that a recent appraisal of the gemstones showed a valuation in excess of $3 million if sold on a retail basis, or $1.9 million if sold on a wholesale basis.

Zenox stated it was their intention to proceed with liquidation of the assets in order to utilize cash proceeds in the acquisition of operating companies.

Zenox is a holding company with subsidiaries in the communications, manufacturing, food/beverage, investment and drug/health fields.

HEWLETT, NY (FEB. 12) PR NEWSWIRE - Anchor Savings Bank FSB (NASDAQ: ABKR) today announced that it had signed a definitive agreement to sell Residential Funding Corporation (RFC) to GMAC Mortgage Corporation (GMAC Mortgage). RFC, a wholly owned indirect subsidiary of Anchor, is a nationwide conduit for the securitization of conforming and nonconforming residential loans. RFC purchases loans from approved originators around the country, then securitizes and sells them either directly or through an affiliate, Residential Funding Mortgage Securities I, Inc. RFC is headquartered in Minneapolis and has offices in California, Georgia, New York, Rhode Island and Texas. The closing is expected to occur by the end of March.

The sales price was approximately $62 million, subject to certain adjustment in RFC's net worth at the closing date.

Commenting on the sale, James M. Large, Jr., chairman and chief executive officer of Anchor, stated that, "the sale of RFC is consistent with Anchor's strategic repositioning following the enactment of the Financial Institutions Reform, Recovery, and Enforcement Act of 1989 (FIRREA). Large also noted that "the new FIRREA capital rules made it extremely difficult for Anchor to continue to support RFC's growth." Furthermore,

Large noted that, "the capital obtained from this sale will help Anchor meet its capital requirements under FIRREA."

Anchor, based in Hewlett, operates branches in Georgia, Florida, and New Jersey in addition to New York. Its charter dates back to 1868, and it is the 20th largest thrift in the United States as of June 30, 1989, based on deposits of $6.8 billion.

#90044p0413 02/13/1990 ~PR Newswire

DALLAS, (FEB. 12) PR NEWSWIRE - IMCO Recycling Inc. (NASDAQ: IMRI) today reported full-year 1989 net income of $4,978,500, or $.50 per common share compared with earnings of $4,716,100, or $.58 per share, in 1988.

The decline in the company's 1989 earnings per common share is due to a substantial increase in its number of outstanding shares.

A non-cash charge of $406,900, or $.04 per share, is included in 1989 net income. This extraordinary item resulted from the write-off of capitalized debt issuance costs associated with subordinated debt that was prepaid in May.

In the fourth quarter of 1989, IMCO Recycling's net income was $913,600, or $.08 per common share, compared with earnings of $1,315,900, or $.16 per share, in the same period of 1988.

Ralph L. Cheek, chairman and chief executive officer,said the company's production volume and profit margins were affected in the second half of 1989 by competitive pressures resulting from an increase in U.S. aluminum recycling capacity. Part of this increase was due to the opening of the company's third production plant, an $8 million recycling facility in Morgantown, Ky.

"Our volume and margins continue to be affected by the competitive situation," Cheek said. "In addition, in December and currently, a major customer has reduced its requirement for our recycling services due to his lower production of can sheet. We expect this decline to be temporary.

"On balance, 1989 was a good year for IMCO Recycling," Cheek said. "Our net income improved, we greatly strengthened our financial position, and we began successful operation of our third production facility. I am confident that continued gains in U.S. aluminum can production and recycling will absorb the industry's current excess recycling capacity over the next year, and that our financial results will eventually benefit

from the substantial rise in metal processing capability that we've put in place."

According to an estimate by Reynolds Metals Company, domestic shipments of aluminum cans rose 6 percent in 1989 to about 83 billion units, the recycling rate increased to approximately 58 percent from 54 percent in 1988, and the number of cans recycled during the year increased by 10 percent to about 48 billion.

The company's 1989 revenues decreased to $38,013,300 from $46,981,500 in 1988 because of higher tolling activity which accounted for 91 percent of metal processed during the year compared with 85 percent in 1988. In tolling transactions, the metal processed is owned by the customers and the company records as revenues only the processing fee it receives, not the total value of the metal. Thus a rise in tolling activity decreases IMCO Recycling's revenues but does not generally affect the company's profitability per pound of metal processed.

Fourth-quarter 1989 revenues were $9,650,600 compared with $9,341,300 in the same period of 1988.

IMCO Recycling processed 305 million pounds of metal in 1989, up 6 percent from the 288 million pounds processed in the prior year. Fourth-quarter 1989 metal processing volume was 82 million pounds, up 8 percent from the 76 million pounds processed in the 1988 quarter.

IMCO Recycling had a weighted average of 10.1 million shares outstanding in 1989, 46 percent above the average of 6.9 million shares outstanding in the prior year. About 2.6 million shares were issued in the fourth quarter of 1988 under a merger agreement that resulted in the formation of IMCO Recycling on Oct. 3, 1988. An additional 2.2 million shares were sold by the company in a public offering that was completed in May 1989. The proceeds of the stock offering were used to repay subordinated debt.

IMCO Recycling is the largest independent recycler of aluminum beverage cans and their by-products in the United States and is the nation's only publicly owned firm whose activities are concentrated in the aluminum can recycling market.

#90044p0415 02/13/1990 ~PR Newswire

NEW YORK (FEB. 12) PR NEWSWIRE - Dr. Kenneth E. Blackman, president of Applied DNA Systems, Inc. (NASDAQ: ADNA, ADNAZ) (the company), today announced the acquisition of 50 percent of Analytical Biosystems Corporation (ABC), which brings the company's ownership of ABC to 100 percent. The company acquired the 50 percent interest in ABC through the issuance of 600,000 shares of its common stock to each of the two other shareholders, the Brown University Research Foundation (BURF) and Brown University (as trustee of a trust created by Dr. M. Boris Rotman), in exchange for their interests in ABC.

ABC was founded in 1985 by the company, BURF and Rotman to commercialize a

chemosensitivity assay, informally referred as the Rotman assay and currently know as the Fluorescent Cytoprint Assay (FCA), which was developed by Rotman at Brown University.

The FCA is a patented "in vitro" assay which measures the effectiveness of specific chemotherapeutic drugs in destroying cancer cells. To date, clinical trials compiled by ABC indicate better than 95 percent accuracy in determining when tumors are resistant to particular chemotherapeutic drugs and more than 88 percent accuracy in identifying the chemotherapeutic drugs that will be effective.

ABC currently holds an exclusive commercial license to the technology from BURF and upon repayment of prior loans of approximately $200,000 from BURF and ABC, will obtain ownership of all issued and pending patents related to the technology worldwide.

ABC's laboratory facility, located in Warwick, R.I., is licensed by the state of Rhode Island to perform the FCA and holds a federal laboratory license, which enables ABC to commercialize the FCA in most of the United States. ABC currently processes 15 to 25 assays per week from diverse medical institutions from across the country.

Today's acquisition represents the conclusion of negotiations started by Donald Bachmann, the company's late chairman, CEO and CFO. After his sudden and untimely death in January, the remaining members of the board of directors elected Henry P. Renard, an active and contributing outside director of the company since 1987, as acting chairman and CEO. At that same meeting, Rotman also was appointed to the board to fill a vacancy created by the recent untimely death of outside director (and assistant secretary) Martin Zimmerman. Alain Klapholz, a vice president of the company, was appointed assistant secretary and CFO.

Renard is an executive vice president with Inverness Counsel, Inc., an investment counsel firm with funds of over $1 billion under management. Blackman, who joined the company in 1987, is president and COO of the company as well as president of ABC. He has over 20 years' experience in the biotec and pharmaceutical industries. Rotman is a professor of medical sciences at Brown University. Klapholz, who joined the company during 1988 and was appointed vice president in 1989, has over eight years' experience with public companies in the health care field.

#90044p0421 02/13/1990 ~PR Newswire

MARTINSBURG, WV (FEB. 13) PR NEWSWIRE - Mountaineer Bankshares of W.Va. Inc. (NASDAQ: MTNR) reported net income of $2.517 million for 1989

compared to $4.588 million in 1988.

On a per share basis, earnings were 95 cents and $1.74 in 1989 and 1988, respectively, or a decrease of 45 percent.

According to company officials, Mountaineer incurred a fourth quarter loss of $39,000 compared to a profit of $1.249 million for the fourth quarter of 1988, or a 1 cent per share loss compared to net income per share of 47 cents in the final quarter of 1988.

"As we previously reported, earnings during the second half of 1989 suffered considerably because of abnormally high provisions for loan losses," said Lacy I. Rice Jr., chairman of the board and chief executive officer. "We have been concentrating on clearing up our loan problems, strengthening our balance sheet and improving our cost structure. Earnings should return to more normal levels in 1990."

Mountaineer Bankshares is the holding company of six West Virginia banks including Old National Bank, Martinsburg/Charles Town; The Empire National Bank of Clarksburg; City National Bank of Fairmont; The Bank of Wadestown, Fairview/Barrackville; Mercantile Banking & Trust Company, Moundsville; and Morgan County State Bank, Berkeley Springs.

#90044p0422 02/13/1990 ~PR Newswire

MUSKEGON, MI (FEB. 13) PR NEWSWIRE - SPX Corporation (NYSE: SPW) today reported sales and earnings for 1989.

Sales from continuing operations for 1989 were $632.0 million, a 12-percent increase over previous year sales of $566.6 million. The increase was substantially due to the full-year sales in 1989 from Bear Automotive which SPX acquired in September of 1988. Sales of products used in the maintenance and repair of motor vehicles were $523.3 million and represented 83 percent of total revenues, while industrial products, primarily window and door hardware and high pressure hydraulics, accounted for sales of $108.7 million, or 17 percent of total revenues.

Net income from continuing operations for 1989 was $23.6 million, or $1.66 per share (fully diluted), and compared with net income the previous year of $26.8 million, or $2.07 per share (fully diluted). Included in 1989 net income was an after-tax gain of $5.5 million from the sale of five small non-core businesses. Generally strong performances by SPX's specialty tools and instruments businesses were offset by soft replacement components and electronic equipment markets, by costs associated with continuing performance improvement programs at Bear Automotive, and by preparations to address important environmental market opportunities for 1990 and thereafter.

For the fourth quarter of 1989, continuing operations provided sales of $149.4 million and net income of $2.0 million, or $.14 per share (fully diluted). This compared to sales of $151.6 million and net income of $4.7 million, or $.37 per share (fully diluted) for the same period in 1988. Fourth-quarter results were positively impacted by a gain from the sale of a small non-core business, which partially offset the earnings effect of extremely soft replacement and electronic equipment markets.

Net income for 1989 from discontinued operations was $57.7 million and

included recognition of the $50.7 million gain which resulted from the contribution of certain SPX operations to the Sealed Power Technologies limited partnership on May 30, 1989, and the $7 million in earnings those operations contributed through May. The gain of $50.7 million represented a restatement of the previously recognized gain as a result of a recent change in the accounting treatment for such transactions.

Net income for 1989 stated to include both continuing and discontinued operations was $81.3 million, or $5.70 per share (fully diluted), and compared with $44.9 million, or $3.46 per share (fully diluted) for 1988.

SPX Corporation, a Fortune 500 company, is a world leader in the production and distribution of proprietary engineered tools, instruments and components to the motor vehicle service industry. During May of 1989 the company accomplished a major restructuring which completed its evolution into a focused vehicular aftermarket and specialty service tools business. The plan for restructuring also created a new, separate business from the company's former motor vehicle original equipment businesses, substantially reduced its long-term debt, and paid SPX shareholders a special dividend of $13 per share.

LA CROSSE, WI (FEB. 13) PR NEWSWIRE - First Federal Capital Corp. (NASDAQ-NMS: FTFC), holding company for First Federal Savings Bank, La Crosse-Madison, reported a fourth quarter income of $593,000 for the period ended Dec. 31, 1989 -- up 70 percent from a third quarter income of $348,000. This is the first quarter of reporting since First Federal's stock conversion on Oct. 20, 1989.

Fourth quarter net interest income before provision for loan losses improved by $341,000 over the previous quarter, increasing from $4,616,000 to $4,957,000. Net income showed a consistent improvement throughout the year on a quarterly basis, to the fourth quarter net of $.31 per share or $1.24 per share on an annual basis.

For the year, net income was $33,000, down from the 1988 net income of $3,110,000. Contributing to the decrease was a decline in net interest income of $1,056,000 and an increase in provision for loan losses over 1988 figures of $831,000. Additionally, non-recurring expenses of $1,171,000 were incurred as a result of the merger in June between First Federal Savings and Loan, La Crosse and First Federal Savings Bank, Madison. Total equity increased from $31,889,000 in 1988 to $50,035,000 in 1989, as a result of the proceeds from the stock conversion.

Total assets decreased from $805 million to $788 million as a result of the bank's strategy to control growth and asset size during this period. First Federal has 22 offices in 15 cities throughout southern and western Wisconsin.

RALEIGH, NC (FEB. 13) PR NEWSWIRE - Durham Corporation (NASDAQ: DUCO) reports consolidated income from continuing operations for the year ended December 31, 1989, of $17,248,000 compared to $15,542,000 last year, up 11 percent. Earnings per share from continuing operations were $2.04 compared to $1.84 last year. On November 30, 1989, the Company completed the sale of State Capital Insurance Company. The discontinued operations and loss on sale produced a loss of $3,912,000 in 1989 compared to a loss on operations of $1,305,000 last year. Therefore, for the year 1989, Durham Corp's net income, including the effects of State Capital, was $13,336,000, or $1.58 per share compared to $14,237,000, or $1.69 per share last year, down 6 percent.

The Group Division of Durham Life had a significant improvement recovering from a $9.4 million pre-tax loss in 1988 to a $349,000 loss in 1989. This Division produced a profit during the last six months. The Credit Division had increases in revenues and profits. Profits from the Individual Insurance were down. During the year this Division had non-recurring expenses associated with the integration of the Sun Life Agents and Policyholders into Durham Life. It also charged-off $2.2 million against net income as a result of the sale of Durham Life's Universal Life block of business. At Durham life Broadcasting, national and local revenues in its markets were down resulting in lower profits from radio and a loss from the television operations.

The Board of Directors of Durham Corporation at its meeting today, February 13, 1990, declared a regular quarterly dividend of $0.23 per share payable on March 13, 1990, to share holders of record on February 27 1990.

In response to published reports and SEC filings of Bailey Financial Group Inc. and Financial Securities Fund, L.P., that indicated that they were jointly considering a formal proposal for the acquisition of Durham Corp., George M. Womble, Chairman, stated that the Board had instructed Donaldson Lufkin & Jenrette, as its investment banker, to assist the Board in its evaluation of this or any other similar matter.

Durham Corporation is a Raleigh-based holding company which through its subsidiaries has interests in life and accident and health insurance,

broadcasting and real estate.

MIAMI LAKES, FL (FEB. 13) PR NEWSWIRE - Oak Tree Construction Computers, Inc. (NASDAQ: AOAK) today announced the signing, by its wholly owned subsidiary Oak Tree Financial Services, Inc., of a three-year contract to process approximately $1,000,000 in third party medical insurance receivables annually from a single health care provider, plus contracts with a new, ten-dealer network based in six states, specifically for the solicitation of claims funding/processing work from medical health providers.

"This marks the beginning of an exciting new recession resistant business direction for our company," according to Brian T. Stack, president of Oak Tree.

Oak Tree Financial Services, Inc., has contracted with independent sales organizations in Connecticut, Nevada, Louisiana, North Carolina, Pennsylvania and Florida to represent its new business of funding and processing medical insurance receivables for health care providers. This involves the installation of Oak Tree's computer hardware and exclusive and unique proprietary software which "pre-cleans" errors from insurance claims then electronically transmits them overnight to the appropriate insurance carrier, thereby greatly accelerating payment of the claim. The first unit was installed in a medical practice in Zebulon, N.C. last week.

According to Oak Tree President Brian Stack, "The health provider industry which covers the wide range of doctors, clinics and ancillary services dependent for their income on the prompt payment of insurance claims, has long been plagued by inefficiencies. The average practice doesn't get paid for services rendered for six to 10 weeks, with extreme cases ranging over six months. As a computer firm, we recognized this industry-wide negative cash flow problem as an opportunity, and have created the specific programs, acceptable to the insurance payors, to address it. After an initial due diligence audit period, our medical clients will be paid every week," Stack stated.

NEW YORK (FEB. 13) PR NEWSWIRE - The Global Government Plus Fund, Inc. (NYSE: GOV) today issued the following February monthly update:

Investment Adviser Commentary:

-- The investment adviser of the Global Government Plus Fund commenced a share repurchase program on Feb. 1. Authorization has been granted by the fund's board of directors to repurchase up to 7 million of the 52,642,508 shares outstanding prior to the program.

-- The European bond markets appear most attractive, especially due to currency expectations. More than 50 percent of the fund's currency exposure is in Europe, which reflects the investment adviser's enthusiasm toward Europe 1992 and the positive developments in Eastern Europe.

-- The dollar weakened vs. higher yielding European currencies, but strengthened against the Yen and Canadian dollar in January.

-- Interest rates rose in almost all markets in January, due to fears of higher inflation and concerns about the impact of economic reforms in Eastern Europe. In Europe and Japan, interest rates are at their highest levels in years. The German bond futures set an all-time low.

-- The investment adviser believes that the sell-off in world markets has been overdone and does not expect a resurgence in inflation to materialize. A more favorable trend in bond prices should prevail over the course of the year.

The Global Government Plus Fund, Inc. is a closed-end investment company invested in debt securities issued or guaranteed by governments, semi-governmental entities, government agencies, supranational entities,

and other governmental entities in the United States and in 20 other major countries and denominated in the currencies of such countries. The fund's manager is Prudential Mutual Fund Management, Inc. and investment advisory services are provided by the Prudential Investment Corporation.

#90044p0465 02/13/1990 ~PR Newswire

LONG BEACH, CA (FEB. 13) PR NEWSWIRE - Two major subassembly operations for McDonnell Douglas' MD-80 twin-jet are moving from Long Beach to Salt Lake City.

The upper and lower fuselage assemblies will begin transferring to the Utah facility in March, according to MD-80 program management in Long Beach. The transfer is expected to be completed in 1991.

"This will allow us to reassign skilled assemblers and support personnel into other areas of final assembly operation in Long Beach," said Buzz Lowry, general manager, MD-80 Production.

"By moving these two operations to Salt Lake City, we are freeing up tremendously skilled groups of employees who not only will be available to strengthen our final assembly work, but also to help train the employees hired in Salt Lake City," Lowry said.

The move of the upper and lower fuselage assembly represents the first major commercial transport subassemblies to be transferred from the Long Beach plant. It is part of the company's master plan to realign and streamline operations at Long Beach, making it the center of design, final assembly and test for McDonnell Douglas transport aircraft.

"This requirement allows Douglas to increase its production capabilities and there by capture a larger percent of the market place," said Lowry.

The Salt Lake City plant expects to receive its first tools needed for the subassembly work at the end of February and plans to expand its work force by more than 500 new employees by the end of the year. The Long Beach facility will continue to grow as the MD-80 begins to increase production rate and the MD-11 and C-17 enter into full production.

"We have already begun hiring qualified structural assemblers in anticipation of the upper and lower fuselage work coming here," said Al Egbert, general manager of the Salt Lake City facility.

The 194,430-square-foot plant east of the Salt Lake City airport was

dedicated in September 1987 and began making subassemblies for the MD-80 and MD-11 commercial transports.

SENECA FALLS, N.Y. (FEB. 13) PR NEWSWIRE - Goulds Pumps, Incorporated (NASDAQ/NMS: GULD) today announced that its decision to recognize a $24.8 million write down of its investment in Raytec Watergroup Company, L.P. resulted in a loss for the year of $1.3 million, or $.06 per share. The write down is based on certain assumptions that the company believes are reasonable and will be accounted for as a discontinued operation. This compares to net income of $23.3 million or $1.18 per share in 1988. Sales for 1989 were a record $507.0 million, a 12 percent increase over 1988 sales of $454.4 million. Net income from continuing operations was the second best in the company's 140-year history, rising 17 percent to $28.8 million, or $1.41 per share, compared with $24.7 million or $1.25 per share in 1988.

In the fourth quarter of 1989, sales rose 9 percent to $125.2 million, compared to $114.8 million in the fourth quarter of 1988. Net income from continuing operations declined 11 percent to $4.7 million, or $.23 per share.

MANCHESTER, MI (FEB. 13) PR NEWSWIRE - Johnson Controls, Inc., (NYSE: JCI) has announced construction of a new recycling facility in Novi, Mich. When complete, the facility will recycle over 140 million post-consumer soft drink containers -- 20 million pounds of material -- per year. Johnson Controls is the leading supplier of plastic soft drink bottles in the United States and in Europe.

The primary plastic used in soft drink containers is called "polyethylene terephthalate," commonly known as "P.E.T." Last year, over 7 billion soft drink containers were manufactured in the United States; a third of these were produced by Johnson Controls. More than 20 percent of all P.E.T. soft drink containers currently being sold are being recycled.

"Johnson Controls is fully committed to the recycling of the plastic containers that we produce," said John Barth, vice president of the Plastics Technology Group of Johnson Controls. "This new facility will provide a steady market for scrap P.E.T. bottles, not only in Michigan, but throughout the country. P.E.T. recycling is environmentally sound and with current market potential exceeding demand by almost 3 to 1, it makes good business sense."

Initial groundbreaking took place late last year and the new building is almost complete. The plant is expected to begin full operations during the third quarter of this year. The Johnson Controls project will utilize the most advanced plastic reclamation technology available, developed by Reko, the recycling subsidiary of DSM, a large Dutch resin company.

At the Michigan facility, used bottles will be separated and cleaned, for use in various applications. Presently, P.E.T. plastic reclaimed from post-consumer containers is used in such familiar applications as carpet fiber, fiberfill for jackets, and paint brush bristles. Johnson Controls further plans to use the recycled P.E.T. in non-food container and automotive applications. Beyond day-to-day operations, the facility will also support development work aimed at improving plastics reclamation technology.

"Our ultimate goal is to develop the technology to 'close the loop' on P.E.T. container recycling," said Barth. "Johnson Controls has programs under way that would target the use of recycled post-consumer soft drink bottles in the production of new soft drink containers."

WARREN, MI (FEB. 13) PR NEWSWIRE - SPI Composites Institute's 45th Annual Conference attendees will hear how "The Team Makes The Difference" as the conference focuses on SMC use in General Motors' new APV mini-van.

The program management team of Donald W. Ableson and Hugh Kerschbaum from GM's Chevrolet-Pontiac-GM of Canada Group will present the story of the design and manufacture of the new multi-purpose van which features an all-composite exterior. The seminar will be held at the Washington Convention Center on Wednesday, Feb. 14 at 2 p.m.

GM's mini-van, the result of a unique team effort, sets a new standard for design, structure, material usage and manufacturing processes in the automobile industry. Dramatic changes occurred not only in the product that is seen, but also in the manufacturing process that is unseen.

"We created a new manufacturing process by a unique combination of proven technologies and truly revolutionary innovative techniques and equipment," said Kerschbaum, manufacturing chief engineer of the multi- purpose vehicle. "The result is a new system that efficiently produces a unique new mini-van."

What differentiates this vehicle from other mini-vans is the use of large exterior body panels made of fiberglass reinforced composite materials, representing the first use of high-volume production panels of this size.

The side panels and roof are adhesively bonded to the metal spaceframe structure using more than 1,600 inches of adhesive. Once the adhesive is applied, the panel is loaded and placed on the spaceframe. The panels are held in place with mechanical fasteners while the adhesive cures.

Other composite panels and components, such as the fascias and fenders, are made of reinforced reaction injection molded material (RRIM) and are mechanically attached to the spaceframe. The fenders, made of polyurea RRIM material, are attached before the paint process and are painted with the body, without the need for separate paint fixtures.

"This is an exciting new generation of vehicles and we were pleased to be a part of the team producing them," commented Ableson, former plant manager at the Tarrytown, N.Y., assembly plant which manufactures the APV, and currently program manager for the APV. "Teamwork, at every level, made the difference in bringing this product to market. Our program engineers, participating supplier partners and plant personnel bought into the program early and saw the process through."

The design and development of the multi-purpose passenger vehicles that are marketed by Chevrolet, Pontiac and Oldsmobile divisions of GM focused on combining utility and functionality with great styling, ride and handling. The Pontiac Trans Sport is featured in the product showcase at EXPO '90.

ATLANTA (FEB. 13) PR NEWSWIRE - National Healthcare, Inc. (NHI) completed the previously announced sale of its subsidiary, which owns a 230-bed hospital in Poplar Bluff, Mo., for approximately $17 million in cash plus $2 million in subordinated second mortgage notes and certain contingent obligations.

The purchaser, Poplar Bluff Physicians Group, Inc., has employed NHI to

manage the hospital for an initial period of five years. The agreements also provide for additional payments to NHI if the hospital meets certain performance levels in the future.

Cash proceeds from the sale were used to retire debt associated with the hospital (approximately $5.5 million) and to reduce NHI's senior bank debt (approximately $11.5 million).

NHI said that it previously provided for a loss of $1.7 million on the sale, but now expects to reduce such loss by approximately $900,000. The reduction will be accounted for as an adjustment to the company's previously provided restructuring reserves.

"We are extremely pleased to consummate this transaction and to be selected by the Poplar Bluff Physicians Group, Inc. to provide our professional hospital management in support of the outstanding team of practicing physicians which the Physicians Group has assembled, together with their clinical affiliate Barnes Hospital," said James T. McAfee Jr., Chairman and Chief Executive Officer of National Healthcare, Inc. and George D. Shaunnessy, President of National Healthcare, Inc. and Poplar Bluff Management, Inc.

CHARLOTTE, NC (FEB. 13) PR NEWSWIRE - The Southeastern Savings Institutions Fund, Inc. (NASDAQ: SSIF) today announced that the Board of Directors has authorized the officers to make open market repurchases of the Company's common stock, from time to time, in order to attempt to reduce or eliminate the amount of discount to net asset value.

The Company believes that the fact that the Company's shares may be the subject of repurchases from time to time may enhance its attractiveness to investors and thus reduce the spread between market price and net asset value that otherwise might exist.

MINNETONKA, MN (FEB. 13) PR NEWSWIRE - Osmonics Inc. (NASDAQ: OSMO), announced today that net income after taxes reached a record $4,047,000 for the year ended Dec. 31, 1989, up 35 percent over net income of

$2,990,000 for 1988. Net income per share also increased 35 percent to $1.15 per share, compared to 85 cents per share last year. Revenue for 1989 was $36.2 million, up 17 percent from $31.1 million for the year 1988.

Fourth-quarter results were also strong with sales increasing 21 percent to $9.3 million compared to last year's fourth quarter of $7.7 million. Net income for the fourth quarter ended Dec. 31, 1989, was $899,000 (26 cents per share), an increase of 29 percent over $697,000 (20 cents per share) for the same period last year.

D. Dean Spatz, president and chairman, said: "We are pleased with the 1989 results which show a 17-percent increase in sales despite a slower economy than the previous year. About one fourth of the sales increase was due to acquisitions made during the year. Improved profit margins reflect a change in product mix coupled with improved employee productivity.

"The earnings per share do not reflect the 25-percent reduction in shares outstanding which was effective Feb. 7, 1990, when we purchased the 871,700 shares owned by Hoechst Celanese. At the present interest rates, we expect the retirement of these shares to have a slight positive effect on net income per share for the year 1990."

#90044p0489 02/13/1990 ~PR Newswire

HOUSTON (FEB. 13) PR NEWSWIRE - LL&E Royalty Trust (NYSE: LRT) announced today that it has received its independent petroleum engineers' annual estimates of future net revenues from proved oil and gas reserves attributable to the properties in which the trust has an interest, all as

of Sept. 30, 1989.

The estimates, prepared by Gruy Engineering Corp., reflect an 88 percent increase in estimated future net revenues to the trust, and a 109 percent increase in discounted present value of estimated future net revenues, from those estimated as of Sept. 30, 1988, after taking into account $12 million in distributions related to the 12 months of production ended Sept. 30, 1989. The Louisiana Land and Exploration Co., which is the working interest owner, has advised the trustee that the increases resulted from higher liquids and natural gas prices as compared with Sept. 30, 1988 prices.

The estimated future net reserves to the trust from total proved reserves as of Sept. 30, 1989 are approximately $75 million, and the present value of such future net revenues discounted at 10 percent is approximately $51 million. (The estimates as of Sept. 30, 1988, were $53 million and $33 million, respectively, before giving effect to the $12 million in distributions for 1989.) In preparing these estimates, the engineers took into consideration prices and costs which were current as of Sept. 30 1989 and included no increases or decreases in prices or costs thereafter. The working interest owner has advised the trustee that prices being received by the working interest owner for production from the properties in which the trust has an interest have generally increased since Sept. 30, 1989.

The engineers' estimates do not take into account administrative expenses of the trust or capital expenditures other than those required to develop reserves which are classified as proved. The estimates also do not take into account any reduction of revenues to the trust by reason of recapture of intangible drilling and development costs under Section 1254 of the Internal Revenue Code.

The conveyances of the royalties permit the working interest owner, under certain circumstances, to escrow some or all of the proceeds attributable to the conveyances. At present, the working interest owner is escrowing all proceeds from the Fort Worth Basin property.

The independent engineers have cautioned the trustee that estimating oil and gas reserves is an inexact process, that reserve estimates are often different from the quantities of oil and gas ultimately recovered, and that estimates of future net revenues to the trust are affected by a number of factors other than petroleum engineering matters, such as oil and gas prices, and operating and capital costs.

SAN DIEGO (FEB. 13) PR NEWSWIRE - BSD Bancorp Inc. (AMEX: BSD) announced that the spinoff of Datatronix Financial Services, the company's item processing subsidiary, became effective today. The spinoff is to BSD Bancorp shareholders of record as of Dec. 15, 1989, with shareholders receiving one share of Datatronix for every 10 shares of BSD Bancorp.

Datatronix will trade in the over-the-counter market. Initial market makers in the stock will be Thomas Green/San Diego Securities and Bateman Eichler, Hill Richards.

The spinoff of Datatronix will provide the company greater operating flexibility and greater control over its own destiny, according to James S. Brown, chairman and CEO of BSD Bancorp. "Datatronix has been performing extremely well," said Brown, "and now it will have the opportunity to perform even better.

"The spinoff will enable Datatronix to establish its own identity," added Brown, "facilitate greater market recognition of the true potential of the company and create additional value for our shareholders."

Datatronix Financial Services, formerly BSD Datacorp Inc., is headquartered in San Diego and is the leading provider of "back office" services to independent banks throughout Southern California. With check and financial item processing facilities in San Diego, Costa Mesa and Glendale, Calif. Datatronix currently serves 48 clients and handles more than nine million checks per month. For the year ended Dec. 31, 1989, Datatronix generated earnings of $359,000 on revenues of $6.6 million, an increase of 61 percent over earnings of $223,000 reported for 1988.

SOUTHFIELD, MI (FEB. 13) PR NEWSWIRE - Thorn Apple Valley, Inc. (NASDAQ: TAVI) President Joel Dorfman today announced that the 380 striking Grand Rapids, Mich., plant workers have agreed to a three-year contract and returned to work on Monday, Feb. 12.

The 380 production workers accepted the exact same contact they rejected on Jan. 27, 1990. The Saturday, Feb. 10 vote was 205-60, in favor of the pact. The contract was first defeated by a vote of 164-117 on Jan. 27, causing the two-week strike. Officials were able to maintain production schedules over the strike period through the use of salaried Thorn Apple Valley employees.

"It's unfortunate the plant workers missed two weeks of work, but we're pleased they agreed to accept what we believe is a fair and equitable contract," said Dorfman. "Now, it's back to business as usual."

Dorfman said that the Grand Rapids plant should be back at full production within a week.

NEW YORK (FEB. 13) PR NEWSWIRE - Benjamin D. Fein, chairman of the board of American Property Investors, Inc., the General Partner of American Real Estate Partners, L.P. (NYSE: ACP), said today the filing by Integrated Resources, Inc. of a voluntary petition for reorganization under Chapter 11 of the Bankruptcy Code would not have any direct affect on American Real Estate Partners. Fein pointed out that only Integrated has filed for relief under Chapter 11 and that none of its subsidiaries were included in the filing.

Fein further stated that although American Real Estate Partners, to a certain extent, relies upon the services of certain personnel of Integrated who may leave Integrated because of the bankruptcy filing, he was confident that sufficient personnel will be retained to provide required services for American Real Estate Partners. Fein said that he believed that any additional costs to American Real Estate Partners that may be required to provide for services would not have a material affect on the results of operations of American Real Estate Partners.

American Real Estate Partners, L.P. is a master limited partnership engaged in acquiring and managing real estate with a primary focus on office, retail and industrial properties.

PORT CHESTER, NY (FEB. 13) PR NEWSWIRE - Zeus Components, Inc. (NASDAQ: ZEUS), a leading distributor of military semiconductors and passive components, reported a profit in its fiscal first quarter ended Dec. 31, 1989.

Net income for the period was $32,000, or $.01 per share, compared to $91,000, or $.03 per share, for the comparable quarter a year ago.

The company incurred a loss from operations of $212,000, or $.08 per share for the quarter ended Dec. 31, 1989, compared to a profit from operations of $32,000, or $.01 per share, for the quarter ended Dec. 31, 1988.

During the quarter ended Dec. 31, 1989 the company repurchased $1,450,000 face value of its 12.25 percent senior subordinated notes for $1,013,000, resulting in an extraordinary gain of $244,000 (after taxes), or $.09 per share.

During the quarter ended Dec. 31, 1988, the company repurchased $600,000 face value of its 12.25 percent senior subordinated notes for $480,000, resulting in an extraordinary gain of $59,000 (after taxes), or $.02 per share.

Profits for the quarter were reduced by a loss of $55,000 or $.02 per share, from operations of the company's TACTech subsidiary, compared to a loss of $60,000, or $.02 per share, for the comparable period a year earlier.

#90044p0519 02/13/1990 ~PR Newswire

WASHINGTON, D.C. (FEB. 13) PR NEWSWIRE - Two Rockwell International products are recipients of Awards of Excellence from the Society of Plastic Industries (SPI) Composites Institute, which is holding its 1990 conference and Expo '90 exposition at the Washington Convention Center, Feb. 12-15.

The awards were made to the Butler Polymet unit of Rockwell's Plastic Products Businesses in recognition of a plastic composite truck bed being developed with Ford for the 1990 Ranger pickup truck, and of a front and rear plastic composite bumper beam set developed for the 1990 Honda Accord.

The Ford Ranger Truck Bed was also selected in the "Best of Category" for Development in final competition today.

William J. Laule, vice president and general manager of Rockwell's Plastic Products Businesses, said both new products represent major advances in the application of strong, light-weight automotive plastics within the industry.

"Both the Ford Ranger pickup truck box and the Honda Accord bumper beams use plastics composite processes that have enabled us to reduce product development lead time, consolidate part numbers, substantially reduce product weight, and meet the customer's cost, strength, and high styling requirements," Laule said.

Rockwell's Butler Polymet wholly owned subsidiary began working with Ford early in the product design stage to develop the composite Ford Ranger pickup box. Butler Polymet produces the box inner panel, the structural wheel housings and the tailgate inner assembly using vinyl ester sheet molding compound (VESMC).

The high-strength composite box has 2.5 times the torsional strength of steel, while providing a significant 30-percent weight savings over traditional steel pickup truck boxes.

The design-friendly VESMC product has some 44 fewer parts than a typical steel pickup box design. This permits easier assembly of the product.

Other improvements over steel include elimination of corrosion, improved durability and lower noise and vibration characteristics.

Rockwell International is a $12 billion multi-industry company, applying advanced technology to a wide range of products in its aerospace, electronics, automotive and graphics businesses.

#90044p0521 02/13/1990 ~PR Newswire

ALPHARETTA, GA. (FEB. 13) PR NEWSWIRE - Digital Communications Associates Inc. (NYSE: DCA) today announced it has signed an agreement to acquire Pacific Data Products Inc. (PDP) of San Diego, Calif., a manufacturer of laser printer enhancement products, for approximately $77 million.

The agreement provides for approximately $64 million in cash and the issuance of shares and assumption of employee stock options for 684,672 shares of DCA common stock, constituting approximately 4.8 percent of DCA's outstanding stock. The closing of the sale is expected to occur within 45 days, subject to normal conditions including the termination of the waiting period of the Hart-Scott-Rodino Antitrust Improvements Act of 1976.

Founded in 1986, PDP designs and manufacturers software cartridges and memory expansion boards that upgrade the capabilities and performance of Hewlett-Packard and certain other brands of laser printers.

The privately held company had $35.5 million in revenues and $5 million in net income for the year ended Dec. 31, 1989. The company's product line includes PacificPage, a software cartridge that provides complete PostScript language compatibility for Hewlett-Packard LaserJet II and IIP printers. The company has 93 employees.

"In a very short time, PDP has become a leading vendor of software and memory products for laser printers, achieving substantial sales and earnings growth," said Bertil D. Nordin, DCA chairman and chief executive officer.

"DCA's financial strength and technological expertise in personal computer networking will strengthen our efforts to expand our product line with network support and connectivity capabilities," said John Downing, founder and president of PDP. "With DCA's resources, we believe we will enhance significantly PDP's ability to design networking and connectivity products

that will enable laser printers to operate more efficiently on a network."

PDP will become a wholly owned subsidiary of DCA and will remain in San Diego.

Based 30 miles north of Atlanta, DCA designs, manufactures and markets personal computer communications products. The company has major offices and facilities in Alpharetta, Ga.; Austin, Texas; Dayton, Ohio; San Jose, Calif; Arecibo, Puerto Rico; Shannon, Ireland; Geneva, Switzerland; and Tokyo, Japan.

WATERTOWN, MA. (FEB. 12) PR NEWSWIRE - Summit Technology, Inc. (NASDAQ: BEAM) today announced -- the Visions '90 marketing seminar held in Venice, Italy Jan. 26, 1990 has resulted in orders of 14 ExciMed(tm) UV200 Ophthalmic excimer laser systems, representing sales of $4.2 million. The total company backlog is currently $6.0 million.

The Visions program, now entering its third year, focuses on educating ophthalmologists on the therapeutic applications of the excimer laser through in-depth didactic session and hands-on wet labs. Fifteen Visions '90 programs will be held throughout 1990 on both domestic and international locations. More the 100 physicians were trained at the Venice, Italy program and over 400 have attended Visions since the program's inception in 1988. Physicians may receive CME credits for the course.

Summit is now listed on the "Federal Reserve Board of Governor's List of Marginable OTC Stocks." This listing becomes effective Feb. 12, 1990.

Summit Technology, Inc. has established a leadership position in designing manufacturing and marketing medical excimer laser systems. A major focus of the company's business is in ophthalmology where applications have been developed for the treatment of common vision disorders including near-sightedness, far-sightedness, glaucoma, astigmatism, and superficial diseases of the cornea. To date, the Summit Technology ExciMed(tm) excimer laser systems have been used to treat several hundred patients in clinical trials domestically and internationally.

#90044p0524 02/13/1990 ~PR Newswire

CAMBRIDGE, MA. (FEB. 12) PR NEWSWIRE - Index Technology Corporation (NASDAQ: INDX), a leading developer of computer-aided software engineering (CASE) products for systems analysis and design, today reported record revenues for the quarter ended Dec. 31, 1989, of $11,411,000, up 31 percent over 1988 fourth quarter revenues of $8,723,000. Net income for the period was $463,000, or 10 cents per share, compared with net income of $985,000, or 22 cents per share, for the same period a year ago.

For the year ended Dec. 31, 1989, revenues were $37,993,000, an increase of 28 percent over 1988 revenues of $29,571,000. Net income for 1989 totaled $2,312,000, compared to net income of $2,735,000 for all of 1988. Earnings per share for the year were 50 cents, compared with earnings per share of 70 cents for 1988.

"The fourth quarter was the strongest revenue period in our history, and sales growth for the year reflects the continued expansion of our installed base; however, earnings fell below expectations largely because of lower than anticipated returns from European operations, where we are investing heavily to expand our direct presence," said Richard A. Carpenter, president and chief executive officer of Index Technology. "We expect that our strategic investment in the company's sales and marketing capabilities and in development of the next generation of our product line will continue to put pressure on earnings until the delivery of those new products later in the year."

During the quarter, Index Technology passed the $100 million milestone in total corporate revenues since the company's founding in 1983.

Also during the quarter, Index Technology announced that IBM had agreed to a major purchase of its Excelerator Series of CASE products to support a wide range of IBM's software development activities. With this agreement, by the end of 1991, IBM will have installed more than 3,000 copies of Excelerator on PS/2 workstations, making IBM one of the largest front-end CASE users in the world.

Also during the quarter, Index Technology announced a Japanese language version of its Excelerator Series, which will be distributed by IBM/Japan. Index Technology also saw strong sales to major corporations as the company's flagship product, Excelerator, has increasingly become the standard front-end CASE tool on which corporate information systems are being designed.

Index Technology's Excelerator is the world's most widely used systems analysis and design CASE product, with an installed base of more than 19,000 copies. The company, founded in 1983, markets its products from its Cambridge, Mass., headquarters, from field sales and support offices

throughout the U.S. and Canada, through subsidiaries in the U.K., France and Australia, and through third-party distributors, providing coverage in approximately 25 countries worldwide.

CHANTILLY, VA (FEB. 13) PR NEWSWIRE - At 7 p.m. EST tonight, private pilots will be able to receive a weather briefing and file a flight plan from their home computers.

Tonight, the Direct User Access Terminal Service (DUATS) will be turned on by Contel Federal Systems. This service will enable pilots in the continental United States to access a database for weather briefings and to file flight plans using a modem and a personal computer from home, office or airport.

The weather information is provided by direct links to Federal Aviation Administration (FAA) computers. Flight plans are filed directly into FAA computers.

DUATS is a free service to civilian pilots and students with current medical certification. Contel Federal Systems, headquartered in Chantilly provides the service under the terms of a contract with the FAA.

Mike Campbell, president of Contel Federal Systems' Government Networks Group, said: "Contel is very proud to be one of the first providers of DUAT. The system is a major step in the modernization of the National Airspace System and FAA's efforts to increase the safety and control of the nation's airways."

George Jakabcin, DUAT's product manager for Contel, said that the "FAA has gone to great lengths to ensure that DUAT provides a high degree of reliability in terms of data integrity and system responsiveness. The availability of DUATS and our value-added Golden Eagle Services for flight planning and aviation weather graphics, open a new age in the focus for flight safety."

The system can be accessed toll-free by dialing 1-800-767-9989 or by using local access Telenet numbers. Information concerning the service may be obtained by dialing 1-800-345-DUAT.

Contel Corporation (NYSE: CTC), a company with more than $3 billion in

annual revenues and sales, provides a broad range of telecommunications products and services.

#90044p0540 02/13/1990 ~PR Newswire

NORWALK, CT (FEB. 13) PR NEWSWIRE - Great Northern Nekoosa Corp. (NYSE: GNN) announced today that its board of directors has directed Goldman, Sachs & Co., the company's financial advisor, to contact and begin negotiations with qualified third parties with a view towards a sale of Great Northern Nekoosa at a price in excess of Georgia-Pacific Corp.'s $63 per share offer.

William R. Laidig, chairman, president and chief executive officer of Great Northern Nekoosa, stated, "The board continues to believe that the interests of the company, its shareowners and its other constituencies would best be served if Great Northern Nekoosa were permitted to continue its long-term strategic plan as an independent company. It now appears, however, that the constraints posed by Georgia-Pacific's offer will not permit such a course. For this reason, the board has instructed Goldman Sachs to solicit bids for Great Northern Nekoosa at a price in excess of Georgia-Pacific's $63 per share offer.

"The board believes that it is in the best position to conduct an orderly, active and effective exploration of all financial alternatives, designed to culminate in the highest possible per share value for shareowners. We believe that a price in excess of $63 per share is certainly achievable."

In connection with the board's decision to seek bids at a price in excess of $63 per share, the board postponed the date of a special meeting of shareowners, previously scheduled for March 2, 1990, until March 20, 1990. The special meeting was called to consider various proposals brought by Georgia-Pacific, including removal of the board and replacement with Georgia-Pacific nominees. On the new date of March 20, the special meeting will be held simultaneously with a second special meeting of shareowners scheduled for that date under the company's Rights Plan.

With respect to postponement of the March 2 special meeting, Great Northern Nekoosa said that, as events have developed, it has become obvious to the board that the March 2 meeting date would not allow shareowners enough time to make an informed judgement with respect to the proposals to be presented at that meeting.

In particular, the board's action in directing Goldman Sachs to seek bids for the sale of the company necessitated a postponement, in order to permit a full and orderly solicitation of bids and to inform shareowners as to the alternatives that develop from this search.

The postponement will also allow for the completion of several matters that are pending in the courts and the dissemination of the outcome of those matters to shareowners.

In particular, the company's antitrust action against Georgia-Pacific's tender offer has not been concluded at this time. Futhermore, hearings in connection with the Maine Attorney General's antitrust action against Georgia-Pacific's offer are not scheduled to begin until Feb. 26, 1990.

The postponement also permits the shareowners' meeting to be consolidated with a second special meeting of shareowners that had been previously called for March 20, 1990 to vote on a precatory resolution requesting the Great Northern Nekoosa board to accept Georgia-Pacific's tender offer for the company.

At the consolidated special meeting, shareowners will consider and vote upon all the matters previously scheduled for action on March 2 and March 20. While the two meetings will be held together, they will retain their separate record dates of Jan. 12, 1990 and Jan. 22, 1990, respectively.

Great Northern Nekoosa said that its board has also adopted an amendment to the company's Rights Plan.

Under the amendment, if Georgia-Pacific were to remove and replace the entire Great Northern Nekoosa board prior to March 20, 1990, Georgia-Pacific would not thereafter be able to redeem or otherwise avoid operation of the Rights under the Rights Plan. The amendment was designed to protect the integrity of the March 20 referendum meeting previously scheduled under the Rights Plan pursuant to Georgia-Pacific's request.

PHILADELPHIA, (FEB. 13) PR NEWSWIRE - Consolidated Rail Corp. (NYSE: CRR)

(Conrail), Santa Fe Railway, and Modesto & Empire Traction Co. introduced five-day-a-week expedited boxcar service Feb. 1 for transporting food products and beverages from California to East Coast and Midwest consumer markets.

Named the "Coast Connection," the new service provides consistent, reliable and economical transportation. Customers receive a single bill for the service.

"This cooperative service by Conrail, Santa Fe and the M&ET is another example of the team efforts connecting railroads are making to win traffic from truckers by providing competitive, economical transportation," said Gordon H. Kuhn, Conrail's senior vice president- marketing and sales.

"The 'Coast Connection' service responds to food and beverage customers who need consistent, reliable delivery," said Don Skelton, Santa Fe's vice president-marketing and sales. "Santa Fe is committed to offering quality transportation service that meets customer expectations."

"The M&ET plays an important part in this quality assurance," said James L. Beard, M&ET president and chief executive officer. "Carloads are pre-classified, simplifying the transcontinental movement and avoiding most classification yard work. We are pleased that we can help meet the many shipper demands for this type of service."

The "Coast Connection" improves transit time by up to two days. Before implementing the service, the three railroads involved conducted test runs to ensure that the service performs as advertised.

To explore the advantages of consistent, cost-effective transportation of perishables, grocery products and beverages, customers may contact their Conrail or Santa Fe account representative or call Conrail at 800-932-9292 or Santa Fe at 800-727-ATSF.

CONTACT: Robert L. Libkind or Patricia Linskey, 215-977-4594, both of Conrail, or Cathy Westphal of Santa Fe Railway, 312-786-6273

LOS ANGELES (FEB. 13) PR NEWSWIRE - David M. Forbes has been appointed president of Orion Pictures Distribution Corp. effective Feb. 26, 1990, replacing Joel Resnick in that position, it was announced today by Eric Pleskow, president and chief executive officer of Orion Pictures Corp.

Forbes, who will be based in New York, most recently served as president of MGM/UA Distribution Co. In that capacity, he was responsible for the domestic distribution and marketing of MGM/UA films in the theatrical and

non-theatrical areas, supervising the release of "Rainman," "A Fish Called Wanda," "Willow," and "Child's Play," among others.

Prior to joining MGM/UA, Forbes directed his own marketing consultation firm, The David Forbes Co., handling such clients as Lucasfilm, Amblin Entertainment, Rastar and New Visions. Forbes began his career in the theatrical exhibition field and has held executive positions at Rastar, Fox and MGM as well as serving for a period as assistant to the president of Columbia Pictures.

"We are delighted to have a man of David Forbes' experience and background join us as head of Orion's domestic sales organization. His innovative approach to the marketing of films will make a significant contribution to Orion as we prepare to launch a major program of films in the theatrical marketplace in 1990," Pleskow stated.

Pleskow noted that Resnick's departure was by mutual agreement. "Joel has left our organization in a strong and more competitive position then when he joined us four years ago. We wish him well in his future endeavors," Pleskow stated.

#90044p0551 02/13/1990 ~PR Newswire

DALLAS, (FEB. 13) PR NEWSWIRE - American Medical Electronics Inc. (NASDAQ: AMEI), the leader in bone growth stimulation technology, today announced that revenues for the year ended Dec. 31, 1989, were a record $9,539,823, compared with $8,534,670 in 1988. Net income in 1989 totaled $607,907 or 14 cents per share, compared with a net loss of $3,154,446 or 75 cents per share in 1988 that includes an extraordinary charge of $3,867,345 or 92 cents per share related to settlement of patent litigation.

For the fourth quarter of 1989, revenues were $2,422,403, with net income of $77,442 or 2 cents per share. Fourth quarter 1988 revenues were $2,337,626, producing net income of $288,844 or 7 cents per share.

"AME's 1989 financial results reflect costs associated with gaining FDA approval to market Spinal-Stim(R) commercially, which was achieved on Feb. 8, 1990," said Joseph Mooibroek, chairman and chief executive officer. "Marketing and manufacturing costs were also substantially higher than normal as we introduced marketing programs to increase market share of Physio-Stim(TM) and increased our capabilities to support a successful national introduction of Spinal-Stim(R), currently the only FDA-approved non-invasive system to enhance healing of spinal fusions and pseudoarthrosis of the spine."

AME also announced that, following a review of the equity markets, it has decided not to proceed with the proposed 1.5 million share public offering announced in October of last year.

The company further updated its previous announcement that its long-standing dispute with Sheldon Thaler regarding the use and ownership of an energy recovery circuit in bone growth stimulators resulted in the filing of a lawsuit by Thaler and PtA Corp. in the U.S. District Court for the District of New Jersey, charging AME with infringement of U.S. Patent No. 4,654,574. AME has sued Thaler and PtA in the Northern District of Texas claiming that the patent is invalid or in the alternative, that AME has rights to use any invention covered by the patent.

In his complaint filed with the New Jersey Court on Jan. 30, 1990, Thaler charges that AME and its New Jersey sales representative are directly and contributorily infringing his patent. Thaler further charges that the infringement is willful and claims compensatory damages in excess of $6 million, as well as treble damages. Thaler also asked that the court enter temporary and permanent injunctions prohibiting AME from making, using, selling or offering for sale, products which infringe, or from contributing to, or inducing the infringement of the patent.

AME's suit in the Texas District Court was filed on Feb. 5, 1990, and asserts that Thaler's patent is invalid, unenforceable, void and not infringed. AME also alleges that it has a shop right in the patent and therefore has either an express or implied license to practice the patent.

AME intends to vigorously defend against Thaler's charges and actively pursue its rights in the Thaler patent.

American Medical Electronics produces and distributes state-of-the-art medical devices primarily to the orthopedic community. These include Physio-Stim(TM), the AME(R) Bone Growth Stimulator for non-union fractures and the Spinal-Stim(R) System to enhance the healing of spinal fusions. AME conducts its product research and clinical testing in cooperation with some of the nation's leading universities and medical centers.

#90044u0810 02/13/1990 ~United Press International

LONDON (FEB. 13) UPI - Stock prices were narrowly higher in light trading at midday Tuesday on the London International stock exchange.

The Financial Times 100-stock index, which tumbled 26.7 points Monday, was

up 8.4 points to 2,295.3. The narrower top 30 industrial average was ahead 7.8 points to 1,818.4.

Volume amounted to around 244 million shares, compared with 176 million shares traded during the same period Monday.

Traders noted the volume was inflated by a 100 million shares, two-way program trade executed by a major brokerage house.

Analysts said the market was held in check by worries that world bond markets, particularly West German, could be on course for further weakness in coming sessions.

If so, analysts said, the yield differential between bonds and stocks looks to widen either further, encouraging switching out of stocks into bonds.

Among the most widely traded stocks, Reuters gained 11 cents to $16.68 after reporting its 1989 pretax profit climbed by more than 31 percent.

Sun Alliance gained six cents to $5.30 and Commercial Union Insurance gained 11 cents to $7.98 in a strong insurance sector.

Elsewhere, British Airways PLC gained five cents to $3.15 and British Petroleum added five cents to $5.44. Both companies are expected to report higher earnings later in the week.

#90044u0816 02/13/1990 ~United Press International

TAMPA, FL (FEB. 13) UPI - A sailor targeted in a U.S. Navy probe into the explosion aboard the battleship USS Iowa that killed 47 people said he will sue several news organizations for tarnishing his name.

Truitt and his lawyer, Ellis Rubin of Miami, said Monday the suit against Time magazine, Newsweek, The Washington Post and NBC will be filed in U.S. District Court in Miami by March 1.

''I think that the Truitt case is going to be a watershed case. Ken Truitt's name, I think, has become synonymous with unsubstantiated smearing,'' Rubin said.

The U.S. Naval Investigative Service also may be named in the suit, Rubin said, for its handling of the investigation into the April 19 explosion in one of the huge gun turrets aboard the World War II-era battleship.

Truitt is seeking ''several millions of dollars'' in damages, Rubin said.

In four weeks last year, Truitt, 22, went from being labeled a hero in the media to being identified as a suspect in a murder investigation with possible homosexual overtones.

He was initially credited by naval officials with turning on a sprinkler system moments after the explosion, which may have saved the entire ship from going up in flames.

But within a few weeks, it was reported that Truitt was the target of an intense naval investigation. The reports said investigators were delving into the possibility that Truitt and sailor Clayton Hartwig, who was killed in the explosion, were involved in a homosexual relationship.

There were also reports that Truitt may have caused the explosion to collect Hartwig's $100,000 life insurance policy.

The report finally released in September concluded that Hartwig probably set off the explosion by shoving a detonator between gunpowder bags in one of the ship's guns. The report made no mention of Truitt.

Truitt's wife, Carole, said she believes the Navy is at fault for leaking the information to reporters, but added that news organizations ''should also be held responsible for the accuracy of what they print.''

Kendall Truitt said the news reports cost him his friends, hurt business at his father's Land O' Lakes restaurant and prompted other sailors to harass and threaten him.

''Nothing's the same,'' said Truitt, whose four-year enlistment in the Navy expired Friday. He said he wants to begin a law enforcement career in Hillsborough or Pasco county.

His side of the story may be sold soon to one of three major studios in California, Rubin said. Final negotiations are under way to have the story told in a made-for-TV movie or a full-length motion picture, he said.

#90044u0949 02/13/1990 ~United Press International

LEBANON, VA (FEB. 13) UPI - A ruling by a Russell County Circuit Court judge, who declined to dismiss $64 million in fines he imposed against the United Mine Workers, cast doubt on when 1,700 striking miners in three states would vote on a tentative contract.

Judge Donald McGlothlin Jr., in refusing Monday to dismiss fines he handed out against the union during its ten-month-old strike against Pittston Coal Group, also gave the UMW ten days to present evidence to change his mind.

Both the company and the union asked McGlothlin to set aside the fines as part of the tentative settlement, which was reached Jan. 1. Miners in West Virginia, Virginia, and Kentucky have yet to vote on the pact.

McGlothlin said his court could not be used as a "bargaining chip" to settle the walkout. "The legal system is not for sale in Virginia," he told attorneys for both sides during a 45-minute hearing.

UMW general counsel Robert Stropp said the union would have to reassess its position and decide if it could persuade McGlothlin to set aside the fines. Pittston Coal Group President Mike Odom issued a short statement saying the company was "committed to ending the dispute and returning our employees to work."

McGlothlin blasted the union for its "organized and coordinated effort to put into effect mass violations of the law" and also was critical of the company.

He reminded UMW officials he had found the union guilty of 400 violations - two-thirds of them violent - of his court order forbidding strike activity aimed at slowing the transport of Pittston coal.

Both the union and Pittston already have reached a settlement to disolve all litigation pending with the National Labor Relations Board, and on Monday a federal judge in West Virginia agreed to that arrangement for cases in his court. A Virginia federal judge was scheduled to make a ruling on the NLRB agreement Tuesday or Wednesday.

However, McGlothlin said he wanted to see further evidence of "sincere contrition" and serious attempts by the union to purge itself of contempt. The union has not admitted any of the violations, did not express remorse and did not offer to pay any of the fines, the judge said.

Stropp said the union was willing to perform 10,000 hours of community service, but McGlothlin replied, "It is of such a miniscule amount it is almost an affront to this court."

McGlothlin also termed it "an incredible irony" that Pittston - which vehemently sought the penalties earlier - should now be asking for dismissal of the fines.

McGlothin said he realized a decision by him to vacate the fines may aid ratification of the tentative pact and, as a result, "honest persons will be able to go back to work and earn a living."

Attorneys for both sides argued the matter essentially was a private civil dispute and that the judge should dismiss the fines because the parties had reached a settlement.

"We respectfully request the healing process commence as soon as possible," Stropp told McGlothlin. They also read a letter from federal mediator William Usery, who urged McGlothlin to drop the fines. Usery called on the judge to give "serious and favorable consideration" to the joint motion to drop the penalties.

Last week, officials in Washington announced the pending settlement of some 145 strike-related cases before the NLRB. Those cases included complaints of picket line violations by the union and unfair labor charges against Pittston.

Even that agreement, however, is contingent on approval by federal courts, ratification of the tentative contract, and return of the striking miners to work.

Also pending is approval by trustees of national miners' health and pension funds of certain clauses in the contract affecting the funds. Union officials have said they have preliminary indications the trustees will approve, but nothing has been settled.

Agreement over the complicated contract was announced New Year's Day, but it quickly became apparent the two sides had settled only on general concepts. It took more than a month later to translate the agreement into specific language. The contract is said to run more than 200 pages and reportedly breaks new ground in labor relations.

The walkout, which started April 5 after miners had worked 14 months without a contract, was relatively small but escalated quickly into a bitter struggle with national implications over the future of labor-management relations in the coal industry.

#90044u0980 02/13/1990 ~United Press International

WASHINGTON (FEB. 13) UPI - The Federal Aviation Administration has proposed requiring modifications to late model Boeing 737 jetliners to prevent inadvertent rudder movements that could lead to loss of maneuverability, officials said Tuesday.

Inadvertent rudder movement is suspected as a possible factor in the Sept. 20, 1989, crash of a USAir 737 jet at LaGuardia Airport in New York that killed two passengers and injured 45 others.

USAir Flight 5050 slid off a rain-slicked runway and into the swirling East River. While a federal investigation is continuing, the pilots' union claims a design flaw in the cockpit instrument that moves the rudder caused a problem that forced the jet to veer dangerously to the left.

The FAA proposal would apply to about 362 U.S.-registered Boeing 737-300 and Boeing 737-400 series airplanes. It would require replacement of the rudder trim control knob with a smooth round fluted knob and modification of the cockpit center console to raise the rear guard rail.

The FAA said the proposal was ''prompted by reports of inadvertent rudder trim actuation'' which, if not corrected, ''could lead to an airplane taking off with an improperly trimmed rudder that could result in reduction of controllability of the airplane or a rejected takeoff.''

Federal aviation authorities estimate the safety change would take 10 1/2 hours for each plane at a labor cost of $400, plus parts. The total cost for US. airlines was estimated at $296,840.

The FAA asked for comments on its proposal to be submitted by April 11.

Boeing already has announced a design change.

The National Transportation Safety Board, meanwhile, opened a hearing Tuesday into the LaGuardia accident to determine its cause.

The pilots union denies that human error might have been a cause of the accident.

#90044u1078 02/13/1990 ~United Press International

WASHINGTON (FEB. 13) UPI - The Federal Reserve Board Tuesday granted Sovran Financial Corp., the nation's 27th largest bank, permission to underwrite municipal bonds, commercial paper, mortgage-related and consumer-related securities. It would engage in the new services through its subsidiary, Sovran Investment Corp., of Richmond, Va., the Fed said.

The Norfolk, Va., regional banking concern, with assets of $23.4 billion, already operates a discount brokerage service, underwrites government obligations, deals in silver and gold and performs other services.

"Consummation of the proposal would provide added convenience to Sovran's customers ... (and) would increase the level of competition among providers of these services," the Fed said in its order. "The proposed activities by Sovran can reasonably be expected to produce public benefits " it added.

The Fed said Chairman Alan Greenspan, governors Martha Seger, Wayne Angell Edward Kelley and John LaWare voted to grant permission. Fed Vice Chairman Manuel Johnson was absent and did not vote on the matter.

#90044u1114 02/13/1990 ~United Press International
DALLAS (FEB. 13) UPI - American Airlines is one of the winners in a new pact between the U.S. and Italian governments calling for the first expansion of air service between the two countries in 20 years.

Under the agreement, Fort Worth-based American and two as-yet unnamed carriers will be able to begin passenger and cargo service to Italy during the next four years, the Department of Transportation said last week. As many as eight U.S. cities may receive non-stop service to Milan and Rome. In exchange, the accord will permit the Italian airline, Alitalia, to serve five additional U.S. gateway cities.

"Italy is one of the countries that we have had great interest in," American spokesman Al Becker said Monday. "It presents more opportunities for European growth."

Plans call for American to begin daily service between Chicago and Milan and Rome starting April 1, 1991. American also would be authorized to serve Dubrovnik and Zagreb, Yugoslavia, via Milan. Becker said American will consider additional U.S. gateways to Italy in the future but has made no decision yet.

American, which has launched a major global expansion program, has been fighting to get service to Italy for the past several years, but previous agreements have prevented it from entering the market.

Only three U.S. carriers - Pan American World Airways, Trans World Airlines, and Federal Express Corp. - now offer passenger and cargo service between the countries. The new pact calls for designating additional U.S. carriers to serve Italy in 1992 and 1994. In the meantime, Alitalia is expected to begin serving two new U.S. gateways Oct. 29, with more service to be added in April 1991.

#90044u1260 02/13/1990 ~United Press International
NEW YORK (FEB. 13) UPI - There's no excuse for not calling your mom Wednesday: AT&T is offering a Valentine's Day gift of cut-rate calls to make up for January's long-distance snafu.

Even customers of American Telephone and Telegraph Co.'s rivals can get in on the weekday bonanza if they are in equal-access areas.

All they have to do is dial 10ATT, AT&T's access code, and then the

long-distance number they are trying to reach.

A breakdown on AT&T's nationwide lines Jan. 15 blocked about half of 100 million attempted long-distance calls over about nine hours.

The foulup was finally pinpointed in a signaling system that had triggered a traffic jam in the national network.

Two days later, AT&T decided that the best way to get back in the good graces of its residential, business and international customers was to offer the special holiday discounts on Feb. 14.

In full-page ads in Tuesday's newspapers, however, the company trumpeted its Valentine's offer to its ''valued'' customers without mentioning that black Monday in January.

Wednesday's special prices are 33 percent below regular weekday prices, AT&T said. They apply to all out-of-state, long-distance calls that are dialed directly on AT&T's public network from business and home phones.

International calls will be 37 percent cheaper, a discount that will apply to calls to 158 countries and areas that can be dialed directly.

The cut rates also apply to long-distance calls dialed directly within most states, an AT&T spokesman said. He added, however, that the company had to get permission from individual state utility commissions for the holiday offer, and the list was not complete early Tuesday.

In addition, evening rates will apply to all other out-of-state directly dialed business services except those that do not have discount schedules based on the time of day, such as 900 lines and some 700 line services, AT&T said.

WASHINGTON (FEB. 13) UPI - The Air Force is refusing deliveries of its newest missile - the Advanced Medium-Range Air-to-Air Missile - because the $722,000 weapon has failed several reliability tests, the Air Force said Tuesday.

The Air Force last week told the main contractors for the multibillion dollar program - Hughes Aircraft Corp. and Raytheon Corp. - that it would no longer accept AMRAAM missiles until problems are fixed, Air Force spokeswoman Capt. Susan Strednansky said.

The newest, most advanced missile is intended to replace Sparrow missiles on the nation's fighter jets. The AMRAAM program is two years behind

schedule and has had cost overruns of more than 40 percent.

The Air Force requested, in the fiscal 1991 budget, a total of 1,800 missiles next year at a cost of $1.3 billion - about $722,000 per projectile.

In an interview with the trade publication Aerospace Daily, the Air Force's AMRAAM program manager, Brig. Gen. Charles E. Franklin, said the Air Force stopped accepting the missile because seven have failed in reliability tests conducted on F-15 fighter aircraft since December.

Franklin told Aerospace Daily that these failures indicated ''no design problem'' with the missile itself, but rather manufacturing ''process or management-decision-related'' quality problems.

For example, he said, the first of the seven most recent failures was due to a crack in the missile skin around the guidance section at an electron-beam weld point.

The second failure involved loss of a wing because the manufacturer had applied solvent instead of lock-tight to secure the attach mechanism, he said.

But the cause of at least three of the seven failures is unclear.

New AMRAAMs won't be accepted until ''we ... identify what the problems are and have confidence that we've got the problems fixed.''

Franklin said the delivery stoppage ''is a prudent action. ... We're trying to be up-front ... take the right business actions that we think are smart (and) ... make damn sure that the reliability problems get worked,'' Franklin told the newspaper.

BLUE BELL, PA (FEB. 13) UPI - U.S. Healthcare Inc. Tuesday reported fourth-quarter earnings of $9.1 million, or 19 cents a share, compared with net income of $414,000, or one cent per share, for the same period in 1988. Revenues for the period were $269.5 million, a 40 percent increase over $192.7 million reported for the final period of 1988.

U.S. Healthcare had net income of $28.4 million, or 60 cents a share, for all of 1989, compared with $3.6 million, or eight cents per share, for all of 1988. Revenues for the year reached $1 billion in 1989, a 35 percent increase from $738.9 million reported for all of 1988.

U.S. Healthcare operates health maintenance organizations in Pennsylvania, New Jersey, New York, Delaware, Connecticut, and Massachusetts.

#90044u1643 02/13/1990 ~United Press International
DETROIT (FEB. 13) UPI - Chrysler Corp. Chairman Lee Iacocca hinted Tuesday there could be further consolidations among the No. 3 carmaker's Canadian plants now that it has restructured its U.S. assembly operations.

Iacocca, during a news conference to announce Chrysler's fourth-quarter losses of $664 million and the $825 million sale of its Gulfstream Aerospace aircraft unit, said the company still has some excess capacity

to trim after "rationalizing" its U.S. operations. "We may have some of that problem still ahead of us," Iacocca said, but added "there will be no more plant closings for now."

Industry analysts have long expected Chrysler to restructure assembly operations at two of its Canadian truck plants that have been running substantially below capacity for some time.

Those facilities include its Pillette Road plant in Windsor, Ontario, which makes full-sized vans and currently employs 2,570 hourly and salaried workers, and its Brampton, Ontario, plant, which makes Jeep Wrangler and YJ models, with about 1,470 workers.

One possible scenario is to consolidate full-sized van production at Chrysler's Dodge City plant in Warren, Mich., or move it to Mexico, while moving production of the Jeep models from Brampton to Toledo, Ohio.

Chrysler, under a plan to carve capacity from its U.S. operations, announced earlier this month the closing of its St. Louis No. 1 car plant by Sept. 21, idling 3,700 workers as it shifts production to plants in Delaware and Michigan.

It also closed its Jefferson Avenue plant in early February, idling 1,700 workers until late next year, when they are expected to return to work at a new $1-billion truck building complax just north of the old side on Detroit's east side. Chrysler currently has five car plants and six trucks plants in North America, counting St. Louis No. 1.

Iacocca said Chrysler will have managed to trim 675,000 units of capacity out of its system within the next 24 months to get it in shape for the early 1990s. He also said Chrysler will buy 50,000 fewer vehicles from its Japanese affiliate Mitsubishi Motors Corp.

Chrysler, which posted a $664-million loss during the fourth quarter because of plant closings and employee buyouts, saw its total factory sales decline by more than seven percent during 1989 to 2.38 million cars and trucks, compared with nearly 2.57 million units during 1988. Chrysler's share of the car market during 1989 also declined, to 13.8 percent from 14.3 percent in 1988.

On other matters, Iacocca said he believed the domestic car business, which has "been sustained on life support by rebates," will once again be profitable, probably by the second quarter of 1990.

Iacocca also said that while Chrysler's guaranteed rebate program last month set sales records, it was not good for the company's profitability. "There's no real money today in the business," he said, adding that the nation's top automakers will have to "get back to the the central core of

the car and truck business." "We've had a real rough six-month bottom," he said of the industry in general. "But (the industry) is on the way up."

#90044u1686 02/13/1990 ~United Press International

HUNTINGTON BEACH, CA (FEB. 13) UPI - Cleanup efforts more than doubled Tuesday as 1,000 workers used rakes and shovels to mop up miles of coastline blanketed by bands of thick crude oil driven ashore by winds and tides.

The Coast Guard said the morning high tide could prove a ''blessing,'' despite the mess of blackish goo it was creating along Southern California sands in the aftermath of last week's 394,000-gallon tanker spill.

''The high tide with winds blowing onshore ... bring the oil high up enough on the beach so that it will not go back out into the surf,'' where it cannot be skimmed, Coast Guard spokesman Dennis Hall said.

The oil is easier to clean up on the sand than at sea, where it tends to drift and separate, he said.

The worst pollution yet from the spill was reported Monday, with crude oil on the sands in swaths up to 30 feet wide and 3 inches thick along miles of coastline.

The Coast Guard said the oil had not reached sensitive wetlands by Tuesday morning, and did not appear to be heading in that direction.

Overnight winds late Monday and early Tuesday were not as strong as had been expected, so while more oil was washed ashore, the pollution seen Tuesday was more as the result of tides, Coast Guard spokesman Rick Meidt said.

''Right now, we've got lots of oil on the beach and a long narrow sheen, some of it light, some of it moderate, about 100 yards from shore and in '' he said.

The cleanup ''could take weeks, or it could just be days,'' depending on weather and tide conditions, said Hall, the Coast Guard spokesman.

On Monday, about 400 workers were involved in the cleanup. About 1,000 were rushed in overnight Monday and Tuesday, officials said.

Workers were swabbing the beaches with absorbent pads and pompons, and scooping up oil and contaminated sand with shovels and rakes. Plastic bags containing tons of oil-soaked debris lined the beaches.

When Southwest VECO, the company that supervised the cleanup of the Exxon Valdez oil spill last year in Alaska, put out a call for more beach cleaners, lines stretched around the block at its Long Beach office as people sought the $10 an hour jobs.

Meanwhile, the ruptured 20-year-old, 80,000-ton tanker American Trader, owned by American Trading Transportation Co., and still loaded with more than 19 million gallons of oil, was docked at a berth in the Argo Terminal at Long Beach Harbor Tuesday morning.

Company President Sandy Schmidt said he expected it would take about 24 hours for a ''routine'' unloading of the oil on board, and officials would then examine two temporary patches in the hull. The ship will have to be moved from the harbor because none of the dry docks there can accommodate it, Schmidt said.

The worst of the pollution occurred along Bolsa Chica and Huntington state beaches, about 20 miles southeast of Los Angeles. Officials put those beaches as well as those in Newport Beach off limits for a minimum of three weeks. Newport Bay, Huntington Harbor, Anaheim Bay and the San Gabriel and the Santa Ana rivers remained closed to boat traffic.

But aerial surveys indicated the oil had done little damage to sensitive wildlife wetlands and estuaries that are home to hundreds of thousands of birds. Fish and Game Department officials said the damage to wildlife was relatively light. More than 80 dead birds had been recovered and nearly 250 others were found drenched in oil. Rescue workers used detergent to wash off the oil, and fed the birds through tubes.

Three dead, oil-coated seals have been found floating in the water, but officials said necropsies would have to be performed to determine if the deaths were related to the spill.

The American Trader spilled nearly 400,000 gallons of Alaska North Slope crude last Wednesday after apparently being sliced open by its own anchor while trying to unload at an underwater pipeline about 2 miles off Huntington Beach. The spill is the worst in California since 1969, when 3.2 million gallons spilled off Santa Barbara.

The Coast Guard said drug tests were negative on the tanker's veteran captain, Robert La Ware, the mooring pilot, John Keon, and the ship's second mate, who was on watch at the time of the accident. Alcohol tests were also negative.

British Petroleum said land crews and more than 20 skimming boats had recovered 144,270 gallons - 36 percent of the spill - by Monday, leaving more than 94,000 gallons. The Coast Guard's latest figures said 43 percent of the oil had evaporated or mixed in with seawater.

#90044u2228 02/13/1990 ~United Press International
TORONTO (FEB. 13) UPI - The Bank of Nova Scotia filed suit in the Ontario Supreme Court against retail magnate Robert Campeau for defaulting on about $10.4 million in personal loans and interest payments, the bank said Tuesday.

In a statement of claim filed Feb. 8, the bank reported that Campeau broke terms of two loan agreements, including one for more than $9.5 million. The second loan involves about $750,000 in principal to Robert Campeau Investment Inc.

The bank said it called the loans late last year after Campeau failed to meet payments or make provisions. It said the collapse of Campeau's stock price in the second half of 1989 triggered the action, because the securities set aside to secure the loans had lost their value.

Campeau's stock traded as high as $18.26 in early September before falling to as low as $1.87 in January. The stock closed down one cent Tuesday on the Toronto Stock Exchange to $2.39.

The bank said it gave Campeau one month to address the situation before informing him that he was regarded in default, in a letter dated Nov. 2.

The Bank of Nova Scotia is the third Canadian bank to take action against Robert Campeau himself for loan defaults in the past two months.

On Jan. 4, the National Bank of Canada seized control of 29 percent of Campeau Corp.'s outstanding common shares after Robert Campeau defaulted on a loan valued at $115 million to another one of his companies.

On Jan. 19, the Bank of Montreal said it was seeking $21.2 million plus almost $600,000 in interest from Robert Campeau for default on a personal loan.

Campeau's United States retailing divisions, Federated Department Stores Inc., and Allied Stores Corp., now jointly renamed Federated Stores Inc., filed for Chapter 11 bankruptcy protection in Cincinnati, Jan. 15.

Meanwhile, Neiman Marcus Group Inc. said Monday it filed a $19 million lawsuit against Federated and Allied for enticing one of Neiman Marcus' key executives, Allen Questrom, to resign and become chairman of Federated.

#90044u2478 02/13/1990 ~United Press International

MOSES LAKE, Wash. (FEB. 14) UPI - A subsidiary of Union Carbide Corp. announced Tuesday that it has signed a letter of intent to sell its polysilicon manufacturing facilities at two Washington state sites to a Japanese company.

There was no sale price disclosed on the agreement between Union Carbide Chemicals & Plastics Co. and Komatsu Electronic Metals Co. Ltd., or KEM, for the sale of the two sites in Moses Lake and Washougal, Wash.

Both companies said the transaction would help ensure the continued operation of the polysilicon business and preserve approximately 270 jobs. Sales in 1988 totaled about $35 million, Union Carbide said.

The transaction, which is subject to reviews by the U.S. and Japanese governments, is expected to result in a modest after-tax gain for Union Carbide.

The plants produce polysilicon based on technology Union Carbide obtained from KEM under a 1981 licensing agreement. KEM is Union Carbide's largest customer for polysilicon, a material used in the manufacture of silicon wafers, which are at the heart of computer and electronic technology.

#90044u2530 02/13/1990 ~United Press International

NEW YORK (FEB. 13) UPI - The board of directors of Drexel Burnham Lambert Group Inc., the junk bond powerhouse that seemed invincible during the takeover-crazed 1980s, voted Tuesday to file for federal bankruptcy protection.

The firm said the petition was expected to be filed Tuesday evening in U.S. Bankruptcy Court in the Southern District of New York.

Drexel Burnham Lambert Group, the parent company, said it will seek protection from its creditors, but the firm's broker-dealer arm Drexel Burnham Lambert Inc. and other subsidiaries will be excluded from the Chapter 11 filing.

The parent company said it had assets of more than $3.6 billion and liabilities in excess of $3 billion.

Drexel acted after disclosing earlier in the day that it had defaulted on $100 million in loans, ''which could result in other defaults.'' The firm also said it planned to liquidate Drexel Burnham Lambert Government Securities Inc., which trades in Treasury bonds.

Late Tuesday Drexel said it defaulted on $1 million in commercial paper, which are unsecured obligations used by large corporate borrowers and investors.

The Drexel board met for several hours into Tuesday evening before announcing its decision to authorize the bankruptcy filing.

The decision came one day after Drexel revealed it was seeking a major investor or merger agreement due to cash flow problems stemming in large part from the hard times that have fallen on the junk bond market.

The possibility that Drexel would file for bankruptcy protection had been widely expected on Wall Street for several days.

Analysts say Drexel, which pioneered the use of junk bonds and built its

fortunes on the frenzied takeovers of the 1980s, suffered heavily last year in the falling junk bond market. Junk bonds nosedived after the failure of a leveraged buyout at UAL Corp. in October that sent the market plummeting.

''They didn't have enough capital to absorb the change in their principal business, which was junk bonds,'' said Hugh Johnson, chief economist at First Albany Corp. in Albany, N.Y. ''Effectively their only business fell apart and they have some stiff litigation and fines on top of that.''

Drexel reported a 1989 loss of about $40 million, citing legal costs during a government investigation of insider trading allegations at the firm. Drexel agreed in 1988 to pay $650 million in penalties to settle charges of securities law violations, and its former junk bond chief Michael Milken is under indictment on insider trading charges..

Junk bond issues such as those of RJR Nabisco Inc. took an early hit on news of Drexel's loan default but rebounded later in the day. Early losses were less extreme than two weeks ago when RJR's credit rating was downgraded.

The investment firm's financial crisis raised serious questions, however, as to its future as a junk bond market maker as well as the fate of the entire market for the high-yield, high-risk bonds used to finance takeovers.

''I think the impact is going to be quite serious, indeed,'' said Gary Hovis, an analyst with Argus Research Corp. ''It's another nail in the coffin containing junk bonds. It's going to place serious pressure on the whole junk bond market.''

While Drexel's trouble may not hurt strong firms such as Morgan Stanley & Co. and Goldman Sachs & Co., it could take a toll on firms such as Merrill Lynch and Smith Barney Harris Upham & Co. that have invested heavily in junk bonds, Hovis said.

''It's not going to put them under, but it's going to have an impact on their share prices,'' he said.

Lawrence Eckenfelder, an analyst with Prudential Bache Securities in San Francisco, said, ''The junk bond market obviously could be in disarray for awhile.''

''Other than that, the broker-dealer is still solvent and I think they'll make good on all their credits,'' he said. ''I think it's just like any other industry. Every now and then, you have a company that goes under.''

On the New York Stock Exchange, Drexel's default announcement sparked some

computerized program selling, used to profit on price spreads between stocks and stock index futures. But prices bounced back as many investors retreated to the sidelines to see what would happen next, analysts said.

''Maybe we've built up some immunity to shocks and surprises from the junk bond market. We've had so many of them,'' Johnson said.

Drexel's broker-dealer subsidiary and the trading floor specialists in Drexel Burnham Lambert Specialists Inc. met capital requirements Tuesday and remained ''members in good standing,'' said a spokeswoman for the New York Stock Exchange.

Both NYSE and Securities and Exchange Commission officials said they were carefully monitoring Drexel's cash flow and its brokerage subsidiary and had examination teams at Drexel's offices in New York.

SEC Chairman Richard Breeden also said in a statement that the ''transfer of net capital'' from Drexel's brokerage subsidiary to its parent corporation ''has been prohibited without prior specific approval.''

Financial data show ''the registered broker-dealer has a positive net worth and remains in compliance'' with securities regulations, he added.

Drexel informed the National Association of Securities Dealers early Tuesday that it halted trading in NASD securities, the regulatory organization said.

Drexel is a market maker for 228 issues on the over-the-counter market, which mostly covers smaller companies that do not meet the stricter listing requirements of the New York Stock Exchange or the American Stock Exchange.

Exchange spokesmen said Drexel conducted transactions as usual Tuesday on the NYSE and Amex.

On the New York Coffee, Sugar and Cocoa Exchange, a spokesman said Drexel was accepting liquidation orders in the three commodities for all-cash transactions only.

The Federal Reserve Board, the SEC, and the Treasury kept close tabs on the impact of the Drexel crisis on the bond market throughout the day.

The Federal Reserve Bank of New York said in a statement it was not striking Drexel from the ranks of major Treasury bond dealers and ''will carefully monitor'' Drexel's plans to liquidate its government securities positions.

Officers of the New York Stock Exchange and Drexel management contacted

Smith Barney about the possibility of taking in some of Drexel's business, said a spokesman for Smith Barney, which acquired 16 of Drexel's retail offices last year.

''We are currently examining this issue on the basis that we would not incur any substantial costs of obligations,'' he said. ''No decisions have been made.''

Drexel's loan default also prompted Standard & Poor's Investor Service and Fitch Investors Service to downgrade their rating of the firm's commercial paper to D, which signifies that the issuer is in default on debt instruments.

The rating agencies said they took the action because they expected Drexel to default on its commercial paper, which occurred later in the day.

A Wall Street credit manager said Drexel's failure to obtain short-term bank loans, leading to its default on the $100 million in loans, ''shows the banks have a lack of confidence in the long-term prospects of the firm.''

The manager, who spoke on condition of anonymity, said he believed the $100 million default was by Drexel's commodities trading subsidiary and that Chase Manhattan may have been the bank involved.

Under bankruptcy protection, Drexel can retain new management, possibly find a merger partner and emerge ''a leaner, meaner, stronger firm,'' Argus's Hovis said.

''If they're in Chapter 11, it's the classic thing of having bitten the bullet,'' Hovis said. ''In the long run, that could have a positive effect on Wall Street.''

#90044u2540 02/13/1990 ~United Press International

NEW YORK (FEB. 13) UPI - Integrated Resources Inc., the nationwide financial services company whose growth was financed largely through junk bond dealer Drexel Burnham Lambert Inc., filed for bankruptcy protection Tuesday under pressure from its creditors.

Integrated currently has $1.6 billion in outstanding debts and assets of a little more than $700 million said company Chairman Stephen Weinroth in a telephone interview.

The chief executive officer said Integrated had a loss of more than $1 billion in the latest reported second quarter as a result of a writedown in the value of assets it had to sell off.

For the soon-to-be-reported third quarter, Weinroth predicted ''another substantial loss, but nothing like the loss in the second quarter.''

Integrated has been headed for a Chapter 11 backruptcy for the past several months as part of an overall company restructuring to handle its debt situation, he said.

''It was probably hastened by a few weeks because a couple of creditors haven't participated in the creditor committee and gone .. to court and tried to get judgments against us.''

He identified the two as Hibernia Bank of San Francisco, which he said is owed about $5 million and the First Fidelity Bank in New Jersey, which is listed as being owed $14 million.

''You can't let them go and get judgments and get them enforced and leave all $1.6 billion of the other creditors out in the cold,'' Weinroth said.

A company statement said Integrated's subsidiaries and affiliates have not sought bankruptcy protection and will continue to ''operate in the normal course.''

Integrated's statement said it had recently presented a restructuring plan to an informal steering committee and had planned to file a registration statement with the Securities and Exchange Commission this week.

''Those plans should form the basis for future discussions and, ultimately a plan of reorganization,'' the Integrated statement said.

Until he became Integrated's chairman in August, Weinroth was head of Drexel's commercial paper division.

Drexel had been a key force in financing Integrated's growth to annual sales of $1.7 billion in financial services such as insurance, mutual funds and real estate partnerships.

Drexel also announced Tuesday that it was considering filing for bankruptcy.

Several years ago Integrated was forced to move away from its main business of tax shelters as changes in the federal tax laws made these investments less profitable.

Faced with debts of nearly $2 billion, Integrated has been selling off some of its subsidiaries in recent months.

One of these subsidaries - Vantage Financial Services Inc. in Edison, N.J.

now is owned by William Dioguardi, Integrated's former head of retail sales.

In a telephone interview, Dioguardi said he was in the process of forming a partnership with Arthur Goldberg, the former president of Integrated.

Dioguardi linked the fate of Integrated and Drexel together, although he disclaimed any detailed knowledge of Integrated's finances.

When Drexel began to run into trouble in 1988 with charges of securities violations in its junk bond transactions, Integrated lost its ability to raise money to finance the new financial services it started after the collapse of the tax shelter business, Dioguardi said.

''I would have trouble making that association ... I do not think that's a cause and effect,'' Weinroth commented.

Integrated's management hadn't been interested in raising its long-term debt ''until it was too late,'' he said.

Drexel had sold some long-term debt for Integrated, ''but the management wanted to keep some lower-cost, short-term debt,'' Weinroth said.

Drexel is also listed on Integrated's list of creditors as being owed $41 million.

Others on the list include: Manufacturers Hanover Trust of New York - $55.8 million; New York's Chemical Bank - $51.5 million; Executive Life Insurance, Los Angeles - $48.8 million; Hong Kong Shanghai Banking Corp. of London - $45 million; Imperial Savings, San Diego - $40 million; Centrust Savings, Miami - $39 million; Canadian Imperial Bank of Commerce, New York - $33.2 million; USX Portfolio Inc., New York - $24 million; Mellon Bank, Pittsburgh - $22.6 million.

#90044u2679 02/13/1990 ~United Press International

LONDON (FEB. 14) UPI - Reuters Holdings Plc announced Tuesday 1989 earnings of $290.8 million, or 70 cents a share, up 43.3 percent from $203 million, or 51 cents a share, in 1988.

The international information news agency said preliminary results for 1989 showed that revenues rose to $1.91 billion from $1.61 billion a year ago.

Reuters Managing Director Glen Renfrew attributed the record earnings to large operating margins and a sharp increase in interest income.

''After a period of rapid expansion in recent years, Reuters production and development resources are now greater than those of its direct competitors and capable of supporting continued vigorous expansion and innovation without major annual increases in their costs,'' said Renfrew, who is also chief executive of the news and information organization.

Renfrew said revenues benefited from ''generally favorable exchange rate movements.''

''But the effect of this on profits was offset by bringing forward into the second half of 1989 certain development and other expenditure originally planned for 1990,'' he said.

SALT LAKE CITY (FEB. 14) BUSINESS WIRE - Questar Corp. (NYSE:STR) Wednesday announced the appointment of a new director and three vice presidents.

Mary Mead, a Wyoming rancher and community leader, was selected to Questar's 13-member board of directors.

A lifelong Wyoming resident, Mead is a principal in a cattle- ranching business in Jackson Hole. She currently is president of the Wyoming Heritage Society and a member of the National Public Lands Advisory Council, which advises the Bureau of Land Management director and the Secretary of the Interior.

A 1957 graduate of the University of Wyoming, Mead also is a member of the Jackson State Bank board of directors.

''We are pleased to have the benefit of Ms. Mead's extensive background concerning Wyoming and public lands issues,'' noted R.D. Cash, Questar chairman, president and chief executive officer. ''Ms. Mead's presence on the board will bring valuable perspective to our discussions, as Questar has extensive oil and gas-related holdings in Wyoming.''

Cash said the board of directors approved the appointments of three new vice presidents for Questar and an affiliated company. Stephen E. Parks was named vice president and corporate treasurer for Questar. He previously was corporate treasurer.

R. Curtis Burnett was named vice president, public affairs, for Questar, effective April 1. He will succeed R. LaVaun Cox, who is retiring. Burnett was assistant vice president, public affairs.

Michael B. McGinley was named vice president of Universal Resources Corp.,

an oil and gas exploration and production subsidiary. McGinley will direct the gas-marketing activities of Questar Energy Co., which recently was merged into Universal Resources.

ENGLEWOOD, CO (FEB. 14) BUSINESS WIRE - U S WEST Inc. (NYSE:USW) Wednesday announced a decision to split its commercial real estate subsidiary, BetaWest Properties Inc., into two separate entities.

One will be 100 percent owned by U S WEST Inc. The other, to be known as BetaWest Properties Ltd., will be 100 percent owned by a group of executives from the original BetaWest. Terms of the arrangement are still under negotiation.

McCormick said most of the $1.4 billion in properties owned by the original BetaWest would remain with U S WEST. Over a period of 5-to-7 years the company intends to dispose of its interest in those properties.

''This arrangement will give us the chance to build a more steady source of income,'' he said.

Dave Sletta, president of BetaWest Properties Inc., will become president of the newly formed BetaWest Properties Ltd.

''We have an agreement in principle to acquire a portion of the original BetaWest's assets, which include seven projects under development or on the drawing board and some land slated for future development,'' Sletta said. ''All will be developed and there are plans for adding more.''

A substantial amount of development funding for BetaWest Properties Ltd. has been committed by U.S. and European lenders, according to Sletta. He added that U SWEST Financial Services will provide start-up funding.

Sletta added that the new company will also have the exclusive management contract on all the operating properties of the original BetaWest, ''so there will be no major changes for tenants.''

BetaWest was formed in late 1983 as the commercial real estate subsidiary of U S WEST Inc. On Jan. 1, 1984, it received $5 million as its first equity injection from U S WEST. Today the company has assets of more than $1.4 billion, including 50 operating properties and 11 projects under development.

U S WEST owns U S WEST Communications and other companies involved in communications, marketing services, financial services and data solutions.

FULLERTON, CA. (FEB. 14) BUSINESS WIRE - Net loss of Ropak (NASDAQ:ROPK) totaled $97,000 in the fourth quarter ended December 31, equal to $ (.03) per fully diluted share.

A year earlier, Ropak earned $493,000, or 14 cents a share, in the comparable period. Revenues for the period were $20.5 million in 1989 and $21.6 million a year earlier.

Ropak's 1989 net income totaled $807,000, equal to 25 cents a fully diluted share, vs. $2,929,000, or 88 cents a share, in 1988. Revenues rose to $94.4 million in 1989 from the $88.8 million recorded for 1988.

Quarterly results have been restated to reflect a 10 percent stock dividend paid June 30, 1989.

William H. Roper, chairman and chief executive officer, said the company's lower results this year were attributable to intense competition in the

plastic container market; to underutilized capacity resulting from the company's substantial expansions and efficiency improvements over the past three years; to higher borrowing costs; and to greater selling expenses, particularly in Ropaks's growing materials-handling business.

Roper said the company expects very substantial growth from its materials-handling operation and from Ropak Laboratories, which supplies test kits and laboratory services for product irritancy testing.

He said, ''We also expect to grow in our traditional container business. With no major expansions planned for the near future, we expect operations to produce results in 1990 better than last year's and more like those of our record year 1988.''

Ropak is a leading multinational maker of plastic packaging and handling products for food, coatings and a variety of agricultural and industrial materials. The company has 10 plants in the United States, Canada and Japan. Ropak also distributes, for a company in which it holds 30 percent equity interest, a line of test kits for the measurement of human eye and skin irritation potential from cosmetics and household chemicals.

SAN FRANCISCO (FEB. 14) BUSINESS WIRE - Union Bank became the first major California financial institution to introduce seven-day-a-week banking with the opening Wednesday of five branches in Ralphs Grocery Co. stores in the San Diego area.

The new branches, two in San Diego, and one each in Del Mar, Chula vista and El Cajon, are the first of 15 that Union will open this year in Southern California Ralphs stores, according to Linda Odenath, vice president and administrator of in-store banking.

She said an additional 35 in-store branches are planned in Ralphs and other supermarkets throughout the state over the next two years after the performance of the initial branches is evaluated.

Hours for the in-store branches are 10 a.m. to 8 p.m. Monday through Friday, 10 a.m. to 6 p.m. Saturday and 10 a.m. to 4 p.m. Sunday. The branches are fully staffed and offer all consumer banking services provided at the bank's other branches, except for commercial loans and safe deposit boxes. They also are equipped with automated teller machines.

''In-store banking is a new concept in California, but it has been highly

successful in other parts of the country,'' Odenath said. ''Bank branches in department stores and other retail establishments have not done as well as those in supermarkets.

''A recent study by the Food Marketing Institute shows that the average supermarket shopper visits the store 2.4 times a week, so having a bank branch on the premises is a great convenience.''

International Banking Technologies, a consultant to Union and other banks that have placed branches in supermarkets, estimates that some 700 in-store branches are now in operation throughout the nation.

''In-store banking is a natural extension of our other services such as Bank-By-Phone, Saturday hours and supermarket ATMs that Union Bank has introduced to be more accessible to our customers,'' Odenath said.

The 10 additional in-store branches Union plans to open in 1990 will be in Ralphs stores in Oceanside (2), Mission Viejo, Fountain Valley, Anaheim (2), Santa Ana, Long Beach, Corona and Moreno Valley.

Union Bank, based in San Francisco, is the fifth largest commercial bank in California with $15.4 billion in assets and 170 offices statewide.

Ralphs Grocery Co. is a leading supermarket chain in Southern California with 142 stores and over $2.5 billion in annual sales.

SANTA FE SPRINGS, CA (FEB. 14) BUSINESS WIRE - McFarland Energy Inc. (NASDAQ:MCFE) announced that its wholly owned subsidiary, Carl Oil and Gas Co., has reached an agreement to acquire various oil- and gas-producing properties located in South Louisiana from LGS Exploration Inc., a subsidiary of Louisiana General Services Inc.

Carl has agreed to pay $4.2 million for the properties, which consist primarily of LGS-operated interests in 53 producing oil and gas wells, leases and related equipment located in 12 parishes in South Louisiana.

The properties currently produce approximately 2,000 MCF and 250 barrels per day net to LGS' interest. The parties expect to close the transaction on March 1. Carl will succeed LGS as operator of the interests.

McFarland Energy Inc. is a California-based oil and gas company with headquarters in Santa Fe Springs and interests in over 500 wells located

primarily in the San Joaquin Valley of California, and Louisiana. Carl Oil & Gas Co. is based in Corpus Christi, Texas, and is actively involved in developing and drilling oil and gas exploration prospects and acquiring producing properties in the Texas, Louisiana and Mississippi Gulf Coast region.

SAN JOSE, CA (FEB. 14) BUSINESS WIRE - ComputerCraft Inc., the wholly owned retail subsidiary of Businessland Inc. Wednesday rolled out its newly designed store on Stevens Creek Blvd. in San Jose.

Located at the site of the original Businessland flagship center which opened in 1982, ComputerCraft occupies 10,000 sq. ft. and features an interior designed by The Burdick Group of San Francisco, a company that has designed innovative interiors, exhibits and products for such notable clients as Esprit, Phillips, Herman Miller and AT&T.

The ComputerCraft retail chain was acquired in July 1988 to facilitate the Businessland market segmentation strategy of focusing Businessland on top corporate and government accounts while having a separate entity targeted at the small and medium-size business and professionals.

ComputerCraft understands the needs of this market segment and brings its 12 years of expertise to serve them. It has a 30-day full refund return policy for all products, including software, and it offers a ''lowest price'' guarantee that matches prices based on competitors' local market advertising.

ComputerCraft is an authorized dealer for Apple, IBM, NCR, NeXT and Wyse computer systems. The retailer also carries Hewlett-Packard and Epson printers and Zenith and NEC laptops. The San Jose facility includes a classroom and a bay for hardware service and maintenance.

There are now 23 ComputerCraft stores in eight major U.S. metropolitan markets and plans call for rolling out the new concept into 50 markets over the next few years.

Founded in 1982, Businessland Inc. is an international leader in the distribution, integration and support of microcomputer and workstation systems for business. The company integrates microcomputer products from selected manufacturers to create systems tailored to specific customer needs and provides the high-level service and support to maximize their productivity.

Businessland operates centers and branch offices in 50 major U.S. metropolitan markets, five metropolitan areas in Great Britain, five in Canada and two in West Germany. It reported sales of $1.2 billion in fiscal 1989.

SAN RAFAEL, CA. (FEB. 14) BUSINESS WIRE - Phoenix American reports six months earnings:

Phoenix American Inc.
Financial Highlights

	Quarter ended Dec. 31	6 Months ended Dec. 31

	1989	1988	1989	1988
Revenues	$6,799,929	$10,210,786	$16,146,799	$16,824,314
Net income	$ 563,000	$ 1,687,000	$ 2,298,000	$ 3,858,000
Earnings per share	12 cents	28 cents	47 cents	58 cents
Number of shares outstanding	4,525,000	5,670,000	4,525,000	5,670,000

Phoenix American Inc. (NASDAQ:PHXA) reported earnings of $563,000, or 12 cents per share, for the second fiscal quarter ended Dec. 31, 1989, compared to $1,687,000, or 28 cents per share, for the like period in fiscal 1988.

Phoenix American is a multi-faceted financial services company based in San Rafael. The company organizes and manages limited partnerships which invest in lease financing of high technology equipment, subordinated debt financing to cable television operators, and lease financing to emerging growth companies. The company also owns and operates several cable television systems.

Gus Constantin, Phoenix chairman and chief executive officer, said: ''Our partnership operations are strong, generating $956,000 in net income on revenues of $10,507,000 for the six months just ended. This compares to $107,000 net income on revenues of $9,844,000 for the same period in fiscal 1988.''

Constantin also noted that the prior year's quarterly results reflect the sale of one of the company's cable television systems for a pre-tax gain of $4.3 million.

Phoenix American is the parent of Phoenix Leasing Inc., Phoenix Securities Inc., Phoenix Cable Inc., Phoenix Venture Inc., and Phoenix Systems Exchange Inc. Since it was founded in 1972, the company has acquired more than $1.5 billion of income-producing assets for investor portfolios.

AZUSA, CA. (FEB. 14) BUSINESS WIRE - Aerojet ElectroSystems was selected as the second source contractor for the Imaging Infrared Seeker Assembly for the Army's Non-Line-Of-Sight (NLOS) Fiber Optic Guided Missile (FOG-M) portion of the Forward Area Air Defense System (FAADS).

Aerojet was awarded the full-scale development contract by Hughes Aircraft Missile Systems Group in an open competition. Hughes Missile Systems Group is teamed with The Boeing Company for the prime contract under the Army's Missile Command.

The NLOS FOG-M system will permit a concealed, protected gunner to engage attack helicopters and armored combat vehicles at extended ranges which cannot be addressed by line-of-sight, direct fire systems. The NLOS FOG-M Imaging Infrared Seeker will provide a nighttime/adverse weather capability.

The selection of a second source supplier for the Imaging Infrared Seeker Assembly ensures that the U.S. Army will have a long-term affordable, survivable solution to the threat of concealed helicopters and armor operating at standoff ranges.

Aerojet ElectroSystems is an operating unit of Aerojet, the aerospace segment of GenCorp. GenCorp is a technology-based company with strong positions in the aerospace, automotive and polymer product industries.
